

Social Monitoring Report

Bi-annual Social Monitoring Report
July 2016

PAK: MFF – Power Distribution Enhancement Investment Program (Tranche 3)

Prepared by Hyderabad Electric Supply Company, Sindh for the Asian Development Bank.

NOTES

- (i) The fiscal year (FY) of the Government of the Islamic Republic of Pakistan and its agencies ends on 30 June.
- (ii) In this report “\$” refer to US dollars.

This social monitoring report is a document of the Borrower. The views expressed herein do not necessarily represent those of ADB's Board of Directors, Management, or staff, and may be preliminary in nature.

In preparing any country program or strategy, financing any project, or by making any designation of or reference to a particular territory or geographic area in this document, the Asian Development Bank does not intend to make any judgments as to the legal or other status of any territory or area.

**Re: Loan 2972-PAK: Power Distribution Enhancement Investment Program,
Tranche 3 - HESCO SMR**

Jose Tiburcio Nicolas to: Liaqat Ali

22/07/2016 06:05 PM

Cc: Ashfaq Khokhar, Ehtesham Z. Khattak, Zhang Lei, Muhammad Zeeshan

Dear Liaqat sb,

Thanks for sharing with the internal SMR for tranche 3 submitted by HESCO. Similar to the SMR submitted by HESCO for tranche 2, **we are also endorsing this internal SMR for uploading to the ADB website for disclosure.** Improvements can be made in the subsequent SMRs. Following are specific comments:

1. The SMR noted that some DPs complain about the delay in compensation payment and insufficient amount to cover the actual damage. HESCO should explore measures to improve processing in order to reduce delays and review the current methodology used in assessing compensation for crop losses to ensure that the principle of providing compensation at replacement cost is met.
2. In the case of the Hala Road grid station to Hala transmission line subproject and Tando Jan Muhammad-Naukot transmission line subproject which is yet to be awarded and an updated LARP still to be prepared, please ensure that an updated LARP based on final route is submitted to ADB for review before actual civil works start in those subprojects. Meaningful consultation with DPs should be conducted and reflected in the updated LARPs.
3. In reporting on site visits and on-site training, please provide information on the dates, location and people met during these site visits. Provide information also on what were observed and discussed and agreed during such visits. Photos of the visits in the annex should include captions on the site, date and people met during such visits.
4. Additional information is needed on grievance redress, including where the registers are kept, grievance focal points assigned, and whether or not complaints were received during the reporting period, what actions were taken and the status of resolution. For instance, the complaints received during field visits on the compensation delays and amount should have been recorded in the register which would reflect when the complaint was noted, who noted the complaint, where the complaint was raised, and if a satisfactory conclusion has been reached.
5. Include a section on the restoration of temporarily used sites, particularly for subprojects where construction has been completed. Provide photos of the restored sites and record feedback from the APs on the restoration work done.

Regards,

Tito S. Nicolas

1. INTRODUCTION OF THE COMPANY

Hyderabad Electric Supply Company Limited; HESCO is a Public Limited Utility Company, established in 1998 under Companies Ordinance 1984 responsible for distribution of Electric Power within its territorial jurisdiction and presently serving more than 0.9 Million customers (Domestic, Commercial, Agricultural, Industrial and others) in twelve Districts of Sindh Province.

