Mohamed Rasheed has extensive experience in managing water supply and sanitation projects, sales development activities, and bills collection. He is a Civil Engineering graduate from Bangalore University and holds two master degrees in Environmental Engineering (AIT, Bangkok) and in Business Management and Administration (Lincoln University, UK).

He is the Marketing Manager of MWSC since 2001. He is responsible for all sales and sales development activities; developed and maintained a reasonably good company image among customers; and played a key role in collection and maintained default payment within a 30-day limit.

He joined MWSC in 1995 as the Deputy Technical Manager where he played the key role in establishing MWSC and the water supply network and the water production infrastructure. Continuous water supply service to customer door step was commenced in 1996.

In 1980, he joined the Malé Water and Sanitation Authority (MWSA) as a Civil Engineer, and has been promoted to Assistant Director, later to Deputy Director, and finally to Director in 1992.

During first five years in MWSA, he managed the implementation of water and sanitation projects funded by UNICEF and UNDP in the outer islands. The water decade target of providing 2 liters per person per day was achieved during this period.

In the next five years in MWSA, he was based mainly in Male' the capital island where there was no system of sewage collection and disposal. He supervised the development and completion of a 46-kilometer sewer pipe network with 9 pumping stations.

As Director of MWSA in 1992, he has played the leading role in implementing DANIDA assisted water projects in Male'; as well as UNICEF and UNDP assisted projects in the outer islands.
