

## CONTRIBUTION TO THE ADB RESULTS FRAMEWORK

No.	Results Framework Indicators (Level 2)	Targets	Methods / Comments
1.	Roads built or upgraded (kilometers)	840 lane kilometers completed by 2023	GRIL plans to increase the road construction capacity to 1,928 lane kilometers/year by 2023 (2019 baseline: 1,697 lane kilometers). The equipment funded by this loan is required to enable such an expansion strategy. However, the individual construction sites cannot be identified and other inputs (outside of the project) are needed. Therefore, it is assumed that if GRIL achieves its growth scenario, this project would contribute to construct approximately 1,050 lane-kilometers over the life of the equipment package, as construction size approximately depends on such an equipment package as being funded here.
