

Contribution to ADB Results Framework
VIE: University of Science and Technology of Ha Noi Development (New Model University) Project

No.	Results Framework Indicators	Targets	Methods Used
1	Classrooms and lecture halls built	110	Classrooms and lecture halls will be constructed at the University of Science and Technology of Hanoi (USTH) under Output 3 of the Project, over the period 2012 to 2016. The design capacity of USTH is 5,000 students. USTH will be located at Hoa Lac Hi-Tech Park.
2	Laboratories built and equipped	370	As above. These are specialized facilities equipped to international standard for work within the six curriculum/program themes that will be offered at USTH. These six themes will be: Aeronautics and Space, Biotechnologies-Pharmacology, Water-Environment-Oceanography, Energy, Materials Science and Nanotechnology, and Information and Communications Technologies (ICT).
3	Person days of staff training delivered	13,977	Outputs 1 and 2 of the Project include a number of capacity-building activities that will be delivered to governors and management recruited to USTH over the period 2012 to 2017.
4	Annual output of graduates from USTH when it is operating at design capacity:		USTH will provide three-year courses for Bachelor, two-year for Master, and three for Doctor. The facilities are designed to produce the numbers of graduates shown in the target column. These output levels are to be achieved in the years 2020 and following.
