China, People's Republic of: Policy and Systems of Synergistically Reducing Pollution and Carbon Emissions in Industry in the Yellow River Basin

Project Name

Policy and Systems of Synergistically Reducing Pollution and Carbon Emissions in Industry in the Yellow River Basin

Project Number

54026-017

Country / Economy

- China, People's Republic of

Project Status

Active

Project Type / Modality of Assistance

- Technical Assistance

Source of Funding / Amount

TA 10208-PRC: Policy and Systems of Synergistically Reducing Pollution and Carbon Emissions in Industry in the Yellow River Basin

Source

Amount

Technical Assistance Special Fund US\$ 300,000.00

Operational Priorities

- OP3: Tackling climate change, building climate and disaster resilience, and enhancing environmental sustainability
- OP5: Promoting rural development and food security

Sector / Subsector

- **Agriculture, natural resources and rural development** / Agricultural policy, institutional and capacity development - Rural water policy, institutional and capacity development - Water-based natural resources management

Gender

Some gender elements

Description

The technical assistance (TA) subproject supports the cluster TA 0048-PRC: Strengthening Capacity, Institutions, and Policies for Enabling High-Quality, Green Development in the Yellow River Ecological Corridor (YREC) of the Asian Development Bank. The YREC program is a multisector programmatic approach that supports the goals of the People's Republic of China's Yellow River Basin (YRB) Ecological Protection and High-quality Development Program, 2021-2035, to prioritize ecological protection and promote high-quality green development in the YRB. The TA cluster has the

following outcome: high-quality, green development opportunities in the YRB increased. The TA cluster comprises a series of subprojects, each focused on different aspects of river basin management, to help achieve the aims of the YREC program. The TA cluster was approved on 28 October 2020. So far, thirteen subprojects have been approved under the TA cluster of which one has been completed and financially closed and twelve are under implementation, and three subprojects will be approved within 2023. The overall TA cluster amount is \$4.782 million, of which \$4.632 million is financed on a grant basis from the Technical Assistance Special Fund (TASF-other sources) of ADB and \$.15 million from the Climate Change Fund.

Project Rationale and Linkage to Country/Regional Strategy

The impact of the TA subproject is aligned with the overall impact of the TA cluster: resilient ecological protection and security in the YRB achieved. The TA cluster subproject will have the following outcome: water efficiency improved through enabling policies, standards, and demonstrative cases.

Impact

Resilient ecological protection and security in the YRB achieved (PRC's Outline of the Rural

Vitalization Plan, 2018-2022; ADB Strategy 2030

Project Outcome

Description of Outcome

Water efficiency improvement on policies, standards, and demonstrative cases developed.

Progress Toward Outcome

Implementation Progress

Description of Project Outputs

Policies for industrial water efficiency enforced

Standards for industrial water efficiency improved

Demonstrative industrial water efficiency model promoted

Capacity development and knowledge sharing on industrial water efficiency

Status of Implementation Progress (Outputs, Activities, and Issues)

Geographical Location

Nation-wide
