

Kyrgyz Republic: Community-Based Infrastructure Services Sector

Project Name	Community-Based Infrastructure Services Sector								
Project Number	31197-013								
Country	Kyrgyz Republic								
Project Status	Closed								
Project Type / Modality of Assistance	Loan								
Source of Funding / Amount	<table border="1"> <tr> <td colspan="2">Loan 1742-KGZ: Community-Based Infrastructure Services Sector</td> </tr> <tr> <td>concessional ordinary capital resources lending / Asian Development Fund</td> <td>US\$ 36.00 million</td> </tr> <tr> <td colspan="2">TA 3452-KGZ: Community-Based Infrastructure Services Sector</td> </tr> <tr> <td>Japan Special Fund</td> <td>US\$ 650,000.00</td> </tr> </table>	Loan 1742-KGZ: Community-Based Infrastructure Services Sector		concessional ordinary capital resources lending / Asian Development Fund	US\$ 36.00 million	TA 3452-KGZ: Community-Based Infrastructure Services Sector		Japan Special Fund	US\$ 650,000.00
Loan 1742-KGZ: Community-Based Infrastructure Services Sector									
concessional ordinary capital resources lending / Asian Development Fund	US\$ 36.00 million								
TA 3452-KGZ: Community-Based Infrastructure Services Sector									
Japan Special Fund	US\$ 650,000.00								
Strategic Agendas	Environmentally sustainable growth								
Drivers of Change	Governance and capacity development Knowledge solutions								
Sector / Subsector	Agriculture, natural resources and rural development - Rural flood protection - Rural sanitation - Rural water policy, institutional and capacity development - Rural water supply services Health - Health sector development and reform Transport - Road transport (non-urban) Water and other urban infrastructure and services - Urban sewerage - Urban water supply								
Gender Equity and Mainstreaming	Effective gender mainstreaming								
Description	The main objective of the proposed Project is to improve the living and health conditions in selected rural and urban communities, in particular for the poor population, through the provision of safe and adequate water supply and proper sanitation, and improvement of flood control/drainage facilities and local roads. The Project is aimed to achieve its objective by (i) improving the capacity of the Central and Local Governments in the delivery of the infrastructure services; (ii) supporting sanitation and hygiene education; (iii) improving the technical and financial capability of local governments and Vodokanals (urban water and sewerage agencies) in the planning, implementation, and O&M of facilities; and (iv) promoting ownership and community management of both rural and urban community-based infrastructure services. The Project consists of two parts: Part A: Physical Infrastructure; and Part B: Institutional Development.								
Project Rationale and Linkage to Country/Regional Strategy	Inadequate delivery of infrastructure services due to fiscal difficulties, aging infrastructure, and institutional constraints, is affecting both urban and rural communities getting access to basic infrastructure services such as water supply, sanitation, flood control, drainage, and roads that are often poorly designed and inadequately maintained. Accordingly, there is a pressing need to improve these basic infrastructure facilities. There is also a need to build the capacity of the sector agencies concerned to enable them to implement subprojects and to develop their ability to undertake operation and maintenance of the constructed systems. In line with the Government's policy using a decentralized community management approach, the Project will enhance the coverage of basic infrastructure facilities, contribute to improving living and health conditions, in particular for the poor population, and improve the institutional, organizational and managerial capabilities of the sector agencies. Inadequate delivery of infrastructure services due to fiscal difficulties, aging infrastructure, and institutional constraints, is affecting rural communities_ access to basic infrastructure services such as water supply, sanitation, flood control, drainage, and roads. There is a pressing need to improve these basic infrastructure facilities, and to build the capacity of the sector agencies concerned to implement subprojects and develop local capacity to operate and maintain the constructed systems. In line with the Government's policy of using a decentralized community management approach, the Project will enhance the coverage of basic infrastructure facilities, contribute to improving living and health conditions, in particular for the poor, and improve the institutional, organizational and managerial capabilities of the sector agencies.

Business Opportunities

Consulting Services

The Project will require 67 person-months international and 779 person-months domestic consulting services for assistance with (i) preparation of technical and socioeconomic surveys, and feasibility studies; (ii) review of technical studies; (iii) preparation of detailed engineering designs and contract documents; (iv) supervision of construction; and (v) preparation and implementation of the capacity-building program. Advance action on recruitment of consultants was approved.

Procurement

The procurement of goods and services financed under the Bank loan will be undertaken in accordance with the Bank's Guidelines for Procurement. International competitive bidding (ICB) procedures will be applied for supply contracts estimated to cost the equivalent of \$500,000 or more. Supply contracts with a value less than \$500,000 equivalent will follow international shopping procedures, except for supply contracts with a value of less than \$50,000 equivalent, which may be procured by direct purchase. Local competitive bidding procedures will be applied for civil works contracts are valued at less than \$2.0 million each.
