TAJIKISTAN

PROJECT PROFILE				
1. Project Name: Agricultural Rehabilitation		2. Sector/Subsector: Agriculture and Natural Resources/ Rural Development		
3. Poverty Classification: ^{a*} PI		4. Crosscutting Operational Priority: ^{b*} ENV		
5. Rationale and Objectives: The agricultural sector has suffered from a major contraction after independence in 1991, and the problem was compounded by the civil conflict of 1992-1997. The sector provides a foundation for economic recovery and socioeconomic stability in the country where 70 percent of the population live in rural areas. Tajikistan is among the world's poorest country. Eighty percent of the population is poor, of which about one quarter is classified as extremely poor or destitute. The country's mountainous terrain, small and isolated rural communities, and the breakdown of public services mean that efforts for poverty alleviation will initially depend upon local initiative and a high degree of community participation. The agricultural rehabilitation project is aimed at reducing poverty in selected areas of the country by generating employment and improving food security.		6. Beneficiary Participation/Consultation Needs: The Project will promote active consultations with stakeholders and beneficiaries, and capitalize on community initiatives and self-help potential. An assessment of the capacity of local governments in planning, implementing, and managing rural community development initiatives is required. Beneficiary participation and contribution in development planning and implementation are also among the prerequisites for ensuring ownership and partnership in the development process. Participatory planning and implementation will also involve the effective use of local organizations.		
7. Scope: The proposed project is expected to activate self-help potential of targeted communities, and promote local initiatives to overcome critical problems and constraints in agricultural development. The proposed project is intended to rebuild basic infrastructure, revitalize agricultural productivity, improve access to markets, expand employment opportunities, and increase incomes, while allowing the communities to become more self-reliant in improving their food security.				
8. Estimated Cost and Financing Plan (\$ 25 million (ADF))				Remarks: More detailed and precise scope of the Project will be defined through the PPTA.
Loan Project Cost (\$m)				
Financing (Source)	FC	LC	Total	
Bank	TBD	TBD	35.00	
Cofinancing	-	-	-	
Borrower	-	TBD	TBD	
Total	TBD	TBD	35.00	
9. Estimated Benefits and Beneficiary Groups: The Project will benefit the rural poor in targeted communities with a total population of about 200,000 people. The Project will generate incremental benefits from (i) improved agricultural productivity, (ii) increased employment, (iii) improved food security, and (iv) increased incomes generated from investments financed by the Project. Capacity building initiatives are expected to improve the capacity of local organizations and communities to plan, implement and manage development initiatives, as well as to enhance the capacity of the targeted communities in safeguarding their food security.				
10. Executing Agency: tbd		11. Project Implementation Period:		
		PPTA	Loan	
		Start:	Jan-01	2002
		End:	Apr-01	2006
12. Environment Category: B		13. Processing Year: TA : 2000 Loan : 2001		

^a CPI = Core Poverty Intervention; PI = Poverty Intervention; ODI = Other Development Interventions.

^b ENV = Environmental Protection; GAD = Gender and Development; GG = Good Governance; HD = Human Development; PSD = Private Sector Development; and RC = Regional Cooperation.

* This classification was completed prior to the finalization of the improved and redesigned classification system in December 2000, which will be applied from January 2001.

TAJIKISTAN

PROJECT PROFILE				
1. Project Name: Rural Financial Systems Development		2. Sector/Subsector: Agriculture and Natural Resources/ Agriculture Support Services		
3. Poverty Classification:^{a*} PI		4. Crosscutting Operational Priority:^{b*} PSD		
5. Rationale & Objectives: The availability and accessibility to financial services in rural areas is inadequate to meet the demand. The Project will address this situation by introducing one or more mechanisms on a pilot basis to begin building an appropriate and sustainable rural financial system. The project will aim to build/strengthen appropriate financial institutions to provide both savings mobilization as well as credit services.		6. Beneficiary Participation/Consultation Needs: Extensive consultation will be undertaken with prospective communities to be involved in the pilot testing of the mechanisms. In addition policy dialogue with the Government and financial institutions will be conducted to establish an appropriate legal and regulatory environment.		
7. Scope: The scope will include: (i) building on existing developments in microfinance/rural finance where feasible; (ii) establish new mechanisms and institutions where necessary; and (iii) develop institutional capacity in areas such as legislation, regulations, supervision and operations and management of microfinance/rural financial institutions. The Project will focus on non-bank financial institutions.				
8. Estimated Cost & Financing Plan (\$): Loan Project Cost (\$'m)				(c) Remarks: It is proposed to prepare a TA Loan. Cofinancing possibilities will be sought during loan processing.
