1. Overview

1.1 Project background

The Northeast GMS corridor (includes Nam Ninh, Quang Tay province, China; Hanoi and Thanh Hoa of Vietnam; Louangphrabang of Lao and Bangkok of Thailand) has been considered as importance corridor as pointed out in the GMS Transport Development Strategy and the Connective between the Northeast of Lao and Northern of Vietnam. Many sections of the Corridor are still under good condition or have been upgrading. An example of The Northern GMS Transport Network Improvement Project has been approval in 2007, which consist of 370 km under the Lao's Northeast Corridor; main component is NH No. 4 connective from Louangphrabang to Lao – Thailand border. However, the remaining sections under Corridor the Northeast of Lao to North of Vietnam border must be upgraded to ensure the connective of the whole corridor.

The Second Northern GMS Transport Network Improvement Project focuses on the HN 217 of Thanh Hoa province in the northern of Vietnam and NH 6, 6A and 6B of Houaphanh province in the Northeast of Lao. Finally, the Nghi Son port will play a role as the main gate to the sea of the corridor. The government of Vietnam and Lao are strongly support for upgrading these connective routes to promote the economic development along the Northeast GMS Corridor and facilitate the connection between Northern of Lao with seaport all the year (including rainy and flood seasons). This project belongs to the Area Implementation Cooperative Action Plan in 2010-2012.

This project is to improve access to social services and markets (leading to improved livelihoods and poverty reduction) and improve the efficiency of the road network and transport in the project area and sub-region. The project will improve the ability to connect the sub-regions and create favourable link among Thailand, Vietnam and Lao. The road works will improve international and regional connectivity through improving traffic quality and constructing bridges and water drainage systems. The project will include new construction and replacement of weak bridges, upgrading and rebuilding severely damaged roads and minimizing influence of flood. The routes will provide convenient connections to districts' centre, national highway and improvement of traffic safety.

The Project is supported by ADB for i) upgrading of National Highway 217 section from Km107+200 - Km195+400 (approximately 88 km in length) to graded IV mountain road standard; ii) new construction of 2 bypasses of Cam Thuy town (Cam Thuy East and West Bypasses with total approximately 3 km in length) to graded III road standard; and iii) improvement of road surface of the section from Km0+000 - Km104+900. The Thanh Hoa PPC will support PMU1 to implement resettlement plan.

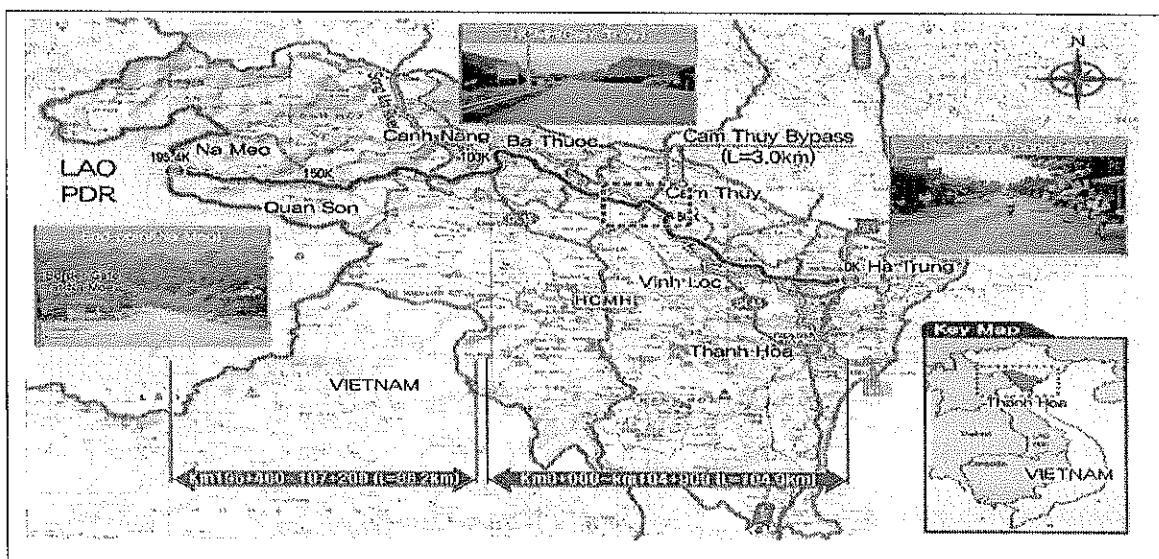

Figure 1: Project location

1.2 A brief of Updated RPs

The Second Northern GMS Transport Network Improvement Project - Upgrading of National Highway No. 217, Thanh Hoa province, phase 1 is implemented in Cam Thuy district, Ba Thuoc district and Quan Son district, Thanh Hoa province.

