

Social Monitoring Report

Semi-Annual Report (January to June 2021)

December 2021

VIET NAM: WATER SECTOR INVESTMENT PROGRAM – TRANCHE 3 (THAI NGUYEN SUBPROJECT)

Prepared by Thai Nguyen Water Joint Stock Company (TWACO) for Thai Nguyen Provincial People's Committee and the Asian Development Bank.

NOTE

(i) In this report, "\$" refers to US dollars.

This social monitoring report is a document of the borrower. The views expressed herein do not necessarily represent those of ADB's Board of Directors, Management, or staff, and may be preliminary in nature.

In preparing any country program or strategy, financing any project, or by making any designation of or reference to a particular territory or geographic area in this document, the Asian Development Bank does not intend to make any judgments as to the legal or other status of any territory or area.

Summary on performances of resettlement implementation for the reporting period from January to June 2021	<p>Package: TN – CW01: The local authorities is reivewing data on type of land of 1 HH due to the inconsistent data among the related authorities.</p> <p>Package: TN CW02:</p> <p>The Land Fund Development Center has completed the DMS. At the time of reporting, the compensation work is being carried out in 4 project communes Phuc Triu, Phuc Xuan, Quyet Thang and Thinh Dan for 244 households, of which 59 households are compensated for trees with a total amount of VND 77,527,800 and 185 households were restored site (yard, fence)</p>	
Key activities planned for period of next 6 months (from July to December 2021)	<p>Package TN-CW01</p> <p>To completed compensation for 1 remaining HH due to the inconsistent data among the related authorities and finalize the affected house</p> <p>Package TN - CW02;</p> <p>It is expected to approve the plan to compensatae 100% of affected households for trees and crops and restored site (yard and fence) to 100% of affected households according to the construction progress until December 2021</p>	

I. INTRODUCTION

1. Background

1. Thai Nguyen Sub-project (Thai Nguyen City Water Supply System Development Project) is a part of the seven water supply subprojects that formed the third Periodic Funding Request (PFR-3) of the Multi-Tranche Financing Facility under Vietnam Water Sector Investment Program.
2. The project is classified as Category B for Involuntary Resettlement (IR) due to land acquisition and as Category C for Indigenous People (IP) as no IP impact was identified in the project area.
3. The project is implemented under Thai Nguyen Provincial People's Committee as the Executing Agency and Thai Nguyen Water Joint Stock Company (TAWACO) as the implementing agency. A project management unit (PMU) has been established to carry out the implementation on behalf of TAWACO.

2. Subproject components

4. The objectives of the project are to provide a sustainable water supply to Thai Nguyen city both for short-term and long-term period, strengthen our water production capacity and improve service quality as well as expand the existing water supply network for Thai Nguyen city and neighborhood and provide favorable conditions for local social-economic development. Thai Nguyen project consists of two contracts as follows:
5. Contract TN-CW01: Constructing new 50,000 m³/day water treatment plant with the following works: Construction of a raw water intake and a raw water pumping station with capacity of 50,000 m³/day near Voi Phun hill, Phuc Triu commune, Thai Nguyen city, Thai Nguyen province
 - Construction of a raw water pipeline of DN800mm, 180m long, runs from the raw water pumping station to the water treatment plant
 - Construction of a water treatment plant at Voi Phun hill of Phuc Triu commune, which includes a static mixer of DN1000mm; 3 reaction tanks; 3 clarifiers, dimension of each clarifier of 73 m²; a two-compartment treated water reservoir of 20,000 m³, a power transforming station and auxiliary works (office, chemical house, sludge pond, drainage system, internal road, fence, gate...)
6. Contract TN-CW02: Constructing new water supply system with the following works: Supply material, installation, commissioning and completion of a water supply to supplement

the existing network of Thai Nguyen city, including: 18.72 km of DN200mm – DN800mm transmission pipeline; 30.91 km of DN100mm to DN200mm distribution pipelines, 49.3 km of D50 to D63 service pipelines and 5,713 connections and 35 fire hydrants.

