

CONTRIBUTION TO THE ADB RESULTS FRAMEWORK

Results Framework Indicators (Level 2)	Targets	Methods / Comments
1. Installed renewable energy capacity (megawatt) [OP3.1.4]	Total installed electricity generation capacity increased to 100 MW by 2022	
2. Total annual greenhouse gas emissions reduction (tCO ₂ e/year) [OP3.1]	Annual emission of 157,502 tons of CO ₂ avoided by 2023	Annual greenhouse gas emission reduction is calculated as annual electricity delivered to the grid x applicable emission factor for Uzbekistan ^a (610 tCO ₂ /GWh)
3. Jobs generated (number) [OP1.2]	A. Number of jobs provided during operation amount to at least 22, of which 3 are for women by 2023. B. Number of jobs provided during construction amount to at least 900, of which 15 are for women by 2022.	
4. Solutions to prevent or address gender-based violence implemented (number) [OP2.2.3]	An Anti-Sexual Harassment Policy developed and implemented by 2023	

CO₂ = carbon dioxide; GWh = gigawatt-hour; MW = megawatt; OP = operational priorities; tCO₂ = tons of carbon dioxide; tCO₂e = tons of carbon dioxide equivalent.
