Description	The purpose of the TA is to identify ways to improve domestic maritime transport; and develop a project for possible ADB financing, including (i) required facilities to facilitate maritime transport; and (ii) technical, institutional, and policy solutions for improving the safety, efficiency and accessibility of the existing maritime transport system. It will also identify a sustainable and effective delivery mechanism for maintaining the proposed facilities; technical, organization, institutional and human resources improvements for efficient transport services; and cost recovery/subsidy mechanisms that will enable effective and consistent operation and maintenance of facilities and vessels. The TA will provide a feasibility study of the project from the engineering, economic, social, and environmental points of view in accordance with ADB guidelines.

Consulting Services	A multidisciplinary team of consultants will provide a total input of 45 person-months of consulting services: 15 international and 30 domestic. Both international and domestic consultants will have expertise in: (i) transport planning/economics, (ii) maritime/coastal engineering, (iii) financial analysis in transport, (iv) social analysis and resettlement, and (v) environmental assessment. The team of consultants, from an international consulting firm in association with domestic consultants, will be selected and engaged by ADB using ADB's quality- and cost-based selection procedures and in accordance with its Guidelines on the Use of Consultants (using the simplified technical proposal procedure) and other arrangements satisfactory to ADB for engaging domestic consultants. The team leader will work in the Maldives for the whole duration of the project assignment.
