

**CONTRIBUTION TO THE ADB RESULTS FRAMEWORK**

1. The project will facilitate the transmission of electric power from India to Bangladesh.

<b>No.</b>	<b>Results Framework Indicators</b>	<b>Targets</b>	<b>Methods Used</b>
1	Installed energy generation capacity (MW equivalent)	500 MW	This additional capacity will be available to Bangladesh through the transmission facilities that will be installed under the project
2	Transmission lines installed or upgraded (km)	125 km (400 kV)	Based on physical construction of the new transmission line.
3	Distribution lines installed or upgraded (km)	0 km	No distribution construction is included in the project.
4	New households connected to electricity (number)	N.A.	While the project will facilitate the availability of additional 500 MW of power in Bangladesh, this cannot be regarded as directly responsible for the electrification of new households.
5	Greenhouse gas emission reduction (tons CO <sub>2</sub> equivalent/year)	N.A.
