

# Resettlement Plan

---

Project Number: 41614-033  
October 2017

## IND: Assam Power Sector Enhancement Investment Program - Tranche 2

Subproject: 132kV S/C of Agia-Matia Line

Submitted by

Assam Power Distribution Company Limited, Guwahati

This resettlement plan has been submitted to ADB by the Assam Power Distribution Company Limited, Guwahati and is made publicly available in accordance with ADB's Public Communications Policy (2011). It does not necessarily reflect the views of ADB. This is an updated version of the plan originally posted in May 2010 available on <https://www.adb.org/projects/documents/assam-power-sector-enhancement-investment-program-1>.

This resettlement plan is a document of the borrower. The views expressed herein do not necessarily represent those of ADB's Board of Directors, Management, or staff, and may be preliminary in nature. In preparing any country program or strategy, financing any project, or by making any designation of or reference to a particular territory or geographic area in this document, the Asian Development Bank does not intend to make any judgments as to the legal or other status of any territory or area.

To,

The Country Director

Indian Resident Mission, ADB

4 San Martin Marg, Chanakyapuri,

New Delhi - 110021

Subject: Submission of -

- 1) Updated Resettlement Plan Report for 132kV SC of Agia-Matia Line under Loan No. 2677-IND, Tranche-2
- 2) Updated Resettlement Plan Report for 132kV SC of Hailakandi LILO under Loan No. 2677-IND, Tranche-2

Sir,

Please find enclosed herewith the Reports as detailed above for Tranche -2 under Loan No. 2677- IND for your needful action.

Thanking you

Yours faithfully,

*[Handwritten signature]* 13/9/17

Director (PMU)

## Executive Summary

### ES1 Project Description

The Asian Development Bank (ADB) is supporting 'Assam Power Sector Enhancement Investment Program' (APSEIP) through a multi-tranche financing facility (MFF) to support continued investment in the state power sector, which is necessary to support economic growth and poverty reduction. The Tranche-2 is one of the investments under the program, which has six investment components related to transmission system, energy efficiency enhancement and capacity building. The investment components are: i) 2 new 220/132/33 kV substation, (ii) 6 new 132/33 kV substations, (iii) 156.027 km. of 220 kV transmission lines, (iv) 129.32 km. of 132 kV transmission lines, (v) upgrade to OPGW, and (vi) extension and refurbishment of existing transmission substations (for 24 s/s). The 132kV S/C of Agia-Matia line (sub-project) is one of the transmission lines under Tranche-2.

### ES2 Objectives of Resettlement Plan

The aims and objectives of this Resettlement Plan (RP) are to mitigate all unavoidable impact due to implementation of the sub-project by providing adequate resettlement and rehabilitation assistance to the affected households, to restore or improve their pre-project standard of living. The plan has been prepared on the basis of findings of inventory survey, socio-economic census survey and consultation with various stakeholders as well as in compliance with ADB's safeguard policy and other social safeguard policies designed by the Bank to protect the rights of affected persons and communities. The RP also takes in to account the laws and policies of Government of India. A Resettlement Plan for the sub-project's original alignment was prepared in April, 2010, but the report has not reported affected person due to 132kV S/C of Agia-Matia line. In order to capture impacts during implementation of this sub-project vis-à-vis damage to land, loss of trees, crop damage etc. this RP has been updated.

### ES4 Impacts

The construction of tower footings has damaged 0.09ha of government land, 0.01Ha of AEGCL land, 0.73Ha of Private land and 0.02Ha of community land. Within 27m transmission corridor, 1570 trees (Fruit Bearing & Timbers) and 13,424 bamboos are impacted belonging to 490 affected persons, which also include person whose land is damaged.

### ES5 Policy and Legal Frameworks

The policy framework and entitlements for the 'Assam Power Sector Enhancement Investment Program' is based on the Electricity Act 2003, The Indian Telegraph Act 1885, The Land Acquisition Act, 1894 (LAA, amended in 1984), The National Rehabilitation and Resettlement Policy, 2007 (NRRP) and ADB's Safeguards Policy Statement 2009.

In the sub-project, no land was acquired for transmission tower footings. However, the project authority has paid compensation to affected persons for damaged to private land due to tower footings construction. This was done by exercising sections 164 (power to execute provisions of ITA, 1885) and 165 (allowing to adopt land estimation process in LAA, 1894) of the Electricity Act 2003, and reading along with section 10 of the Indian Telegraph Act (ITA) 1885 that allow compensation for damage to private land but without acquiring any right.

**ES6 Entitlements, Assurances and Benefits**

All affected households (AHHs) are entitled to receive compensation for all losses and affected assets based on the principle of replacement value. All compensation and assistance is paid as per the entitlement matrix included in the RP. Special assistance is available for vulnerable and severely affected households. In addition, all AHs are entitled to livelihood restoration assistance to help improve or at least restore their pre-project living standards and income-earning capacities. Unforeseen impacts will be mitigated in accordance with the principles of the RP prepared for this Project.

**ES7 Resettlement and Rehabilitation Budget**

The resettlement cost for this Project includes compensation for land, trees, & crop damage, and the support cost for RP implementation. The total resettlement cost for the 132kV S/C of Agia-Matia line is **INR 83,20,733**

**ES8 Consultation and Disclosure**

Public Consultations were conducted during the socio economic census survey of the 132kV S/C of Agia-Matia line from 9<sup>th</sup> to 12<sup>th</sup> April 2013 and again on 1<sup>st</sup> to 4<sup>th</sup> July 2013. The public consultations were participated by sixty four people including affected persons, local peoples, and representatives from AEGCL. During the consultations the project features were explained, perceived benefits and losses due to the Project were discussed with the affected persons, and the various stakeholders' opinions were elicited.

The updated Final Resettlement Plan will be translated into the local language and disclosed at the local level, such as at project sites and the offices of the Gram Panchayats and of the Deputy Commissioner.

**ES9 Grievance Redress Mechanism**

The EA has established a mechanism to receive and ensure the resolution of affected persons' concerns and grievances about physical and economic displacement and other project impacts, paying particular attention to vulnerable groups. The grievance redress mechanism is designed to address AP's concerns and complaints promptly, using an understandable and transparent process that is gender responsive, culturally appropriate, and readily accessible to the displaced persons at no cost.

**ES10 Institution Set-up**

The executing agency (EA) through its Project Management Unit (PMU) in the Head Office is responsible for planning, coordinating, implementing and financing of all resettlement activities. The PMU has established an Environment and Social Management Unit (ESMU), headed by the Assistant Manager, to deal with all social safeguards issues. The field units of PIU undertakes all related field level activities, including RP implementation.

**ES11 Monitoring and Evaluation**

The sub-project impacts are not significant and resettlement is not involved, it is classified as Category B. The monitoring mechanism for implementation of the RP is limited to internal monitoring. The internal monitoring is the responsibility of the PIUs and ESMU. The PMU prepares biannual social monitoring reports on resettlement activities and submits the same to ADB for review, to determine whether the resettlement objectives have been achieved and livelihoods and living standards have been restored or enhanced, and to recommend suitable corrective actions as required.

