

CONTRIBUTION TO THE ADB RESULTS FRAMEWORK

No.	Level 2 Results Framework Indicators (Outputs and Outcomes)	Targets	Methods / Comments
1	None	None	The program is a policy-based loan to address and reduce the technical, financial, and governance deficits in Pakistan's energy sector. The program is built on a strong government reform agenda to secure financial sustainability, strengthen governance, and reinforce infrastructure improvements. The reform plan aims to reduce circular debt flows, support integrated planning, appoint professional boards and heads in energy entities, develop competitive power market roadmap, initiate privatization, facilitate private sector participation and competitive renewable energy and off-grid energy deployment.
