## Project Name
Improving Ecological Protection and Poverty Alleviation Outcomes of the Rare-Earth Sector in Jiangxi Province

### Project Number
51013-001

### Country
China, People's Republic of

### Project Status
Active

### Project Type / Modality of Assistance
Technical Assistance

### Source of Funding / Amount
TA 9480-PRC: Improving Ecological Protection and Poverty Alleviation Outcomes of the Rare-Earth Sector in Jiangxi Province  
Technical Assistance Special Fund  
US$ 400,000.00

### Strategic Agendas
- Environmentally sustainable growth
- Inclusive economic growth

### Drivers of Change
- Governance and capacity development  
  Knowledge solutions

### Sector / Subsector
- Agriculture, natural resources and rural development  
  Agricultural policy, institutional and capacity development

### Gender Equity and Mainstreaming
- Some gender elements

### Description
The proposed knowledge and support technical assistance (TA) will support improved integration of poverty alleviation and ecological protection efforts in Jiangxi Province of the People's Republic of China (PRC). It will explore the influence of the rare-earth mineral sector on poverty alleviation and environmental outcomes in Jiangxi Province, and prepare policy recommendations for improved integration of poverty alleviation and ecological protection efforts in the province, with Ganzhou Prefecture as focal area. The TA is aligned with the following impact: the PRC's supporting system for poverty alleviation improved. The TA will have the following outcome: poverty alleviation and environmental protection policies in Jiangxi Province improved.

### Project Rationale and Linkage to Country/Regional Strategy
Rural poverty is widespread in Jiangxi Province, with 25 counties included in the national list of identified poverty-stricken counties, including much of the Luoxiao Mountains' contiguous area. Poverty alleviation is high on the agenda of the Jiangxi Provincial Government, as part of national efforts under the Thirteenth Five-Year Plan (2016-2020). However, efforts have focused heavily on development of resource-intensive industries as engines for increasing economic growth. The mineral sector is a major contributor to Jiangxi Province's economy, with rare-earth extraction and processing the most significant subsector. While development of these natural capital assets has provided opportunities for economic growth, there are increasing problems of water pollution, biodiversity loss, erosion, and deteriorating agricultural productivity. Economic performance has masked the negative impacts of pollution and degradation of natural capital. Such development is unsustainable, limits economic prosperity over the longer term, and is contrary to the PRC's broader goals of building an ecological civilization.

This TA will explore the influence of the rare-earth mineral sector on poverty alleviation and environmental outcomes in Jiangxi Province, and prepare policy recommendations for improved governance, environmental performance, and poverty alleviation outcomes in Ganzhou, Jiangxi, prepared.

### Impact
The People's Republic of China's supporting system for poverty alleviation improved

### Project Outcome
**Description of Outcome**
Poverty alleviation and environmental protection policies in Jiangxi Province improved

### Progress Toward Outcome
**Implementation Progress**
Socioeconomic influence of rare-earth industries and opportunities to improve poverty alleviation outcomes in Ganzhou, Jiangxi identified

Environmental impacts of rare-earth industries and opportunities to improve environmental performance, remediation, and financing mechanisms in Ganzhou, Jiangxi identified

Rare-earth industrial structure and regulatory mechanisms in Ganzhou, Jiangxi examined

Policy recommendations for improved governance, environmental performance, and poverty alleviation outcomes in Ganzhou, Jiangxi prepared

**Status of Implementation Progress (Outputs, Activities, and Issues)**
The TA became effective on 12 January 2018 and the consulting firm was mobilized in May 2018. The inception phase has been completed. A minor change in scope and implementation arrangements was approved in November 2018. The consultants' terms of reference and TA implementation schedule were revised based on this minor change. The consultants' contract termination date and TA completion date were also revised in accordance with the revised TA implementation schedule.

### Geographical Location
Nation-wide, Ganzhou, Ganzhou, Ganzhou

### Summary of Environmental and Social Aspects

#### Environmental Aspects

#### Involuntary Resettlement
Indigenous Peoples

Stakeholder Communication, Participation, and Consultation

During Project Implementation

Business Opportunities

Consulting Services

The Asian Development Bank (ADB) will administer and coordinate implementation of the TA through the East Asia Department and will work closely with the Jiangxi Provincial Government through the Jiangxi Committee of the Chinese People’s Political Consultative Conference (JPPCC), which will be both the executing and implementing agencies of the TA. ADB will engage a consulting firm following the ADB Procurement Policy (2017, as amended from time to time) and the associated project administration instructions and/or technical assistance instructions. It is anticipated that the knowledge and support technical assistance (TA) will require 21 person-months of consulting services, comprising at least three national and two international consultants. Areas of expertise required will include minerals industry analysis, policy and regulation, socioeconomic analyses, and environmental economics. These consultants will be engaged by ADB in accordance with the Procurement Policy (2017, as amended from time to time) using the quality- and cost-based selection method, with a quality cost ratio of 90:10 given the high technical complexity. It is anticipated that the consultants will be mobilized during the first quarter of 2018.