Cam Thuy bypasses include Cam Thuy East bypass and Cam Thuy West bypass. The Cam Thuy East bypass is 1.58 km in length, starts at Km 54+750 on NH217, goes through agricultural land areas and intersects with Ho Chi Minh road at Km 522+100 (equivalent to Km 56+330 of NH217). Cam Thuy West bypass is 1.39 km in length, starts at Km 523+750 on Ho Chi Minh road (equivalent to Km 58+560 on NH217) and connects with NH at Km 59+950.

Highway No.217 goes through Quan Son and Ba Thuoc district has the length of 88,7 km from Km107+200 to Km 195+400, in which section in Quan Son district is 75,4 km from Km 120+250 to Km195+400 and section in Ba Thuoc district is 13,3 km from Km 107+200 to Km120+250.

Because the Project goes through 3 districts, there are 3 separate updated RPs for the 3 districts. According to the URPs, the implementation project have been affected to land, trees, crops, structures... of HHs/agencies. These impacts are summarized in tables below:

Table 1: Impacts of the project

District	Total AHs (HH)	By types of loss (HHs)						
		Residential land	Agricultural land	Garden land	House/ shop	Other structures	Crops/trees	Grave
Cam Thuy district	311	5	286	4	16	18	82	1

Moreover, URP also mentions to some impacts on trees, crop, and some public assets.

1.3 Outline of independent monitoring on RP implementation

The donor, ADB, requests that the implementation of RP must be followed with the approved RP to ensure social safeguard of the project, all the gaps (if any) during the implementation of RP should be considered and identified for coming tasks such as updating resettlement plan, additional compensation activities or design of income restoration programs for APs. This requires feedback channels on the implementation of RP. Besides internal monitoring report on RP implementation prepared by Project Management Unit (daily monitoring), the donor also requests a different objective and independent channel, referred to the external monitoring report which is prepared by an external agency, not directly under the Project Management Unit.

1.3.1 Independent monitoring agency

The external monitoring agency must understand clearly about social safeguard policies of donors and of regions. They are qualified, have sufficient human resources to undertake this task. The association of Investment and Environment Protection Consultation Company EPC (EPC Co., LTD.) and Center For Assisting Community Sustainable Development (CSD) is one of the agencies which meet the above conditions and have been selected by the investor for this service.

1.3.2 Monitoring and reporting compliance monitoring implementation of RP 3rd

According to the signed contract, Independent monitoring agency have to perform: (i) Inception report; (ii) Baseline survey conduct and report preparation on social-economic condition of Cam Thuy district - Progress report No. 1; (iii) Preodic compliance monitoring report – Cam Thuy district - Progress report No. 2 – Semi-annually report; (iv) Baseline survey conduct and report preparation (baseline) on social-economic condition of Ba Thuoc and Quan Son districts (- Progress report No. 3); (v) Periodic compliance monitoring report – Ba Thuoc and Quan Son district - Progress report No. 4 – annually report; (vi) Periodic compliance monitoring report for whole project- Progress report No. 5 – Semi-annually report 2; (vii) final report.

Up to now, the independent monitoring agency has completed report (i), (ii), (iii), (iv) and (v). This report is periodic compliance monitoring report for whole project- Progress report No. 5 and use the results by IMA surveyed in 12/2014.

1.3.3 Objectives of independent monitoring

Independent monitoring on the RP implementation is to assess:

If the implementation of the resettlement plan have been followed the policies and procedures outlined in the RP or not;

If the main objective outlined in RP, that the living standards of the affected people will be at least restored or even improved, is achieved;

Identify gaps between the actual situation and indicators of RP; make recommendations if any;

Monitoring reports are to assess and make recommendations for the completion of the RP and for the RP implementation measures in accordance with the actual conditions to ensure that risks of worse living, livelihood, production, income, etc. due to the land acquisition for the project are minimized.