3. Objectives of internal monitoring

7. Because this project is categorized as B in involuntary resettlement and there is no any impacts on ethnic minority household, it only requires the internal monitoring reports during project implementation. The main purpose of the monitoring and evaluation program is to ensure that matters related to involuntary resettlement have been implemented in accordance with the policies and procedures of the RPs/uRPs following ADB SPS 2009.

8. The general objectives of internal monitoring are to: (i) report on the status and assess the compliance with the agreed social safeguards documents, including RP/uRPs; (ii) confirm the availability/handover of land to the proposed subprojects; (iii) monitor contractors' compliance to policy framework's provisions related to temporary land acquisition during civil works; (iv) ensure that the standards of living of affected households is restored or improved; (v) monitor the implementation process; (vi) assess the sufficient implementation of compensation, resettlement measures and social development assistance programs; (vii) identify problems or potential problems; and (viii) identify and implement quick response measures to mitigate emerging issues.

9. This report is prepared by Thai Nguyen PMU to provide information and report to ADB on the implementation status of social safeguard in the first half of 2021, covering the period from Jan to Jun 2021.

4. Institutional arrangements

10. The PMU is responsible for fulfilling the environment and social safeguards requirements of the project. The PMU is also responsible for surface water and air quality sampling activities, undertaking social – environmental investigations that may arise during implementation, and responding to environmental, resettlement-related or nuisance-related complaints from residents or businesses affected by the project works.

11. Construction Supervision Consultant (CSC) will supervise implementation of the project works on behalf of the Implementing Agency. The CSC is also in charge of mobilizing the staff to supervise and monitor effective implementation of the environmental management plan (EMP), resettlement plan (RP), and preparing semi-annual safeguards monitoring reports to ADB, CSC will be mobilized from the commencement of the construction of the project works and will conduct regular supervision of the construction site on a daily basis.

5. Summary of impacts based on detailed designs/DMS results

23. At the time of reporting, the total number of 267 households of the whole project that have been identified as affected households by subproject implementation, equivalent to 63% (267/424) in comparison with the data reflected in the updated RPs, the total number of households have been compensated/restored the site out of the total number of households counted for 94% (251/267) households. The details of each package are as follows:

24. For the TN CW-01: The work of compensation for site clearance has been completed (except for 01 case due to authorities have not yet agreed on the type of affected land). Actual number of affected households is 7 households with affected forestland area of 96,943m² including 77.783 m² of protection forestry land area and 19,160 m² productive forestry land area. The perennial land (7,734 m²) and residential land (400 m²) mentioned in uRP (summary in table below) will not be affected. Among these 7 households, there is 1 household affected by auxiliary works with an area of 12m²; all 7 affected households have timber with the number affected trees are 12,229 trees, there are 5 households affected with fruit trees with the number of trees of 552 trees; 3 households are affected with temporary houses with an area of 127.4m². For details see table below

Table 2: Different impact between uRP and updated at the time of reporting for TN CW-01

Contents	According to uRP			According to DMS as of June 2021		
	Number of AH	Number of APs	Quantity of impact	Number of AH	Number of APs	Quantity of impact
1. Number of affected households	8	32		7	28	
+ Number fo Severely AH	7	28		7	28	
+ Number of vulnerable households (Households with woman-headed with dependents)	1	4		1	4	
2. Households are directly affected by land acquisition	8	32		7	28	
- Households are Affected with forestry land (m ²))	8	32	91,805	7	28	96,943
- Households are Affected with perennial land (m ²)	4	16	7.734	0	0	0

Contents	According to uRP			According to DMS as of June 2021		
	Number of AH	Number of APs	Quantity of impact	Number of AH	Number of APs	Quantity of impact
- Households are Affected with rural residential land (m ²)	4	16	400	0	0	0
- Number of households are affected with secondary structures (m ²)	3	11	801	1	4	12
- Number of Households are Affected with timber trees (tree)	8	32	10.661	7	28	10.444
- Number of Households are Affected with fruit trees (tree)	7	28	3.176	7	28	2.274
- Number of Households are Affected with temporary house (m ²)	3	12	127	3	12	127,4

