

Bibliography

This bibliography contains a number of basic ADB documents on resettlement and other studies directly relevant to the themes addressed in the training modules. The trainer should make sure that the course participants have access with priority to the basic policy documents and should make the decisions s/he considers appropriate as to the selection and amount of other studies to be recommended for reading by course participants.

Also, the trainers are encouraged to recommend to course participants some country-specific and locally-specific readings, related to the projects with which the participants are most directly familiar.

One simple way the trainer can facilitate more reading as "homework", and thus more informed discussion, is for him/her to arrange for photocopying a set of the main readings in a bound set and distribute it to course-takers who otherwise may not have access to the recommended materials.
