Report of Independent Auditors to the Asian Development Bank

In our opinion, the accompanying statements of financial position and the related statements of activities and changes in net assets and cash flows present fairly, in all material respects, in terms of United States dollars, the financial position of the Asian Development Bank—Japan Special Fund at 31 December 2005 and 2004, and the results of its activities and changes in net assets and its cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the management of the Asian Development Bank. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

ASIAN DEVELOPMENT BANK—JAPAN SPECIAL FUND

NOTES TO FINANCIAL STATEMENTS

31 December 2005 and 2004

NOTE A—NATURE OF OPERATIONS

The Japan Special Fund (JSF) was established in March 1988 when Japan and the Asian Development Bank (ADB) entered into a financial arrangement whereby Japan agreed to make an initial contribution and ADB became the administrator. The purpose of JSF is to help developing member countries (DMCs) of ADB restructure their economies and broaden the scope of opportunities for new investments, thereby assisting the recycling of funds to DMCs of ADB. While JSF resources are used mainly to finance technical assistance (TA) operations, these resources may also be used for equity investment operations in ADB's DMCs. Under the agreement between ADB and Japan, ADB may invest the proceeds of JSF pending disbursement.

In March 1999, the Board approved the acceptance and administration by ADB of the Asian Currency Crisis Support Facility (ACCSF) to assist Asian currency crisis-affected member countries (CAMCs). Funded by Japan, ACCSF was established within JSF to assist in the economic recovery of CAMCs through interest payment assistance (IPA) grants, TA grants, and guarantees. With the general fulfillment of the purpose of the facility, Japan and ADB agreed to terminate the ACCSF on 22 March 2002. The ACCSF account is to be kept open until the completion of all TA disbursements and the settlement of all administrative expenses.

NOTE B—SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Presentation of the Financial Statements

The financial statements of JSF are presented on the basis of those for not-for-profit organizations and as unrestricted and temporarily restricted net assets. ACCSF funds are separately reported in the financial statements.

JSF reports the contributions of cash and other assets as restricted support if they are received with donor stipulations that limit the use of the donated assets. When the donor restriction expires, that is, when a stipulated time or purpose restriction is accomplished, temporarily restricted net assets are reclassified to unrestricted net assets and reported in the Statement of Activities and

Changes in Net Assets as “NET ASSETS RELEASED FROM RESTRICTIONS.”

Investments

All investment securities held by JSF are reported at estimated fair value, which represents their fair market value. Realized and unrealized gains and losses are included in revenue. Time deposits are reported at cost.

Interest on investment securities and time deposits are recognized as realized and reported, net of amortizations of premium and discounts.

Securities Purchased Under Resale Arrangements

JSF accounts for transfer of financial assets in accordance with FAS 140, “Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities – a replacement of FAS 125.” In general, transfers are accounted for as sale under FAS 140 when control over the transferred assets has been relinquished. Otherwise, the transfers are accounted for as repurchase/resale arrangements and collateralized financing arrangements. Securities received under resale arrangement are neither recorded on JSF's balance sheet nor repledged under securities lending arrangements. ADB monitors the fair value of the securities received under resale arrangements, and if necessary, requires additional collateral.

Contributions

Contributions by Japan are included in the financial statements from the date indicated by Japan that funds are expected to be made available. Contributions which are restricted by the donor for specific TA projects/programs or for IPA grants are classified as temporarily restricted contributions. Those without any stipulation as to specific use are accounted for and reported as unrestricted contributions.

Technical Assistance and Undisbursed Commitment

Technical assistance is recognized in the financial statements when the related project is approved and becomes effective. Upon completion of the TA project or cancellation of a grant, any undisbursed amount is

CONTINUED

written back as a reduction in TA for the year and the corresponding undisbursed commitment is eliminated, accordingly.

Functional Currency and Reporting Currency

The financial statements are expressed in thousands of current United States dollars. The United States dollar is the functional and reporting currency, representing the currency of the primary economic operating environment of JSF.

