

Tax Administration

Priority options on track but...

- Need to highlight importance of governance especially the need for the top leadership to get behind priority bills and to follow through on revenue initiatives (especially fiscal incentives)
- Need to evaluate existing programs on tax administration such as RATES (Run After Tax Evaders)
- Need to re-evaluate and issue IRRs for Lateral Attrition Law

Expenditures

Priority Options also on track but...

- Need to cut subsidies to losing government corporations like NFA
- Reallocate savings from government corporations' subsidies to social safety nets
- Need to assess ongoing reforms on procurement programs

Governance

Need to fight corruption confirmed but...

- Target specific agencies for institutional reforms (e.g., BOC, BIR, and regulatory agencies)
- Revive reliance on LEDAC to get consensus on priority growth-oriented bills
- Review scope of executive prerogatives on appointments and strengthen civil service rules