**ES12 Findings of Due Diligence**

There is no land acquisition and no physical displacement of affected person. The APs who are affected have been compensated within the provisions of Resettlement Framework prepared for the APSEIP. In order to minimise the project's impact, the ownership of land damaged due to tower footings remains with respective land owner.

---

## **1. Introduction**

### **1.1. Purpose of Resettlement Plan**

1. A Resettlement Planning document (RP) was prepared in April, 2010 for the Tranche-2 project following the guidelines in Resettlement Framework (RF) of 'Assam Power Sector Enhancement Investment Program' (APSEIP). The RP list out the social impacts envisaged during implementation of the project, especially due to eight sub-stations, but the RP has not captured the impacts due to the implementation of ten transmission lines. Consequently, to comply with ADB's safeguard policies, a separate RP for 132kV S/C of Agia-Matia line is prepared and it is based on findings of the socio-economic census survey that was conducted from 9<sup>th</sup> to 12<sup>th</sup> April 2013 and 1<sup>st</sup> to 4<sup>th</sup> July 2013, and RP implementation status collected from the Implementing Agency. The preparation of this Final RP for the sub-project in accordance with Resettlement Framework (RF) of the project, regulatory requirement of the country, and ADB's safeguard policies.
2. The main objective of this RP is to mitigate all involuntary resettlement impacts caused by the subproject and provide adequate R&R assistance to the affected households to restore or improve their pre-project standard of living. The RP is based on the final engineering design, findings of a census survey and consultation with various stakeholders, and R&R activities implementation status provided by Executing Agency. The RP is in compliance with national laws and policies, such as the Electricity Act 2003, The Indian Telegraph Act 1885, the National Rehabilitation and Resettlement Policy 2007, the Land Acquisition Act 1894 and the ADB Safeguard Policy Statement (SPS) 2009. Tranche 2 of APSEIP is classified as Involuntary Resettlement Category B due to its low significant impacts.
3. A due diligence exercise was carried out for resettlement & rehabilitation activities implemented in the sub-project. This was desired due to (a) all resettlement & rehabilitation (R&R) activities were already implemented without updating the RP, and (b) to ascertain compensation paid to APs identified during stringing of transmission line were as per RF. A due diligence chapter is included in Chapter 12 of this final RP.

### **1.2. Project Description**

4. The Asian Development Bank (ADB) is supporting 'Assam Power Sector Enhancement Investment Program' (APSEIP) through a multi-tranche financing facility (MFF) to support continued investment in the state power sector, which is necessary to support economic growth and poverty reduction. The investments under the program are intended to (i) facilitate increased power transfers to accommodate increased demand and economic growth; (ii) improve supply-side energy efficiency by system de-bottlenecking and reducing technical losses; (iii) reduce the intensity of greenhouse gas (GHG) and other emissions via improved system efficiency; (iv) support expanded private sector participation in distribution system operations and other energy services; and (v) facilitate

poverty reduction via improved electricity services and economic growth.

5. The impact of the investment program will be a sustainable state power sector with increased T&D capacity to support inclusive economic growth. The outcome will be enhanced quality and expanded service delivery of electricity through improved technical, commercial, and financial performance and capability of power utilities.
6. The Tranche-II is one of the investments under the program, which has six investment components related to transmission system, energy efficiency enhancement and capacity building. The investment components are: i) 2 new 220/132/33 kV substation, (ii) 6 new 132/33 kV substations, (iii) 156.027 km. of 220 kV transmission lines, (iv) 129.32 km. of 132 kV transmission lines, (v) upgrade to OPGW, and (vi) extension and refurbishment of existing transmission substations (for 24 s/s).

### 1.3. Sub-project Profile

7. In Tranche-II, the physical investment for expansion and upgrade of transmission and distribution systems involves construction of eight sub-stations and ten transmission lines. The 132kV SC Agia-Matia is one of the transmission line sub-project implemented under Tranche-II. The final alignment of the transmission line traverses through 14 villages under Balajan and Matia Revenue Circle, Goalpara District. The final transmission line length of 22.534km will be laid over eighty five towers. These towers are located in both Government and private land (Table 1.1). The approved final tower schedule is in **Annexure 2**.

According to the 2011 Census, Goalpara district has a population of 10,08,183 with a population density of 553 persons per sq. km. The average literacy rate of Goalpara district is 67.37%, with male and female literacy of 71.46% and 63.13% respectively. The sex ratio of the district is 964 that at par with states recorded sex ratio of 958.

## 2. Impacts

### 2.0 General

8. A Resettlement Plan has been prepared adopting the guidelines in RF for 132kV S/C Agia-Matia line (the sub-project) in January, 2015. The RP intended to minimise and mitigate social impacts due to construction of tower footings and stringing of transmission line. As per this RP, impacts due to the sub-project include damage to land, loss of trees, bamboos and tea plants (Table 2.1). No CPRs, structures, and any other assets were impacted. No non-titleholders were identified as affected. This RP is prepared to comply and incorporating comments received from ADB.
9. The identification of project affected people was limited to Project Impact Area, which is the Right of Way (RoW) required for stringing of transmission lines i.e. 27m for 132kV. The people affected were identified during Route Survey of sub-project alignment, which was jointly verified with Circle Officer. A census survey of the affected persons was carried out in the month 9<sup>th</sup> to 12<sup>th</sup> April 2013 and 1<sup>st</sup> to 4<sup>th</sup> July 2013 and already approved 'Census Survey Questionnaire Format' (**Annexure 1**) for the project has been used to collect information of affected persons and their losses.
10. In case of persons whose losses are limited to only trees and bamboos located within transmission corridor, a joint verification exercise was conducted by the officials of Revenue Department during transmission corridor verification. The joint verification survey was done in phase manner and participated by officials of IA and respective affected persons as member of the team. The impacts recorded were jointly verified by all the members present during the joint verification exercise. Hence, the census survey was not carried out for such affected person
11. The involuntary resettlement impacts identified in the RP are summarized in Table 2.1. The impact reported from henceforth is for the finalised transmission line alignment.

**Table 2.1: Summary of Impacts - Final T/L Alignment**

Sl. No	Impacts Description	Unit	Impacts
			Final RP
1	Total Affected HHs	No.	147
a.	AH due to tower footings (HH)	No.	82
b.	AH due to T/L stringing (HH)	No.	65
2	Total Land Requirement	ha	0.85
a.	Agriculture land	ha	0.73
b.	Government land	ha	0.09
c.	AEGCL land	ha	0.01
d.	Community land	ha	0.02
3	Loss of Structure	No.	Nil
4	Loss of Trees (non-fruit + fruit tree)	No.	1570
5	Loss of Bamboos	No.	13,424
6	Vulnerable Affected Person	No.	35
7	Loss of Assets	No.	Nil
8	Area of Crop Damage	Ha.	Nil

## 2.2 Affected Households

12. A total of 147 households have been affected due to the sub-projects. There are 82 households who are affected due to tower footings. Similarly, 65 households are only sustaining losses of trees and bamboos due to stringing of transmission line. The detail of AHH's is in **Annexure 3**.

## 2.3 Land Requirements

13. As per final tower schedule and compensation payment status collected from Implementing Agency, a total of **0.85 ha** land area is damaged due to 85 tower footings construction. No other type of land is damaged due to sub-project.