Translation of Currencies

Assets, liabilities, and uncommitted balances are translated to the reporting currency at the applicable rates of exchange at the end of the reporting period. Contributions included in the financial statements during the year are translated at the applicable exchange rates as of the respective dates of commitment. Revenue and expense amounts are translated for each semi-monthly period at the applicable rates of exchange at the beginning of each period; such practice approximates the application of average rates in effect during the period. Exchange gains or losses on currency transactions arise on exchange differences between the date a project/program is committed and the timing of disbursements. Exchange gains or losses are credited or charged to operations.

In October 2005, the Board of Directors approved the adoption of daily exchange rates for accounting and financial reporting purposes effective from 1 January 2006. The use of daily exchange rates will allow transactions denominated in non-US dollar to be translated using exchange rates at time of transactions.

Equity Investments

Equity investments with readily determinable fair values are reported at fair value using quoted market prices.

Accounting Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires Management to make estimates and assumptions that

affect the reported amounts of assets and liabilities as at the end of the year and the reported amounts of income and expenses during the year. The actual results could differ from those estimates.

Statement of Cash Flows

For the purposes of the Statement of Cash Flows, the JSF considers that its cash and cash equivalents are limited to "DUE FROM BANKS."

Reclassification

Certain reclassifications of prior year's amounts and information have been made to conform to the current year's presentation.

NOTE C—INVESTMENTS

The main investment management objective is to maintain security and liquidity. Subject to these parameters, ADB seeks the highest possible return on its investments. Investments are governed by the Investment Authority approved by the Board of Directors in 1999. ADB is restricted by its Investment Authority to invest in government and government-related debt instruments and in time deposits. In the US dollar portfolio only and up to limited amounts, investments may be made in corporate bonds rated A or better, AAA-rated asset-backed securities, and AAA-rated mortgage-backed securities. The investment portfolios of both JSF and ACCSF as of 31 December 2005 and 2004 are comprised of United States dollars holdings. Other securities consisted of corporate bonds.

The annualized rates of return on the average investments held under ACCSF and JSF funds during the year, based on the portfolio held at the beginning and end of each month were 3.20% and 3.25%, respectively (1.35% and 1.47%, respectively - 2004).

NOTE D—EQUITY INVESTMENTS

ADB used JSF resources to make an equity investment in India in 1990. In 2004, JSF sold this equity investment and realized a gain of \$900,000.

ASIAN DEVELOPMENT BANK—JAPAN SPECIAL FUND

NOTES TO FINANCIAL STATEMENTS

31 December 2005 and 2004

NOTE E—OTHER ASSETS AND LIABILITIES

The ordinary capital resources (OCR) and special fund resources are at all times used, committed, and invested entirely separate from each other. The administrative and operational expenses pertaining to the OCR and special fund resources will be charged to the respective funds. The administrative expenses of JSF are settled on regular basis between the OCR and JSF. Regional technical assistance projects and programs may be combined activities between special and trust funds. Interfund accounts are settled on a regular basis between JSF and the other funds.

The interfund balances between other funds, which are included in other assets and liabilities are as follows:

	2005	2004
Amounts Receivable by JSF from:		
ACCSF	\$ 149,000	\$ 604,000
Technical Assistance Special Fund (TASF)	–	1,000
Total	<u>\$ 149,000</u>	<u>\$ 605,000</u>
Amounts Payable by:		
JSF to : OCR	\$ 109,000	\$ 50,000
TASF	9,000	–
Agency Trust Funds	1,000	–
Total	<u>\$ 119,000</u>	<u>\$ 50,000</u>
ACCSF to : JSF	<u>\$ 149,000</u>	<u>\$ 604,000</u>

NOTE F—UNDISBURSED COMMITMENTS

Undisbursed commitments are denominated in United States dollars and represent TA projects/programs which have become effective but not yet disbursed. During 2005, an amount of \$7,145,000 representing completed and

partially canceled TA projects (\$8,428,000 – 2004) have been written back as a reduction in technical assistance for the year, and the corresponding undisbursed commitments have been eliminated. \$847,000 (\$951,000 – 2004) of this amount corresponds to ACCSF. The fair value of undisbursed commitments approximates the amounts outstanding because ADB expects that disbursements will substantially be made for all the projects/programs covered by the commitments.

NOTE G—CONTRIBUTIONS AND UNCOMMITTED BALANCES

All contributions for the years ended 31 December 2005 and 2004 were received during the respective years.

