

PROJECT DATA SHEET

Project Data Sheets (PDS) contain summary information on the project or program: Because the PDS is a work in progress, some information may not be included in its initial version but will be added as it becomes available. Information about proposed projects is tentative and indicative.

PDS Creation Date 06 Sep 2007

PDS Updated as of 08 Nov 2010

Project Name Industrial Wastewater Management

Country Viet Nam

Project/Program Number 41068-012

Status Proposed

Geographical Location Viet Nam

In preparing any country program or strategy, financing any project, or by making any designation of, or reference to, a particular territory or geographic area in this document, the Asian Development Bank does not intend to make any judgments as to the legal or other status of any territory or area.

Sector and/or Subsector Classification Not yet classified

During Project Implementation

DESCRIPTION

The PPTA will prepare a loan project suitable for ADB to consider financing. The ensuing loan will help improving living conditions of the urban population, enhancing competitiveness by developing water supply infrastructure, and institutional development and capacity building. This will be achieved through: (i) sustainable provision of safe water in the Greater Hanoi area by developing alternative water resources (e.g. Red River) to meet future water demand and improve service quality; (ii) reducing NRW (in collaboration with World Bank), and (iii) promoting public private partnership through corporatization and management and performance contracts for project financing and operation and maintenance.

PROJECT RATIONALE AND LINKAGE TO COUNTRY/REGIONAL STRATEGY

Industrial wastewater management was raised as a key issue from ADB-Developing Member Countries Sanitation Dialogue Conference held in Manila in March 2009 and the In-Country Sanitation Dialogue, held in Viet Nam in April 2009. The recently completed water sector review (TA4903-VIE) highlights industrial wastewater pollution as a cause for concern with 111 out 154 industrial parks without centralized wastewater treatment plants. The assessment of the Socioeconomic Development Plan 2006 -2010 shows Viet Nam missing its targets of universal coverage in industrial wastewater pollution control. New targets expect a 80% coverage by 2015 from the current 40%.