The sub-project does not involve acquisition of land for tower footings. The details of procedures adopted to compensate affected persons are discussed in Legal Frameworks chapter.

## 2.4 Loss of Trees

14. The final alignment of 132kV S/C Agia-Matia T/L has impacted 1570 trees and 13,424 bamboos located within transmission corridor of 27m. The impact to trees includes 629 fruit bearing trees (Jack Fruit, Pineapple, Beetle nut, coconut, mango, berry, lemon, Jamuk, Pan tree, Guava and Bel tree) and 941 non-fruit trees (Gamari, Neem and Simolu) belonging to affected households. The details of trees impacts are in **Annexure 4**.

**Table 2.2: Number of households losing trees by type**

S.No	Type of Trees	Number of AHHs	Percentage
1	Fruit trees	33	29.20
2	Non-fruit Trees	54	47.79
3	Both fruit and non-fruit trees	26	23.01
<b>Total</b>		<b>113</b>	<b>100%</b>

## 2.5 Crop Damage

15. At the time of stringing, no standing crop area has been impacted. As the stringing was done after harvesting period for this transmission line.

## 2.6 Impacts on Structure and CPR's

16. No private structures and common property resources were impacted due to the sub-project.

## 2.7 Restrictions on Use of Land

17. Land use restriction is limited to width of land within the transmission corridor (27m). No construction of building and planting of tall trees within the transmission corridor are allowed to maintain safe vertical clearance of 6.1mt from the lowest

conductor.

## **2.8 Income Loss**

18. The construction of tower footings were done post harvesting of crops, as a result the overlapping with cultivation period has been avoided. This change in construction schedule has prevented impacting livelihood source of affected person involved in agriculture occupation.

## **2.9 Vulnerable Groups**

19. Total Thirty five households have been identified as vulnerable. Among these, Thirty two are Scheduled tribe (Plains) and rest Three are Scheduled caste (**Table no.3.7**), while in case of income all the households falls above monthly poverty threshold limit, therefore there is no vulnerability in income stratification. (**Table no.3.6**)

### 3. Socio Economic Profile of Affected Persons

#### 3.0 General

20. The chapter discusses the social and economic profile of eighty two households whose land is damaged and constitute 55.78% of total affected households. The profile of the affected households is established from the socio economic survey that was conducted in April 9-12 and July 1-4, 2013.
21. A joint verification exercise was conducted to estimate loss of trees /bamboos/tea plants due to stringing of transmission line by a team comprising officials of Revenue Department and Implementing Agency, and respective Affected Persons. However, the affected persons due to stringing of T/L were not surveyed. The census survey findings discussion in subsequent paragraphs is for affected persons whose land is damaged due to tower footings and does not include affected persons whose loss is limited to trees/bamboos/tea plants.

#### 3.1 Households

22. A total of 79 households comprising 425 affected persons have been impacted due to tower footings construction. Total 79 household head of all affected household were available during census survey, while 3 household heads were unavailable during the census survey. Total Household affected due to tower footing is 82.

#### 3.2 Gender Distribution

23. The 79 affected households comprise 425 affected persons, of which 52.94% are male and 47.06% are female.

**Table 3.1: Distribution of AP Population**

Sl. No	Gender	Total Population	Percentage
1	Male	225	52.94
2	Female	200	47.06
<b>Total</b>		425	<b>100</b>

#### 3.3 Household Size

24. The majority i.e. 39.24% of affected household are having household size of 4 to 6. This is followed by 34.18% having household size of 7 to 10 and 11.39% has household size 1 to 3 & 11 to 13 and remaining 2.53% and 1.27% belongs to household size of 14 to 16 and above 16. The average household size of 79 affected households whose land is damaged due to tower footings is 7.24.

**Table 3.2: Distribution of Households Size**

Sl. No	Household Size	No. of HHs	Percentage
1	1 to 3	9	11.39
2	4 to 6	31	39.24
3	7 to 10	27	34.18

4	11 to 13	9	11.39
5	14 to 16	2	2.53
6	Above 16	1	1.27
<b>Total</b>		<b>79</b>	<b>100</b>
<b>Note:</b> Total HH is 82, while 3 HH were unavailable during the census survey.			

### 3.4 Literacy

25. On literacy rate, 44.24% of affected person have attended secondary level. This is followed by 30.59% people who attended up to graduate level and 20.71% people are primary. The illiterate people comprise only 4.24%, which is low. Details of Literacy level is in Table 3.3.

**Table 3.3: Summary of Literacy Level**

S.No	Education Status	Number of AP	Percentage
1	Illiterate	18	4.24
2	Primary (up to class 4)	88	20.71
3	Secondary (up to class 10)	188	44.24
4	Higher (up to graduate)	130	30.59
5	Technical	1	0.24
<b>Total</b>		<b>425</b>	<b>100.00</b>

### 3.5 Landholding

26. The data when compared with classification of Agriculture Census India indicates that 32 AHH i.e. 40.51% of affected household are in medium category i.e., above 4 hectare. 29 AHH falls under large category which is around 36.71%, while small and semi medium holding have 10 and 8 AHH respectively which covering 12.66% and 10.13% of the whole land holding from total 79 AHHs.

**Table 3.4: Distribution of Landholdings**

S.No	Farmer Classification	Land holding (ha)	No. of HHs	Percentage
1	Marginal	below 1	0	0
2	Small	1-2	10	12.66
3	Semi-medium	2-4	8	10.13
4	Medium	4-10	32	40.51
5	Large	Above 10	29	36.71
<b>Total</b>			<b>79</b>	<b>100</b>
<b>Note:</b> Total affected HH is 82, while 3 AHH's were unavailable during the census survey.				

### 3.6 Workforce Participation

27. There are total 425 affected persons, of which only 42.82% are employed and remaining 57.18% are unemployed. Hence, the workforce participation rate (Table 3.5) among the affected person is 41.41%.

**Table 3.5: Employment Status**

Sl. No.	Employment Status	Number of AP	Percent
1	Employed	182	42.82
2	Unemployed	243	57.18
<b>Total</b>		<b>425</b>	<b>100.00</b>
<b>Note:</b> 182 AP are employed while 11 AP are under government pension, 193 in total under income pattern			

### 3.7 Income Distribution Pattern of Affected Households

28. As per census survey, the cumulative monthly income of all earning members for 79 affected households surveyed is above Rs. 3000, while no household is earning in range of Rs. 2000-3000 and below Rs. 2000/-.

**Table 3.6: Income Pattern of Affected Households**

Income Range in Rs/- per month	No. of HHs	HHs with no. of earning members						
		1	2	3	4	5	6	7
<2000	0	0	0	0	0	0	0	0
2000-3000	0	0	0	0	0	0	0	0
>3000	79	21	25	20	7	3	2	1
<b>Total</b>	<b>79</b>	<b>21</b>	<b>25</b>	<b>20</b>	<b>7</b>	<b>3</b>	<b>2</b>	<b>1</b>
<b>Note:</b> 182 AP are employed while 11 AP are under government pension, 193 in total under income pattern								

29. The vulnerability of affected households is assessed by comparing their monthly income with the derived monthly poverty threshold limit<sup>1</sup>. It is evident from Table 3.6 that seventy nine affected households are earning more than monthly poverty threshold limit, while none of the households are earning below monthly poverty threshold limit.