1.3.4 Monitoring indicators

Monitoring indicators are shown as table below::

Table 6: Monitoring indicators

Indicator	Variable	Assessment methodology	Assessment period
Resettlement Plan Implementation(RP)	<ul style="list-style-type: none"> - Distribute human resources for RP - Compensation payment - Withdrawn properties - Prepare replacement land - Disburse budget - Information disclosure and residential interview - Restoration of affected assets 	<ul style="list-style-type: none"> - Consider internal monitoring report - Consider contractors' plan and operation - Interview and observe implementation agency at each grade - Interview affected person accidentally 	Yearly
Livelihood restoration	<ul style="list-style-type: none"> - Compensation according to replacement cost - Compensation does not include inflation or fees / taxes - The adequate and appropriate of replacement land. - The appropriateness of the relocation expense - The appropriate time for replacement/asset recovery - Certificate of ownership of the affective households 	<ul style="list-style-type: none"> - Interviews with people affected - stratified sample of displaced objects, objects lose their land, ethnic minorities and women - Review of internal monitoring reports - Review of compensation costs and costs of modification materials 	Yearly
	<ul style="list-style-type: none"> - The changes in the level of income and the income of affected - The changes in the access of affected to the services and utilities - The participation of affected people in the community organizations - The participation of affected 	<ul style="list-style-type: none"> - Replicate the socio-economic survey of affected persons (with some modifications for new social programs) - Compared to the initial socio-economic survey and the results later - Interviews with vulnerable household groups 	* At the start of the implementation of resettlement (Year 1) and completion of the project (Year 2)

Indicator	Variable	Assessment methodology	Assessment period
	persons in the social action programs related to project - Restores life of vulnerable household groups		
Affected person's satisfactory level	- Awareness of the affected people about resettlement procedures and their rights - Awareness of the people affected about using the complaints system - Satisfaction of affected people about resettlement process.	- Review of records of complaints and resolving complaints - Interview random people affected - Community Meetings - Focus group discussions with different groups	Yearly
RP performance	- The accuracy of DMS for planning and asset declaration affected - Adequacy of budget implementation - The compatibility of the implementation plan and the required tasks - The unexpected issues arise	- Review of records of complaints and resolving complaints - Interview random people affected - Interview with implementing agencies at each level	Yearly
Impact of resettlement	- Withdrawing freed land - Migration to the project area	- Interview random people affected - Observed	Yearly

1.3.5 Monitoring approaches/methodology

This monitoring methodology had been developed and approved in the inception report therefore they were not included in this report.

1.3.6 Scope of the monitoring

Monitoring scope is divided into two types: (i) administrative authorities relate to project and (ii) survey on the sites:

- At PMU 1 office;
- Resettlement Committees of Cam Thuy district, resettlement of Quan Son and resettlement of Ba Thuoc district.
- Interview affected households in communes.

1.3.7 Sample size selection

Sample size for interview according to TOR and selected in the inception report includes: (1) 20% of partially affected households, (2) 100% of severely affected HHs¹. Sample size in this monitoring will be shown as table below:

¹Severely affected HHs are the HHs to be relocated or lost more than 10% of agricultural land

Table 7: Sample size in the second monitoring

No	District/commune	Affected HHs			Sample size			
		Total Affected HHs	Severely affected HHs (house affect)	Other affected HHs (marginal, vulnerable)	Severely affected HHs	Rate (%)	Other affected HHs	Rate (%)
A	Cam Thuy district	311	81	229	81	100	46	20,0
1	Cam Thuy town	63	10	53	10	100	10	18,9
2	Cam Son commune	72	27	46	27	100	10	21,7

2	Trung Tien commune	204	5	199	5	100	40	20,1
3	Trung Thuong commune	174	3	171	3	100	34	19,9
4	Quan Son town	387	3	384	3	100	78	20,3
5	Son Lu commune	386	14	372	14	100	74	19,9
6	Son Dien commune	552	3	549	3	100	110	20,0
7	Muong Min commune	188	28	160	28	100	32	20,0
8	Na Meo commune	243	2	221	2	100	44	19,9
C	Ba Thuoc district	481	7	474	7	100	91	19,2
1	Thiet Ong commune	1	0	1	0	100	0	0,0
2	Thiet Ke commune	89	4	85	4	100	17	20,0
3	Ky Tan commune	391	3	388	3	100	78	20,1
	Total	3271	151	3120	151	100	619	19,8