HESCO AREA OF COMMAND

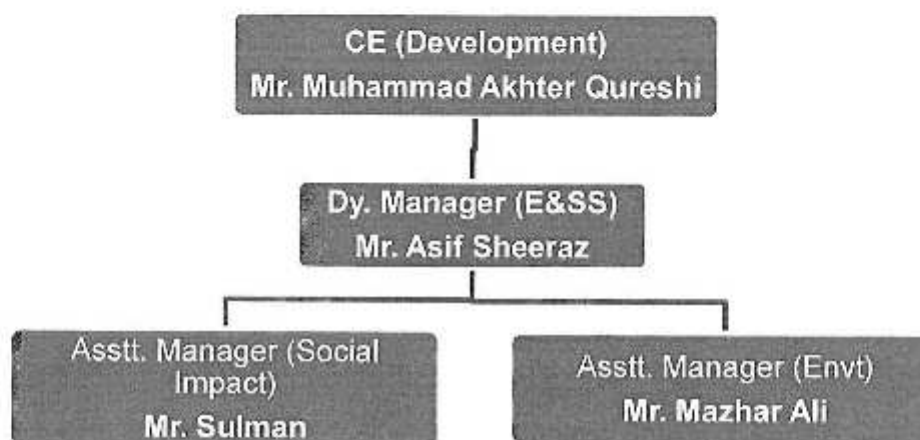

1.1. ABOUT PROJECT MANAGEMENT UNIT (PMU)

To effectively plan, execute and monitor the Power Distribution Enhancement Investment Program (Tranche III), a Project Management Unit (PMU) has been established under Chief Engineer (Development) comprising of five sections i.e. Planning, Scheduling & Coordination, Procurement, Finance and Environment & Social Safeguard along with the Project Director (GSC) for physical execution of grid stations and transmission lines. (Annexure A)

1.2 ENVIRONMENTAL & SOCIAL SAFEGUARD SECTION

The Environmental & Social Safeguard (E&SS) Section of PMU, HESCO provides an overall supervision and advisory services during the Pre - Construction phase, Construction phase & Post - Construction phase of the project. The unit also assists and advises GSC Directorate, Construction Directorate and other HESCO departments on environmental and social matters overall. Organizational structure of E&SS – PMU HESCO is attached as below.

2. BRIEF DETAIL OF THE PROJECT

The Hyderabad Electric Supply Company (HESCO) is planning to undertake the Power Distribution Enhancement Investment Project (PDEIP) Tranche-III to enhance the capacity of its system and to facilitate consumers in various parts of its territory. HESCO is seeking financing from the Asian Development Bank (ADB) for financing of this project. In line with the prevailing legislation in the country, and ADB safeguard policies, an Environmental and Social Assessment of the project has been carried out.

The **basic information/ data about the loan** are here as under:-

Loan Number: (ADB TA Loan No. 2972-PAK)

Project Title:- Power Distribution Enhancement Investment Program,
Multi-Tranche Financing Facility PDEPMFF-Tranche-III

Borrower:- GOP/ HESCO

Executing Agency:- PEPCO

Implementing Agency:- HESCO

Location of the Project:- The Sub-Projects under Tranche-III are in Hyderabad, Mirpurkhas, Badin, Tando Muhammad Khan and Matiari Districts of Sindh Province.

2.1-OBJECTIVES OF THE PROJECT

HESCO through GoP has undergone a Project Financing agreement with Asian Development Bank for:

1. Strengthening the capacity of Power Distribution and Transmission networks.
2. To meet the increasing electricity demand in the selected areas more efficiently.
3. To upgrade the existing power infrastructure.

2.2-SCOPE OF WORK

There are 9 Nos. of projects under ADB Tranche-III. Detail is as under:

1. Construction of 01 No. of New 132 kV Grid Station and allied Transmission Line.
2. Conversion of 03 No. of Grid Substations from 66kV to 132kV and allied Transmission Line.
3. Extension of 03 Line bays.
4. Construction of 02 No. 132 kV Transmission Line.

No.	Project Component	
01.	New Grid Station with Allied Transmission Line	01 Nos.
	i. 132 kV New Matli Grid Station.	
02.	Extension of Power Transformers	03Nos.
	ii. 132 kV Naukot Grid Station.	
	iii. 220/132 kV Hala Road Grid Station.	
	iv. 132 kV Hala Grid Station.	
03.	Conversion of Power Transformers with T/L	03 Nos.
	v. 66 kV Tando Ghulam Ali Grid Station with allied T/L	
	vi. 66 kV Digri Grid Station with allied T/L.	
	vii. 66 kV Tando Jan Muhammad Grid Station with allied T/L.	
04.	Transmission Lines (New)	02 Nos.
	viii. 132 kV T.J. Muhammad- Naukot Transmission Line.	
	ix. 132 kV Hala Road-Hala Transmission Line.	