### 3.8 Social Stratification of Affected Household

30. The majority 40.19% of affected households belong to ST (Plains) category and OBC category followed by 15.19% by General and 3.79% by SC category.

**Table 3.7: Social Stratification of Affected Person**

Caste	Number of HH	Percent
General	12	15.19
Other Backward Caste	32	40.19
More other Backward caste	0	0
Scheduled tribe (Plain)	32	40.19
Scheduled tribe (Hills)	0	0
Scheduled caste	3	3.79
<b>Total</b>	<b>79</b>	<b>100</b>
<b>Note:</b> Total 82 AHHs, while 3 AHHs were unavailable during the census survey		

<sup>1</sup> The Assam state poverty threshold limit of Rs. 691.7 monthly per capita for rural area for 2009-10 set by the Ministry of Development for North Eastern Region has been used to calculate a household monthly poverty threshold limit of Rs. 3714/-. This monthly poverty threshold limit is derived by multiplying rural area poverty threshold limit with affected HH average household size of 5.37

## **4. Policy and Legal Frameworks**

### **4.2 Policy Framework**

31. The policy framework and entitlements for the 'Assam Power Sector Enhancement Investment Program' is based on the Electricity Act 2003, The Indian Telegraph Act 1885, The Land Acquisition Act, 1894 (LAA, amended in 1984), The National Rehabilitation and Resettlement Policy, 2007 (NRRP) and ADB's Safeguards Policy Statement 2009.

### **4.3 The Electricity Act, 2003**

32. An Act to consolidate the laws relating to generation, transmission, distribution, trading and use of electricity and generally for taking measures conducive to development of electricity industry, promoting competition therein, protecting interest of consumers and supply of electricity to all areas, rationalization of electricity tariff, ensuring transparent policies regarding subsidies, promotion of efficient and environmentally benign policies constitution of Central Electricity Authority, Regulatory Commissions and establishment of Appellate Tribunal and for matters connected therewith or incidental thereto. This act provides guidelines for compensating damage in private land when installing of electricity transmission equipment. The section of this acts relevant to RP preparation are;
  - a. The sub-section 3 of section 67 of part VIII stipulate to cause little damage and has made provision to make full compensation for any damage, detriment or inconvenience caused.
  - b. The sub-section 6 of section 68 of part VIII set provision for compensating trees affected due to lying of transmission line.
  - c. The section 164 of part XVII empowers to execute the provisions of the Indian Telegraph Act 1885.
  - d. The section 165 of part XVII empowers to acquire land under the provision of the Land Acquisition Act 1894.

### **4.4 The Indian Telegraph Act, 1885**

33. The Indian Telegraph Act, 1885 main objective was to give power to the Government to install telegraph line and poles on private as well as public property. The act contain six parts, of which section 10 of part III details out the power of telegraph agency and procedures for compensating for damage sustained in private and public land at time of installing and maintaining of telegraph line and poles. Further, the act also clearly specify not to acquire any right other than that of user only in the property under, over, along, across in or upon which the telegraph authority places any telegraph line or post.

### **4.5 The National Resettlement and Rehabilitation Policy, 2007**

34. The NRRP stipulates the minimum facilities to be ensured for persons displaced due to the acquisition of land for public purposes and to provide for the basic minimum requirements. All projects leading to involuntary displacement of

people must address the rehabilitation and resettlement issues comprehensively. The State Governments, Public Sector Undertakings or agencies, and other requiring bodies shall be at liberty to put in place greater benefit levels than those prescribed in the NRRP. The principles of this policy may also apply to the rehabilitation and resettlement of persons involuntarily displaced permanently due to any other reason. The objectives of the Policy are:

- i. to minimize displacement and to promote, as far as possible, non-displacing or least displacing alternatives;
- ii. to ensure adequate rehabilitation package and expeditious implementation of the rehabilitation process with the active participation of the affected families;
- iii. to ensure that special care is taken for protecting the rights of the weaker sections of society, especially members of the Scheduled Castes and Scheduled Tribes, and to create obligations on the State for their treatment with concern and sensitivity;
- iv. to provide a better standard of living, making concerted efforts for providing sustainable income to the affected families;
- v. to integrate rehabilitation concerns into the development planning and implementation process; and
- vi. where displacement is on account of land acquisition, to facilitate harmonious relationship between the requiring body and affected families through mutual cooperation.

The NRRP is applicable for projects where over 400 families in the plains or 200 families in hilly or tribal or Desert Development Program (DDP) areas are displaced. However, the basic principles can be applied to resettling and rehabilitating regardless of the number affected.

#### **4.6 Land Acquisition Act, 1894 amended 1984**

35. The LAA provides a framework for facilitating land acquisition in India. LAA enables the State Government to acquire private land for public purposes. LAA ensures that no person is deprived of land except under LAA and entitles APs to a hearing before acquisition. The main elements of LAA are:
  - i. Land identified for the purpose of a project is placed under Section 4 of the LAA. This constitutes notification. Objections must be made within 50 days to the District Collector (DC, the highest administrative officer of the concerned District).
  - ii. The land is then placed under Section 6 of the LAA. This is a declaration that the Government intends to acquire the land. The DC is directed to take steps for the acquisition, and the land is placed under Section 9. Interested parties are then invited to state their interest in the land and the price. Under Section 11, the DC will make an award within one year of the date of publication of the declarations. Otherwise, the acquisition proceedings shall lapse.
  - iii. In case of disagreement on the price awarded, within 6 weeks of the award, the parties (under Section 18) can request the District Collector (DC) to refer the matter to the Courts to make a final ruling on the amount of compensation.
  - iv. Once the land has been placed under Section 4, no further sale or transfer

is allowed.

- v. Compensation for land and improvements (such as houses, wells, trees, etc.) is paid in cash by the project authorities to the State Government, which in turn compensates landowners.
- vi. The price to be paid for the acquisition of agricultural land is based on sale prices recorded in the District Registrar's office averaged over the three years preceding notification under Section 4. The compensation is paid after the area is acquired, with actual payment by the State taking about two or three years. An additional 30 percent is added to the award as well as an escalation of 12 percent per year from the date of notification to the final placement under Section 9. For delayed payments, after placement under Section 9, an additional 12 percent per annum is paid for the first year and 15 percent for subsequent years.

#### **4.7 ADB's Safeguard Policy Statement 2009**

- 36. ADB has adopted the Safeguard Policy Statement (SPS) in 2009, including safeguard requirements for environment, involuntary resettlement and Indigenous People. The objectives of the Involuntary Resettlement Safeguard policy are to avoid involuntary resettlement wherever possible; to minimize involuntary resettlement by exploring project and design alternatives; to enhance, or at least restore, the livelihoods of all displaced persons in real terms relative to pre project levels; and to improve the standards of living of the displaced poor and other vulnerable groups.
- 37. The involuntary resettlement safeguards cover physical displacement (relocation, loss of residential land, or loss of shelter) and economic displacement (loss of land, assets, access to assets, income sources, or means of livelihoods) as a result of (i) involuntary acquisition of land, or (ii) involuntary restrictions on land use or on access to legally designated parks and protected areas. It covers them whether such losses and involuntary restrictions are full or partial, permanent or temporary.

