## Project Outcome

Description of Outcome	ADB is able to respond in an expedient manner once the damage and loss assessment findings are finalized by the Government, and ADB staff design the support mechanisms to facilitate reconstruction
Progress Toward Outcome	The Java Reconstruction Fund (JRF) was established in 2006 at the request of the Government of Indonesia (GOI). The successful reconstruction of Java following the disasters in May and July 2006 is widely recognized for its remarkable achievements. The Java Reconstruction Fund (JRF) has played a key role in this recovery, supporting the Government of Indonesia (GOI) in its efficient and effective management of the post-disaster reconstruction. When Mount Merapi erupted in October 2011, the JRF provided the Government's first and most significant response to the disaster.

## Implementation Progress

Description of Project Outputs	The fund can coordinate international resources around common objectives, avoid duplication of effort, create synergies and reduce transaction costs for both donors and the recipient
--------------------------------	--

Status of Implementation Progress (Outputs, Activities, and Issues)	The JRF will continue its commitment to support the post-disaster recovery of communities in Java until its closing.

## Stakeholder Communication, Participation, and Consultation

During Project Design

During Project Implementation	The Java Reconstruction Fund (JRF) continues to engage its stakeholders through various communications and outreach activities. Those activities intensified during this reporting period due to ramping up activities in Merapi affected areas and winding down the Livelihoods Recovery projects. Most communication and outreach efforts have been conducted to ensure high participation and community ownership of project activities, or for livelihood projects, to further fine tune exit strategies.
