

ADB Assistance to Afghanistan

In December 2002, the Asian Development Bank (ADB) approved the first loan made by an international financial institution to Afghanistan in over 23 years. The \$167.18 million Postconflict Multisector Program loan supports policy reforms, public infrastructure investment, and capacity-building to promote economic growth and recovery in the wartorn country. A

second \$150 million loan was approved in June 2003. The Emergency Infrastructure Rehabilitation and Reconstruction Project is rebuilding important road and power infrastructure in the country. A third loan of \$55 million for an Agriculture Sector Program was approved in early May 2004, to promote agricultural growth and poverty reduction by developing a sound policy framework and establishing

efficient sector institutions. ADB has also approved \$26.35 million in grants to Afghanistan to fund capacity-building technical assistance (TA) and is administering \$65 million in grant pilot projects in Afghanistan's transport, health, education, irrigation, and community development sectors. The following is a list of ADB assistance to Afghanistan to date.

Loans	\$372.18 million
Date of Approval 4 December 2002 Amount \$167.18 million Type of Assistance Loan	Postconflict Multisector Program This loan from ADB's Asian Development Fund (ADF), ADB's concessional lending window for its least developed members, supports policy and institutional reforms to improve governance and strengthen the financial, transport, and energy sectors. The first tranche of \$100 million was released on 6 December 2002. The major areas of reform are currency, banking and central bank laws, payments system, fiscal management and transparency, governance, institutional efficiency and effectiveness of ministries and agencies, regulatory framework for transport, private sector participation, and reliability of energy systems. The second tranche of \$50 million was disbursed in December 2003.
Date of Approval 3 June 2003 Amount \$150 million Type of Assistance Loan	Emergency Infrastructure Rehabilitation and Reconstruction This loan from ADB's Asian Development Fund (ADF) will rehabilitate and reconstruct 447 kilometers of the primary national road network from the Pol-e-Khomri to Mazar-e-Sharif, Sheberghan, and Andkhoy, including a link to Uzbekistan. The project will repair or rebuild power transmission lines in the northern provinces and the power distribution system in Kabul, as well as damaged gas production, transmission, and distribution facilities in Sheberghan, including the natural gas pipeline to Mazar-e-Sharif. The project will also provide support for the rehabilitation of the irrigation infrastructure.
Date of Approval 4 May 2004 Amount \$55 million Type of Assistance Loan	Agriculture Sector Program This loan from ADB's Asian Development Fund (ADF) seeks to promote agricultural growth and poverty reduction through support for market-based policy reforms, formulation of public infrastructure investment programs, and institutional reform and organizational capacity building. The Program includes specific reform measures to develop a sound policy framework and establish efficient sector institutions, introduce management systems for sustainable use of natural resources, formulate sound programs for sector investment, improve the efficiency of sector support services, improve the efficiency of agricultural commodity markets, and restructure state-owned enterprises. The first tranche of \$30 million will be released on or about 6 May 2004, while the second tranche of \$25 million is expected to be made available about one year later.