#### **4.8 Applicability of Legal Frameworks**

- 38. This final RP has to be consistent with provisions of legal frameworks enforced in the country. An analysis has been carried out to identify acts, rules, and regulations triggered and its extent of applicability. The Table 4.1 summarises the applicability of various legal frameworks.
- 39. To minimise the impact on affected persons, the project authority decided not to acquire and to pay compensation for damaged private land due to tower footings construction. This has been accomplished by exercising sections 164 (power to execute provisions of ITA, 1885) and 165 (allowing to adopt land estimation process in LAA, 1894) of the Electricity Act 2003, and reading along with section 10 of the Indian Telegraph Act (ITA) 1885 that allow compensation for damage to private land but without acquiring any right.

**Table 4.1: Applicability of Legal Frameworks**

Sl. No	Legal Framework	Objectives	Applicability
1	The National Resettlement and Rehabilitation Policy (MoRD), 2007	The NRRP stipulates the minimum facilities to be ensured for persons displaced due to the acquisition of land for public purposes and to provide for the basic minimum requirements.	<b>Applicable.</b>
2	Land Acquisition Act, 1894 amended 1984	Provides a framework for facilitating land acquisition in India. LAA enables the State Government to acquire private land for public purposes. LAA ensures that no person is deprived of land except under LAA and entitles APs to a hearing before acquisition.	<b>Applicable.</b> The estimation of land damaged compensation has been carried out following the procedures stipulated in the LA Act 1894.
3	The Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act (RFCT in LARR), 2013	The Act lays down procedures for estimating fair compensation of the affected families (and not just the titleholders) due to land acquisition, rehabilitation and resettlement. The Act prohibits acquisition of multi-cropped irrigated land as a special provision to safeguard food security, unless in exceptional circumstances as a demonstrable last resort.	<b>Not Applicable.</b> The sub-project does not involve acquisition of land. Additionally, the estimates for land damage was done before enactment of this Act.
4	The Electricity Act-2003 as amended in 2007	An Act to consolidate the laws relating to generation, transmission, distribution, trading and use of electricity and generally for taking measures conducive to development of electricity industry, promoting competition therein, protecting interest of consumers and supply of electricity to all areas, rationalization of electricity tariff, ensuring transparent policies regarding subsidies, promotion of efficient and environmentally benign policies constitution of Central Electricity Authority, Regulatory Commissions and establishment of Appellate Tribunal and for matters connected therewith or incidental thereto.	<b>Applicable.</b>
5	Indian Telegraph Act, 1885	The main object of the Telegraph Act was to give power to the Government to install telegraph lines on private as well as public property.	<b>Applicable.</b> The payment for land damage compensation without acquiring the right has been as per section 10 of the ITA, 1885.
6	ADB Safeguard Policy Statement (SPS), 2009	The objectives of the Involuntary Resettlement Safeguard policy in SPS, 2009 is to avoid involuntary resettlement wherever possible; to minimize involuntary resettlement by exploring project and design alternatives; to enhance, or at least restore, the livelihoods of all displaced persons in real	<b>Applicable.</b>

Sl. No	Legal Framework	Objectives	Applicability
		terms relative to pre-project levels; and to improve the standards of living of the displaced poor and other vulnerable groups.	

## 5. Entitlements, Assistance and Benefits

### 5.1 Eligibility

40. The APs entitled to compensation and/or rehabilitation provisions for this sub-project include (i) all APs losing land either covered by legal title/traditional land rights, or without legal status; (ii) registered and unregistered tenants and sharecroppers; (iii) owners of buildings, crops, trees, plants, or other objects attached to the land; and (iv) APs losing income and/or access to natural resources.
41. Compensation eligibility is limited by a cut-off date set for the subproject. The day of the census survey will serve as the cut-off-date. APs who settle in the affected area after the cut-off date will not be eligible for compensation. They will however be given sufficient advance notice, requested to vacate the premises and dismantle affected structures prior to project implementation.

### 5.2 Entitlements

42. A Resettlement Framework for Assam Power Sector enhancement Investment Program was prepared and explains the detailed description of each compensation measure and assistance provided in the entitlement matrix. At the time of finalising this RP, the Resettlement Framework was updated in August 2014. Since, the estimation of R&R budget for this sub-project was completed in 2013 and compensation payment was started from 2014 onwards, Resettlement Framework 2009 has been adopted to keep consistency of procedures and provision adopted in R&R budget. The entitlement matrix of original RF 2009 is detailed out in Table 5.1.
43. The construction of tower footings and stringing of transmission line are the key activities inducing social and environmental impacts due to implementation of the sub-project. Hence, the affected persons of this sub-project is entitled for:
  - i. damage to private land due to tower footings construction;
  - ii. loss of trees, bamboos and crop damages etc.;
  - iii. vulnerable groups;

**Table 5.1: Entitlement Matrix**

S.No	Type of Loss	Application	Definition of Entitled Person	Entitlement
1	Loss of private land	Agricultural land, homestead land or vacant plot	Legal titleholders/ APs with customary land right/APs with Permit from local authority	<ul style="list-style-type: none"> <li>• Compensation at replacement value or land-for-land where feasible.</li> <li>• Transitional allowance based on three months minimum wage rates.</li> <li>• Shifting assistance for households (@Rs.10,000/- per affected household).</li> <li>• Notice to harvest standing seasonal crops. If notice cannot be given, compensation for share of crops will be provided.</li> <li>• Additional compensation for vulnerable households.</li> </ul>

			Tenants and leaseholders (whether having written tenancy/ lease documents or not)	<ul style="list-style-type: none"> <li>• Compensation for rental deposit or unexpired lease.</li> <li>• Transitional allowance based on three months minimum wage rates.</li> <li>• Shifting assistance for households.</li> <li>• Notice to harvest standing seasonal crops. If notice cannot be given, compensation for share of crops will be provided.</li> <li>• Additional compensation for vulnerable households.</li> </ul>
			Sharecroppers for agricultural land	<ul style="list-style-type: none"> <li>• Notice to harvest standing seasonal crops. If notice cannot be given, compensation for share of crops will be provided.</li> <li>• Additional compensation for vulnerable households.</li> </ul>
2	Loss of Government land	Vacant plot, Agricultural land and homestead land	Leaseholders	<ul style="list-style-type: none"> <li>• Reimbursement of unexpired lease.</li> <li>• Transitional allowance based on three months minimum wage rates.</li> <li>• Shifting assistance @ no less than Rs. 10,000/- per household.</li> <li>• Notice to harvest standing seasonal crops. If notice cannot be given, compensation for share of crops will be provided.</li> <li>• Additional compensation for vulnerable households.</li> </ul>
			Encroachers	<ul style="list-style-type: none"> <li>• Advance notice to shift from encroached land.</li> <li>• Notice to harvest standing seasonal crops. If notice cannot be given, compensation for share of crops will be provided.</li> <li>• Additional compensation for vulnerable households.</li> </ul>
			Squatters	<ul style="list-style-type: none"> <li>• Advance notice to shift from occupied land.</li> <li>• Notice to harvest standing seasonal crops. If notice cannot be given, compensation for share of crops will be provided.</li> </ul>
3	Loss of residential structure	Residential structure and other assets	Legal titleholders	<ul style="list-style-type: none"> <li>• Replacement value of the structure and other assets (or part of the structure and other assets, if remainder is viable).</li> <li>• Fees, taxes, and other charges related to replacement structure.</li> <li>• Shifting assistance @ no less than Rs. 10,000/- per household.</li> <li>• Right to salvage materials from structure and other assets with no deductions from replacement value.</li> <li>• Additional compensation for vulnerable households.</li> </ul>
			Tenants and leaseholders	<ul style="list-style-type: none"> <li>• Replacement value of the structure and other assets (or part of the structure and other assets, if remainder is viable) constructed by the AP.</li> <li>• Compensation for rental deposit or unexpired lease.</li> <li>• Shifting assistance @ no less than Rs. 10,000/- per household.</li> <li>• Right to salvage materials from structure and other assets with no deductions from replacement value.</li> <li>• Additional compensation for vulnerable households.</li> </ul>
			Encroachers and squatters	<ul style="list-style-type: none"> <li>• Replacement value of the structure and other assets (or part of the structure and other assets, if remainder is viable) constructed by the AP.</li> <li>• Shifting assistance @ no less than Rs. 10,000/- per household.</li> </ul>

