Dear Sir / Madam

hopefully, you will be fine.

please download some attachment of road punch list namely a,b,c,d and e prepared by Project Management Consultant (ACC), attachments namely 1,2 and 3 prepared by Contractor and a file consisting on Ms-Excel is prepared by me with comparative studies, hopefully, this will help and indicate you regarding issues are existing in reconstruction project funded by Asian Development Bank, Loan # -Pak, Package-No # 5604.

it is further stated that two representative of ADB Pakistan made visit on 20-11-2013 of this site of said road, one was healthier as per physical structure was favoring of contractor that he has successfully performed his duties but i have certain reservations on development work, which is very poor.

So, it is requested an information may be collected from ADB Pakistan that who have made visit and necessary actions may be taken against healthier person.

copy of this email may be sent to Country Director ADB-Pakistan for further necessary actions.

wishes the best regards.

Abdul Ghafoor Siyal,
Institute of Physiotherapy & Rehabilitation Sciences,
LUMHS Jamshoro-Pakistan.

The Honorable Aunn Mehdi,
Monitoring and Evaluation Manager,
Asian Bank Funded Projects,
Asian Development Bank, Pakistan.

Dear Sir,

I am grateful to ADB and specially yours that made visit regarding redress on my complaint, addressed to [Respected Werner E. Liepach](#), sent on 13th November, 2013 of assessment / investigation of reconstruction work of [Sher Shah Suri Road](#)

It is stated that Mr. [Mushtaque Memon \(Deeplai\)](#), SDO, Works & Services, Government of Sindh was misguided you regarding reconstruction work, he didn't allow you to visit proposed sites and prohibited you to see / meet local residents, they wanted to visit you some specific sites, which are really are poor / have been damaged / havoc due to poor construction of [Sher Shah Road](#).

He was favored Contractor directly and he made his defense in your presence at 0+000 Zero point (As you are eye-witness of his statements). As he meet us at zero point, he said, you people nilly-willy submit complaints against contractor, what and how was this road before 2 year and what and how is now, despite you are creating problems for contractor. Thereafter, he insisted and forced you,

sir, leave them and get seat of vehicle to depart further. It meant, he did not want as local people see / meet you and indicate and offer to visit affected / damaged sites / to show ill constructive work done by contractor. Therefore, he denied to conserve more and made aggression us. He is involved in deficient construction activities with contractor.

I would like ask that:

Is it possible, to assess / examine quality of construction wok during travelling in vehicle which was forwarding / driving with speed 80-95 Km per hour?

How is it possible to find out deficiencies during riding on vehicle?

How you examine compaction, material of shoulder, asphalt, abutments of bridges, retaining walls, grouted rip-rap, parapet walls and so on does it possible to inspect their methodology and their qualities during travel?

Does it enough to capture pictures of RBOD Bridge and through this investigation does problem will redress?

Does it the right process of investigation which was adopted through Car?

Did you find findings? What are

Do maximum findings are obtainable with walk-way or riding-way?

I have many questions can explain accurate position of this road but the person who were making visit with, he misguided, misinterpreted and concealed some physical faults from you and kept away from your detail assessment. I am not alleging him, but I would like to explain, I might be wrong, Mr. [Mushtque Memon](#), SDO, Works and Service is dealing, managing and controlling Flood Emergency Reconstruction Projects (FERP) of District Jamshoro, funded by Asian Developments Bank-Pakistan.

He is the only person, contractor whose obey instructions but the same contractor, some time deny to staff of PMC-ACC. Why did not contractor obey PMC-ACC and obey only Mr. [Mushtaque Memon](#), Why? Because he is in the position of client, being client, his financial desires fulfills by contractor when he want, therefore, that is reason obliging contractor and denying Staff of PMC-ACC, consequently, Mr. Mushtaque is shelter / an umbrella / a shoulder, which support illegally, defense and save contractor from all types of investigations.

Since starting of Flood Emergency Reconstruction Projects (FERP) in District Jamshoro, he is involved with contractor likewise and support them internally intentionally , he instruct the contractor that work must be performed as per his direction, I am with you, if, during the development / construction finding out any problem and people inform to higher authorities of Sindh Government regarding poor performance of roads, Government Agencies ever nominate him for investigation, he, similarly emotional blackmail the people / local residents and he become ever

success to hide work deficiencies of contractor and advise like you people, come on sir, let we move further, trying to escape you attention from complaints / indications pointing out by local residents.

It is submitted that I have reservations, concerns and queries on investigation collective which visited by him. If, you inspect site with us, hopefully, you will find those problems which you might inspected and perhaps, never visit with findings.

It is you are requested please prepare comprehensive neutral report in favor of people, those are recipients of collective benefits by respective Sindh-Government with kind cooperation of Asian Development Bank-Pakistan. If, there is still confusion in findings / to being problems to prepare report, I offer and invite you re-visit / re-inspection of this road, hopefully, you will be able to receive quantum response in inspection by me.

I am grateful of respected Werner E. Liepach who designated you to perform significant assignment with honestly and diligently.

I hope that you role will be appreciable in the matter. If, after, your report, if we local residents remain fails to get requisite justice, finally, we will contact with honorable courts against Mr. Mushtque Memon and Contractor Channa and others.

Once again, it is great pleasure provided ADB and immense courage efforts and observations made by you.

I am forwarding punch list of contractor and PMC-ACC alongwith light analysis demonstrated by me in M.S Excel File.

Wishes the Best Regards.
