GLOSSARIES

- Displaced person (DP)** - Means any person or persons, household, firm, private or public institution that are fully or partially, permanently or temporarily physically displaced (relocated, lost residential land, or lost shelter) and/or economically displaced (lost land, assets, access to assets, income sources or means of livelihood) due to (i) involuntary acquisition of land, or (ii) involuntary restrictions on land use or on access to legally designated parks and protected areas. AHs could be of three types: (i) persons with formal legal rights to land lost; (ii) persons who have claims to such lands that are recognized or recognizable under national laws; and (iii) persons who have neither formal legal rights nor recognized or recognizable claims to the lost land. In the case of a household, the term DP includes all members residing under one roof and operating as a single economic unit, who are adversely affected by a project or any of its components.
- Compensation** - Means payment in cash or in kind to replace losses of land, housing, income and other assets caused by the Project. All compensation is based on the principle of replacement cost, which is the method of valuing assets to replace the loss at current market rates, plus any transaction costs such as administrative charges, taxes, registration and titling costs.
- Cut-off date** - Means the date of project land acquisition announcement by competent agency. The AHs will be informed of the cut-off date for each project component, and any person who settled or assets created in the project area after the cut-off date will not be entitled to compensation and assistance under the project.
- Detailed Measurement Survey (DMS)** - Based on the approved detailed engineering design, this activity involves the finalization of subproject land acquisition and resettlement impacts, including final cost of resettlement. This is the process where all fixed assets (i.e., lands used for residence, commerce, agriculture, including ponds; dwelling units; stalls and shops; secondary structures, such as fences, tombs, wells; trees with commercial value; etc.) and sources of income and livelihood inside the Project right-of-way (project area) are identified, measured, their owners identified, their exact location pinpointed, and their replacement costs calculated. Additionally, the severity of impact to the affected assets and the severity of impact to the livelihood and productive capacity of AHs will be determined.
- Ethnic Minority (EM)** - Any ethnic group of Vietnam, except the dominant Kinh Group, who has the following characteristics at different levels - living in the rural and remote area or having ancestor's territory in the project area and depending on natural resources of these area and territory, and having a social or cultural identity distinct from that of the dominant group (Kinh-Viet).
- Entitlement** - A range of various activities including compensation, assistance in income restoration, shift in occupation, relocation... etc, provided to affected people based on the type and level of impact which aims to restore their socio-economic conditions.

Income Restoration Program	- A program designed with various activities that aim to support affected persons to recover their income / livelihood to pre-project levels. The program is designed to address the specific needs of the affected persons based on the socio-economic survey and consultations.
Land acquisition	- Refers to the process whereby an individual, household, firm or private institution is compelled by a public agency to alienate all or part of the land it owns or possesses to the ownership and possession of that agency for public purposes in return for compensation at replacement costs
Rehabilitation	- This refers to additional support provided to APs losing productive assets, incomes, employment or sources of living, to supplement payment of compensation for acquired assets, in order to achieve, at a minimum, full restoration of living standards and quality of life
Relocation	- This is the physical relocation of an AP from her/his pre-project place of residence and/or business.
Resettlement and Ethnic Minorities Development Plan (REMDP)	- A plan for resettlement of an ethnic minority population, combining the resettlement plan with specific ethnic minority concerns and cultural sensitivity for the specific needs of the ethnic minority groups.
Replacement Cost	- The amount needed to replace an affected asset net of transaction costs such as administrative charges, taxes, registration and titling costs
Replacement Cost Survey	- This refers to the process involved in determining replacement costs of affected assets based on empirical data
Resettlement	- This includes all measures taken to mitigate any and all adverse impacts of a project on AP property and/or livelihoods, including compensation, relocation (where relevant), and rehabilitation as needed.
Severely affected household (SAH)	- This refers to affected households who will (i) lose 10% or more of their total productive land and/or assets, (ii) have to relocate; and/or (iii) lose 10% or more of their total income sources due to the subproject.
Stakeholders	- Individuals, groups, or institutions that have an interest or stake in the outcome of a project. The term also applies to those potentially affected by a project. Stakeholders include land users, country, regional and local governments, implementing agencies, project executing agencies, groups contracted to conduct project activities at various stages of the project, and other groups in the civil society which may have an interest in the project.
Vulnerable group	- These are distinct groups of people who might suffer disproportionately or face the risk of being further marginalized by the effects of resettlement and specifically include: (i) female headed households with dependents, (ii) disabled household heads, (iii) households falling under the generally accepted indicator for poverty, (iv) children and the elderly households who have no other means of support, (v) landless, and (vi) ethnic minorities.

I. GENERAL INFORMATION

1. Objectives of the project

1. Loan No. 3173 (SF) –Additional financing of the Integrated Rural Development Sector Project in Central Provinces (IRDSPCP) was approved by ADB on 20 October 2014. The Additional financing costs US\$92.5 million, US\$85 million through a loan from the ADB, and the remaining US\$7.5 million contributed by The Government. The Loan Agreement between ADB and the State's Bank of Vietnam was signed on 23 January, 2015, become effective from 22 June, 2015 and the Loan will be closed on 30 June, 2019. The main office of ADB in Vietnam has been responsible for management of the additional financing since November 2014.

2. The objectives of project is to improve the livelihoods and standards of living for the rural population in the Central Region. The objectives will be gained through improving the quality, expanding irrigation area, improving connectability among infrastructures, increasing agriculture production, creating more job opportunities, improving health and education condition and reducing damage caused by natural disaster for people living in the provinces participating in the project. The project comprises three components: (i) improving infrastructure in rural infrastructure in the Central Region; (ii) improved capacities of (a) national, provincial, district and commune staff in project management and supervision, and (b) farmers in agricultural production; and (iii) improved project management skills for infrastructure development.

3. The Executing Agency (EA) for the IRDPCP is the Ministry of Agriculture and Rural Development (MARD), with responsibility delegated to the IRDPCP Central Project Management Unit (CPMU) to monitor the implementation of project. Agencies implementing subprojects are the PPCs of six provinces participating in the project. Central Project Management Unit (CPMU) – under Agriculture Project Management Board is established with responsibility for implementing the project at Central level. At the provincial level, PPMUs under MARD are established by PPCs and responsible for managing daily activities of the project.

2. Information of Subprojects

4. ADB's mission in June 2012 conducted screening of subprojects under the additional financing. Five screening criterias are: (i) dealing with urgent need of proposed beneficiaries; (ii) limiting land acquisition and impact on resettlement and insignificant impacts on environment; (iii) simple design in an adjacent area is well prepared and presented easily to understand; (iv) capable of completion with a minimum of civil works contract packages; and (v) subproject cost greater than \$2 million and less than \$7 million equivalent. There have been 24 subprojects screened in six provinces (including Ha Tinh, Thua Thien Hue, Binh Dinh, Phu Yen, Ninh Thuan and Binh Thuan). These subprojects are expected to irrigate for 29,000 ha of agriculture land, about 115km of road on canals and 24.5 km of dike for preventing flood to improve road to important irrigation works, and improve accessibility to agricultural product market.

5. The project includes 24 subprojects in which 20 subprojects requiring land acquisition and 04 subprojects not requiring land acquisition are determined. The subprojects in provinces are as follows:

Table 1. Number of subprojects by Provinces

Province	Number of Sub-project	Subproject with land acquisition
Ha Tinh	5	4
Thua Thien Hue	3	3
Binh Dinh	6	6
Phu Yen	4	4

Province	Number of Sub-project	Subproject with land acquisition
Ninh Thuan	2	2
Binh Thuan	4	1
Total	24	20

6. Beside, based on the saving budget from project implementation, one new subproject and seven additional works to ongoing subprojects have been proposed, of which only SP of Upgrading the infrastructures for safety vegetable production in An Hai commune, Ninh Phuoc district, NinhThuan Province is considered as a new SP and other 7 investments are considered only as additional components in ongoing/completed subprojects, including(i) Upgrading 2 secondary canals (N9 and N13) of Quao river system, Binh Thuan province (ii) Upgrading the North primary canal of Ba Bau irrigation system, Binh Thuan province; (iii) Repairing and upgrading canals of Rac River irrigation system and (iv) Repairing and upgrading irrigation system, rural road and market in 5 flooded communes of Duc Tho district in Ha Tinh province and (v) Upgrading and extending Quan culvert, Thua Thien Hue province. (vi) Upgrading tertiary canals of Cham irrigation scheme, Ninh Thuan province and (vii) calamity remedies of Van Phong irrigation scheme, Binh Dinh province. Three out of eight new subproject/additional component will involve to land acquisition.