				<ul style="list-style-type: none"> <li>• Right to salvage materials from structure and other assets</li> <li>• Additional compensation for vulnerable households.</li> </ul>
4	Loss of commercial structure	Commercial structure and other assets	Legal titleholders	<ul style="list-style-type: none"> <li>• Replacement value of the structure and other assets (or part of the structure and other assets, if remainder is viable).</li> <li>• Fees, taxes, and other charges related to replacement structure.</li> <li>• One time financial assistance @ Rs. 25,000/- per structure.</li> <li>• Shifting assistance @ no less than Rs. 10,000/- per household.</li> <li>• Right to salvage materials from structure and other assets with no deductions from replacement value.</li> <li>• Additional compensation for vulnerable households.</li> </ul>
			Tenants and leaseholders	<ul style="list-style-type: none"> <li>• Replacement value of the structure and other assets (or part of the structure and other assets, if remainder is viable) constructed by the AP.</li> <li>• Compensation for rental deposit or unexpired lease.</li> <li>• One time financial assistance @ Rs. 25,000/- per structure. .</li> <li>• Shifting assistance @ no less than Rs. 10,000/- per household.</li> <li>• Right to salvage materials from structure and other assets with no deductions from replacement value.</li> <li>• Additional compensation for vulnerable households.</li> </ul>
			Encroachers and squatters	<ul style="list-style-type: none"> <li>• Replacement value of the structure and other assets (or part of the structure and other assets, if remainder is viable) constructed by the AP.</li> <li>• One time financial assistance @ Rs. 25,000/- per structure.</li> <li>• Shifting assistance @ no less than Rs. 10,000/- per household.</li> <li>• Right to salvage materials from structure and other assets.</li> <li>• Additional compensation for vulnerable households</li> </ul>
5	Loss of livelihood	Livelihood	Legal titleholder/ tenant/ leaseholder/ non-titled /employee of commercial structure, farmer/ agricultural worker	<ul style="list-style-type: none"> <li>• Assistance for lost income based on three months minimum wage rates.</li> <li>• Additional compensation for vulnerable households.</li> <li>• Consideration for project employment.</li> </ul>
6	Loss of trees and crops	Standing trees and crops	Legal titleholder/ tenant/ leaseholder /sharecropper/ non-titled AP	<ul style="list-style-type: none"> <li>• Notice to harvest standing seasonal crops</li> <li>• If notice cannot be provided, compensation for standing crop (or share of crop for sharecroppers) at market value</li> <li>• Compensation for trees based on timber value at market price, and compensation for perennial crops and fruit trees at annual net product market value multiplied by remaining productive years; to be determined in consultation with the Forest Department for timber trees and the</li> </ul>

				Horticulture Department for other trees/crops.
7	Impacts on vulnerable APs	All impacts	Vulnerable APs	<ul style="list-style-type: none"> <li>• Additional one time financial assistance: Assistance in the form of grant will be paid to those below the poverty line and the vulnerable including households headed by women, SC, ST, disabled and the elderly at the rate of Rs.10,000 per eligible households</li> <li>• Vulnerable households will be given priority in project construction employment.</li> </ul>
8	Temporary loss of land	Land temporarily required for sub-project construction	Legal titleholders, non-titled APs	<ul style="list-style-type: none"> <li>• Provision of rent for period of occupation for legal titleholders.</li> <li>• Compensation for assets lost at replacement value,</li> <li>• Restoration of land to previous or better quality</li> <li>• Additionally, Cash Compensation will be paid for the temporary damage of crop under the RoW during the maintenance and repair after the construction. Also, the AP may be allowed to cultivate their land under the transmission lines (RoW)</li> </ul>
9	Loss of common resources	Common resources	Communities	<ul style="list-style-type: none"> <li>• Replacement or restoration of the affected community facilities – including public water stand posts, public utility posts, temples, shrines, etc.</li> </ul>
10	Any other loss not identified	-	-	<ul style="list-style-type: none"> <li>• Unanticipated involuntary impacts will be documented and mitigated based on the principles of the Resettlement Framework.</li> </ul>

### 5.3 Valuation of Assets

44.	<p><b>Land:</b> In the sub-project, land for tower footings has not been acquired under LAA, 1894, as a result the provision for loss of private land (S.No 1) in the entitlement matrix is not applicable. However, to mitigate the impact, the project authority has compensated ten affected persons for damaged to their land by exercising section 164 of part XVII of the Electricity Act 2003 and read along with section 10 of the Indian Telegraph Act 1885. Further, in accordance with sub-section (2) of section 165 in the Electricity Act 2003, the process defined under Land Acquisition Act, 1894 has been adopted for calculating compensation amount for the land area damage due to tower footings. The circle rate was collected from concern department for fixing the land price for different categories of land along the transmission corridor. Subsequently, the Deputy Commissioner of Goalpara District has approved the RoW for the sub project (<b>Annexure 7</b>). The land compensation amount also includes additional 30 percent solatium as well as interest of 12 percent per year from date of notification.</p>
45.	<p><b>Tree Loss:</b> The compensation rate for trees has been decided after consulting concerned departments to arrive at a rate at-par with market value. The rate for timber tree has been determined in consultation with the Forest Department, similarly, horticulture department was consulted to obtain remaining productive period of fruit bearing trees.</p>

## 6. Resettlement and Rehabilitation Budget

46. The resettlement cost for this Project includes compensation for land damage, crop damage and zirat; and the support cost for RP implementation. The total land damage compensation amount also includes Solatium @ 30% plus interest rate @12%. Ten percent contingency has been added to the budget. Based on the above, the final resettlement budget for the 132kV S/C of Agia-Matia line is **INR 83,20,733**

