

Dr. Leena Srivastava is the Executive Director of The Energy and Resource Institute (TERI), New Delhi, India. She is responsible in defining and implementing TERI's research agenda to facilitate the transition to independent regulation in the infrastructure sectors of the economy; providing research direction and guidance; developing research projects and programmes; and managing projects. Dr. Srivastava is an active member of various professional societies on energy and environmental economics such as the International Association for Energy Economics and the Institute for Global Environmental Strategies of Japan. She has been also an active member of the Scientific Steering Committee (SSC) for the core Project "Industrial Transformation" (IHDP-IT) of the International Human Dimensions Programme on Global Environmental Change, International Scientific Planning Committee for the 2001- Open Meeting of the Human Dimensions of Global Environmental Change, and Working Group on Lifestyles and Energy, World Energy Council. She is affiliated with professional journals and international bodies on energy policy research and development. Dr. Srivastava completed her Ph. D. (Energy Economics) in the Indian Institute of Science, Bangalore, India (1995).
