

The Greater Mekong Subregion (GMS)
Economic Cooperation Program

**Progress in Transport and Trade
Facilitation Initiatives in the GMS**

*15th GMS Ministerial Conference
Senior Officials' Meeting
17 June 2009*

¹ ADB

Importance of TTF Measures

**Recognition by GMS Summit and other forums of
TTF in building and sustaining the subregion's
overall competitiveness:**

- Third GMS Summit – need for accelerated harmonization and integration of border crossing formalities, including CIQ, and development of trade logistics
- Twelfth Meeting of the Subregional Transport Forum (STF-12) – need to address remaining unresolved issues delaying the implementation of the CBTA at the selected pilot border crossing points
- GMS Senior Officials' Meeting (SOM) – little time left to target year for full implementation of CBTA (2010)

The global economic crisis - TTF will help enhance cross-border, intra-regional trade - to compensate for any decline in global trade

² ADB

Recent Progress

- Joint customs inspection in a CCA at Dansavanh-Lao Bao;
- Single-window inspection at Mukdahan-Savannakhet and Hekou-Lao Cai;
- Increase in quota of vehicles for cross-border transport between Cambodia and Viet Nam;
- Three-country exchange of traffic rights among Lao PDR, Thailand, and Viet Nam and implementation of the GMS CTS along the East-West Corridor;
- communication links at Savannakhet - Mukdahan; and
- Lao PDR to upgrade its checkpoint and allow joint document processing and physical inspection with Viet Nam at Dansavanh

ADB

Strategic Review: Identification of Impediments to Effective Implementation (I)

- Ratification of the CBTA and its annexes and protocols has taken longer than expected; in most cases, ratification \neq implementation
- Limited coordination among TTF initiatives within and beyond GMS
- Need to prioritize actions rather than try to do too much – greater pragmatism and results-orientation
- Insufficient “ownership” of the CBTA by Customs and other government agencies
- Infrastructure remains a constraint

4

ADB

Strategic Review: Identification of Impediments to Effective Implementation (II)

- Need for effective SPS program but limited SPS provisions in CBTA
- Limited coordination among TTF initiatives within and beyond GMS
- Need for all countries to benefit equitably
- Insufficient awareness and involvement by the private sector in the CBTA
- Institutional arrangements need strengthening
- Significant capacity development needs at all levels (borders, provinces, and capitals)

5

ADB

Need for a Strategy for Effective Implementation

- Need for well coordinated strategy and actions to address the identified issues and impediments
- A proposed strategy and work program prepared and to go through further consultations
