

# India: Restoration and Diversification of Livelihoods for Tsunami Affected Poor & Marginalized People in the states of Tamil Nadu and Kerala

Project Name	Restoration and Diversification of Livelihoods for Tsunami Affected Poor & Marginalized People in the states of Tamil Nadu and Kerala		
Project Number	39490-012		
Country / Economy	India		
Project Status	Closed		
Project Type / Modality of Assistance	Grant		
Source of Funding / Amount	Grant 9094-IND: Restoration and Diversification of Livelihoods for Tsunami Affected Poor & Marginalized People in the states of Tamil Nadu and Kerala		
	Japan Fund for Prosperous and Resilient Asia and the Pacific	US\$ 5.00 million	
Strategic Agendas	Environmentally sustainable growth		
Drivers of Change			
Sector / Subsector	Multisector / Multisector		
Gender			
Description	The purpose of the project is to restore and diversify the livelihoods of the Tsunami-affected poor and marignalised people in the states of Tami Nadu and Kerala. The key project components are (i) set up a fully serviced model fishing village complex to help tsunami-affected members of the fishing community and others, whose livelihoods are closely linked to fishing community activities; (ii) create value addition to the seafood and related produce and establish market links for a long-term sustainable income-generating program for tsunami-affected poor in the vicinity; (iii) pilot new approaches through infusion of technologies in sustainable income-generating activities and develop opportunities for alternative livelihoods; and (iv) introduce livelihood activities that reduce vulnerability to natural disasters.		
Project Rationale and Linkage to Country/Regional Strategy	The TEAP and JFPR were prepared following the request by the States and the Indian government. While disaster projects are not part of ADB's country plans or pipeline for projects, the project was developed in accordance with the overall framework and policies of the India, the States and ADB.		
Impact	Diversify and accelerate restoration of livelihood of poor and marginalized people in tsunami affected areas of Kerala and Tamil Nadu, by introducing new ideas and approaches to traditional fisheries-related activities.		
Project Outcome			
Description of Outcome	Restoration and diversification of livelihoods for Tsunami affected poor and marginalized people in the states of Tamil Nadu and Kerala.		
Progress Toward Outcome	The JFPR project helped 20,259 beneficiaries, as against an initial target of 8,000 beneficiaries, in the two states.		
Implementation Progress			
Description of Project Outputs	1. To set up a model fishing village complex with all amenities to organize the post harvest activities on shore; 2. Development of varied alternative livelihood activities; and 3. Support establishment of environment friendly fish breeding activities.		
Status of Implementation Progress (Outputs, Activities, and Issues)	JFPR agreements with States and Gol were signed in Oct 06 and GIM (Grant Implementation Manual) approved by both states. The project closed on 6 October 2010. Mid-way through the project implementation, the scope for the project was changed and funds were reallocated from Component A: Model Fishing Village to expand the scope of other components on account of no takers for the model fishing village and the high demand from the vulnerable communities for alternate income generation activities. At the time of project closing, the commitment was \$2.58 million (51.6%) and disbursements stood at \$1.68 million (33.5%). In Tamil Nadu, the model village fish processing complex under Component A was dropped. Under Component B, alternate livelihood activities, 24 subprojects were taken up for a value of \$0.87 million and expenditure incurred. Under Component C, environment friendly fish breeding activities, 9 subprojects amounting to \$0.40 million were successfully implemented. Project management, monitoring and audit, amounting to \$0.14 million were used under the Component D. In Kerala, for alternative livelihood activities under Component B, 11 subprojects for a value of \$0.81 million and 5 subprojects under Component C, environment friendly fish breeding activities, amounting to \$0.26 million were implemented. Under Component D for project management, monitoring and audit, an amount of \$0.11 million was spent.		
Geographical Location			
Summary of Environmental and Social Aspects			
Environmental Aspects	The JFPR designs incorporates the environmental and social safeguards of the states, India and ADB. All subprojects developed under the JFPR will undergo the initial check list for environmental impact, initial social surveys and evaluation and a check to see if any indigenous peoples are involved or affected. If there are any impact these would be mitigated through environmental management plans or resettlement plans as required. Since the livelihood programs tend to be small in terms of physiscal impact, no adverse environmental impact are expected. The social impact will be positive, will be inclusive of all types of peoples affected by the tsunami, with emphasis on the poor, the stressed and women and children.		
Involuntary Resettlement	The JFPR designs incorporates the environmental and social safeguards of the states, India and ADB. All subprojects developed under the JFPR will undergo the initial check list for environmental impact, initial social surveys and evaluation and a check to see if any indigenous peoples are involved or affected. If there are any impact these would be mitigated through environmental management plans or resettlement plans as required. Since the livelihood programs tend to be small in terms of physiscal impact, no adverse environmental impact are expected. The social impact will be positive, will be inclusive of all types of peoples affected by the tsunami, with emphasis on the poor, the stressed and women and children.
