## ADB AS A BORROWER

- ADB is a leading AAA borrower in international and domestic capital markets having issued bonds across various markets in 49 currencies.
- ADB is AAA-rated by Standard & Poor’s, Moody’s, and Fitch based on strong fundamentals: strong shareholder support, solid financial profile, and conservative financial policies.
- Callable capital (\$132.9 billion as of 30 September 2023) is available for debt service payments and provides the ultimate backing for ADB’s borrowings and guarantees. ADB has never made a call on its callable capital.
- Around 94% of ADB’s loans are to the sovereign portfolio. ADB has never suffered any losses of principal on sovereign loans and does not take part in debt rescheduling.
- The total amount of disbursed loans, disbursed equity investments, and the related prudential buffer, and the maximum amount that could be demanded from ADB under its guarantee portfolio may not exceed the total amount of ADB’s unimpaired subscribed capital, reserves and surplus, exclusive of the special reserve.
- ADB’s capital utilization ratio as of 30 September 2023 was 69.1%, calculated using the 2023 capital adequacy framework methodology.