2. Implementation progress

2.1 Implementation progress of the RP

2.1.1 General progress

At the monitoring time, the RP implementing progress is as table below:

Table 8: Implementation progress of project

No	Work items	Cam Thuy district	Quan Son district	Ba Thuoc district
1	Establishment of District Resettlement Committee	done	done	done

No	Work items	Cam Thuy district	Quan Son district	Ba Thuoc district
2	Project information disclosure	done	done	done
3	Replacement price survey	done	done	done
4	Detail measurement survey (DMS)	done	done	done
5	Establishment of detail compensation plan	done	done	done
6	Resettlement cost estimation	done	done	done
7	Approve detail compensation plan	done	done	done
8	Compensation payment and land handover	done	done	done

+ Replacement price: Resettlement committee signed contract with South West Information and Price Appraisal JSC on 20th February 2013 for carrying out the replacement price survey. Basing on results of this survey, Thanh Hoa PPC has issued Decision on approving compensation price units. Thus it could be considered as the local authorities complied with project's policy framework.

2.2.2 Number of AHs in RP and in reality

There is a difference between the number of affected households in the RP and reality. Details as follows:

Table 9: Number of AHs in RP and in reality

No.	District/commune	No. of AHs reported in URP				No. of affected household reality

3. Results/Findings

3.1 RP implementation Arrangement

The Resettlement activities has been considered as an subproject , Thanh Hoa PC was assigned for Quan Son and Ba Thuoc districts to carry out the RPs of the project's section passing their area. Cam Thuy, Quan Son and Ba Thuoc DCARBs had been established. The DCARB members include i): General deputy of district PC; ii) managers/deputy managers of district's Industry and Trade Division, Environmental and Natural Resource Division, Finance and Planning Division, iii) Chairman and land management officers of affected communes and 2 representatives of affected villages.

The results from site survey show that, NH217 is not the first project that need to resettle in the districts, but it is the first project which funded by OAD loan. Therefore, almost DCARB member have not fully understood on the difference between the donor's safeguard policies and Vietnam requirement. Thus monitoring consultants also indicated several differences (i) Information disclosure requirement (ii) Require compensation cost at replacement prices which leading to require an survey and the compensation replacement cost for each project; (iii) DMS and IOL; (iv) independent monitoring requirements. Full understanding on requirements of compensation implementation between donor's policies and Vietnam regulations will be very useful in RP preparation and implementation.

The DCARB members are representatives of involving departments of district, of affected communes and of the affected people. In spite of holding concurrently mechanism, the DCARB has worked very effectively in preparation of compensation plan, compensation payment, land acquisition and resolution of complaints. However, with such mechanism, the storage of compensation plan was not good. At the time, each department is responsible for storing records of their management fields only. For example, DONRE is responsible for storing documents on measurement, inventory, calculation and compensation plan while Finance and Planning department is responsible for storing vouchers and invoices of compensation payment. That may affect the accuracy of payment and cause difficulties in the internal and external monitoring.

3.2 Information disclosure

The information disclosure about the RP is particularly paid attention to as mentioned in the policy framework of the project. It is to make sure that all AHs are entitled to participating in and being consulted sufficiently. If information is disseminated well, AHs can understand thoroughly about the RP. Thus, it will reduce complaints as well as ensure progress of the project. Status of information disclosure is represented in the table below:

Table 10 Status of information disclosure implementation

No.	Content	Cam Thuy	Quan Son	Ba Thuoc
1	Project information disclosure on land acquisition	done	done	done
2	Public consultation meeting to announce compensation policy (see table below)	done	done	done
3	To post publicly compensation calculation results on commune officers and send detail result to AHHs	done	done	done

Source: District Resettlement Committee in Cam Thuy, Quan Son and Ba Thuoc

Detail information on public consultation meetings to announce compensation policy presented in the below table:

Remark: The information disclosure was sufficiently done, which included information disclosure on detail compensation plan to AHHs before submitting for

approval, which could be considered that transparency during RP preparation and implementation. Almost interviewees have been provided information about the project and compensation policies.

