a The 1994 estimate was based on provincial reports. The 1995–1997 and 1999 estimates were based on the Socio-Economic Survey of Cambodia. The 1998 and 2008 figures were based on the results of the General Population Census of Cambodia.

b The break in the national accounts series is due to the difference in compilation methodology starting 1993.

c Includes hotels and restaurants beginning 1993.

d Includes real estate and business beginning 1993.

## Cambodia

- e For 1990–1992, figures include education; health and social work; and other community, social, and personal services.
- f From 1993 onward, includes nonprofit institutions serving households.
- g Value is estimated as the difference between GDP by industrial origin and sum of private consumption expenditure and government consumption expenditure at current market prices.
- h Derived from balance of payments data.
- i Includes budget support grants and project aid grants beginning 2001.
- j Figures exclude nonbudgetary surplus/deficit, hence the item refers to overall budgetary surplus/deficit.
- k Includes information, other government agencies, and contingencies.
- l Due to the shift from the IMF's Balance of Payments Manual 4 format to Balance of Payments Manual 5 format in 1998, some transaction categories have changed. Data prior to 1998 may not be comparable with the rest of the series.
