| Source of Funding / Amount | Loan 3792-INO: Emergency Assistance for Rehabilitation and Reconstruction  
Ordinary capital resources  
US$ 109.75 million  
Loan 3793-INO: Emergency Assistance for Rehabilitation and Reconstruction  
Ordinary capital resources  
US$ 188.00 million |
| Strategic Agendas | Environmentally sustainable growth  
Inclusive economic growth |
| Drivers of Change | Governance and capacity development  
Knowledge solutions  
Partnerships |
| Sector / Subsector | Agriculture, natural resources and rural development  
Irrigation  
Rural water supply services  
Water-based natural resources management  
Education - Education sector development  
Transport - Air transport - Water transport (non-urban)  
Water and other urban infrastructure and services  
Urban water supply |
| Gender Equity and Mainstreaming | Effective gender mainstreaming |
| Description | In line with the Master Plan for Recovery and Reconstruction for Central Sulawesi (the Master Plan), the Emergency Assistance for Rehabilitation and Reconstruction (EARR) will support the Government of Indonesia in building back better critical infrastructure damaged by the devastating disasters in Central Sulawesi Province in September 2018, where a 7.4-magnitude earthquake triggered a near-field tsunami, landslides, and major liquefaction. |
| Project Rationale and Linkage to Country/Regional Strategy | The Emergency Assistance for Rehabilitation and Reconstruction (EARR) respond to the government's formal request to the Asian Development Bank (ADB), for the rehabilitation and reconstruction of critical infrastructure in Central Sulawesi. The EARR contributes to the objectives of ADB's country partnership for Indonesia, 2016-2019. It is consistent with the operational priorities of ADB's Strategy 2030 - poverty alleviation, gender equality, and promoting rural development and food security. The EARR also promotes a stronger, faster and integrated response based on prior experience and knowledge of disaster response approaches, and is delivered through a One ADB Team. |
| Impact | Socioeconomic impact of disasters reduced |
| Project Outcome | |
| Description of Outcome | Access for affected people, including women and children, to resilient and inclusive infrastructure restored |
| Progress Toward Outcome | |
| Implementation Progress | |
| Description of Project Outputs | Human settlement infrastructure constructed, rehabilitated, and upgraded  
Water resource infrastructure constructed, rehabilitated, and upgraded  
Ports rehabilitated and reconstructed  
Airport rehabilitated and reconstructed |
| Status of Implementation Progress (Outputs, Activities, and Issues) | |
| Geographical Location | Central Sulawesi |
| Safeguard Categories | |
| Environment | B |
| Involuntary Resettlement | B |
| Indigenous Peoples | B |
| Summary of Environmental and Social Aspects | An environmental assessment and review framework (EARF) was prepared and disclosed on 29 May 2019, following ADB's Safeguard Policy Statement as well as government laws and regulations. Subprojects in protected areas, including those either legally protected or officially proposed for protection, will not be considered. Initial environmental examinations and environmental management plans will be prepared consistent with the EARF, and will be incorporated in contract documents to be implemented by contractors and monitored by the implementing agencies. |
Involuntary Resettlement

A Resettlement and Customary Communities Development Framework (RCCDF) that combines the involuntary resettlement framework with the indigenous people’s development framework was prepared and disclosed on 29 May 2019 following ADB’s Safeguard Policy Statement as well as government laws and regulations. Resettlement plans and indigenous people’s development plans will be prepared consistent with the RCCDF. The start of civil works and/or restrictions to the use of land resources will not be allowed unless customary communities are fully compensated, and all entitlements provided.

Indigenous Peoples

The EARR will ensure that indigenous people affected by the disasters will receive culturally appropriate social and economic benefits, participate actively in the EARR, and not suffer adverse impacts as a result of the EARR.

Stakeholder Communication, Participation, and Consultation

During Project Design

As part of the EARR preparation, consultations were held with national and provincial government agencies. The government’s consultation and participation processes were used to engage with a wide range of stakeholders. The design of EARR has been anchored and guided by government’s priorities for rehabilitation and reconstruction of essential infrastructure. The government has led the assessment of the damage and needs, which has informed the selection of infrastructure to be rebuilt through the EARR. In formulating the Master Plan for Recovery and Reconstruction for Central Sulawesi, the government gathered input from local stakeholders communities and local government to identify and prioritize immediate and medium-term needs.

During Project Implementation

Business Opportunities

Consulting Services

All consulting services will be undertaken in accordance with ADB Procurement Policy (2017, as amended from time to time) and the Procurement Regulations for ADB Borrowers (2017, amended from time to time).

Procurement

All procurement of goods and works will be undertaken in accordance with ADB Procurement Policy (2017, as amended from time to time) and the Procurement Regulations for ADB Borrowers (2017, amended from time to time).