Effective 31 December 2002, all remaining temporarily restricted net assets under JSF were transferred and integrated into the unrestricted regular net assets, as concurred by Japan, in order to optimize the use of JSF. Similarly, Japan lifted the restriction over the use of net accumulated investment income, which under the original terms of agreement between ADB and Japan, may only be used for defraying JSF's administrative expenses. Japan agreed to use the net accumulated investment income as additional resources for funding future ADB's TA operations.

In June 2004, the Cooperation Fund for Regional Trade and Financial Security Initiative was established as a multi-donor umbrella facility to support TA to developing member countries for enhancing port security and combating money laundering and terrorist financing. In July 2004, the Government of Japan agreed to transfer US\$1,000,000 to the fund from the investment income of JSF.

Uncommitted balances comprised of amounts which have not been committed by ADB as at 31 December 2005. These balances include approved TA projects/programs that are not yet effective.

As of 31 December 2005 and 2004 these balances are as follows:

	2005			2004		
	ACCSF	JSF Regular and Supplementary		ACCSF	JSF Regular and Supplementary	
		Total	Total		Total	
Uncommitted balances	\$26,895,000	\$146,875,000	\$173,770,000	\$26,022,000	\$149,229,000	\$175,251,000
TA projects/programs approved by Japan and ADB but not yet effective	–	(15,050,000)	(15,050,000)	–	(27,422,000)	(27,422,000)
TA projects/programs approved by Japan and not yet effective	–	(5,400,000)	(5,400,000)	–	(3,575,000)	(3,575,000)
Uncommitted balances available for new commitments	<u>\$26,895,000</u>	<u>\$126,425,000</u>	<u>\$153,320,000</u>	<u>\$26,022,000</u>	<u>\$118,232,000</u>	<u>\$144,254,000</u>

The temporarily restricted uncommitted balance remaining available as of 31 December 2005 corresponds to funds under ACCSF of \$26,895,000 (\$26,022,000 – 2004) to cover completion of TA disbursements and the amount of net accumulated investment income of \$3,891,000 (\$2,865,000 – 2004) for settlement of all administrative expenses.

Net assets reverted back to temporarily restricted assets under ACCSF relate to savings on financially completed technical assistance net of amount from accumulated investment income, released from restrictions to defray the administrative expenses of the Fund.

NOTE H—FAIR VALUE OF FINANCIAL INSTRUMENTS

Fair value of a financial instrument is defined as the amount at which the instrument could be exchanged in

a current transaction between willing parties, other than in a forced or liquidation sale.

The carrying amount of time deposits is a reasonable estimate of its fair value.

If available, quoted market values are used to determine fair values. Financial instruments for which market quotations are not readily available are valued using valuation models. The basis of valuation is the expected cash flows discounted based on observable market data.

See Notes B, C, and F for discussions relating to investments and undisbursed commitments. In all other cases, the carrying amounts of JSF's assets, liabilities, and uncommitted balances are considered to approximate fair values for all significant financial instruments.

About the Japan Special Fund

The Japan Special Fund (JSF) was established in 1988 when Japan and Asian Development Bank (ADB) agreed to provide financial support for ADB's technical assistance program in the form of an untied grant.

It aims to help ADB's developing member countries:

- restructure their economies in light of the changing global environment
- broaden the scope of opportunities for new investment
- prepare loan projects, thereby facilitating the recycling of funds to members

The Government of Japan has appointed ADB as the Administrator of the JSF.

About the Asian Development Bank

The work of the ADB is aimed at improving the welfare of the people in Asia and the Pacific, particularly the nearly 1.9 billion who live on less than \$2 a day. Despite many success stories, Asia and the Pacific remains home to two thirds of the world's poor. ADB is a multilateral development finance institution owned by 64 members, 46 from the region and 18 from other parts of the globe. ADB's vision is a region free of poverty. Its mission is to help its developing member countries reduce poverty and improve the quality of life of their citizens.

ADB's main instruments for providing help to its developing member countries are policy dialogue, loans, equity investments, guarantees, grants, and technical assistance. ADB's annual lending volume is typically about \$6 billion, with technical assistance usually totaling about \$180 million a year.

ADB's headquarters is in Manila. It has 26 offices around the world and has more than 2,000 employees from over 50 countries.