Source: uRP and DMS results by June 2021

25. For the package TN CW-02: Completed the detailed measurement survey. As of June 2021, total affected HH is 259/416 (62% compared to uRP. In fact, 100% (259/259 households). There are 157 households (416-259). =157) is not counted due to the revision of technical design the pipeline which move to the traffic safety corridor). Out of 259 households, 74 households are affected in terms of trees and crops and 185 households are affected by yards, fences, etc. There are 59/74 (80%) households affected by trees and crops have been paid in cash and 185/185 households as restored the site to the original state.

26. Out of 259 households, equivalent to about 1316 people, there are 16 vulnerable households. This package has only temporary impact, no long-term impact on land acquisition. There is a change in this package (reducing the impact on crops. The temporarily affected land area according to uRAP is about 8,741.4 m² (including 8,052 m² of agricultural land, 600 m² of bare land) and 89.4 m² of public land) in the communes of Phuc Triu, Phuc Xuan, Quyet Thang and Thinh Dan ward. However, in reality, the number of affected households decreased compared to uRP as mentioned above and the area also decreased accordingly. Specifically, the area of land of the affected household decreased from 8741m² to 2505m²; the number of affected trees decreased from 8,802 to 997. In terms of level of impact, these areas will only be affected for a short period of time construction period (about 1 month) and will be restored to the original state. The construction area does not have any

underground works such as power lines or telecommunications cables affected. Detail compensation for the package TN –CW-02, see tables below.

Table 3: Different impact between uRP and updated at the time of reporting for TN CW-02

Contents	According to uRP			According to DMS as of June 2021		
	Unit	AHH	Amount	Number of AH	Number of APs	Amount
1. Number of affected households	HHs	416	1,664	259	1.36	
2. Number of affected People	People		1,664			
3. Number of households are affected with structures	HHs	369	1476	185	740	
- Structure include fences, ground, gate, well, rock embankments	m2		2,156			1442
4. Number of households are affected with trees and crops	HHs	231	924	74	296	
- Tree include: tea, rice, and fruits like litchi, longan, pomelo and ornamentals.	trees		8,822			997
5. Number of households are temporary affected with land						2505
- Annual crop land	AH / m2	386	8,052	42		1816
- Vacant land	AH / m2	50	600	50		600
- Public land	AH / m2	4	89	4		89

Total	416	74	185	259	157	416	59	185	244

(Source: Thai Nguyen Land fund development Center, 6/2021)

Remark:

**For the the households affected by concrete yard and concrete payment/alley, the Contractor will be responsible for returning the site, the cost has been included in the civil construction.*

**Among the households that do not have to be measured, there are 30 households belonging to this project and also affected by the Bac Son road upgrade project that have been compensated with the capital of the Project owner of the Bac Son road upgrade project. Compensation price according to the agreement between the Project owner and the AHH. During the implementation process, PMU also worked with the Project owner of the Bac Son road project so that the people could be consulted, supported and compensated according to the current policy and agreed by both parties*

28. The total number of affected, counted and compensated/returned households is shown in the table below

Table 5:Summary scope of affected HH and Land of the 2 packages

Affected HH	uRP	DMS as of 6/2021	Total paid HH or restored site to orginal state as of 6/2021
TN-CW-01 package

II. PROGRESS OF SOCIAL AND LAND ACQUISITION IMPLEMENTATION

1. General project progress

12. Contract TN-CW01: The Contract was signed by the Joint Venture of Hai Duong Irrigation Construction JSC, Minh Thong Co., Ltd and Europe Pump JSC on January 18, 2020. The Package has started on March 16, 2020 with total construction time of 18 months. As the semi-annual progress report 2021, the actual completed volume is about 65%.

13. Contract TN-CW02: Constructing new water supply network: The Contract was signed on August 27, 2020 and started on September 10, 2020. As the semi-annual progress report, the actual completed volume is about 65%.