3.3 Checking sufficiency of the entitlements

To check sufficiency of the entitlements, the consultant focused on following issues: (1) Validity of compensation records, (2) Quantitative sufficiency of compensated assets; (3) Sufficiency of compensation cost and (4) Assistance policies.

3.3.1 Validity of compensation records

One set of compensation record include at least following papers: (1) Decision on land acquisition; (2) DMS minute; (3) Compensation calculation sheet; (4) Payment minute. To check validity of a compensation records, the consultant paid attention to the 4 above documents, sufficiency of signatures and stamps of stakeholders, validity in time order of different papers, etc. Details of the review are as follows:

Table 12: Results of checking validity of compensation record

No.	District/commune	Results of checking validity of compensation record		
		Outstanding issues	Good practices	Remarks
1	Cam Thuy district	None	<ul style="list-style-type: none"> - The records have enough types of papers mentioned above. - Valid time - Have enough signatures and stamps - Records were stored separately for every HH and bound into folders for convenient management. 	The records have been completed and stored at DCARB

Source: District Resettlement Committee in Cam Thuy, Quan Son and Ba thuoc

Through checking record, it reveals that all the compensation records were valid

3.3.2 Quantitative sufficiency of compensation assets

Checking the quantitative sufficiency of compensated assets is to ensure that all affected assets have been inventoried, measured and compensated. To check quantitative sufficiency of compensated assets, the consultant paid attention to: (1)

Comparison of quantity of inventoried assets with one in the detailed compensation plan; (2) Interview HHs on satisfied level with number of compensation assets and (3) Complaint letters on requesting supplementary inventory.

Result of checking DMS shows that all DMS minutes were clear and with sufficient signatures of stakeholders. Among those, the signatures and name of AHs have been filled clearly and sufficiently. The number of affected assets in DMS minutes is consistent with the number in detailed compensation plans. There were no complaints or suggestion letters about supplementary or insufficient inventory. In sum, the affected assets have been inventoried and calculated sufficiently in term of quantity.

3.3.3 Checking on compliance of compensation cost and assistance allowance

According to RP of compensation cost plan, affected assets must be applied by replacement cost. To check sufficiency in term of compensation cost, consultant concentrated on issues below:

(i) Legal bases for calculating compensation and assistance

Applied documents for calculating affected assets' compensation and assistance are as below:

- Decision No. 3788/2009/QĐ-UBND dated 23 October 2009 of Thanh Hoa province PC on stipulating policies of compensation, assistance and resettlement in the event of land acquisition by the State in Thanh Hoa province;
- Decision No.1745/2013/QĐ-UBND dated 28 May 2013 of Thanh Hoa province PC on replacement cost of land for land acquisition of the project Upgrading of National Highway 217 (NH217) in Quan Son district;
- Decision No.1666/QĐ-UBND dated 22 May 2013 of Thanh Hoa province PC on replacement cost of structures for land acquisition of the project Upgrading of National Highway 217 (NH217) in Quan Son district;
- Decision No.1667/QĐ-UBND dated 22 May 2013 of Thanh Hoa province PC on replacement cost of trees and crops on land for land acquisition of the project Upgrading of National Highway 217 (NH217) in Quan Son district;
- Decision No.1665/QĐ-UBND dated 22 May 2013 of Thanh Hoa province PC on approval of assistance rates for land acquisition of the project Upgrading of National Highway 217 (NH217) in Quan Son district;
- Decision Bo.1273/2013/QĐ-UBND dated 18 April 2013 of Thanh Hoa province PC on replacement cost of land for land acquisition of the project Upgrading of National Highway 217 (NH217) in Ba Thuoc district;
- Decision No.1525/QĐ-UBND dated 10 May 2013 of Thanh Hoa province PC on replacement cost of structures for land acquisition of the project Upgrading of National Highway 217 (NH217) in Ba Thuoc district;

- Decision No.1293/QD-UBND dated 22 April 2013 of Thanh Hoa province PC on replacement cost of trees and crops on land for land acquisition of the project Upgrading of National Highway 217 (NH217) in Ba Thuoc district;
- Decision No.1571/QD-UBND dated 16 May 2013 of Thanh Hoa province PC on approval of assistance rates for land acquisition of the project Upgrading of National Highway 217 (NH217) in Ba Thuoc district;

The analyses above show that the legal bases for calculating compensation and assistance are the documents (i) new documents issued in 2013, only document stipulated assistance spending issued in 2009(ii) Compensation assets based on replacement cost survey.

