EA = executing agency, IND = India, OED = Operations Evaluation Department, PHI = Philippines, PRC = People's Republic of China, VIE = Viet Nam.

Note: Staff from executing agencies were met in all cases. Case studies used a combination of case study materials produced by consultants, a review of material in ADB project files and interviews with ADB staff in Headquarters and Resident Missions.

^a OED staff held discussions with ADB staff in Headquarters on key issues and the environmental management systems. Because much was already known about the project, it was decided that field visits would add little and would not be undertaken.

^b OED staff met key executing agency staff in Delhi but did not get security clearance to visit the region.

^c OED staff held discussions in Beijing and Yunnan Province but plane delays disrupted the schedule and resulted in a cancellation of the field visit.