14. Contract TN-CS2: Construction Supervision Consultant: The Contract was signed by ANYCON Project Consulting Ltd and WATECH Construction Consulting Joint Stock Company on May 13, 2020. The Contract will be terminated in December 2021 and the time for monitoring the Contractor's warranty is 24 months.

2. Progress of preparation of social safeguards documents for subprojects

15. During project preparation, a Resettlement Plan was prepared in 2013, based on preliminary design and covered the whole project.

16. During project implementation, two resettlement plans (uRPs) have been updated based on the detailed design of the WTP and Constructing New Water Transmission and Distribution Networks: uRP for Constructing New Water Treatment Plant, Phuc Triu Commune (TN CW 01) is approved and disclosed in January 2019.

17. The uRP for Constructing New Water Supply Networks (TN CW 02) is approved and disclosed in December 2018. However, due to the delay of procurement process of TN - CW02, the uRP for CW 02 was approved in 2018 but it has not been implemented, the compensation has not been paid to AHs. Therefore, as requested by ADB, PMU needs to review DMS results to identify changes, especially changes in categories of structures or in categories of trees due to growing up and changes in the compensation prices for impacts. In August 2020, the new uRP for TN CW 02 was prepared and approved. The scope of uRP includes the item of construction of pipeline with 12km from Voi Phun hill going along To Huu road to Dan intersection. Diameter of pipe is D600-D800.

3. Information dissemination and community consultation

18. According to requirements in Safeguard Policy Statement of ADB, meaningful consultations should be carried out throughout the project cycle. In previous implementation

stages, a Project Information Booklet (PIB) has been prepared and handed over to each affected household. The PIB provides summary information on the entitlements of the affected HHs based on the policies set out in the Project Resettlement plan approved. Main information of the PIB consist of:

a. Brief Project Background: (i) Projects and Project's impacts; (ii) Project owners and project implementation agencies; (iii) phases of the project and implementation timeframe; (iv) Total investment; and (v) Name of the Investor and Donors and investment's cost for the project.

b. Approved updated resettlement plans for the affected HHs: (i) Principles of titles for compensation, assistance and resettlement ;(ii) compensation, assistance policy for the land affected and affected households; (iii) compensation, assistance policy for houses, structures affected; and (iv) Other assistances

19. Consultation for contract: TN-CW-01: Consultation meeting on draft compensation plan have been organized and publicly posted in Phuc Triu CPC. The details are as shown the table below. The minute of dissemination of compensation, supports and resettlement plan is attached in appendix 1 in the report SMR second 2019.

20. Consultation for contract: TN-CW-02: In the process to prepared uRP, the consultation was made and mentioned in the annex of uRP which approved by ADB in August, 2020.

21. The information publication and community consultation for Contract TN-CW02 was carried out by the design consultant during their surveys and preparation of the uRP for the pipelines and no more consultation meeting during this monitoring period.

22. In the first 6 months of 2021, due to the influence of Covid, consultation activities with large number of participants have been limited in recent times. The consultation activities were be carried out mainly through the following forms: 1) The Land Fund Development Center consults directly with small groups during the DMS process; ii) Land fund development center publicly listed in communes and villages Decision No. 39/2017/QD-UBND dated December 20, 2017 on promulgating Regulation on compensation unit prices for crops in Thai Nguyen province ; iii) PMU consults and respond the opinions of commune/village officials via the phone when implementing compensation work; and iv) Independent consultant consulting local people and authorities (see some pictures in the appendix). The information from the consultation shows that the people are satisfied with the compensation policies of the project.

4. DMS implementation

a. DMS for TN CW - 01:

23. According to the approved uRP for Contract TN-CW01, the number of affected households is 8. However, 1 HH didn't carry out DMS and land acquisition due to dispute (since that the detailed design has been adjusted to avoid this land area, therefore, the project will not conduct land acquisition with total of 2,462.4m² of this households). Besides, 1 HH carried DMS but the authorities are certifying the type of land because there are differences among the land management unit with the area of 19,160m².

