**Description**
Shaanxi Province is located at the center of the PRC and neighbors eight provinces. Its capital, Xi'an City, is a gateway to the Silk Road Economic Belt and designated as a national logistics node city, expected to function as a hub for the Belt and Road Initiative (BRI). Xi'an is currently the 8th most congested city in the PRC, with an urban population of 6.5 million. As the BRI is implemented, Xi'an is expected to grow substantially. As the city has grown geographically, peripheries of the existing logistics facilities are being incorporated into urban areas resulting in the increased movement of freight traffic through urban areas, compounding the city's congestion problems and negatively affecting the city's livability and environment. The project will demonstrate integrated and comprehensive logistics development through improving: (i) cold supply chain, (ii) urban-rural logistics, (iii) bulk agricultural commodity supply chain, (iv) logistics information technology, and (v) small- and medium-sized enterprises strengthening.

**Project Rationale and Linkage to Country/Regional Strategy**
The project aims to assist Shaanxi Province in developing comprehensive and demonstrative logistics and supply chain management solution to foster green, sustainable, and inclusive economic development and integration with global supply chain.