Grants	Technical Assistance \$26.35 million
<p>Date of Approval 30 May 2002</p> <p>Amount \$14.5 million¹</p> <p>Type of Assistance Grant Technical Assistance</p>	<p>Capacity Building for Reconstruction and Development</p> <p>This grant, made through ADB's Technical Assistance Special Fund (TASF), has 19 components and is helping strengthen the ability of government ministries and departments to formulate policies and plans and implement projects in a range of sectors. Equipment, computers, and vehicles delivered under the grant have improved the operational capacity of the Government. Training of government staff is also under way.</p>
<p>Date of Approval 30 May 2002</p> <p>Amount \$500,000</p> <p>Type of Assistance Grant Technical Assistance</p>	<p>Disaster Preparedness and Management Capacity Building</p> <p>This grant, made through ADB's Technical Assistance Special Fund (TASF), is helping strengthen Afghanistan's office of Disaster Preparedness. Under the grant, an assessment of the institutional environment, technical capacity, and training and equipment needs of the office was completed in October 2002. A basic risk-management training course was carried out in Kabul for 30 participants in December 2002 and a high-level awareness and skills development tour was organized for senior officials of the office in January and February 2003. A further training course for selected office staff was held in July 2003 to help extend awareness to the provinces.</p>
<p>Date of Approval 18 March 2003</p> <p>Amount \$950,000</p> <p>Type of Assistance Grant Technical Assistance</p>	<p>Energy Sector Review and Gas Development Master Plan</p> <p>This grant, made through ADB's Technical Assistance Special Fund (TASF), will review the energy sector and prepare a comprehensive gas subsector development master plan that will guide and promote the energy supply based on identification of promising potential resources; attract private capital by removing impediments in government policies and strategies; improve sector efficiency through institutional strengthening; and prepare a gas development master plan to meet the expected increased domestic demand for natural gas, reduce the consumption of imported petroleum products, and reduce the environmental impact associated with the use of other fossil fuels.</p>
<p>Date of Approval 13 August 2003</p> <p>Amount \$750,000</p> <p>Type of Assistance Grant Technical Assistance</p>	<p>Preparing for the Power Transmission and Distribution Project</p> <p>Made through ADB's Technical Assistance Special Fund (TASF), this grant will help prepare a power transmission and distribution project. It will ensure a sufficient and stable power supply for Kabul—identified as one of the key economic zones of Afghanistan—and other major cities.</p>
<p>Date of Approval 17 September 2003</p> <p>Amount \$1 million</p> <p>Type of Assistance Grant Technical Assistance</p>	<p>Preparing for the Herat-Andkhoy Road Project</p> <p>This grant, made through ADB's Technical Assistance Special Fund (TASF), is for a project preparatory study for rehabilitating and improving the road connecting Herat to Andkhoy. This technical assistance will explore the viability of providing efficient road infrastructure, which could improve the provision of humanitarian aid, basic public services, safety, and security, and achieve regional economic development and national integration.</p>

¹ Not including grant cofinancing from Denmark for renewable energy (\$540,000), and from Australia for technical assistance to the Ministry of Finance (\$136,000).

Preparing the Regional Airports Rehabilitation Project

This Technical Assistance Special Fund (TASF) grant will prepare a civil aviation master plan to provide the framework and time-bound action plan for sustainable and effective development of Afghanistan's civil aviation sector. The grant technical assistance will undertake feasibility studies for rehabilitating selected airports and develop the capacity of the Ministry of Civil Aviation and Tourism to implement ensuing investment projects and operate and maintain the rehabilitated airports.

Date of Approval
3 December 2003

Amount
\$750,000

Grant Technical Assistance

Institutional Strengthening of the Gas Sector

This grant, made through the Technical Assistance Special Fund (TASF), will help the Ministry of Mines and Industry (MMI) develop policies and strategies for sector development, efficient institutional management, and human resource development. Key areas of MMI's Planning Department will be strengthened to rebuild and develop the gas subsector. Specifically, MMI capacity in policy formulation, energy sector assessment, organizational restructuring, and overall sector management and coordination should be strengthened. The technical assistance will develop and strengthen the institutional capability to plan, review, monitor, assess needs, and modernize the gas subsector. Afghan Gas personnel will receive hands-on training in safety, operation and maintenance, and project management.

Date of Approval
11 December 2003

Amount
\$3.4 million

Type of Assistance
Grant Technical Assistance

Support for Public Administration Reform Program

This grant, made through ADB's Technical Assistance Special Fund (TASF), is helping the Government implement its Public Administration Reform (PAR) program to enable civil servants to function more efficiently and effectively. In particular, it will strengthen the capacity of the Independent Administrative Reforms and Civil Service Commission (IARCSC) to perform its functions, improve the performance of departments delivering essential services, and help institute sound policies for human resources management. The technical assistance will establish a mechanism to harmonize and coordinate donor-funded projects supporting the PAR program. Also part of the program is the restructuring of the emergency and disaster management system, which was the recommendation of a previous technical assistance for capacity building in disaster management.