3. IMPACTS OF EACH SUB-PROJECT.

3.1 NEW 132 KV MATLI GRID STATION SITE AND ASSOCIATED TRANSMISSION LINE

The Sub-project consists of construction of a new Grid Station and associated 0.5 km long transmission line. The grid station will be linked to the existing 132 kV Tando M. Khan –Badin transmission line. The land for grid station measuring an area of 2 acres and 37 ghuntas has been purchased on voluntary sale bases. The total price of Rs. 8,800,000/-has been paid to the seller (Sale Deed attached in Annexure C). Since the seller went into negotiations with the HESCO a few months back, he did not grow any crops on the said patch of land and left it unattended, so no any crop damage or tree/structure damage is associated with this aspect of the sub-project. However, there are some potential social impacts associated with the construction of 0.5 km long transmission. The DDR for the New Matli Grid station has been prepared and reviewed by the ADB in April 2015 and the LARP was updated in August 2015. According to the updated LARP, the transmission line will pass from the New Matli grid station in deh Jagsiyani near Goth Gabol Khan Jagsi and will connect Tando M. Khan-Badin transmission line. The transmission line will temporarily affect a total of 5.54 acre of farmlands area in terms of crops. There will be damage to 14 wood trees. A total of 5 farming households (DHs) with a total population of 23 (DPs) will be affected. As the resettlement impacts are non-significant none of the household will be displaced or lose more than 10 % of their productive assets. Currently the subproject is in design phase.

3.2 CONSTRUCTION OF 132 KV EXTENSION BAYS AT 220/132 KV HALA ROAD & 132 KV HALA ALONG-WITH DOUBLE CIRCUIT 132 KV TRANSMISSION LINE HALA ROAD GRID STATION-HALA

The construction of extension bays will be totally inside the existing grid stations so there will not be any social issues with this aspect. The 65 km transmission line will pass through 7 villages of Tehsil Hala of Matiari and Hyderabad District. According to the LARP

prepared in October 2012 the transmission line will temporary affect a total of 185 ha of farmland area. There will be expected damage to 280 wood fruit trees and 5 farmhouse structures. As a result, a total of 270 farming households (DHs) with a total population of 1676 (DPs) will be affected. None of the household will be displaced or lose more than 10% of their productive assets. The updation of the LARP is schedule to start after the award of contract.

3.3 CONVERSION OF 66 KV TANDO GHULAM ALI GRID STATION ALONG-WITH ALLIED TRANSMISSION LINE.

The 66 kV Grid station conversion is inside the boundary of the existing grid so there is no any social / resettlement issue for the conversion. The 132 kV 27.4 km long New Matli to Tando Ghulam Ali T/L is being established to provide additional source of power to the Tando Ghulam Ali town. This line is constructed along the existing 66 kV Matli-Tando Ghulam Ali Transmission line and covers 7.4 km in the villages of Tando Ghulam Hyder taluka of T. M Khan district and 20 km in the Tando Ghulam Ali Taluka of Badin district. The turnkey contract had been awarded to M/s CCCE-ETERN (JV), China on 7th day of November, 2014 and till now foundation work of 81 towers have been completed out of 102 and erection of 79 towers is complete. 56 cases of foundation payments had been assessed out of which 15 affected persons have been paid and 54 cases of erection had been assessed out of which 15 payments have been made. During the consultations the very most concern of the affected people was about the compensation for which they were briefed about HESCO's procedure and were assured full cooperation in this matter.

3.4 CONVERSION OF 66 KV DIGRI GRID STATION ALONGWITH ALLIED TRANSMISSION LINE.

The 66 kV Grid station conversion is inside the boundary of the existing grid so there is no any social / resettlement issue for the conversion. The 27.4 km long Tando Ghulam Ali to Digri TL is being constructed to provide additional power source to the residents of Digri. This line covers 14.6 km in the villages of Tando Ghulam Ali Taluka of

Badin district and 11.1 km in the Digri Taluka of Mirpurkhas district. The turnkey contract had been awarded to M/s CCCE-ETERN (JV), China on 7th day of November, 2014 and till now foundation work of 84 towers have been completed out of 98 and erection of 79 towers is complete. 72 cases of foundation payments had been assessed out of which 65 affected persons have been paid and 65 cases of erection had been assessed out of which 51 payments have been made. During the visits it was generally complained about the late compensation payments and getting less payment than the actual damage but it was concluded that it's a general complaint and revenue rates from the concerned authorities are used to ascertain damage of the crops.