(ii) Comparison of compensation cost in reality with one in RP

In order to considering legal bases for calculating compensation and assistance for this project, the consultant also compared compensation cost in reality with one in RP for assessing the sufficiency of the compensation cost. Results of the comparison are as follows:

Table 13: Comparison of compensation cost in reality with one in RP

No	Assets	Comparison of compensation cost in reality with one in RP			
		In RP	In reality	Additional assistance	Legal bases
1	Residential land at K34 station- Quan Son town bridge	2.000	2.000		Decision No.1745/QD-UBND dated 28 May 2013 Decision No.3788/QD-UBND dated 18May 2013
2	Residential at Km34 – Quan Son town	1.600	1.600		
3	Agricultural land	30	30	1,5*30	
4	Perennial crop land	12	12	1,5*12	
5	Forestry land	5	5	1,5*5	
6	Aquaculture land	30	30	1,5*30	
7	Bambo	11	11		Decision No.1667/2013/QD-UBNDdated 22 May 2013
8	Additional assistance	1.000	1.000		Decision No.1665/QD-UBND dated 22 May 2013
9	Reward for progress	1.000	1.000		Decision No.1273/QD-UBND dated 16 May 2013

Source: Field Monitoring

It can be seen that compensation cost in reality is not significantly different from one in RP. In addition to compensation according to RP, HHs received assistance

allowance for shifting job that was 1.5 time of agricultural land cost. AHs interview on the difference between compensation cost and market price, 94.09% of AHs agreed on compensation cost for agricultural land, 89.56% of AHs agreed on compensation cost for trees/crops. This is the high agreement rate from AHs. For compensation cost of residential land, however, 26.23% agreed with compensation cost and 49.18% thought that compensation cost was low. Detail of HHs interview on the remark of compensation cost is as below:

Table 14: Result of interview about the disparity of compensation cost and market prices

No.	Compensation cost	Equal to market price		Acceptable		Little lower		Much lower		Do not know	
		Ans.	Share (%)	Ans.	Share (%)	Ans.	Share (%)	Ans.	Share (%)	Ans.	Share (%)
1	Residential	0	0.00	16	26.23	13	21.31	30	49.18	2	3.28
2	Agricultural land	0	0.00	239	94.09	4	1.57	11	4.33	0	0.00
3	Housing	0	0.00	8	23.53	6	17.65	18	52.94	2	5.88
4	Trees/Crops	1	0.19	463	89.56	22	4.26	29	5.61	2	0.39

Source: Field Monitoring

(iii) Comparison of compensation cost in reality with one in RP

In addition to considering legal bases for calculating compensation and assistance for this project, the consultant also compared compensation cost in reality with one in RP for assessing the sufficiency of the compensation cost. The compensation costs for land, structures, trees and annual crops are equal to the cost in RP.

Satisfactory level of AHs with compensation assistance cost: the consultant interviewed some HHs about satisfactory level with compensation assistance cost . Results shows that about 620/670 APs (equal to 88.6%) that was satisfactory with compensation assistance cost.

Through analysis above: (i) compensation cost for affected assets applied was replacement cost; (ii) compensation cost in reality was equal to price in RP; (iii) There was no complaint about price and; (vi) AHs was satisfactory about compensation cost, so the project considered that it had complied with sufficiency of compensation cost.

3.4 Compensation plan disclosure

The detail compensation plan had been announced to each AHs for checking any missing assets, reference before approval. Moreover, these plan also issued the information disclosure at public broad in all comments officers within project area. After that DCARB invited all APs to attend the information disclosure meeting and

consulted with the detail compensation plan for each AH. At this meeting, all AHs will sign on their detail compensation plan if they agree with the plan. The AHs disagreed to sign would have 15 days for consider their complains. During this time, the member of DCARB together with commune PC representative will visit these AHs house to identify, explain and complaint address. Following this mechanism which could create high transparency during preparing and approving RP and got high acceptance of local people with the detail compensation plan leading to high satisfy with compensation cost and project policy.