**Table 6.1: Resettlement Budget**

Sl. No	Items	Unit	Unit Rate (INR)	Final T/L Alignment	
				Quantity	Total Cost (INR)
1	2	3	4	5	6
A	Compensation for damaged Land				
A1	Agriculture Land (Private)	Ha	Rate determined by circle office	0.73	9,18,355
Sub Total for A					9,18,355.00
B	Compensation for Trees/Zirat				
B1	Timber Trees	No.	Rate determine by Forest Department/ horticulture department	941	27,05,838
B2	Fruit Trees	No.		629	16,95,830
B3	Bamboos	No.		13,424	18,94,280
Sub Total for B					62,95,948.00
C	Assistance				
C1	Vulnerable category	HH	One time assistance of INR. 10,000/- per affected household	35	3,50,000
Sub Total for C					3,50,000
Total (A+B+C) (INR)					75,64,303
Contingency (10%) on (A+B+C)					7,56,430.3
Grand Total (INR)					83,20,733
Grand Total in Million (INR)					8.3

## 7. Consultation and Disclosure

### 7.1 Consultation in the Project

47. Public consultation is an important tool to ensure peoples participation in the planning and implementation phase of this sub-project. Public consultations were organised during preparatory stage of the project. The details of consultation undertaken are summarised in Table 7.1

**Table 7.1: Summary of Consultation**

Date	Venue	Number of Participants	Issues Discussed
28-01-2010	Kamakhya	14	<ul style="list-style-type: none"> <li>Awareness about the project and environmental pollution.</li> <li>Benefits of the projects.</li> <li>Social and Environmental problems in the region.</li> <li>Presence of environmental sensitive areas in the region.</li> <li>Health and safety issues.</li> <li>Compensation payment mechanism initiatives for minimal environmental / social impacts.</li> <li>Presence of Indigenous People.</li> <li>Likely participation of the people for the future project implementation</li> </ul>
29-01-2010	Sonabil	10	
01-02-2010	Hailakandi	12	
13-03-2010	Bilasipara	20	
09-04-2013 to 12-04-2013	Agia-Matia	69	
01-07-2013 to 04-07-2013	Agia-Matia	18	

48. Public consultation in the sub-project area was held at Harimura, Genderapara, Dohikata, Samaguri, Moijhanga, Garukhuta and Kurabhara villages on 9<sup>th</sup> to 12<sup>th</sup> April, 2013 & also in 1<sup>st</sup> July to 4<sup>th</sup> July 2013. The consultation was limited to one-on-one interaction with eighty seven peoples that also includes women, villagers and affected persons. The mode of consultation was informal meeting and one to one interaction. The consultations were conducted with major objectives of;
- Establishing an understanding on overall developmental goals and benefits of the project;
  - Understanding the views of the people affected, with reference to use of land and its due compensation;
  - Resolving issues related to impacts on community property and their relocation, if any;
  - Examine APs' opinions on health safety issues during the construction and selection garbage materials or the waste materials;
  - Identifying levels and extent of community participation in project implementation and monitoring;
  - Developing a thorough coordination between all the stakeholders for the successful implementation of the project;

## 7.2 Key Findings of Consultations

49. The key findings of the consultation on various issues such as: general perception about the project, suggestions to mitigate any damage or loss of livelihood are presented below. **(Annexure 5)**
- The proposed project will benefit affected people to reduce the frequently power cut and lack of the electricity supply.
  - Women should also be empowered in the unskilled works of the project.
  - The affected peoples also suggested starting the tower erection works after harvesting of crops.
  - People asked about creation and employment opportunities during construction phases of the project.
  - Safety procedures such as glow sign and other relevant safety measures should be adopted during the construction stage of the project in order to avoid the untoward accidents.
  - Affected people expect a good amount for the loss of their private land because the National Power Grid Corporation Ltd. provides the people a huge amount of compensation for the transmission line which is traverse some of the villages.
  - Compensation amount of the tower erection should be provided before the erection of the tower to the affected people.

## 7.3 Disclosure

50. To ensure transparency in planning and active involvement of APs and other stakeholders, the project information will be disseminated through disclosure of the updated Final RP. The summary of the final RP will be made available in Assamese language. The official of IA will continue interacting with affected persons and information dissemination through consultation will continue throughout Investment Program implementation. A copy of the final RP will also be disclosed in ADB's and AEGCL website.

---

## 8. Grievance Redress Mechanism

### 8.1 General

51. RP implementation requires an efficient grievance redress mechanism that will resolve the queries and complaints of the APs. The EA established a mechanism to receive and facilitate the resolution of affected persons' concerns and grievances about physical and economic displacement and other project impacts, paying particular attention to the needs of vulnerable groups. The grievance redress mechanism is required to address AP's concerns and complaints promptly, using an understandable and transparent process that is gender responsive, culturally appropriate, and readily accessible to the displaced persons at no costs.

### 8.2 Grievance Redress Mechanism

52. **PIU Level**

Grievances will first be addressed to Implementing Agency (IA) at the local level and registers grievances in a complaint register with details related to the date of complaint, the type and nature of the complaint, action taken, follow up and communication sent to the complainant. Investigation of grievances involves site visits and consultation with relevant parties, such as the affected persons, contractors, land acquisition officials and the like. If a grievance remains unresolved within 2 weeks it is referred to the Grievance Redress Committee (GRC).

53. **Grievance Redress Committee**

The GRC comprises representatives of the APs, PMU, PIU, ESMU, field level staff, district magistrate/commissioner, local administration, revenue authority and local community. The main responsibilities of the GRC are to: (i) provide support to APs on problems arising from land/property acquisition; (ii) record AP grievances, categorize, and prioritize grievances and resolve them; (iii) immediately inform the PMU of serious cases; and (iv) report to APs on the resolution of their grievances and decisions of the GRC and the PMU. Other than disputes relating to ownership rights, which require to be resolved by a court of law, the GRC will review grievances involving compensation assessment and payment, relocation and other assistance. The GRC will meet every month if grievances are brought to the Committee, determine the merit of each grievance, and resolve grievances within a month of receiving the complaint. Simultaneously, the affected person is free to access the country's legal system at any time, although the GRM is the preferred mechanism of grievance redress. All costs involved in resolving the complaints (meetings, consultations, communication, and reporting and information dissemination) will be borne by the Project. Records will be kept of all grievances received, including contact details of the complainant, date the complaint was received, nature of grievance, agreed corrective actions and the date these were affected, and the final outcome. The GRCs will continue to function during the life of the Project including the defect liability period.

## **9. Institution Set-up**

### **9.1 Key Institutions Involved**

54. The implementation of the RP requires the involvement of various institutions at different stages of the project cycle. This section deals with roles and responsibilities of various institutional actors. It is noted that the Program (MFF) has been under implementation, therefore, all the necessary institutions are already in place and functional. Additionally, the relevant staff has been trained to deal with safeguards issues and has been involved in RP implementation for several years. The primary institutions involved in the process are as follows:
- Assam Electricity Grid Corporation Limited (EA and IA)
  - Project Management Unit (PMU)
  - Environment and Social Management Unit (ESMU) at PMU Level
  - Project Implementation Unit (PIU)

### **9.2 Executing Agency**

55. The Assam Electricity Grid Corporation Limited (AEGCL) is the executing agency (EA) for the APSEIP. The AEGCL also functions as the implementing agency (IA) for APSEIP with a dedicated Project Management Unit (PMU). The PMU in AEGCL has been set up for the overall implementation of the subproject activities. PMU is responsible for planning, coordinating, implementing and financing all resettlement activities. The PMU also comprises an Environment and Social Management Unit (ESMU) headed by an Assistant Manager to deal with the safeguards issues. A Land Acquisition Officer is placed in the PMU to handle land acquisition issues. Additionally, the EA/IA ensures that the office of the District Commissioner and its concerned staff are involved during the land acquisition process.