3. Social safeguards documents required for preparation of subprojects

7. As above mentioned, there are 24 subprojects in whole project, but 20 subprojects need to acquire land. According to ADB SPS, therefore 26 social safeguards documents related to resettlement and social issues need to be prepared and approved for those subprojects. While the RP/REMDPs must to prepare for the subproject, the DDRs also need to prepare for some subprojects where have conducted land acquisition before approving for subproject implementation as ADB requirements. Namely, these consists of 11 Resettlement Plans (RPs), 3 Resettlement and Ethnic Minority Development Plan (1 REMDP and 2 uREMDPs), 6 Due Diligence Report (DDR), 2 update Resettlement Plans (uRPs) and 4 Land Donation Reports (LDRs). The table below describes the information of required safeguards documents by subprojects.

Table 2.Information of social safeguards Documents required by Subprojects

No	Name of Subprojects	Type of Required safeguard documents					Notes
		RP	uRP	REMDP /uREMDP	DDR	Land Donation Reports	
A	Ha Tinh Province						
1	Upgrading canal system of Rac River irrigation				√		
2	Upgrading irrigation/drainage and rural road system in flooding-prone area of Loc Ha District					√	
3	Upgrading Ho Dam and Tiem River canal system						No land acquisition
4	Upgrading irrigation system, rural road and market in 5 flooded communes of Duc Tho District					√	
5	Upgrading irrigation system of 3 Communes, Thach Ha District					√	
B	Thua Thien Hue Province						
1	Upgrading Dai Giang River Dike system	√					
2	Upgrading Dong Tay Hoi Tom Dike combining with on-farm road	√					

No	Name of Subprojects	Type of Required safeguard documents					Notes

2	Upgrading Saloun Reservoir			√			
3	Upgrading North primary canal of Ba Bau irrigation system						No land acquisition
4	Upgrading primary canal of Quao River						No land acquisition
	Total	11	2	3	6	4	

4. Social safeguards documents required for preparation of new addition subprojects

8. As above mentioned, there are 8 new subproject/additional components. Upon request of ADB in their letter dated 29 March 2017 on reviewing new additional SPs proposed to use saving budget from the Integrated Rural Development Sector Project in Central Provinces - Additional Financing under screening criteria, the Central Project Management Unit (CPMU) and the Loan

Implementation Consultants (LIC) organized a field trip¹ to the eight new subproject/additional components in provinces of Binh Dinh, Phu Yen, Ninh Thuan, Binh Thuan, Ha Tinh and Thua Thien Hue from 10 to 19 April 2017.

9. It is noted that five out of eight new subproject/additional components will not involve any land acquisition as the construction activities are mainly located within the land area of existing works, (i) Upgrading 2 secondary canals (N9 and N13) of Quao river system, Binh Thuan province (ii) Upgrading the North primary canal of Ba Bau irrigation system, Binh Thuan province; (iii) Repairing and upgrading canals of Rac River irrigation system and (iv) Repairing and upgrading irrigation system, rural road and market in 5 flooded communes of Duc Tho district in Ha Tinh province and (v) Upgrading and extending Quan culvert, Thua Thien Hue province.

10. Therefore, only 3 exceptions concern the preparation of (i) a new REMDP for the SP titled “Upgrading the infrastructures for safety vegetable production in An Hai commune, Ninh Phuoc district, NinhThuan Province”; (ii) REMDP for the SP titled “Upgrading tertiary canals of Cham irrigation scheme, Ninh Thuan province”, and (iii) an addendum to the Updated Resettlement Plan for Canal N24 Van Phong irrigation scheme subproject, Binh Dinh province.

5. Objectives of internal monitoring

11. Because this project is identified as category B in IR and IP, it only requires having internal monitoring reports during project implementation. The main purpose of the monitoring and evaluation program is to ensure that matters related to involuntary resettlement have been implemented in accordance with the policies and procedures of the RPs/REMDPs/DDR following ADB SPS 2009 and the uREMDF.

12. The general objectives of internal monitoring is to: (i) report on the status and assess the compliance with the agreed RP; (ii) confirm the availability/handover of land to the proposed subprojects; (iii) monitor contractors’ compliance to policy framework’s provisions related to temporary land acquisition during civil works; (iv) ensure that the standards of living of affected households is restored or improved; (v) monitor the implementation process; (vi) assess the sufficient implementation of compensation, resettlement measures and social development assistance programs; (vii) identify problems or potential problems; and (viii) identify and implement quick response measures to mitigate emerging issues.

13. The report is established by CPMU to provide information and report to ADB on the implementation status of compensation and resettlement in the first six months of 2018 in the project provinces as of June 2018.

6. Institutional arrangements

14. In order to ensure the compliance of the project with regard to the implementation of safeguard policies of ADB, since the beginning of the project preparation stage, the PPMUs have assigned an officer who is responsible for social safeguard policy issues, including social and land acquisition and environment with the support of the Specialists in term of resettlement and environment from project implementation consultant (PIC). Training courses on social safeguards policy have been implemented since the early stages of the project and additional supports are also provided to officials of PPMUs during project implementation. Therefore, all of the social safeguard issues of the project have been implemented in compliance with ADB's requirements and policy framework approved for the project.

¹The CPMU (Ms. Pham Hoang Lan - Deputy Director; Mr. Pham Hien Luong - Technical staff; Mr. Pham Cong Duc - Technical staff; Ms. Hoang Thi Van - Safeguard Policy staff); LIC (Mr. Nguyen Van Toan - Irrigation specialist; Mr. Pham Ngoc Thang - Economist; Ms. Do Thi Nham - Environmental specialist; Mr. Nguyen Vinh Phu - Resettlement specialist).

II. DETAILED PROGRESS OF RESETTLEMENT IMPLEMENTATION PLANS

1. Progress of preparation of social safeguards documents for the subprojects

15. At the time of this report, total 26/26 required safeguard reports on resettlement matters have been approved by ADB that includes six DDRs, 11 RPs, one REMDP, two uREMDPs, two uRPs and four land donation reports. The table below describes more details on the status of preparation of social safeguards by subproject in provinces.

Table 3. Social safeguards documents required for subprojects

No	Name of Subprojects	Type of Required safeguard documents	Status of Documents
A	Ha Tinh Province		
1	Upgrading canal system of Rac River irrigation	DDR	Approved by ADB in Jan 2017
2	Upgrading irrigation/drainage and rural road system in flooding-prone area of Loc Ha District	Land donation report	Submitted to ADB in 2016
3	Upgrading Ho Dam and Tiem River canal system	No land acquisition	NA
4	Upgrading irrigation system, rural road and market in 5 flooded communes of Duc Tho District	Land donation report	Submitted to ADB in 2016
5	Upgrading irrigation system of 3 Communes, Thach Ha District	Land donation report	Submitted to ADB in 2016
B	Thua Thien Hue Province		
1	Upgrading Dai Giang River Dike system	RP	Approved by ADB on 13March 2017
2	Upgrading Dong Tay Hoi Tom Dike combining with on-farm road	RP	Approved by ADB in Jan 2017
3	Upgrading road combining with flood protection dike of Pho Lai - Thanh Cam - Nam Duong - Co Thap	Land donation report	Submitted to ADB in 2017
C	Binh Dinh Province		
1	Upgrading Nui Mot Reservoir's canal system	RP	Approved by ADB in Jul 2014
		uRP	Approved by ADB in Jun 2016
		DDR	Approved by ADB in Aug 2016
2	Upgrading Lai Giang Dam's primary canal	RP	Approved by ADB in Aug 2014
3	Upgrading Hoi Khanh Reservoir	RP	Approved by ADB in Aug 2014
		uRP	Approved by ADB in Aug 2016
4	Upgrading My Thuan Reservoir	RP	Approved by ADB in Aug 2016
	Upgrading rural infrastructures in Nhon Tho - Nhon Khanh	RP	Approved by ADB in December 2016