3.5 Checking the timeliness of the compensation

According to the RP, all affected assets must be fully compensated before the land acquisition, concretely as follows:

- Compensation for fully affected house must be done at least three months before land acquisition;
- Compensation for agricultural land must be done before the construction;
- Compensation for trees and annual crops must be done before the construction.

All the interviewees said that they have been fully compensated before the land acquisition. No interviewees had to hand over their land before receiving compensation. The analysis shows that the timeliness of the compensation was complied with.

3.6 Complaint and Complaint Address

Main complains concentrated on 3 issues: (i) Affected asset inventory that is still inefficiency;(ii) Disagree how to calculate compensation area for structure, housing that was partly affected; (iii) AHs located within the ROW land must be replaced their houses who request for replacement assistance.

+ For the AHs who missed the affected assets , the DCARBs has been carried out calculated again, finally, these APs are total agree with the results.

+ For the AHs who still disagreed with calculate method for area and physical structure which is partly affected. The DCARBs also could not decide that the remaining house structure whether safety enough or not for living, thus the DCARBs asked the Department of Civil Work and Construction for assisting.

+ For the AHs who living within the ROW, and not affected on residential land but still need to remove the house, request for replacement assistance policy. However, there is no policy for these causes, the DCARBs also sent the request to Thanh Hoa PC for further consideration.

It is quite clear that all complain cases have been considering. For such steps, it will get high agreement when detail compensation plan has submitted for approve. All complains have been resolved.

3.7 Number of relocated HHs and resettlement area

a) Number of relocated HHs

Although much mitigation measures have been taken into account during RP preparation to reduce land acquisition area, number of relocated HHs and impacts on local people but there are still a number of HHs need to relocate for project implementation.

Table 15: Number of relocated HHs

No.	District/commune	Total Affected HHs	Relocated HHs
A	Cam Thuy district	311	1
1	Cam Thuy town	63	1
2	Cam Son commune	72	0
3	Cam Phong commune	175	0
B	Quan Son district	2479	62
1	Trung Ha commune	345	4

		3271	67

Source: District Resettlement Committee in Cam Thuy, Quan Son and Ba thuoc

There are 67 relocated households. Most of them have residential land in the old village, few have bought land. All of them were building houses at the new location.

4. Conclusion

Through the RP monitoring, we can conclude that the RP implementation has been complied with the approved RP, this reveals through following issues:

1. The information disclosure of subprojects has been complied with requirements of RPs. The information disclosure has been done many times and with many types;

2. All affected assets have been inventoried, calculated and compensated for AHs. Most of interviewees participated in the DMS and signed minutes of asset inventory;
3. Compensation cost is replacement cost and has been agreed to by all AHs. Besides, the interview on satisfactory level of AHs with compensation cost also shows that almost interviewees agreed to the compensation cost;
4. Timeliness of the compensation has been complied with involuntary resettlement policies of ADB. All AHs have received full compensation before handing over the sites for the project;
5. All the problems mentioned in the last supervision was solved by DCARBs;
6. At the time, no activities involving to income restoration programs have been done in Cam Thuy district, Ba Thuoc district and Quan son district. According to officers of district Women Association, Farmer Association, Agricultural Extension Centre, Forest Extension Centre and Vocational training centre, they did not know information and their roles in the implementation of income restoration programs.

5.3. Questionnaire

QUESTIONNAIRE FOR AP INTERVIEW

Project

Type of subproject

- ☐1 With land acquisition ☐2 Without land acquisition (temporary impact)

Location:

Coupon

--	--	--	--	--

- Type of impact: Fully affected HHs and relocate to resettlement site ☐ Severely affected HHs because loss of more than 10% of agricultural land holding ☐ Partially affected HHs ☐
- Fully affected HHs and self-relocated ☐ Vulnerable group ☐ Other ☐

A – INTERVIEWING HHs WHO ARE ACQUIRED LAND (Types 1 and 2 above)

