Regional: Scoping of Community Resilience Partnership Program

Project Name

Scoping of Community Resilience Partnership Program

Project Number

53142-001

Country / Economy

- Regional

Project Status

Closed

Project Type / Modality of Assistance

- Technical Assistance

Source of Funding / Amount

TA 9728-REG: Scoping of Community Resilience Partnership Program

Source

Amount

Integrated Disaster Risk Management Fund US\$ 225,000.00

TA 9728-REG: Scoping of Community Resilience Partnership Program

Source

Amount

Integrated Disaster Risk Management Fund US\$ 150,000.00

Strategic Agendas

- Environmentally sustainable growth
- Inclusive economic growth

Drivers of Change

- Gender Equity and Mainstreaming
- Governance and capacity development
- Knowledge solutions
- Partnerships

Sector / Subsector

- **Public sector management** / Decentralization

Gender

Some gender elements

Description

ADB is developing the Community Resilience Partnership Program (CRPP) to support ADB's developing member countries (DMCs) scale up resilience investments (i) targeted at the poor and marginalized population; (ii) implemented at the local level (household, communities, small and micro enterprises, and local governments); and

(iii) in the context of wider inclusive development and governance reforms. CRPP is envisioned as a partnership between ADB and a wide range of development partners to collectively support DMCs in scaling up their resilience-building investments at the local level. The implementation of CRPP will support DMCs in achieving their commitments to global agreements: the 2030 Agenda for Sustainable Development, the Paris Agreement of Climate Change, and the Sendai Framework for Disaster Risk Reduction. The CRPP is aligned with the priorities of ADB's Strategy 2030, which aims at eradicating extreme poverty and achieving a prosperous, inclusive, resilient, and sustainable Asia and the Pacific. It will support strengthening linkages between operational priority 3 of the Strategy 2030--tackling climate change, building climate and disaster resilience, and enhancing environmental sustainability--with other operational priorities such as addressing remaining poverty and reducing inequalities, accelerating progress in gender equality, making cities more livable, promoting rural development and food security, and strengthening governance and institutional capacity. The TA will undertake a scoping exercise for establishing the CRPP, directly aligning with the ongoing discussion at the global level to introduce an action track on local resilience under the Global Commission on Adaptation.

Project Rationale and Linkage to Country/Regional Strategy

The Asia and the Pacific Region is extremely vulnerable to the impacts of climate change and disaster risk. Prolonged heat waves, coastal sea-level rise, changes in rainfall patterns, and increase in intensity and frequency of extreme weather events are affecting the lives of millions of populations, especially the poor and marginalized people whose livelihoods are often dependent on climate-sensitive sectors. The vulnerabilities in these sectors are increasing due to changes in climate variables, often requiring the poor to adopt different coping strategies (i.e., reducing consumption levels and making investment choices on education, health, and livelihoods) that may impact their long-term well-being. Thus, if efforts to reduce poverty are to be sustained, increasing investments in resilience should be one of the core strategies of poverty reduction.

Climate and disaster risks are set to increase. With rampant and unplanned development taking place in many countries, more communities are being exposed to natural hazards. Informal urban settlements are often located in unsafe areas and lack access to infrastructure and social services. Poorer rural communities, which often live close to subsistence levels, are already struggling with existing changes in weather patterns. Investments in resilience, therefore, need to reach scale, which may entail a combination of actions: increased organizational capacity, finances, linkages with interventions across sectors, and partnerships.

Impact

Investments in building resilience of the poor and marginalized population increased at the local level.

Project Outcome

Description of Outcome

Community Resilience Partnership Program (CRPP) established

Progress Toward Outcome

Implementation Progress

Description of Project Outputs

Scoping paper for CRPP finalized

National consultation for rolling out CRPP implementation in selected DMCs undertaken

Status of Implementation Progress (Outputs, Activities, and Issues)

Geographical Location

Regional

Summary of Environmental and Social Aspects

Environmental Aspects

Involuntary Resettlement

Indigenous Peoples

Stakeholder Communication, Participation, and Consultation

During Project Implementation

Business Opportunities

Consulting Services

The TA will be implemented by ADB's Climate Change and Disaster Risk Management Division of the Sustainable Development and Climate Change Department from April to December 2019. The TA will utilize 8 person-months of consultant inputs to be provided by 3 international consultants and 1 national (PHI) consultant. All consulting services will be engaged by ADB as individuals and on output-based (lump-sum) contracts. Advanced contracting procedures are proposed for engaging the consultants. ADB will engage the consultants following the ADB Procurement Policy (2017, as amended from time to time) and its associated project administration instructions and/or staff instructions.