24. To avoid delaying civil construction, LFDC, PMU and 2 HHs discussed and agreed the solutions. Given that, the HH is awaiting authorities to certify the type of land will be get payment after getting the final certify the type of land; for the 01 HH who would not require land due to dispute and revised technical design will be official informed in the next decision by functional agency. The pending issues regarding 2 AHs doesn't affect to the preparation schedule for construction of project because the area is small and it is in the area for phase 2 of project.

b. DMS for TN CW - 02:

29. For TN CW-02, PMU and consultant have consulted with local government and affected households for the best resettlement options and agreed that successive method should be used for construction and compensation. Specifically, people requested the contractor to complete each section so that it does not affect people's travel in the long term, and if the contractor/project cause temporarily affects the physical works (yard, fence), it must be restored to the current state for the affected households right after the pipe installation completed and compensation for crops and property on land according to the government's policy for the affected households before the construction and installation of the pipe section. The LFDC completed DMS and consolidating data for compensation plan for approval. Progress of DMS for 02 contract packages as in table below:

Table 6: DMS progress as of June 2021

No.	Contract	DMS commencement date	DMS completion date	Remarks
1	TN CW-01	19/7/2019	10/8/2019	07 AHs out of total 08 AHs was conducted by LFDC 01 AH with land area to be acquired of 2,462.4 m ² is in dispute of land ownership against another household in the area then DMS for this AH will be conducted when the dispute is resolved by Phuc Triu Commune People's

No.	Contract	DMS commencement date	DMS completion date	Remarks
				Committee. However, during working with PMU and local agencies, PMU plans to adjust design to avoid land acquisition to this AH. The progress of land acquisition process for this AH will be updated in the next monitoring report.
2	TN CW-02	18/5/2018	31/12/2021 (DMS was completed but may arise (if any) during construction, so it is expected to complete in December 2021)	By June 2021, the cash payments were made to 59 affected households for trees and crops, and the site restoration were conducted to 185 households. The unit price is applied according to the unit price in Decision No. 39/2017/QĐ-UBND dated December 20, 2017 on promulgating the Regulation on compensation unit prices for crops in Thai Nguyen province. At present, there is no decision on separate compensation for the above 59 households. The decision on compensation for all affected households under this package will be issued in 01 decision. It is expected that in December 2021.

5. Preparation and approval of compensation plans

30. According to regulation of Thai Nguyen province as well as Vietnam Government on compensation and assistance, the affected forestry protection will not be compensated or assisted but must be re-planted by client. However, this area was used by local people and PMU propose Thai Nguyen PPC for mechanism of assistance for these AHs. And In addition, Thai Nguyen PPC issued the letter No. 5187/UBND-CNN, dated 13 December 2019 for approval additional assistance for forestry protection land that is affected by subproject (attach in Appendix 3 of the SMR second 2019) through the consultation meeting with relevant agencies and AHs (minute in Appendix 2 of the report SMR second 2019).

31. The compensation unit rates are in accordance with the Decision No. 08/2019/QĐ-UBND dated 19/4/2019 for compensation of assets attached to properties and Decision No. 39/2017/QĐ-UBND dated 20/12/2017 for compensation of plants on the properties for subproject. According to compensation price was issued in two these Decisions, Letter No. 5187/UBND-CNN, dated 13 December 2019, the City's Land Development Center have prepared a compensation plan and publicize the compensation plan at the People's Committee of Phuc Tri commune and sent the compensation plan to the affected households.

Affected households have 20 days to compare the replacement cost, if there is any other idea about the unit price, they will send it to PMU and city land fund development center for consideration and adjustment (minute of public meeting in Appendix 1 in the SMR for the last six month of 2019).

32. As of 6 2021: There are 3 decisions to approve compensation for the package TN-CW-01. Details of these decisions are outlined in the monitoring report for the second half of 2020.

33. For TN CW-01: Land Fund Development Center and TAWACO paid 6 out of 7 households in January 2020. The remaining 1,916 hectares of production forest (of 01 remaining AH-stage 2) has finished the tallying work, currently the city land fund development center, Phuc Triu CPC and affected households are finalizing the legal procedures to submit to competent authorities for approval.