No	Name of Subprojects	Type of Required safeguard documents	Status of Documents
5		DDR	Approved by ADB in Oct 2016
6	Upgrading Van Phong canal system	DDR	Approved by ADB in Aug 2016
D	Phu Yen Province		
1	Consolidate main canal and branch canals of Dong Cam irrigation scheme	RP	Approved by ADB in Sep 2016
		DDR	Approved by ADB in Jul 2016
2	Upgrading road and sluice of An Cu - An Hiep - An Hoa	RP	Approved by ADB in Aug 2016
3	Upgrading Suoi Cau weir and access road	RP	Approved by ADB in Oct 2016
4	Upgrading irrigated canal of Dong Tron reservoir's irrigation system	RP	Approved by ADB on 21March2017
E	Ninh Thuan Province		
1	Upgrading beginning section of North primary canal of Nha Trinh - Lam Cam irrigation system	uREMDP	Approved by ADB in Jun 2016
2	Upgrading the Cham Canal and management road of the South primary canal of Nha Trinh - Lam Cam irrigation system	REMDP	Approved by ADB in Jun 2016
		DDR	Approved by ADB in Jun 2016
F	Binh Thuan Province		
1	Upgrading Du Du Reservoir	No Land acquisition	NA
2	Upgrading Saloun Reservoir	uREMDP	Approved by ADB in Jul 2016
3	Upgrading North primary canal of Ba Bau irrigation system	No Land acquisition	NA
4	Upgrading primary canal of Quao River	No Land acquisition	NA

2. Progress of preparation of social safeguards documents for the addition subprojects/additional components

16. Regarding to preparation of the safeguards documents as for ADB requirements for SP of “Upgrading the infrastructures for safety vegetable production in An Hai commune, Ninh Phuoc district, NinhThuan Province”. The public consultation meetings and socio- economic survey (SES) have been conducted for 19 affected households from 15th to 17th May 2017. However, the DMS for affected assets has not yet been completed and therefore the data of affected assets of households are not available at the time of this reporting. Thus, the consultant has yet to prepare the safeguards documents for this subproject. As for the plan of LFDC and PPMU of Ninh Thuan province, the results of DMS are expected to be completed by the end of July 2018; when the DMS’ results are available, the safeguards documents will be prepared and submitted to ADB.

17. Regarding to SP “Repairing calamity impacts of Van Phong irrigation canal system subproject”, the public consultation meetings and SES for 5 communes and affected households have been conducted by CPMU, PPMU and LIC from 15 to 18 April 2018. At the end of June 2018, the addendum RP has been submitted to ADB and at the time of reporting, on 4th July 2018, the ADB has issued the NOL to the resettlement plan for this subproject. Based on the approved RP, the Binh Dinh PPMU will coordinate with the DCARBs to complete payment the compensation and assistances to AHs within July 2018 and once the payment of compensation is completed the civil works will be started.

18. .For SP of Upgrading tertiary canals of Cham irrigation scheme, Ninh Thuan province. As per PPMU’s information, now they are working with the relevant authorities to prepare for subproject implementation in term of land acquisition. It is expected that the DMS will be completed within October 2018. After the DMS will be completed, the REMDP of this subproject will be prepared and submitted to ADB for review and approval.

3. Scope of impacts caused by subprojects

19. As of June 2018, land acquisition implementation of the 20 subprojects in six provinces has affected 5,129 households including 3,744 households on a permanent basis and 1,394 HHs temporarily affected during the construction process (An increase of 324 temporary affected households in comparison to last report due to construction of Dong Tron SP). Of the total 3,744 households having land permanently acquired, a total of 3,637 HHs are only marginally affected, 107 HHs are severely affected by losing more than 10% of their agriculture land (This is amount of severely affected households by whole projects - 24 subprojects. There aren’t any subprojects with more than 200 severely affected people: the SP with the highest number of SAHs is SP of Upgrading the Cham Canal and management road of the South primary canal of Nha Trinh - Lam Cam irrigation system, with a total of 48 severely affected households. However, as the result of social economic survey during preparation the REMDP for this subproject, the average household size is 3.9 person/HH; therefore the total of severely affected person is 187 person) and 457 HHs are belonging to vulnerable groups, of which 173 households are ethnic minority and 284 households are classified as poor households and/or female headed households.

20. The detailed number of affected HHs in each province is presented in the Table 4 below.

Table 4. Number of affected HHs in the project provinces

Province	Permanently affected HHs				Temporarily affected HHs	Total number of affected HHs
	Total	Marginally affected HHs	Severely affected HHs	Vulnerable Groups	(*)	
Ha Tinh	282	270	12	8	0	282
Thua Thien Hue	276	276	0	0	0	276
Binh Dinh	782	782	0	0	1,061	1,843
Phu Yen	1,940	1,905	35	206	324	2,264
Ninh Thuan	334	274	60	131	9 ²	334
Binh Thuan	130	130	0	112	0	130
Total	3,744	3,637	107	457	1,394	5,129

Source: internal monitoring reports of PPMUs of six provinces

²Nine (9) households are permanently acquired and also are temporary impacted by construction activities of subproject. Therefore, total of AH of Ninh Thuan is 334 Households.

21. As of the reporting time, a total 987,662 m² of land are permanently acquired for construction of the subprojects. Agricultural land is acquired with the highest proportion in comparison with other types of land (accounting for 59.0 % of the total permanently acquired land area). Meanwhile, total 834,338 m² are temporarily affected for construction of the subproject (An increase of 44,381.6 m² temporary affected land in comparison to last report due to construction of Dong Tron SP). Regarding area of land acquisition, Binh Dinh is the province with the most acquired land area out of the 6 participating provinces. Acquired residential land area only accounts for 0.5% of the total acquired land (5,025 m²). Of the total acquired land for SPs, 54,642.3 m² of productive land have been donated by 517 households. Data on acquired land in the provinces is presented in the Table 5 below:

Table 5. Affected land area in the project provinces

Province	Permanently acquired land area (m ²)							Temporarily affected land area (m ²)	Total temporarily and permanently affected land area (m ²)
	Agricultural land	Residential land	Aquaculture land	Garden Land	Forest land	Other land	Total		
Ha Tinh	28,470.0	1,505.0	0.0	0.0	0.0	0.0	29,975.0	0.0	29,975.0
Thua Thien Hue	2,781.2	44.1	1,591.1	0.0	0.0	8,599.9	13,016.3	0.0	13,016.3
Binh Dinh	161,364.0	2,889.0	0.0	0.0	54,130.0	0.0	218,383.0	781,956.0	1,000,339.0

22. Affected structures include temporary houses, graves and other structures. The DMS result shows that a total of 1,447.4 m² of houses and 20,202.3 m² of structures are affected by the subproject. In addition, 151 graves are affected by the subprojects.