3.5 CONVERSION OF 66 KV TANDO JAN MUHAMMAD GRID STATION ALONGWITH ALLIED TRANSMISSION LINE.

The 66 kV Grid station conversion is inside the boundary of the existing grid so there is no any social / resettlement issue for the conversion. The 132 kV 15.21 km long Digri to Tando Jan Muhammad T/L is being established to provide additional source of power to the Tando Jan Muhammad town. As per the LARP updated in October 2015, the transmission line will pass 15.21 km through the villages of Digri and Tando Jan Muhammad in the Mirpurkhas district, where it will temporarily affect some 128 acre of crops. As a result, twenty five farming households (25 AHs) with a population of 150 (APs), will be affected by the loss of agricultural crops, of whom 7 AHs are likely to suffer also from the loss of trees. As the resettlement impacts are non-significant none of the household will be displaced or lose more than 10 % of their productive assets. The turnkey contract had been awarded to M/s CCCE-ETERN(JV), China on 7th day of November, 2014 and till now foundation work of 31 towers have been completed out of 56. By now 28 cases of foundation have been assessed and compensation payment will start soon.

3.6 CONSTRUCTION OF DOUBLE CIRCUIT 132 KV TRANSMISSIONS LINE TANDO JAN MUHAMMAD – NAUKOT.

The 132 kV 26 km long Tando Jan Muhammad to Naukot T/L will be established to provide additional source of 132 KV to Naukot. The transmission line will pass through 5 villages tehsil Tando Jan Muhammad of Mirpurkhas District .According to the LARP prepared in October 2012 the sub-project will temporarily affect a total of 78 ha of farmlands area in terms of crops. There will be damage to 257 trees(195 wood and 62 fruit) As a result a total of 150 farming households (DHs) with a total population of 900 (DPs) will be affected. As the resettlement impacts are non-significant none of the household will be displaced or lose more than 10 % of their productive assets. The updation of the LARP is schedule to start after the award of contract.

4. SOCIAL SAFEGUARD WORK STATUS

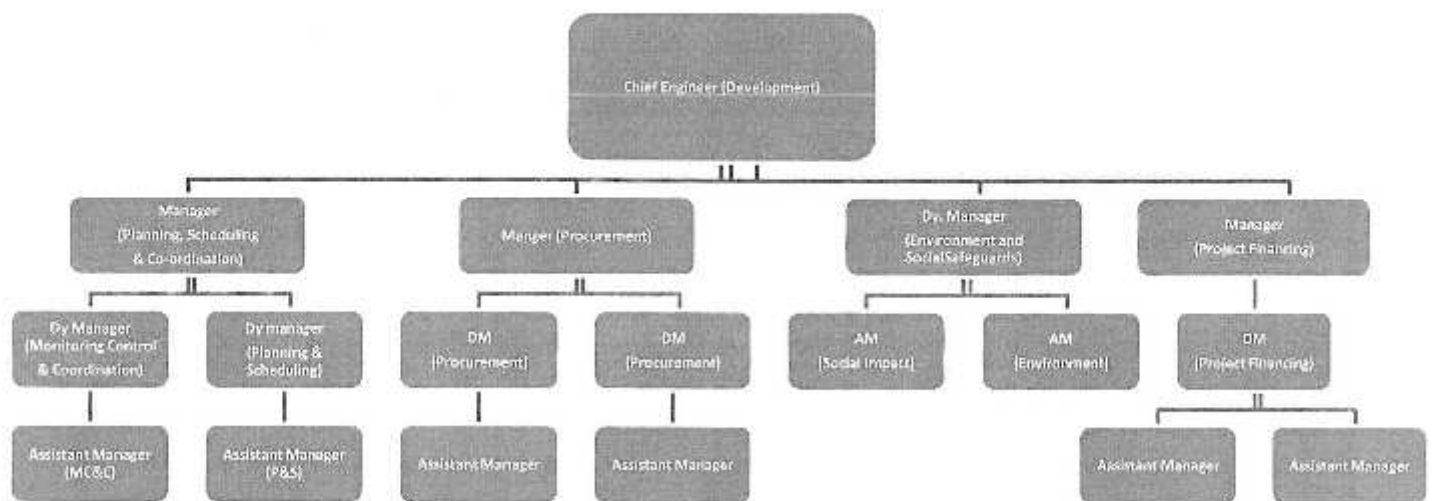

Land Acquisition and Resettlement Plans (LARP):

- (i) All LARPS of sub-projects under Tranche-III have been uploaded/ displayed on HESCO official websites. (www.hesco.gov.pk).
- (ii) The LARPs of four subprojects have been revised/updated on actual basis and the same has been submitted to the Asian Development Bank for review.
- (iii) Regular visits are conducted at site of each sub-project for implementation of LARP.
- (iv) Environmental and Social Monitors are met in order to reach out to the problems at site and fortnightly monitoring sheets are required from them. (Annexure C)
- (v) Environmental & Social Complaint Register is available on each active project site to record complaints of affected household / persons.
- (vi) Grievance Redressal Committee has been constituted and documented procedure for grievance redressal is functional (Annexure D).