34. For contract TN CW-02 As described in the progress of DMS implementation, this package has completed the DMS and consolidate data and will issue an approval decision in one time, expected in December 2021. During the construction process, the PMU made a compensation plan (unit price according to Decision No. 39/2017/QD-UBND dated December 20, 2017 on promulgating Regulation on compensation unit price for crops in Thai nguyen province) for each section part and has been approved by the PMU for 59 affected households in terms of trees and crops before payment and the contractor restored the site for 185 affected households in terms of concrete yard, fence, etc. This method is consistent with the actual construction progress and minimize the impact on the daily life and business of local residents and got the support of the affected households. During the process of site restoration and payment to affected households for trees and crops, there were no complaints from affected people.

35. Because the inventory is conducted scatteredly in many areas of project communes and hamlets, the area for installation of pipelines is mainly located in the traffic safety corridor, so the impact level on trees and crops is very small, so the project owner and the Land Fund Development Center plan to aggregate the compensation amount to submit for approval of this whole bidding package in 1 phase (according to the plan, submit 2 rounds for approval). Therefore, the approval of the compensation decision is slow compared to the construction progress but the site is secured for construction activities.

36. In the first 6 months of 2021, no new compensation unit price has been officially approved. Package TN-CW-02 is expected to have 01 approval in December 2021.

37. In the process to conduct resettlement plan, Land Fund Development Center and TAWACO has complied the project policy such as compensation prices, supporting policy. The detail for this support

38. For support policy: for 6 affected households of package TN - CW 01, the subproject has applied support policies in accordance with the mentioned uRP matrix framework, specifically

- Subsidy to stabilize the livelihood (1 household): Cash assistance equivalent to 30 kg of rice for each family member for 3 months if not relocated.
- Job creation and occupation changing allowance (6 households): Cash assistance equivalent to 3 times the value of the affected area of the same type of land but the area to be allowed does not exceed the local agricultural land allocation quota.
- Vulnerable AHs (1household - single Nguyen Thi Tuyet currently having dependents): Affected groups of any severity of impacts. These have the right to access to livelihood restoration/ development programs such as vocational training and micro-credit support; Other support as decided by the relevant CPC, PPC, if any. Receive one-time cash support of VND 2,000,000.
- Loss of income / livelihood due to acquisition of agricultural land (6 households): Transitional assistance in the form of a cash subsidy equivalent to 30kg of rice for each household member in periods prescribed by Thai Nguyen PPC allowed households to lose (i) 10% to 30% of their productive land for 3 months; (ii) from 30% to 70% in 6 months; and (iii) over 70% of production land in 12 months.
- Income restoration allowance equivalent to 3 times of the acquired area with the current land price up to the maximum entitlement to land applicable in the project area in accordance with the provisions of the Thai Nguyen People's Committee. The right for each member of working age to participate in apprenticeships

39. According to the construction contract between the Project owner and the Contractor, the compensation costs for the yard, walls, fences and structures will be directly compensated by the contractor to the affected households through repair, restore the current state of the physical infrastructures (yard, fence). Therefore, for households affected by the yard, concrete road, fence under package TN-CW-02, the contractor has restored the site to the original state for the household according to the agreement of the two parties.

40. During the July 2021 monitoring, during consultation with affected and compensated households, local authorities and affected households, people were satisfied with the unit

price, payment and restoration site for households. There are no complaints about these issues.

41. Corresponding to the DMS progress as described above, the compensation plans for the affected households have been prepared in two SPs as follow:

Table 7: Compensation Plan Preparation and Approval Progress

No.	Contract	Construction plan		Detailed DMS		Public Plan		Payment	
		Start	Completion	Start	Completion	Start	Completion	Start	Completion
1	TN CW-01 (Stage 1 for 06 AHs)	Feb. 2020	Aug. 2021	15/5/2019	10/6/2019	01/8/2019	30/12/2019	01/01/2020	22/1/2020
	TN CW-01 (Stage 2 for 01 AH)			20/12/2019	7/3/2020	9/3/2020	09/6/2020	Q1/2021	Q1/2021
2	TN CW-02	Sep. 10, 2020	Dec. 3, 2021	5/8/2020	20/8/2020	Expected 12/2021	Expected 12/2021	Expected 12/2021	Expected 12/2021