23. In addition, implementation of the subprojects affects 432,917.6 m² of rice and various types of crops, such as maize, potato, cassava, peanut, vegetable and grass. The implementation of subprojects in the six provinces had to cut off 81,755 timber and fruit trees. Detailed impacts on structures, trees and crops are presented in the table below:

Table 6. Impacts on structures, trees and crops caused by the project

Province	Affected structures (m ²)				Affected trees and rice/crops	
	House	Structures	Grave	Other	Rice/crop (m ²)	Trees (tree)
			(Unit)			
Ha Tinh	-	448.0	-	-	-	540.0
Thua Thien Hue	54.9	46.7	39.0	-	844.5	4,069.0

4. Information dissemination and community consultation

24. Information dissemination and community consultation activity are activities taking place during the project's implementation process. At the time of this reporting, at least two rounds of information dissemination and community consultation have been organized in the project provinces during project preparation and updating the safeguards documents for the project. In addition, as for ADB's requirement, the approved RPs/REMDPs have also been disclosed to all affected households and other stakeholders, besides the copies of these RPs/REMDPs that were placed in the commune/and villages. The information disclosure process covers the following topics:

- i) Detailed design of subproject's policies, AHs eligible for compensation and resettlement assistance.
- ii) The DMS, sub-project impact, eligibility particularly on the cut-off dates for each sub-project and grievances redress mechanism;
- iii) Mechanisms of payment.
- iv) Consulting on the replacement cost, compensation payments and other entitlements of AHs as well as on additional assistance and allowances to the severely affected households, affected vulnerable group;
- v) Gender and vulnerable group issues;
- vi) Implementation schedule.

25. The first period of dissemination of information and community consultation was organized by LIC during the FS preparation in coordination with PPMUs of six province in 2013 and 2014. The latest information dissemination and community consultation exercise was carried out in 2016, after approval of the detailed design and construction drawings of each subproject by the competent authorities; information dissemination through consultative meetings was conducted with communal authorities and representatives of affected HHs in their communes. Details of the above are shown in the Table 7 below:

Table 7. Information on information dissemination and community consultation

Provinces	Times of information dissemination and community consultation	
	<i>The first time</i>	<i>The second time</i>
Ha Tinh	Jan 2014	Feb, Mar 2016
Thua Thien Hue	Mar 2014	Apr 2016
Binh Dinh	Apr 2014	Feb, May 2016
Phu Yen	May and Jun, 2014	May 2016
Ninh Thuan	Aug 2014	May, Sep 2016
Binh Thuan	Jul 2013	Jan 2016

Source: internal monitoring reports of PPMUs of six provinces

26. In order to ensure that affected households are able to participate in and understand the project information, as well as contribute ideas or recommendations to the project, the PPMUs have implemented a variety of activities and methods of information dissemination as follows:

- i) Delivery the project information leaflets to households;
- ii) Organize community consultation meetings;
- iii) Notification through community speaker system; and
- iv) Disseminate information through other commune and village meetings such as Women's Union, Veterans', Elderly's, Farmer's Union.

27. As results of all public consultation meetings, local authorities, communities and affected households agreed on the go ahead of each subproject. All attendants were aware of project benefits and they committed themselves to take active part to subprojects implementation. The main results of the above are listed here below:

- v) All of the AHs participating in the meetings agreed with compensation policy of the project and agree with compensation unit price issued by the PPC;
- vi) Vulnerable AHs agreed to receive compensation and assistance in cash in accordance with the project's policy;
- vii) The participants of the meetings stressed the need for a strict coordination among the PPMU and the works contractor with local authority to ensure security in operations as well as with full respect of the local environment during the construction process;
- viii) The AHs proposed that PPMU should require the works contractor to restore the site to its original status after construction;
- ix) Representatives of the AHs proposed to be employed by contractor in activities suitable for them during the construction process.

28. Regarding to recommendations and opinions of the participants, the PPMU and relevant parties have responded as follows:

- i) The PPMU, The Supervisors and the contractors will work closely in order to ensure security as well as environment compliance during the construction process.
- ii) The PPMU confirmed that the contractors have to restore the site to its original status after construction completion.
- iii) The PPMU will work closely with the contractor to recruit the member of affected households to do works suitable to them during construction process.

29. With regards to ethnic minorities (173 EM households), in addition to general discussions or consultations in affected communities, the PPMUs of Ninh Thuan and Binh Thuan and other project stakeholders have implemented a number of other measures to ensure (i) full participation of ethnic minorities in project preparation and implementation, (ii) full provision of information on project matters to ethnic minorities, and (iii) receipt of opinions and views of ethnic minority people on the project. Details are as follows:

- i) Delivering the project information brochures (PIBs) to each ethnic minority household in simple, understandable language, even in ethnic minority languages (as need);
- ii) Disclosing project information at village meetings; and
- iii) Providing necessary materials/project documents for village chiefs, village patriarchs and prestigious people in ethnic minority communities and, through village chiefs and village

elders, disseminate information related to the project to ethnic minority people in the project area.

30. The views/opinions of ethnic minorities are summarized below:
 - i) Expect the project to be completed early to facilitate improved production for the households' benefit.
 - ii) Full compensation and allowances paid for affected households as regulated by the project.
 - iii) Ensure suitable environmental sanitation during construction.
 - iv) If there are other impacts on the public property of the local people, the project must compensate and restore their status to their original conditions, especially the local road.
31. Feedback from the PPMUs and stakeholders to opinion of EM households.
 - i) The PPMU will work closely with the contractor to ensure that the project is implemented on schedule;
 - ii) The PPMU will coordinate with all stakeholders to implement the compensation and the full support provided by the project;
 - iii) PPMUs will require contractors to ensure suitable environmental condition during construction; and
 - iv) The PPMU will ask the contractor to provide compensation if causing impacts on the assets of the households during the construction process.

5. Implementation process of DMS

32. At the time this report preparation, all the 20 subprojects requiring resettlement have completed the DMS for the affected HHs. Nine subprojects completed DMS in 2015 and the other 11 subprojects completed the DMS in 2016. DMS data of subprojects in the project provinces is presented in the Table 8 below:

Table 8. Implementation process of DMS

Provinces	Number of subprojects completed DMS in 2015	Number of subprojects completed DMS in 2016	Number of subprojects not completed DMS	Number of subprojects requiring land acquisition
Ha Tinh	1	3	0	4
Thua Thien Hue	0	3	0	3
Binh Dinh	5	1	0	6
Phu Yen	1	3	0	4
Ninh Thuan	2	0	0	2
Binh Thuan	0	1	0	1
Total	9	11	0	20

Source: internal monitoring reports of PPMUs of six provinces

6. Preparation and approval of compensation plan

33. Since the last report, 20/20 subprojects have the compensation plans approved for affected assets. In order to ensure entitlement of affected HHs, the compensation plans are prepared based on entitlement matrix which is separately determined in RP/uRP and REMDP/uREMDP for each subproject. Since last report due to adjustment of the design of Nhon Khanh – Nhon Tho SP in Binh Dinh province, one compensation plan of Binh Dinh province has been adjusted and reapproved. The compensation plan is also adjusted for 05 households along two canals of T3 and T28 affected

by SP of “Upgrading irrigated canal of Dong Tron reservoir’s irrigation system” in Phu Yen province as their paddy lands have been affected.

34. Besides, the construction activities of the contractor for Dong Tron SP in Phu Yen province have caused some impact to the productive land of local people. Accordingly, on 29th May 2018, Tuy An DPC has issued the Decision No. 746QD-UBND approving on compensation and assistance for temporary impacts due to construction the SP of Dong Tron with a total of VND 427,810,000 for 324 households along the canals of T18 (131 households); D26 (65 households), and T30 (128 households). Data on status of preparation and approval of compensation plan is presented in the Table 9 below:

Table 9. Progress of preparation and approval of compensation plan

Provinces	Number of subprojects without approved compensation plan yet	Number of subprojects with approved compensation plan	Number of subprojects requiring land acquisition
Ha Tinh	0	4	4
Thua Thien Hue	0	3	3
Binh Dinh	0	6	6
Phu Yen	0	4	4
Ninh Thuan	0	2	2
Binh Thuan	0	1	1
Total	0	20	20

Source: internal monitoring reports of PPMUs of six provinces

7. Compensation and assistance payment

35. As mentioned in the last report, almost all of AHs have received fully compensation and assistances, with the exception of some affected households with regard to additional allowances and compensation for temporary impacts during construction phase. At the time of reporting, all of these households have received fully compensation and assistances, as for the details below:

- (i) The additional payment to vulnerable households affected by SP of Upgrading Saloun Reservoir have been made for 126 Households who are severely AHs/vulnerable groups affected by this SP, with a total compensation of 565,923,200 VND in January 2018.
- (ii) The additional payment to poor households who already received allowance for vulnerable households, but amounting to less than 2,000,000 VND, while policy in approved RP will support a minimum 2,000,000 VND/HH, have been made for 33 households affected by Dong Tron SP totaling VND 102,593,673 and 14 households affected by Dong Cam SP totaling VND 24,785,673 (June 2018).
- (iii) The payment of compensation for temporary impacts occurred during construction implementation for the canals of D26, T18 and T30 of “Upgrading irrigated canal of Dong Tron reservoir’s irrigation system” have been made for 324 households VND 427,810,000 in June 2018.