Date of Approval
26 December 2003

Poverty Assessment and Socioeconomic and Macroeconomic Statistical Capacity Building

This grant, made through ADB's Technical Assistance Special Fund (TASF), is helping the Government improve the collection and analysis of national statistics. Focusing on the Central Statistics Office and selected line ministries, the technical assistance will strengthen their systems for gathering data needed by a wide variety of users for monitoring, planning, and research. The project was designed within the framework of a statistical master plan being developed by the Government with the joint support of ADB, United Kingdom Department for International Development (DFID), International Monetary Fund, United Nations Economic and Social Commission for Asia and the Pacific (UN-ESCAP), and World Bank. The technical assistance will conduct the first comprehensive poverty assessment for Afghanistan, improve national accounts estimates, and collect trade, balance-of-payments, and fiscal data. It will also update the consumer price index, expanding coverage to six major urban centers, and review the legal and institutional framework for statistical gathering. Training will be provided for staff and new data collection systems will be introduced to help fill major gaps in statistics collection.

Date of Approval
26 February 2004

Amount
\$750,000

Preparing the National Power Transmission Grid Project

This grant, made through ADB's Technical Assistance Special Fund (TASF), will support the Government's strategy for poverty reduction through economic growth by assisting in the preparation of a national power transmission grid project to interconnect the northwestern power system with the northern and central power systems, thereby improving system stability and security, reducing losses, and improving the reliability of supply in the interconnected power systems. The project will supply the provinces of Badghis, Faryab, and Jawzjan which currently are not electrified from a grid.

Date of Approval
4 May 2004

Amount
\$1 million

Grant Pilot Project

Primary Health Care Partnership for the Poor

ADB is administering a grant of \$3 million from the Japan Fund for Poverty Reduction (JFPR) to explore how the Ministry of Health can effectively contract nongovernment organizations to develop community-based primary health care and thereby reduce rural poverty. The project will support the development of community organizations to construct, upgrade, and maintain small health centers, water supply facilities, and toilets. It will also establish community-managed health centers for clusters of villages in 10 districts. The project aims to reduce child mortality rates by 30% over 3 years and reduce common infectious diseases, child malnutrition, and maternal mortality rates.

Grant Pilot Project

Integrated Community Development in Northern Afghanistan

ADB is administering a grant of \$3 million from the Japan Fund for Poverty Reduction (JFPR), financed by the Government of Japan, to harness community participation in improving the living standards of poor villagers in northern Afghanistan. The project will provide communities a chance to participate in the processes that affect their livelihoods, develop key infrastructure, promote natural resource management, and provide access to credit and business advice to help create micro enterprises. The community mobilization program will be carried out by nongovernment organizations (NGOs), targeting 72 communities along a road being repaired under ADB's Emergency Infrastructure Rehabilitation and Reconstruction Project.

Rural Recovery through Community-Based Irrigation Rehabilitation Project

ADB is administering a grant of \$5 million from the Japan Fund for Poverty Reduction (JFPR), financed by the Government of Japan, to repair severely damaged irrigation systems in northern Afghanistan. The community-based project will rehabilitate and improve about 120 small-to medium-scale traditional irrigation schemes in up to 40 micro-watersheds in the three northern provinces of Jowzjan, Faryab, and Sar-E-Pol. Over two years, communities will play a key role in identifying, prioritizing, planning, and undertaking the subprojects. The project will have a positive impact on cultivation of poppy and other sources of drugs by focusing farmers' attention on food crops. The project will provide short-term jobs for up to 45,000 people. About 150,000 families dependent on agriculture-based activities will reap the benefits of improved irrigation.
