The Asian Development Bank (ADB) provided a small grant financing of $100 thousand from the Climate Change Fund to assist the People’s Republic of China Ministry of Ecology and Environment in preparing their new National Climate Change Adaptation Strategy 2035. ADB funded technical specialists and convened workshops with international partners and the Ministry of Ecology and Environment during preparation of the strategy.

Objectives: This session will highlight ADB’s strategic upstream engagement with a key client to promote improved downstream climate resilience outcomes, and guide ADB lending and non-lending assistance regarding climate resilience. It will also allow ADB to elaborate on how it would work with the People’s Republic of China to implement the strategy.

Photos: Tree plantation site in Chagolnaiya, Feni. Trees have been planted along the river slopes to prevent landslides during heavy rain along Doctor K.I. Singh Highway in Nepal; Mangrove seedlings in Puerto Princesa. Aside from fish sanctuaries, the City Government of Puerto Princesa maintains nurseries of mangrove seedlings to complement the fisheries management project. All photos by ADB.

Note: ADB recognizes “China” as the People’s Republic of China.