36. By the end of June 2018, a total of VND 62,728,472,834 (equivalent to US \$2,769,469) have been paid to 5,129 households, including payment of compensation and assistances for both permanent and temporary impacts. None of AHs have not received their compensation and assistances, as detailed in the table below.

Table 10. Implementation status of compensation payment

Provinces	Number of HHs receiving compensation	Compensation and assistance amount paid to affected HHs	Remarks
Ha Tinh	282	1,026,537,720	236 donated their land to SP
Thua Thien Hue	276	897,513,000	151 donated their land to SP
Binh Dinh	1,843	16,631,608,113	
Phu Yen	2,264	31,010,740,568	
Ninh Thuan	334	12,452,446,533	
Binh Thuan	130	709,626,900	130 households donated their land to SP, of which 20 households received compensation for affected assets on land
Total	5,129	62,728,472,834	
	In USD	2,769,469	

Source: internal monitoring reports of PPMUs of six provinces

8. Process of land acquisition and resettlement

37. By the reporting time, 20 subprojects have fully completed their site clearance. Of the total 4,805 households affected by subprojects, none need to be relocated due to their land acquisition for the SP. After completion of the compensation payment to affected households and site clearance, the PPMUs have coordinated with the cadastral department and land fund development center of the district and have conducted the handing-over of the land to the contractor for civil works. Therefore, the SPs' sites do not face obstacles for implementing the civil works.

Table 11. Process of resettlement and site clearance

Provinces	Number of subprojects	Number of subprojects requiring land acquisition	Number of subprojects with site clearance completed
Ha Tinh	5	4	4
Thua Thien Hue	3	3	3
Binh Dinh	6	6	6
Phu Yen	4	4	4
Ninh Thuan	2	2	2
Binh Thuan	4	1	1
Total	24	20	20

Source: internal monitoring reports of PPMUs of six provinces

9. Restoration of AHs' livelihoods and rehabilitation of AHs' livelihood.

38. Besides compensation for affected land and property, the project has adopted adequate policies to support affected households in ensuring the interests of the people and help them to restore their stable livelihood.

39. At the time of this report preparation, of the total 3,744 households who had their agriculture productive land acquired, a total of 2,201 households were provided allowances as job changing supports with regards to their livelihood stabilization and income restoration, amounting to a total value of VND 17,717,928,325. See details in the Table 12 below:

Table 12. Implementation status of livelihood restoration and rehabilitation of AHs

Provinces	Number of HHs receiving assistances	Assistance amount paid to affected HHs
Ha Tinh	46	647,522,820
Thua Thien Hue	51	195,507,650
Binh Dinh	726	6,054,859,750
Phu Yen	1,219	9,585,768,105

Binh Thuan	0	0 ³
Total	2,201	17,717,928,325

Source: internal monitoring reports of PPMUs of six provinces

40. According to the project policies, SAH and AHs of the vulnerable group, apart from receiving compensation for affected assets, also got additional assistance to stabilize their life and restore their livelihood totaling VND 4,955,144,932. Should AHs wish to take part in job trainings after their land is acquired, the project will create favorable conditions and support SAHs by sending their application letters to vocational training centers of the district and province. However, at the time of this reporting, DMS shows that AHs decided to receive assistance for their life stabilization in cash and opted to find new jobs by themselves, instead of attending vocational training courses arranged for the subproject. During process of public consultation meeting, the affected households also informed that there was no significant impact on income sources of households. In addition, according to project policy various types of allowances have been provided to AHs such as (i) cash allowance for job changing and job creation for AHs affected by the permanent loss of agricultural land; (ii) cash allowance for life stabilization for AHs losing 10% or more of their productive landholdings; (iii) and cash allowance for vulnerable affected households. It is therefore not necessary to develop a separate income restoration program for households, but as agreed by the local authorities and the PPMU, these households have been supported to access to opportunities of livelihoods as well as activities during the construction of the project at the locality.

41. According to the PPMUs report on the status of livelihoods and incomes of severely affected households by the land acquisition of subprojects, especially the PPMUs of Ninh Thuan province where the number of severely affected households of the subprojects was largest (48 severe AHs due to land acquisition for SP of Upgrading the Cham canal and management road of the South primary canal of Nha Trinh - Lam Cam irrigation system). At present, the income of these households has been restored at least as before project, with stable income ranging from 4,000,000 VND to 5,000,000 VND per month. Income sources of households are mainly based on trading activities, hired labor and bank interest from previous compensation. In addition, with the support of the local authorities in changing the crop structure for the remaining productive land after land acquisition, therefore the income from the remaining land area has also contributed to their income restoration and livelihood development of households. Therefore, in general, the lives of households are quite stable and they have no difficulty in changing their livelihood and seeking income sources.

42. Regarding the requests from consulted AHs to take suitable and unskilled jobs during the project implementation, up to date a total of 5,502 member of AHs have been employed by the contractors for doing jobs such as digging the earth, transporting construction material, cleaning the construction site, mixing cement, taking water to cure concrete surfaces, etc. The following table describes the number of AH member recruited by contractors under each province.

Table 13. AH member recruited by contractors under subprojects

No	Name of Subprojects	The number of AH member recruited by contractors
A	Ha Tinh Province	743

³There is no assistance for change of job in Binh Thuan province due to 130 AHs donated their land to the SP.

Source: GAP Report of Quarter II 2018

10. Assessment on the degree of APs' satisfaction concerning compensation and resettlement.

43. At least two public consultations were conducted for each SP by CPMU/LIC/PPMU and others by local authorities. In those public consultations, information related to project implementation including impact scale, impact level, compensation plan/price and public information booklet were delivered to AHs. Besides, a grievance procedures and grievance redress scheme was established on compensation in the project. In the stage of preparing and updating RP/REMDP, a grievance scheme of compensation and resettlement was prepared and delivered to AHs in project communes.

44. Since last report, no complaint on the implementation of compensation and assistance payment has been raised except some households affected by Dong Tron reservoir's irrigation system" subproject in Phu Yen province whom complained regarding the impacts during construction due to rocky and soil falled down into their paddy land. However, at the time of this report, the compensation for damaged crop during construction have been made for these households as mentioned above. Therefore, the local people in general are satisfied with the result of the lost inventory, compensation price assistance and resettlement policies of the Project.

11. Conformity of resettlement implementation progress with civil works progress and next plan

45. According to the project requirements, compensation is only made when RP/uRP or REMDP/uREMDP is approved by ADB and construction only commences when compensations and assistance payments are implemented.

46. In this respect, six SPs, including one SP in NinhThuan, three SPs in BinhDinh, one SP in Phu Yen, and one SP in Ha Tinh province had paid compensation in advance before RPs/REMDPs were approved by ADB. At the time of this report, all of the documents related to these preliminary compensatory activities have been prepared and submitted to ADB and subsequently approved as indicated in the Table 3.

12. The status of implementation of payment of additional assistances for affected households as for the agreed actions in the approved Due Diligence Reports (DDR).

