Strategic Agendas
- Environmentally sustainable growth
- Inclusive economic growth

Drivers of Change
- Governance and capacity development

Sector / Subsector
- Agriculture, natural resources and rural development - Irrigation

Gender Equity and Mainstreaming

Description
The TA aims to support effective startup and implementation of the associated Assam Integrated Flood and Riverbank Erosion Risk Management Investment Program (AIFRERMIP) through provision of capacity strengthening of the State Government of Assam (SGOA) and relevant institutions of the Government of India (the Government) in comprehensive flood risk management (FRM) and community-based approach to this end. The TA includes 2 components. The first component will put into operation the institutional mechanisms for community-based flood risk management, and the second component will support the operationalization of all other elements of the comprehensive FRM pursued under AIFRERMIP.

Project Rationale and Linkage to Country/Regional Strategy
TA is provided in association with the associated MFF for AIFRERMIP. Please refer to the Project Information Document for the MFF.

Impact
Enhanced resilience against flood and river erosion risk

Project Outcome

<table>

<tr>
<th>Description of Outcome</th>
<th>Enhanced capacities of the concerned FRM institutions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Progress Toward Outcome</td>
<td>TA activities were implemented satisfactorily with the participation of concerned project staff, consultants and the EA. TA consultants supported the EA of the associated Loan 2684 from August 2011 to Dec 2014. Throughout TA implementation, it was affected by the slow implementation progress of the associated loan project necessitating an extension of the TA implementation period until 31 December 2014.</td>

Stakeholder Communication, Participation, and Consultation

During Project Design
The Project is included in the TA Cluster for Advanced Project Preparedness for Poverty Reduction (approved on 31 August 2009). The design of the Project was discussed with the Government of India and State Government of Assam during the appraisal follow-up mission of the associated AIFRERMIP. The need for capacity development has also been stressed during the stakeholder workshops held at the time of loan project preparation in 2007-2009.

During Project Implementation
(i) State-level workshops are held at inception stage (for discussion of the approaches for the AIFRERMIP) and TA completion stage (for discussion of the performance and lessons) for community-based flood risk management; and  
(ii) Continuous communication with FREMAA, WRO and other stakeholders have been maintained.
The C-TA subproject was expected to be implemented from August 2011 to June 2012. TA implementation period had been extended until 30 June 2014. ADB recruitment of 11.5 and person-months of international and national individual consultants, respectively, covering the areas of river engineering, flood management, morphology, community disaster risk management, training, procurement, and social safeguards has been completed. All consultants were engaged individually by ADB in consultation with the Government and AIFRERM, and following ADB's Guidelines on the Use of Consultants for selecting and engaging national consultants. The engagement of individual consultants aimed to mobilize best qualified experts who can contribute to the implementation of the specific technologies and best practices to be put into operation under the AIFRERMIP. The consultants has prepared a synthetic consolidated inception report, and providing quarterly progress briefs. During TA implementation, the consultants will organize (i) state level workshops at inception stage (for discussion of the approaches for the AIFRERMIP) and TA completion stage (for discussion of the performance and lessons) for CBFRM, and (ii) state and national level expert advisory group meetings on FRM knowledge base and new technologies on a half yearly basis, and workshops at inception and TA completion stages.

The C-TA will procure office equipment (photocopying and fax machines and network facilities) for use of TA consultants during TA implementation, and which will be turned over to the project management office on TA completion.