Note:

Package TN-CW-01 has 01 household is not paid, expected to be compensated in December 2021
 Package TN-CW-02 has completed the DMS, but during the construction process, it may arise the AHH, so it is expected that the arising HH (if any) will be completed in December 2021

6. Process of compensation payment

42. In January 2020 Land Fund Development Center and TAWACO paid 6 out of 7 households under TN CW 01. TAWACO allocated enough budget for both contracts. By the time of reporting, there is still 1 household that has been conducted DMS but has not received the compensation yet due to the inconsistent documents on land type of the authorities, 01 household would not be acquired land due to dispute and revised technical design would not require the land of this HH.

43. In the first 6 months of 2021, the project paid compensation for trees and crops to 59 households with the amount of VND 77,527,800 and restored the site for 185 households. A list of 59 compensation-receiving cash can be found in **Annex 1**.

Table 8: Resettlement budget according to approved uRP and as of June 2021

2	TN CW-02	416	416	8,741.4	8,741.4	8.822	8.822	3,342,703,000	Ongoing. No approval decision on compensation plan

44. At the time of monitoring, July 2021. The supervision consultant recorded compensation and resettlement assistance paid to 6/7 households in Doi Che hamlet, Phuc Triu commune under the TN-CW 01 package with the total amount of VND 10,031,415,000. In the package TN-CW-02, the Consultant also recorded that 59 households affected by trees in 4 communes Quyet Thang, Phuc Xuan, Phuc Triu, Thinh Dan were compensated with the amount of 77,527,800VND and 185 households were restored the site to the original state. A review of the check and interviews with the households showed that they received enough compensation, resettlement assistance in January 2020 and had no complaints. Specifically, the amount of money received by the households under the package TN-CW-1 is as in the table 13 below; and the list of HH compensated cash under the package TN – CW-02 are presented in **Appendix 1**.

Table 9: List of households received compensation and resettlement support under package TN – CW 01

No	Name of AHH	Decision no.81 dated 27/ 11/2019	Decision 1467 dated 26/2/2020	Total (VNĐ)

7. Site clearance and hand over the site

45. TN CW -01: Currently, the package is under construction, it is expected that the package will be completed in August 2021. At the time of monitoring in December, 2020, it showed that 6/8 affected households have handed over the site. At present, there is still 1 household that has not got the approval decision on compensation, assistance plan of the competent authorities (due to the difference of land type among the land management units). It is expected to approve the compensation plan and pay the compensation for this household in the 2th quarter, 2021. The affected area of this household has temporarily not affected to the construction progress of the subproject, which will be implemented later. For the 01 disputed HH, due to the revise technical design, so land acquisition for this HH would not require and this disputed HH would not affect the civil construction activities.

46. For package TN CW-02: On September 8, 2020, ADB had issued No Objection Letter to the commencement of some pipeline sections of the new water supply network construction contract (TN -CW-02), Thai Nguyen province, and requested TWACO continue to monitor the compensation work and report to ADB, and request TWACO to comply with measures to minimize adverse impacts in the process in construction. The No Objection Letter is shown in Appendix 1. By the time of reporting, TWACO has complied with the above requirements. Currently, the DMS works are ongoing to be consolidated by the Land Fund Development Center of Thai Nguyen City to prepare the compensation plan. From the implementation of this package, there are no complaints from AHs. Construction work at clean site location is still being carried out according to the Contractor's plan.