47. As mentioned in the previous paragraph, a total of six DDRs have been prepared and approved for six subprojects in provinces of Ninh Thuan, Phu Yen, Binh Dinh and Ha Tinh. After these DDRs have been approved by ADB, the PPMUs of these provinces have worked closely with the relevant agencies to implement the agreed actions according to the conclusions in the approved DDRs. Right now, all of required actions have been implemented by the related PPMUs. Please see below table for detailed information of completion on those required actions:

Table 14 Status of implementation of the agreed actions in the approved DDRs

No	Name of SP	Agreed actions in the approved DDR	Status of implementation	Time of completion
1	Upgrading the Cham canal and management road of the South primary canal of Nha Trinh - Lam Cam irrigation system (NT2)	<p>a, Additional payment to households losing from 10% to 30% of productive land and vulnerable households</p> <p>b, Display of the construction drawing of the SP to AHs at the project area.</p> <p>c, Check the results of DMS of affected assets of the AHs and payment of the compensation for inadequate/mistaken DMS results</p> <p>d, Provision of the measures for households who lost more than 70% of productive land</p> <p>e, Check and support the affected households who want to get the loan from Policy Bank or job trainings/vocation</p> <p>f, Check and propose the action for left-overland of AHs after land acquisition by SP</p>	<p>a, A total of 32 households who lost from 10 – 30% of productive land have received an amount of 130,032,000 VND; 29 households are classified as vulnerable households and have received a total amount of 733,568,000 VND in compensation.</p> <p>b, The PPMU of Ninh Thuan has displayed the construction drawings to AHs and also displayed these in the village and commune.</p> <p>c, The PPMU and LFDC have surveyed the AHs based on DMS and identified 14 households for whom some affected assets have been early omitted; these have subsequently been paid their due supplementary compensation for a total of 166,850,080 VND.</p> <p>d, The PPMU and LFDC of Ninh Phuoc have worked with these households regarding job vocation, or job trainings. They don't need training courses because they have already attended many class relating agricultural subjects</p> <p>e, The PPMU and LFDC of Ninh Phuoc have worked with these households regarding job vocation, or job trainings. They don't need training courses because they have attended much class relating agricultural subject.</p> <p>f, The PPMU and LFDC of Ninh Thuan have identified a total of 20 AHs who have left-overland after some of their land acquisition; then they have also checked for those areas, but there are still</p>	<p>December 2016</p> <p>December 2016</p> <p>December 2016</p> <p>December 2016</p> <p>December 2016</p> <p>December 2016</p>

No	Name of SP	Agreed actions in the approved DDR	Status of implementation	Time of completion
		g, Conduct the training course to community monitoring board of four communes	sufficient land available for production and there is no need to acquire other land for their livelihood (Average remaining land of these HHs is more than 200 m ² with good condition of water irrigation for production). g, The community monitoring boards have been established in four communes, and the LIC have conducted the trainings for these with regards to monitoring methodology.	December 2016
2	Upgrading Nui Mot reservoir canal system (BD1)	Payment of additional assistances to 33 households who are certified as vulnerable groups	The SP did not permanently acquire land of local households, as the SP just temporarily caused impacts to 351 households. Therefore, these households are not subject to additional assistance. So the additional payment is not required.	
3	Upgrading rural infrastructures in Nhon Tho - Nhon Khanh (BD5)	Payment of additional assistances to severely affected households (02 HHs) and 01 vulnerable household	The PPMU and LFDC have checked and identified a total of 3 households who lost from 10% to 30% of productive land, and one household that lost from 30% to 70%;these households have been paid for subsistence assistances with a total of 19,305,000VND	April 2017
4	Upgrading Van Phong canal system (BD6)	Payment of additional assistances to severely affected households (16 HHs) and 29 vulnerable household	The PPMU and LFDC have identified that: None of AH are severely affected households; 31 households are certified as vulnerable groups (of which: Binh Thuan: 5 HHs; Tay An: 5 HHs (Tay Son district); Nhon My: 6 HHs (An Nhon town); Cat Tan: 15 HHs (Phu Cat district). All of 31 households have been paid 2,000,000 VND/HH in cash as additional assistances to vulnerable groups, as per project's policy.	April 2017
5	Upgrading canal system of	Additional payment for households losing from	On August 20th 2017 the PPMU and LFDC have paid for the additional assistances	August 2017

No	Name of SP	Agreed actions in the approved DDR	Status of implementation	Time of completion
	Rac River irrigation (HT1)	10% to 30% of productive land Payment of additional assistances to vulnerable household	to 15 households with regard to assistances to vulnerable affected households and severely affected households as per project's policy.	
6	Consolidate main canal and branch canals of Dong Cam irrigation scheme (PY1), and Dong Tron SP	Additional payment to poor households who already received allowance for vulnerable households but less than 2,000,000 VND, while policy in approved RP will support a minimum 2,000,000 VND/HH.	LFDCs of Phu Hoa, Tuy An and Tay Hoa districts have approved the additional supports to poor households in accordance with the approved RP. The details are as below: For Dong Tron SP:33 households for a total of 102,593,000 VND For Dong Cam SP:14 households for a total of 24,785,673 VND During June 2018, the payment of additional support have been made for these households.	June 2018

Source: internal monitoring reports of PPMUs of six provinces

IV. PENDING ISSUES

48. Since last report, almost all SPs now have completed the implementation of compensation and land acquisition, except for the payment of addition allowances for vulnerable households who affected by “Upgrading Saloun Reservoir” subproject in Binh Thuan. However, as resulting from CPMU and PPMU working sessions with the Binh Thuan province and relevant agencies on 18th Jan 2018, DCARB of Ham Thuan Bac has issued the Decision No. 195/QD-UBND regarding the payment of allowances for 126 Households who are severely AHs/vulnerable groups affected by Upgrading Saloun Reservoir subproject for a total of 565,923,200 VND. Accordingly, in January 2018 the payment of allowances has been made for these households.

49. Regarding to the findings and required actions of ADB mission from 19th to 30th June 2017, almost of issues have been resolved as indicated since last report, except one issue related to the temporary impacts during construction implementation for the canals of D26, T18 and T30 of “Upgrading irrigated canal of Dong Tron reservoir’s irrigation system”. However, at the time of reporting, the payment for these temporary impacts have been made for all affected households. Therefore, right now there is no any pending issues of SPs. Please see the following table for more details of status of resolving issues found by ADB mission.

Table 15. The status of resolving the issues raised by ADB Mission from 19th to 30th June 2018

No	Issues raised by ADB Mission	The nature and status of Issues	Status of completion
1	Regarding the pending issues identified by review mission in December 2016 about allowance that not be paid for the severely affected households (AHs), who lose 10% to 30% of agricultural production land in the Lining the middle section of “Rac river irrigation system” subproject in Ha Tinh province, Ha Tinh has not yet implemented	The PPMU of Ha Tinh and relevant agencies have conducted the agreed action in the approved DDR; however, 15 households (of which 12 HHs are severely affected household and 03 households are classified as vulnerable group) who are entitled to get additional assistances have decided not to request for any additional compensation.	Following ADB’s comments, a new agreement was reached with the 15 AHs on 20 August 2017, in which these abided to the compensations rules of the ADB to receive the due compensation. Therefore, the PPMU and LFDC have conducted payment of the additional assistances to 15 households.
2	The allowance for vulnerable groups in “Upgrading Saloun Reservoir” subproject in Binh Thuan has not been paid	Same situation as SP of “Rac river irrigation system”: the households pledged to renounce to their entitlements, but this contribution is not accepted by ADB Mission. ADB also requested PPMU to pay the allowances for these households by July 2017 as	On 18/01/2018, DCARB of Ham Thuan Bac has issued the Decision No. 195/QD-UBND regarding payment of allowances for 126 Households who are severely AHs/vulnerable groups affected by Upgrading

