

Inadequate Infrastructure and Poor Access to Opportunities

Recommendations

- Review BOT Law, e.g. clarify guarantee and incentive provisions
- Innovation: use of ODA and BOT/PPP mix for financing projects
- Improve targeting/prioritization vis-à-vis limited resources and equity considerations
- ODA for poor areas, BOT/PPP for urban projects
- Develop effective/independent regulatory institutions
- Provide capability building funds for project development available to both Implementing agencies and especially to poor LGUs

Recommendations

- Develop appropriate incentives for better LGU performance, e.g. link access to ODA funding to attain MDG goals, performance incentives for LGUs attaining MDG goals
- Improve access to cheaper medicines e.g. drug trade industry liberalization
- Use of innovative measures in education e.g. vouchers, alternative (informal and non-formal) education system, LGUs' financing education and conditional cash transfers
