

CONTRIBUTION TO THE ADB RESULTS FRAMEWORK

1. The Program contributes to country outcomes in the priority sector of sustainable transport in strategy 2020. The table below indicates the Program's contribution to the ADB Results Framework at country level:

Results Framework Indicator (Level 2)	Target	Methods / Comments
Greenhouse Gas Emission Reduction (tCO ₂ -equivalent)	10.5 million	Assuming deployment of about 5,000 clean buses and each bus saves 0.75 tonnes of GHG emissions per day on average. During an 8-years normal lifespan, these buses will have a total of 14 million operating days (350 per year).

2. The Program also contributes to the ADB Results Framework at Level 3 on ADB's Operational Effectiveness by increasing:

- i) Proportion of lending to Strategy 2020 core operational areas to 80% by 2012
- ii) Proportion of projects supporting private sector development to 30% by 2012
- iii) Proportion of projects supporting environmental sustainability to 25% by 2012
