

GOVERNMENT OF LAO PDR ASIAN DEVELOPMENT BANK

CUMULATIVE IMPACT ANALYSIS AND NAM THEUN 2 CONTRIBUTIONS

Annex 3: Hydropower Development

Operation of reservoirs, assumptions and input data.

Prepared by: Anders Korvald

November 2004

TABLE OF CONTENTS

1	INTRODUCTION	1
2	ASSUMPTIONS	1
2.1	Model description.....	1
2.2	Technical assumptions.....	2
3	RESERVOIR AND HYDROPOWER DATA	5
3.1	Reservoirs in Lancang, Yunnan.....	5
3.2	Reservoirs in Lao PDR.....	8
3.3	Reservoirs in Thailand.....	9
3.4	Reservoirs in Vietnam.....	10
3.5	Reservoirs in Cambodia.....	11
3.6	Summary of reservoirs in Mekong.....	11
4	FLOODING	12

LIST OF FIGURES

<i>Figure 3-1. Location of large existing and planned reservoirs for hydropower and irrigation.</i>	6
<i>Figure 3-2. Monthly river flow at border to Lao PDR before (natural) and after construction (in percentiles) of planned hydropower projects in Yunnan.</i>	7
<i>Figure 4-1. Daily discharges for Mekong just upstream Tonle Sap and the discharge in Nam Theun, during a high flood in Nam Theun.</i>	13

LIST OF TABLES

<i>Table 3-1 Hydropower projects in Lancang, Yunnan (projects in bold are included in the 2010-scenario).</i>	5
<i>Table 3-2. Storage hydropower projects in Nam Ngum, Lao PDR (projects in bold are included in the 2010-scenario).</i>	8
<i>Table 3-3 Storage hydropower projects in Nam Theun, Lao PDR (projects in bold are included in the 2010-scenario).</i>	9
<i>Table 3-4 Storage hydropower projects in Se Kong, Lao PDR (projects in bold are included in the 2010-scenario).</i>	9
<i>Table 3-5. Existing reservoirs in Thailand.</i>	10
<i>Table 3-6 Storage Hydropower projects in Se San and Sre Pok, Vietnam (projects in bold are included in the 2010-scenario). PS! The sum includes the other smaller projects (active storage less than 100 mill.m³).</i>	10
<i>Table 3-7 Storage Hydropower projects in Se San and Sre Pok, Cambodia. (no projects are included in the 2010-scenario).</i>	11
<i>Table 3-8. Active storage in the Mekong basin.</i>	11
