### Project Name
Support for Innovation and Technology Partnerships in Asia and the Pacific - Capturing and Sharing Technology Innovation Knowledge (Subproject 1)

### Project Number
52307-002

### Country
Regional

### Project Status
Active

### Project Type / Modality of Assistance
Technical Assistance

### Source of Funding / Amount
**TA 9691-REG: Support for Innovation and Technology Partnerships in Asia and the Pacific - Capturing and Sharing Technology Innovation Knowledge (Subproject 1)**

Technical Assistance Special Fund

US$ 400,000.00

---

#### Strategic Agendas
Inclusive economic growth

#### Drivers of Change
Governance and capacity development
Knowledge solutions
Private sector development

#### Sector / Subsector
Energy - Energy sector development and institutional reform

#### Gender Equity and Mainstreaming
No gender elements

#### Description
The subproject will have the following outcome: ADB innovation knowledge sharing enabled. This TA subproject will assess which innovation ecosystem elements need to be strengthened to allow for faster adoption of new technologies in selected sectors and themes in DMCs. This requires a good understanding of the innovation landscape and the emerging issues in the sectors and themes supported by the TA cluster. It also requires proactive knowledge sharing related to existing technology innovations, and their successes and failures complemented and reinforced by an open debate among experts from DMCs, technology providers and development partners. ADB's current and innovative approach to knowledge sharing could reach a broader group of stakeholders, including technology entrepreneurs. This subproject will help the TA cluster to support knowledge engagements with technology providers to advance HLT innovations in DMCs.

#### Project Rationale and Linkage to Country/Regional Strategy
The goal of the innovative knowledge sharing approach supported under this subproject, is to inspire action for innovation inside and outside of ADB. The objective is to innovate around the way ADB is sharing tacit knowledge. It means moving to a more engaging approach which creates interaction between ADB and the audience in DMCs. For example, sharing knowledge with case studies using a digital first' approach is not about pasting text into a template. Digital stories need to seamlessly incorporate graphics, text, video and photographs into a coherent narrative that both engages and moves the viewers. The knowledge sharing approach will also focus on constant monitoring of data on website traffic, preferences, feedback, trends and audience' appetites and interest, which then acts as the platform for creating real-time second-stage engagements, meetups, seminars, workshops and hackathons. These engagements themselves are opportunities for creating more content and keeping the innovation stories going and growing.

#### Impact
Use of advanced and innovative technologies across ADB operations promoted and capacity-building support to DMCs provided

---

#### Project Outcome
- **Description of Outcome**: ADB innovation knowledge sharing enabled
- **Progress Toward Outcome**: ADB innovation knowledge sharing enabled

#### Implementation Progress
- **Description of Project Outputs**: Development challenges susceptible to technology innovations defined
- Tacit knowledge related to high-level technology innovations captured and shared
- ADB online innovations community developed

#### Geographical Location
Regional

#### Summary of Environmental and Social Aspects

During Project Implementation

Business Opportunities

Consulting Services

Individual consultants will be recruited to support the implementation of TA activities. A total of 20 person-months of individual consulting services (14 person-months of international consulting inputs and 6 person-months of national consulting inputs) will be engaged following the ADB Procurement Policy (2017, as amended from time to time) and its associated project administration instructions and/or staff instructions. Output-based and/or lump-sum contracts will be considered, but time-based contracts will be used as appropriate.
