

Setup of Security Questions and Answers

1. After login in <https://cpd.adb.org>, there will be a REMINDER to update the Security Questions. Click [Change Security Questions >>] button.

You can skip this by clicking [Continue >>] button but on your next login, this reminder will be displayed again.

2. Select three (3) security questions and provide the answers.

Note

Choose a security question and answer that is hard to discern. The security questions will be used by the system to verify authenticity of a request to change or retrieve forgotten password.

3. In the [Enter Captcha] text box, input the captcha shown on screen. Make sure that the characters are typed in correctly, else click [New Captcha] to generate a new one..
4. Click [Save Security Details].

A message confirming that the security questions are registered will be displayed.
