CUMULATIVE IMPACT ANALYSIS AND NAM THEUN 2 CONTRIBUTIONS

Annex 5: Rural Landuse with Emphasis on Irrigated Agriculture

Prepared by: Garry Oughton

November 2004

TABLE OF CONTENTS

1.	PART 1: GEOGRAPHY & LANDUSE MECHANISMS.....	1
1.1	Introduction.....	1
1.2	Zonation of the Mekong Drainage Basin.....	2
1.2.1	Geographic Subdivisions	2
1.2.2	Administrative Sub-divisions	5
1.2.3	Climatic Zonation	5
1.2.4	Ecological Landscapes & Ecoregions	6
1.2.5	Future Landuse Zonation	6
1.1	Rural Landuse and Livelihood Regimes	7
1.2.6	Hunting & Gathering.....	8
1.2.7	Agriculture.....	9
1.2.8	Animal Husbandry.....	12
1.2.9	Forestry and Tree Plantations.....	13
1.2	Impacts of Landuse on Basin Hydrology	14
1.2.1	Categorisation of Impacts	14
1.2.2	Impactors	16
1.2.10	Impactees	16
1.3	Hydrologic Pathways.....	18
1.3.1	Water Loss Mechanisms.....	19
1.4	Irrigation	20
1.4.1	Irrigated Cropping Regimes	20
1.4.2	Crop Water Requirements	21
1.4.3	Irrigation System Typology.....	25
1.4.4	Irrigation Mechanism.....	33
2	PART 2: PRESENT STATUS OF LANDUSE & SHORT-TERM TRENDS	36
2.1	Introduction.....	36
2.2	Basin-wide Perspectives	37
2.2.2	Trans-basin Diversions	39
2.2.3	Predicted Impacts of Agriculture	40
2.2.4	Ongoing & Planned Irrigation Upgrading and Expansion	40
2.3	Lao PDR Perspective	40
2.3.1	Irrigated & Irrigable Lands.....	40
2.3.2	Ongoing & Planned Irrigation Upgrading and Expansion	41
2.4	Local Perspective - NT2-HPP Proximal Impact Zones	41
2.4.1	Theun-Kading Basin (14,822 sq km).....	44
2.4.2	Nam Hinboun Basin	60
2.4.3	Xe Bangfai Basin and Surrounding Districts.....	61
3	PART 3: RECOMMENDATIONS	64
3.1	Policy & Legal Framework	64
3.2	Institutional Strengthening and Capacity Building	65
3.2.1	Governmental Institutions	65
3.2.2	Non-Government, Community-Based, and Private Sector Organisations.....	67
3.3	Technical Aspects and Best Practices Leading to Sustainable Rural Landuse Intensification	68
3.3.1	Data-gathering & Monitoring	69
3.3.2	Design of Civil Works	70
3.3.3	Public Consultation & "Informed" Choice	71
3.3.4	Water Resources Infrastructure Operation & Maintenance.....	71
3.3.5	Tree Plantations.....	72
3.3.6	Best Practices for Rainfed Agriculture, Grazing, Plantation, Forestry & Conservation.....	72
4	PART 4: PREDICTED LANDUSE SCENARIOS	73
4.1	Basin-wide Perspective.....	74

4.1.1	Five-Year Scenario (Year 2010).....	74
4.1.2	Twenty-Year Scenario (Year 2025; Assuming Best Practices)	76
4.2	Lao PDR Perspective	77
4.2.1	Five-Year (Year 2010) Scenario.....	77
4.2.2	Twenty-Year Scenario (Year 2025; Assuming Best Practices)	77
4.3	Local Perspective - NT2-HPP Proximal Impact Zones	78
4.3.1	Five-Year (Year 2010) Scenario.....	78
4.3.2	Twenty-Year Scenario (Year 2025; Assuming Best Practices)	78

LIST OF TABLES

Table 1:	MRC National Sub-areas	4
Table 2:	Estimated Evaporation plus Transpiration from Crop Plants (mm/day)and cropping areas in the Lower Mekong Catchments (km ²)	22
Table 3:	Influence of Static Head variation on Irrigation Pump Energy Consumption	28
Table 4:	Irrigated Dry Season Rice in the LMB and Predicted Increase (km ²).....	37
Table 5:	ADP Planned Irrigation Schemes in Khammuan Province	43
Table 6:	Existing Irrigated Land Potential Increase in the NT2 affected Catchments	44
Table 7:	Existing & Potential Increase of Irrigated Land in the Nakai Plateau and Nakai-Nam Theun NBCA	46
