

OUTLINE OF SELECTION CRITERIA FOR CITIES

To leverage ongoing PPP-TG work on enabling environment for private sector participation and PPPs, the partner cities will be selected from among those countries that are currently monitored in the 2nd edition of the PPP Monitor, and any new countries added to the future editions of the PPP Monitor going forward.

While still being finalized, it is expected that our initial target cities will have some of these indicative characteristics:

- 1-5 million people;
- Net surplus;
- City leadership comprised of reform-champions with MOF support;
- Strong existing ADB relationships;
- Leverage on-going RD/SDCC assistance
- Strong enabling environment for private sector participation in municipal infrastructure
- Deepening capital markets

The final selection of cities will be developed based on a combination of the findings of the legal frameworks. In the selection of the cities, the TA will closely coordinate with the RDs and the RMs to leverage ongoing and planned RD pipelines.