5- SOCIAL SAFEGUARD AWARENESS AND TRAINING.

On site trainings were arranged during the site visits regarding health and safety issues, local norms, social issues, housekeeping, use of PPE's, communicable diseases especially Dengue, Malaria, Airborne, Waterborne diseases & drugs, defensive driving, site restoration after the work and overall implementation of the Land acquisition and resettlement plan (LARP) of the Tranche-III sub-projects.

ANNEXURE B – EPA APPROVAL

Reference No: EPA/ 2014/03/06/ EIA/06

ENVIRONMENTAL PROTECTION AGENCY GOVERNMENT OF SINDH

Plot # ST-2/1, Sector 23, KIA, Karachi-74800
Ph: 5065950, 5065998, 5065637
5065532, 5065946, 5065621
epasindh@cyber.net.pk
Facsimile: 5065940

Dated: 23rd December, 2014

SUBJECT: - DECISION ON ENVIRONMENTAL IMPACT ASSESSMENT (EIA)

1. Name and Address of Proponent: Chief Engineer(Dev), PMU
M/s Hyderabad Electric Supply Company.
2. Description of Projects: Sub-Projects under Asian Development Bank(ADB) Tranche-III of HESCO
3. Location of Projects: The Project will cover T.M Khan, Hyderabad, Mirpurkhas, Badin and Matari Districts of Sindh
4. Date of Filing of EIA: 24-02-2014

5. After careful review of the Environmental Impact Assessment (EIA) report the Environmental Protection Agency (EPA), Sindh, has decided to accord its approval subject to the following conditions:-

(i) The Hyderabad Electric Supply Company hereinafter referred as: proponent will comply Environmental Quality Standards in force for air emissions from the project site and Right of Way(RoW).

(ii) Noise levels shall be implemented in order to minimize noise impact of the proposed project.

(iii) Mitigation measures recommended in the EIA report must be strictly adhered to minimize any negative environmental effect on the natural ecology of the project area.

(iv) Fuels, oils and other hazardous substances will be handled and stored accordingly to standard safety practices outlined in respective material safety data sheets (MSDS).

(v) Engineering design of the vibration and sound producing equipment such as generators, compressors and other machineries together with housing of such units be kept in soundproof enclosures with right location design of these units shall be adopted as an effective in minimizing the noise levels and vibration impact.

Always Remember— Reuse, Reduce & Recycle

- (vi) Emergency response or contingency plan for any accident / incident on the Grid station site should be developed before the operational phase of the project. The same shall be furnished to the EPA within thirty days for approval, failing which the Grid station shall not be made operative.
 - (vii) A complete code of Health, Safety and Environment (HSE) shall be developed, which should include efficient parameters at specific work place. For this purpose HSE setup should be established and supervised by a designated HSE officer at the senior level with sufficient administrative and technical authority to perform the designated functions. Proponent will make sure that the operating instructions and emergency actions are made available to every worker/labor/commuter at the site.
 - (viii) Sludge generated from the fuel storage tanks will be collected, transported and disposed off in environmentally safe manner. Details of standard operating procedure for disposal of oily sludge will be submitted to the EPA.
6. This approval and any considerations thereof shall be treated as null and void if the conditions, mentioned in para-5 above, are not complied with.
 7. The proponent shall be liable for compliance of EIA/IEE Regulations, which direct for condition for approval, confirmation of compliance, entry, inspection and monitoring.
 8. This approval does not absolve the proponent of the duty to obtain any other approval or consent that may be required under any law in force.
 9. The approval is accorded only for the project activity described in the EIA Report. Proponent shall submit separate EIA or IEE as required under regulation for any enhancement or change in the design of project.
 10. Implementation Report of all the mitigation measures and EMP laid down in the EIA report shall be ensure by HESCO. No violation of any regulations, rules, instruction and provision of SEP Act, 2014, shall be made and in case of any such violation of the rules/laws in the approval shall stand cancelled without any further notice.