No	Issues raised by ADB Mission	The nature and status of Issues	Status of completion
		indicated in the MOU of ADB Mission in June 2017	Saloun Reservoir subproject for a total of 565,923,200 VND. These households have received their allowances in full.
3	Regarding resettlement implementation in “Upgrading irrigated canal of Dong Tron reservoir’s irrigation system” subproject in Phu Yen province		
3.1	There are some AHs have not yet been paid due to inadequate/mistaken DMS results.	Actually, the DMS has been made for 05 households along two canals of T3 and T28; however, the compensation plan has not been prepared for these households yet. Therefore, payments have not been done for these 05 HHs. On 22 th June 2017, the compensation plan of 05 households have been approved by Tuy An district for a total of 66,392,000 VND. The payment of compensation will be made for these households in July 2017.	The payment of compensation has been made for five households with an amount of 66,392,000 VND in July 2017
3.2	Besides, during construction, this subproject also involves temporary impacts. Currently, the AHs disagree with construction due to unsatisfied payment for their temporarily impacts. The civil works contractors should pay for any damaged crops or income loss during the temporary use of AHs lands. Phu Yen PPMU is in charge of monitoring on restoration those temporarily affected lands to their original conditions. At the moment, these pending issues have a	Regarding temporary impacts during construction for the canals of D26, T18 and T30 of “Upgrading irrigated canal of Dong Tron reservoir’s irrigation system”. On 29th May 2018, Tuy An DPC has issued the Decision No. 746QD-UBND approving the compensation and assistance for temporary impacts due to construction of the SP of Dong Tron with a total of VND 427,810,000 for 324 households along the canals of T18 (131 households); D26 (65 households), and T30 (128 households). Accordingly,	The payment of compensation for temporary impacts have been made for 324 households with an amount of VND 427,810,000 in June 2018

	direct effect on progress of construction in this subproject	during June 2018 the payment have been made for these households.	

Source: internal monitoring reports of PPMUs of six provinces

V. CONCLUSIONS AND RECOMMENDATIONS

1. Conclusions

50. At the beginning stage of the project, the project provinces have not fully complied with regulations on resettlement; therefore this shortcoming has been amended through adjusted procedures and processes for implementing compensations and resettlement on several occasions. Accordingly, the project provinces have proactively cooperated with stakeholders to ensure that compensation, assistance and resettlement activity will fully comply with regulations mentioned in the uREMDF of the project.

51. Overall, affected HHs located in the SPs area agreed and supported the above implementation procedures. None of the HHs that received compensation and assistance has raised complaint about the support provided.

2. Recommendations

52. PPMUs need continuing to ensure full compliance with the Project's procedures concerning the implementation applied for compensation, assistance and resettlement issues. In this respect the PPMUs need to keep cooperating with DLFDCs and CPCs to ensure that compensation Project's procedures will be duly followed, in accordance also with the approved uREMD Framework.

53. PPMUs need continuing to cooperate closely with relevant authorities dealing with resettlement matters, such as LFDCs and local agencies as well as with contractors, design consultants and supervisors to ensure that due payment to AHs affected by negative impacts and losses during construction implementation is timely enacted.

54. There is the need to ensure strict coordination among CPMU, LIC and PPMUs to detect and resolve any arising issue relating to compensation and resettlement during the project implementation process.

MEETING MINUTES OF COMMUNITY CONSULTATION
On Safeguard Policies of Resettlement and Environment of L3173 Project

Cat Hiep, 16 April 2018

Sub-project name: Calamity Remedies of Van Phong Irrigation Scheme

Cat Hiep Commune, Phu Cat District, Binh Dinh Province

I. Participants:

- | | |
|-------------------------------------|---|
| - Mr. Nguyen Van Cho, | Position: President of Cat Hiep CPC |
| - Mr. Nguyen Van Phu, | Position: Cadastral Officer |
| - Mrs. Ngo Thi Lan, | Position: Women Union staff |
| - Mrs. Hoang Thi Van, | Position: CPMU Safeguard staff |
| - Mr. Le Dinh Tan, | Position: Binh Dinh PPMU staff |
| - Mr. Hoang Dinh Giap, | Position: Design consultant |
| - Mr. Nguyen Vinh Phu, | Position: Resettlement Specialist - LIC |
| - Representatives of AHs: 07 people | |
- (See attached participant list)

II. Contents:

2.1. Contents of dissemination information:

- Dissemination of sub-project design: including general information of the sub-project such as objectives, location, construction scope, etc.
- Dissemination of scope of effect, Resettlement and Ethnic Minorities Development Framework, environmental issues.
- Dissemination of implementation progress, procedures of making complaints, monitoring and evaluation.
- Delivery of sub-project brochures.

2.2. Community consultation:

- Consultation on scope of effect and impacts of sub-project implementation, resettlement issues, environmental issues, expected impacts, mitigation measures for negative impacts on affected people;
- Consultation on replacement price, compensation policy and rights on compensation and assistance of affected people;
- Consultation on demand for assistance and life recovery methods suitable for affected people;
- Collection of other opinions related to compensation and resettlement, and environmental impacts before and during construction and during the sub-project operation.

III. Opinions in the discussion

General opinions:

- Agriculture is the main job of local people but water is scarce, therefore the sub-project receives great support of the people.

- Due to the special nature of local soil, the design of the sub-project should ensure that water is always available in the canal and avoid causing sand slide when discharging water.
- Contractors should identify and work with the CPC on locations for gathering materials.
- It is necessary to consider recovery or take mitigation measures for downstream of 4 outlets.
- There should be measures to block garbage in culvert gates.

Environment:

- Construction contractors must ensure that people's life is not affected, particularly environmental pollution or reinstatement of people's production road.
- The site plan should be cleared and recovered after completion of the sub-project.

Resettlement and Gender issues:

- The implementation of compensation and assistance should be in accordance with the project policy;
- The remaining land area should be considered being acquired if this area does not ensure production and economic efficiency;
- During the construction, if there is any impact on the cultivation land of the households, it must be compensated or assisted and returned to the original state.
- Assistance for women should be considered, especially unskilled labors in the process of project construction.

The consultation meeting ended at 11:30, 16 April 2018.

MEETING MINUTES OF COMMUNITY CONSULTATION
On Safeguard Policies of Resettlement and Environment of L3173 Project

Cat Trinh, 16 April 2018

Sub-project name: Calamity Remedies of Van Phong Irrigation Scheme

Cat Trinh Commune, Phu Cat District, Binh Dinh Province

I. Participants:

- | | |
|-------------------------------------|---|
| - Mr. Nguyen Ngoc Phuoc, | Position: President of Cat Trinh CPC |
| - Mr. Duong Thanh Nam, | Position: Cadastral Officer |
| - Mrs. Nguyen Thi Kim Chung, | Position: Women Union staff |
| - Mrs. Hoang Thi Van, | Position: CPMU Safeguard staff |
| - Mr. Le Dinh Tan, | Position: Binh Dinh PPMU staff |
| - Mr. Hoang Dinh Giap, | Position: Design consultant |
| - Mr. Nguyen Vinh Phu, | Position: Resettlement Specialist - LIC |
| - Representatives of AHs: 06 people | |
- (See attached participant list)

II. Contents:

2.1. Contents of dissemination information:

- Dissemination of sub-project design: including general information of the sub-project such as objectives, location, construction scope, etc.
- Dissemination of scope of effect, Resettlement and Ethnic Minorities Development Framework, Environment issues.
- Dissemination of implementation progress, procedures of making complaints, monitoring and evaluation.
- Delivery of sub-project brochures.

2.2. Community consultation:

- Consultation on scope of effect and impacts of sub-project implementation, resettlement issues, environmental issues, expected impacts, mitigation measures for negative impacts on affected people;
- Consultation on replacement price, compensation policy and rights on compensation and assistance of affected people;
- Consultation on demand for assistance and life recovery methods suitable for affected people;
- Collection of other opinions related to compensation and resettlement and environmental impacts before and during construction and during the sub-project operation.

III. Opinions in the discussion

Environment:

- The people agree and support the implementation of the project. It is recommended the project be implemented soon so that the people would take its benefits and be stable for production;

- The construction contractors are required to take measures to minimize environmental pollution;
- The contractors are required to register transportation routes to ensure traffic safety for local people;
- Sign boards should be installed at the construction site and construction plan should be clearly announced to people.