8. Income Restoration Program

47. The project has 6 AHs are severely affected as they lose more than 10% of their total agricultural landholdings (and 01 vulnerable household- this HH received support of 2 million VND which mentioned in the previous report. So, in total 7 HH under IRP). No application of a sperate IRP but it is integrated in to other social economic development programe/plan of communes. A rapid assessment with some HH showed that the agricultural income on the affected land is not the main source of income for households. They have many different sources of income such as hired labor, trading, business... Moreover, 7 HHs are benefiting the current policies of the government on career education, and labour export programe introduce by commune in cooperation with private companies and other policies. On the other hand, the project's compensation money has partly good changed the economic conditions of the household as they have used the compensation money to do business. The results of consultation with affected households in June 2021 show that the affect of land acquisition does not reduce household income, even increase opportunities for people. *"My family life is fine. In general, there is no impact on income. For that compensation money, my son bought land in the district already. He said that the land price has increased, so it will not affect the family's income"* (Consultation of affected households in Phuc Triu commune, female, 54 years old).

9. Grievance Redress Mechanism

48. A grievance mechanism has been set up to help ensure that the complaints of AHs are resolved in a timely and satisfactory manner. Through the holding of consultations during RP preparation and implementation, including the distribution of PIBs, the AHs have been and will be made fully aware of their rights to file a complaint, as needed. The resolution of a complaint will pass through 3 stages, beginning with the commune, then the district, and then the provincial level of the People's Committee before it is elevated to a court of law as a last resort. Thai Nguyen Water Joint Stock Company (TAWACO) will shoulder all administrative costs and legal fees incurred in the resolution of grievances. For 01 household that has not conduct a DMS due to a dispute, Phuc Triu Commune People's Committee has not yet resolved it. After long-standing dispute, situation cannot be solved, PMU will report to the competent authorities to adjust the project's design for not using the disputed area. The adjustment of this plan does not affect the land area needed to build a new water plant due to the small area (2,462.4m²) and this area is included in the reserved land area for phase 2.

49. According to the resettlement plan, there are 8 affected households, however, the DMS is not implemented for one AH because the land is in dispute (Dispute with another household other than 7 affected households by the project. The Project Management Board

and Resettlement Consultants agreed not to recover the disputed land area (small area, future construction area and does not affect the project construction area (2,462.4m²). the payment to a household due to insufficient legal documents) The PMU and the resettlement consulting unit are working with the People's Committee of Phuc Triu commune and affected households to supplement the required documents, At the monitoring period in June 2021, there is no change compared to the situation in the last 6 months of 2020

50. During the monitoring report, no complaints received.

III. CONCLUSIONS AND RECOMMENDATIONS

1. Conclusion:

51. Package TN-CW01: has completed payment for 06 households, 01 has completed the tallying work and is in the process of finalizing legal documents to submit to the competent authorities for approval. 01 households in dispute has requested to adjust the route without land acquisition.

52. The detailed inventory of the package TN –CW02 has been completed and paid for 59/74 (80%) affected households in terms of crops and restored the site to original state for 185 affected households in term of yard and fence. The progress of DMS and payment to the affected households of this bidding package ensures the construction progress of the contractor.

53. The project has complied with policies to support and compensate affected households. During the process of monitoring and consulting with local authorities and some affected households, there were no comments on the compensation policy of the project. People are satisfied with the compensation work

54. The uRP for the Contract TN-CW02 is completed, approved and published in Aug 2020.

2. Recommendations

55. TAWACO will corporate with local authorities to push up the progress of preparing compensation plan for contract TN CW-02.

56. Under package TN CW 01, there is 01 household completed the counting step (DMS). However, the compensation has not been planned yet as the land fund development center, Phuc Triu CPC and affected household are finalizing the legal documents. It is expected that resettlement work will be carried out in the third quarter of 2021 and promptly to revise the finalize the list of affected HH in the final decision of the local related authorities.

57. The status of time-bound required actions for next period in table below.

Table 10: Time-bound Required Actions

No.	Issues	Required Actions	Responsibility	Completion Time
TN CW-01	Not yet approve compensation plan for 01 AH	Approval compensation and supports plan for remaining 01 AH accordance with the uRP for TN-CW01	PMU/LFDC	Quarter 3 2021
TN CW-02	Speed up compensation and payment to affected households	Approve compensation plans according to regulations	PMU/LFDC/ CPC	Quarter 3 2021
