

Subject: RED LINE BUS TRANSIT - Karachi

Hon'ble Sir,

We would like to state that we are old residents of New M.A. Jinnah Road, Karachi (from Jail Chowrangi to Peoples Chowrangi) since last 40-45 years) and whatever you intend to build Red Line bus transit project on this road, the width of the road is approx. 40 meter to pass 3 line traffic and presently during peak hours traffic runs bumper to bumper with jam traffic also and at the time of religious processions, this road is used alternately.

The entire way used by the residents such as school, madarsa, grocery shops doctor clinics etc. will be severally affected due to this Red Line Bus Transit project. Also you will have to touch our Usman Park (Parda Park) and to be reduced as per your design of this project, station will also have to build there. This road would be totally ruined and destroyed as per traffic point of view and value of properties of affected area will also be declined. It would not be out of place that such projects are built to facilitate the peoples, citizen and general public but in our country this project of Red Line Bus Transit will entirely cause of different problems to peoples and it will be not successful and fail. Therefore, it is strongly suggested and requested to change the design or it should be shifted to Kashmir Road, we shall be highly obliged and all the concerned peoples and resident will be extremely thankful to you.