Resettlement and Gender issues:

- Affected households and the CPC agree about the sub-project implementation;
- Compensation and support policies of the project are required to be fully complied;
- Assistance for HHs of vulnerable groups should be paid special attention to;
- During the construction, if there are impacts outside the scope of the site clearance, the project has to compensate and return the affected area to its original state;
- For the remaining land area after acquisition that is impossible to cultivate or too small, the project is proposed to acquire the area;
- Women should be assisted in taking part in land acquisition and monitoring activities; or women who have lost a lot of land should be facilitated to get suitable jobs created by the contractor of the sub-project.

The consultation meeting ended at 15:30, 16 April 2018.

MEETING MINUTES OF COMMUNITY CONSULTATION
On Safeguard Policies of Resettlement and Environment of L3173 Project

Binh Thanh, 17 April 2018

Sub-project name: Calamity Remedies of Van Phong Irrigation Scheme

Binh Thanh Commune, Tay Son District, Binh Dinh Province

I. Participants:

- | | |
|-------------------------------------|---|
| - Mr. Nguyen Cong Minh, | Position: President of Binh Thanh CPC |
| - Mr. Tran Xuan Quang, | Position: President of Commune Fatherland Front Committee |
| - Mr. Ho Xuan Cuoi, | Position: Cadastral Officer |
| - Mrs. Hoang Thi Van, | Position: CPMU Safeguard staff |
| - Mr. Le Dinh Tan, | Position: Binh Dinh PPMU staff |
| - Mr. Hoang Dinh Giap, | Position: Design consultant |
| - Mr. Nguyen Vinh Phu, | Position: Resettlement Specialist - LIC |
| - Representatives of AHs: 04 people | |
- (See attached participant list)

II. Contents:

2.1. Contents of dissemination information:

- Dissemination of sub-project design: including general information of the sub-project such as objectives, location, construction scope, etc.
- Dissemination of scope of effect, Resettlement and Ethnic Minorities Development Framework, Environment issues.
- Dissemination of implementation progress, procedures of making complaints, monitoring and evaluation.
- Delivery of sub-project brochures.

2.2. Community consultation:

- Consultation on scope of effect and impacts of sub-project implementation, resettlement issues, environmental issues, expected impacts, mitigation measures for negative impacts on affected people;
- Consultation on replacement price, compensation policy and rights on compensation and assistance of affected people;
- Consultation on demand for assistance and life recovery methods suitable for affected people;
- Collection of other opinions related to compensation and resettlement and environmental impacts before and during construction and during the sub-project operation.

III. Opinions in the discussion

- The sub-project is agreed to be implemented because the local production land is impoverished, not economically effective.

Environment:

- When implementing construction, the PPMU and contractors have to work and coordinate closely with the CPC to ensure traffic safety and security for people in the project area;
- Signs must be installed at the construction site;
- The contractor must apply mitigation measures to avoid impacts of dust and water pollution on people living the surrounding area.

Resettlement and Gender issues:

- Policies of the project must be fully applied to ensure and create conditions for the households to stabilize their life;
- In the process of payment of compensation, the PPMU and DPC are requested to work closely with the CPC to ensure progress.
- Construction must be implemented in the area that has been acquired, if there is any impact outside the acquired area, the project must pay the compensation;
- For the remaining areas after acquisition, if not they do not meet requirements of production conditions, the project is proposed to consider acquiring these areas;
- Support to vulnerable households should be in accordance with project policies, especially single mothers
- Women should be given opportunity to be employed by the contractors during the construction process.

The consultation meeting ended at 9:00, 17 April 2018.

- (See attached participant list)

II. Contents:

2.1. Contents of dissemination information:

- Dissemination of sub-project design: including general information of the sub-project such as objectives, location, construction scope, etc.
- Dissemination of scope of effect, Resettlement and Ethnic Minorities Development Framework, Environment issues.
- Dissemination of implementation progress, procedures of making complaints, monitoring and evaluation.
- Delivery of sub-project brochures.

2.2. Community consultation:

- Consultation on scope of effect and impacts of sub-project implementation, resettlement issues, environmental issues, expected impacts, mitigation measures for negative impacts on affected people;
- Consultation on replacement price, compensation policy and rights on compensation and assistance of affected people;
- Consultation on demand for assistance and life recovery methods suitable for affected people;
- Collection of other opinions related to compensation and resettlement and environmental impacts before and during construction and during the sub-project operation.

III. Opinions in the discussion

Environment:

- The people agree and support the implementation of the project. It is recommended the project be implemented soon so that the people would take its benefits and be stable for production;

- The construction contractors are required to take measures to minimize environmental pollution;
- The contractors are required to register transportation routes to ensure traffic safety for local people;
- Sign boards should be installed at the construction site and construction plan should be clearly announced to people.

Resettlement and Gender issues:

- Affected households and the CPC agree about the sub-project implementation;
- Compensation and support policies of the project are required to be fully complied;
- Assistance for HHs of vulnerable groups should be paid special attention to;
- During the construction, if there are impacts outside the scope of the site clearance, the project has to compensate and return the affected area to its original state;
- For the remaining land area after acquisition that is impossible to cultivate or too small, the project is proposed to acquire the area;
- Women should be assisted in taking part in land acquisition and monitoring activities; or women who have lost a lot of land should be facilitated to get suitable jobs created by the contractor of the sub-project.

The consultation meeting ended at 15:30, 16 April 2018.

MEETING MINUTES OF COMMUNITY CONSULTATION
On Safeguard Policies of Resettlement and Environment of L3173 Project

Binh Thanh, 17 April 2018

Sub-project name: Calamity Remedies of Van Phong Irrigation Scheme

Binh Thanh Commune, Tay Son District, Binh Dinh Province

I. Participants:

- | | |
|-------------------------------------|---|
| - Mr. Nguyen Cong Minh, | Position: President of Binh Thanh CPC |
| - Mr. Tran Xuan Quang, | Position: President of Commune Fatherland Front Committee |
| - Mr. Ho Xuan Cuoi, | Position: Cadastral Officer |
| - Mrs. Hoang Thi Van, | Position: CPMU Safeguard staff |
| - Mr. Le Dinh Tan, | Position: Binh Dinh PPMU staff |
| - Mr. Hoang Dinh Giap, | Position: Design consultant |
| - Mr. Nguyen Vinh Phu, | Position: Resettlement Specialist - LIC |
| - Representatives of AHs: 04 people | |
- (See attached participant list)

II. Contents:

2.1. Contents of dissemination information:

- Dissemination of sub-project design: including general information of the sub-project such as objectives, location, construction scope, etc.
- Dissemination of scope of effect, Resettlement and Ethnic Minorities Development Framework, Environment issues.
- Dissemination of implementation progress, procedures of making complaints, monitoring and evaluation.
- Delivery of sub-project brochures.

2.2. Community consultation:

- Consultation on scope of effect and impacts of sub-project implementation, resettlement issues, environmental issues, expected impacts, mitigation measures for negative impacts on affected people;
- Consultation on replacement price, compensation policy and rights on compensation and assistance of affected people;
- Consultation on demand for assistance and life recovery methods suitable for affected people;
- Collection of other opinions related to compensation and resettlement and environmental impacts before and during construction and during the sub-project operation.

III. Opinions in the discussion

- The sub-project is agreed to be implemented because the local production land is impoverished, not economically effective.

Environment:

- When implementing construction, the PPMU and contractors have to work and coordinate closely with the CPC to ensure traffic safety and security for people in the project area;
- Signs must be installed at the construction site;
- The contractor must apply mitigation measures to avoid impacts of dust and water pollution on people living the surrounding area.

Resettlement and Gender issues:

- Policies of the project must be fully applied to ensure and create conditions for the households to stabilize their life;
- In the process of payment of compensation, the PPMU and DPC are requested to work closely with the CPC to ensure progress.
- Construction must be implemented in the area that has been acquired, if there is any impact outside the acquired area, the project must pay the compensation;
- For the remaining areas after acquisition, if not they do not meet requirements of production conditions, the project is proposed to consider acquiring these areas;
- Support to vulnerable households should be in accordance with project policies, especially single mothers
- Women should be given opportunity to be employed by the contractors during the construction process.

The consultation meeting ended at 9:00, 17 April 2018.