I. General information about AH

1. Name of interviewee.....
Age..... Sex ☐ Male ☐ Female Education:.....
Career: Relation with HH head:
2. Name of HH head
Age..... Sex ☐ Male ☐ Female Education:..... Career:
Address:.....
3. Number of persons living and eating together with the householder:
Of which : Male:persons female:persons
Number of persons with income persons
- Before the project implementation: Persons
Of which : Male:persons female:persons
- After the project implementation: Persons
Of which : Male:persons female:persons
4. National groups
Vietnamese ☐ Chinese ☐ Khmer ☐ Other:.....
5. Is the AH as a social policy family receiving government subsidies?
☐1 Yes ☐2 No
6. Type of impact

<input type="checkbox"/>	<i>Affected residential land and garden</i>
<input type="checkbox"/>	<i>Affected agricultural land (rice land, forest land, aquaculture land) (...% lost land area over total land holding)</i>
<input type="checkbox"/>	<i>Affected other land (specify).....</i>
<input type="checkbox"/>	<i>Partially affected house but not move</i>
<input type="checkbox"/>	<i>Fully affected house and rebuilt house on remaining land</i>
<input type="checkbox"/>	<i>Fully affected house and have to move</i>
<input type="checkbox"/>	<i>Affected shop/workshop (business, service, trade)</i>
<input type="checkbox"/>	<i>Cut crops/trees</i>
<input type="checkbox"/>	<i>Living facilities</i>
<input type="checkbox"/>	<i>Lost career, have to change career</i>
<input type="checkbox"/>	<i>Move grave</i>
<input type="checkbox"/>	<i>Other (classify).....</i>

II. Information dissemination

7. What means of communications that you received information about the project?
- | | |
|---|---|
| <input type="checkbox"/> Leaflets | <input type="checkbox"/> Officials of local authorities |
| <input type="checkbox"/> Notice board | <input type="checkbox"/> Officials of the project |
| <input type="checkbox"/> Newspaper, radio... | <input type="checkbox"/> Public meetings |
| <input type="checkbox"/> Others (detail)..... | |

- | | |
|--------------------------------|-------------------------------|
| <input type="checkbox"/> 1 Yes | <input type="checkbox"/> 2 No |
|--------------------------------|-------------------------------|

If not, the reason is:

- | | |
|---|--|
| <input type="checkbox"/> 1 Disseminated not clearly | <input type="checkbox"/> 3 Don't know who can be asked |
| <input type="checkbox"/> 2 Haven't learnt about | <input type="checkbox"/> 4 Other |

9. Have you attended public meetings about project implementation at our ward/hamlet?
- | | | |
|--------------------------------|-------------------------------|---------------------------------------|
| <input type="checkbox"/> 1 Yes | <input type="checkbox"/> 2 No | <input type="checkbox"/> 1 Don't know |
|--------------------------------|-------------------------------|---------------------------------------|

III. Asset inventory

10. Have you been informed about time of asset inventory and measurement?
- | | |
|--------------------------------|-------------------------------|
| <input type="checkbox"/> 1 Yes | <input type="checkbox"/> 2 No |
|--------------------------------|-------------------------------|
11. Did you participate in measurement and inventory of your damaged assets?
- | | |
|--------------------------------|-------------------------------|
| <input type="checkbox"/> 1 Yes | <input type="checkbox"/> 2 No |
|--------------------------------|-------------------------------|
12. Are there any of your assets not inventoried?
- | | |
|--------------------------------|-------------------------------|
| <input type="checkbox"/> 1 Yes | <input type="checkbox"/> 2 No |
|--------------------------------|-------------------------------|

If yes, then what are they?

13. Did you agree to results of the asset inventory?

☐1 Yes

☐2 No

If no, why did you not agree?

<input type="checkbox"/>
<input type="checkbox"/>
<input type="checkbox"/>
<input type="checkbox"/>
<input type="checkbox"/>
<input type="checkbox"/>

Insufficient inventory

Type of land is incorrect

Type of house is incorrect

Type of crops/trees is incorrect

Land origin is not correct

Other (specify)

14. Did you review and sign to the inventory minutes?

☐1 Yes

☐2 No

15. Did you store one copy of the minutes?

☐1 Yes

☐2 No

IV. Compensation and allowances

16. Were you consulted about compensation cost and compensation plan? Did you review your calculation sheet?

☐1 Yes

☐2 No

17. How is your assessment on compensation cost of your affected assets at the time of compensation?

		Same as market price	Acceptable	Little lower	Much lower	Do not know
		1	2	3	4	5
1	Residential land cost
