Description							
Project Rationale and Linkage to Country/Regional Strategy	The project is included in the Country Operation and Business Plan of 2008.						
Impact	The impact would be a more sustainable rural road sector based on a sound core network with good accessibility to markets and other social services, and an efficient and sustainable road maintenance regime.						
Project Outcome							
Description of Outcome	The outcome of the proposed TA will be to rehabilitate and pave, with a single seal surface treatment, about 500 km of unpaved rural roads, and assist the MRD in establishing an effective and sustainable periodic and routine maintenance management program for the rural roads network. It will also assist MRD to strengthen its road asset management capacity while building the capacity of local private sector contractors in undertaking rural road maintenance works, and mitigating natural disasters in disaster prone areas, predominantly due to frequent floods, to minimize the damage to the road network.						
Progress Toward Outcome							
Implementation Progress							
Description of Project Outputs	The outputs of the TA will be the agreed project design and feasibility study for a priority network of rural roads of about 500 km in length, selected on a screening criteria based on ADB's strategy of geographical focus, supporting the already financed projects of other relevant sectors, completed or nearing completion, and MRD's priority for rehabilitation under the Government's development priorities.
