

# Regional: Support for Clean Energy Financing Partnership Facility Administration

Project Name	Support for Clean Energy Financing Partnership Facility Administration				
Project Number	48379-001				
Country / Economy	Regional				
Project Status	Closed				
Project Type / Modality of Assistance	Technical Assistance				
Source of Funding / Amount	<table><tr><td>TA 8766-REG: Support for Clean Energy Financing Partnership Facility Administration</td><td></td></tr><tr><td>Climate Change Fund</td><td>US\$ 225,000.00</td></tr></table>	TA 8766-REG: Support for Clean Energy Financing Partnership Facility Administration		Climate Change Fund	US\$ 225,000.00
TA 8766-REG: Support for Clean Energy Financing Partnership Facility Administration					
Climate Change Fund	US\$ 225,000.00				
Strategic Agendas	Environmentally sustainable growth Inclusive economic growth				
Drivers of Change	Knowledge solutions Private sector development				
Sector / Subsector	Energy / Energy efficiency and conservation - Energy utility services - Large hydropower generation - Renewable energy generation - biomass and waste - Renewable energy generation - geothermal - Renewable energy generation - small hydro - Renewable energy generation - solar - Renewable energy generation - wind				
Gender	No gender elements				
Description	The SSTA proposes to provide supplementary funding support to allow continuous resourcing of the CEFPP as a bridging solution. This involves the extension of funding for five existing consultancy positions for twelve months to allow retention of the existing CEFPP management team. Operationally, the CEFPP is administered by RSID, but the activities it funds are initiated and implemented by operational departments (ODs). The role of CEFPP is gradually widening as ADB's clean energy activity grows and more donors trust ADB to act as their advocate in managing funding support for low-carbon development. Accordingly, RSID plans to continue CEFPP operations to catalyze greater clean energy investments in the region.				
Project Rationale and Linkage to Country/Regional Strategy	This technical and administrative support has been provided to date under the umbrella of RETA 6501, however the intended term and resources of this RETA have now been exhausted. The current practice of charging an administration fee for CEFPP cost recovery does not provide funding for all aspects of funds management, including monitoring, reporting and providing technical support to user departments. For the CEFPP to continue its current operations and achieve its stated purpose as a catalyst of clean energy investments in DMCS, a new resourcing structure is required. ADB Budget, Personnel and Management Systems Department (BPMSD) is leading a working group to explore solutions for better financial trust fund management, including changing the current system of fee allocations, and setting up cost centers for fund teams to put administrative arrangements on a sustainable footing; this SSTA is proposed to bridge the gap until this new solution for resourcing funds is finalized, and to ensure CEFPP's uninterrupted operation.				
Impact	Reduced GHG emissions through expanded clean energy investments in DMCS				

## Project Outcome

Description of Outcome	Ongoing growth in ADB clean energy investment through continuing operation and administration of the CEFPP and its related activities
------------------------	---

Progress Toward Outcome

## Implementation Progress

Description of Project Outputs	(i) Fund Secretariat operations (ii) Coordinating and tracking overall CEFPP-funded activities and project progress (iii) Project assessment and processing of Fund applications (iv) Program monitoring and evaluation systems (v) Reporting (vi) Interdepartmental and external support and coordination
--------------------------------	---

Status of Implementation Progress (Outputs, Activities, and Issues)

Geographical Location	Regional
-----------------------	----------

## Summary of Environmental and Social Aspects

Environmental Aspects

Involuntary Resettlement

Indigenous Peoples

## Business Opportunities

Consulting Services	<p>The technical assistance (TA) will require input from an individual international consultant for 12 person-months and individual national consultants for 48 person-months. ADB will engage all consultants in accordance with the Guidelines on the Use of Consultants (2013, as amended from time to time). The implementing RSID Project Officer will serve as Team Leader to coordinate all inputs from all consultants under this TA.</p> <p>Terms of Reference:</p> <p>The consultants shall ensure that all works and outputs under this TA are fully compliant with ADB and Government policies and guidelines.</p> <p>a. Clean Energy Funds Management Team Leader (1 National Consultant, 12 person months). The Consultant will work in RSID to support the activities of the CEPPF, including the individual trust funds. Under the guidance of the Facility/Fund Manager or his/her designate, the Consultant will supervise team members as well as coordinate with other staff and consultants in various departments throughout ADB. The consultant is expected to hold relevant tertiary qualifications and have a minimum of five years' experience in funds management, clean energy or related fields.</p> <p>b. Clean Energy Funds Assistant Fund Manager (1 National Consultant, 12 person months). The Assistant Fund Manager will work closely with the Facility Manager, Fund Manager, and regional departments and will be responsible for the various activities related to several fund operations, budget and program monitoring, report preparation, application processing, knowledge management, and individual fund administration. The Assistant Fund Manager will also work extensively with Project Team Leaders from regional departments on the preparation, evaluation, and revision of project proposals. The consultant is expected to hold relevant tertiary qualifications and have a minimum of three years' experience in funds management, clean energy or related fields.</p> <p>c. Clean Energy Expert (1 International Consultant, 12 person months). The expert is expected to assist operations departments (ODs) and RSID in pursuing action plans directed towards the increase of clean energy investments in developing member countries (DMCs), with focus on demand side energy efficiency, in particular building and industry. The consultant is expected to hold relevant tertiary qualifications and have a minimum of eight years' experience in clean energy, energy efficiency or related fields.</p> <p>d. Financial Control Expert (1 National Consultant, 12 person months). The Financial Control Expert will be recruited to oversee the Facility's financial transactions and maintain a financial management system in a manner that is compliant with generally accepted accounting principles and harmonized with ADB's policies and procedures in close coordination with concerned offices within ADB (e.g., CTL, OAS). The Financial Control Expert will report to the Facility Manager, Alternate Facility Manager, and Energy Specialist of the Sustainable Infrastructure Division (RSID). The consultant is expected to hold relevant tertiary qualifications and have a minimum of three years' experience in funds management, financial control or related fields.</p> <p>e. Results Management Expert (1 National Consultant, 12 person months). The Results Management Expert will work in RSID to support the activities of CEPPF reporting to the Facility/Fund Manager, or his/her designate. The consultant is expected to hold relevant tertiary qualifications and have a minimum of three years' experience in finance, funds management, monitoring and evaluation or related fields.</p>