### **9.3 Environmental and Social Management Unit**

56. The Environment and Social Management Unit (ESMU) has been set up within the PMU/AEGCL, along with other engineering units, to address all environmental and social issues of the APSEIP. The ESMU is headed by an Assistant General Manager, who works closely with other staff of the PMU and assists the PMU in getting all necessary clearances and in the implementation of the resettlement activities prior to the start of any civil works. The ESMU coordinates safeguard activities both at headquarter and PIU level. All activities are managed and supervised by the Assistant General Manager based at the Head Office.

### **9.4 Project Implementation Unit**

57. In addition to the PMU, there is a PIU at the level for the independent implementation of sub-project. The PIU is responsible field for field level activities, including all social safeguards related requirements and RP implementation. The PIU maintains all databases, works closely with APs and other stakeholders and monitors day-to-day resettlement activities.

## **9.5 Social Safeguard Consultant**

58. In addition to the above, a social safeguard consultant has also been engaged to facilitate the process of finalization of the Resettlement Plans prepared for sub-projects under the APSEIP. The key responsibility of the Social Safeguard Consultant is to review and update all sub-project RPs, based on the Resettlement Framework (RF) agreed for this MFF and the relevant ADB policies. In addition, the Consultant's responsibilities also include advising and assisting the EA/IA in mitigating Social and Environmental issues and administration and Implementation of measures in RP, as required.

## **10. Implementation Schedule**

59. The implementation of the RP was scheduled as per the overall project implementation timeframe. All activities related to land acquisition and resettlement were planned to ensure that compensation is paid prior to the commencement of civil works. Public consultation, monitoring and grievance redress were undertaken intermittently throughout the project duration. As part of advance actions, the EA established the PMU, PIU, ESMU and GRC for resettlement implementation.
60. Payment of compensation to all 82 affected households for land damaged and 65 affected persons losing trees and bamboos damage during stringing of transmission line is completed and the line is under operation.

---

## **11. Monitoring and Evaluation**

### **11.1 General**

61. RP implementation is closely monitored through both, internal and external monitoring arrangements, to assess resettlement progress and identify potential difficulties and problems. Internal monitoring is undertaken by the PIU with assistance from the PMU/ESMU. The extent of monitoring activities, including their scope and periodicity, is commensurate with the Project's risks and impacts. AEGCL is required to implement safeguard measures and relevant safeguard plans, as provided in the legal agreements, and to submit periodic monitoring reports on their implementation performance.

### **11.2 Internal Monitoring by PMU**

62. The PMU internal monitoring include: (i) administrative monitoring: daily planning, implementation, feedback and troubleshooting, individual AP file maintenance, and progress reports; (ii) socio-economic monitoring: baseline information for comparing AP's socio-economic conditions, evacuation, demolition, salvaging materials, community relationships, dates for consultations, and number of appeals placed; and (iii) impact evaluation monitoring: Income standards restored/improved, and socioeconomic conditions of the affected persons.
63. Monitoring and evaluation reports documenting progress on resettlement implementation and RP completion reports will be provided bi-annually by the PMU to ADB for review.

### **11.3 Monitoring Indicators**

64. The indicators related to physical progress of the work will include items such as:
- Training of PIU and other staff completed
  - Census, assets inventories, assessments and socio-economic studies completed
  - Grievance redress procedures in-place and functional
  - Compensation payments disbursed, and
  - Monitoring and evaluation reports submitted.

These indicators will form the basis of the monitoring and evaluation of RP implementation. The information collected through the household survey will provide benchmarks for comparison on the socio-economic status of the DPs in the project implementation period. A key objective will be the maintenance or improvement of the APs incomes and quality of lives.

## **12. Findings of Due Diligence**

### **12.1 General**

65. The main purpose of the due diligence exercise is to (i) assess the compliance of all RP activities already implemented under the subproject with provisions of the RF, (ii) identify gaps, if any, and (iii) design corrective actions as required.

### **12.2 Compensation for Damaged Land**

66. To minimise the impact on affected persons, the project authority decided not to acquire and to pay compensation for damaged private land due to tower footings construction. This has been achieved by exercising sections 164 (power to execute provisions of ITA, 1885) and 165 (allowing to adopt land estimation process in LAA, 1894) of the Electricity Act 2003, and reading along with section 10 of the Indian Telegraph Act (ITA) 1885 that allow compensation for damage to private land but without acquiring any right.
67. The total private land requirement assessed for tower footings is 0.85 Ha for this sub-project. A total amount of **INR. 9,18,355/-** has been paid as compensation for damaged to private agricultural land to 82 affected households.

### **12.3 Compensation for Loss of Trees**

68. Compensation for 1570 trees (fruit & non fruit) and 13,424 bamboos owned by 65 title holders has been paid based on their market value. The rate for compensation for these impacts was finalized by engaging the Horticulture and Forest Departments. The loss of timber trees and bamboos was compensated at applicable market rates amounting to a total of **INR 27,05,838/-** and **INR 18,94,280/-**, respectively. The compensation for the loss of fruit trees was calculated based on the age of the affected tree and the annual produce value for the remaining productive years, totaling **INR 16,95,830/-**. The grand total amounts to **INR 62,95,948/-**. See **Annexure 6** for sample documentary evidence of compensation payments made for land and trees.

### **12.4 R&R Assistance**

69. From the socio economic census survey, 35 households were identified in vulnerable category. On the basis of social vulnerability it has been identified during the census survey that 32 AHHs falls under schedule tribe (Plains) and 3 AHHs falls on Scheduled caste category. Therefore one-time assistance of INR 10,000 has been assisted to the 35 AHHs and added in the R&R budget.

### **12.5 Findings and Conclusion**

70. There is no land acquisition and no physical displacement of affected person. The APs are however, economically displaced due to damaging of their land. All affected persons have been paid the compensation for damage to private land, loss of trees and bamboos. Even though compensation for land is paid, it is noted that the ownership of the land is not acquired and remains with respective individual owners. The usability of land has diminished, still the owner has the option to utilise the land for cultivation, which further minimise the impact of the project.

**Annexure 5****Public Consultation Minutes**

Focus Group Discussion	
Name of the Sub-Project	132 <del>BB</del> KV Agia - Matia T/L
Name of the Village/s	Harimura / Bohikata
Date	09-04-13
Venue	Goalpara.
No. of Participants attended:	15
FGD Conducted by	Dibya Jyoti Baruah, D. Singha.
<b>Objectives:</b> <ul style="list-style-type: none"> <li>To inform community about the proposed sub-project</li> <li>To understand their overall socio-economic condition</li> <li>To understand their views and perceptions on project</li> </ul>	
<b>Issues discussed &amp; Observation made:</b> <ol style="list-style-type: none"> <li>1) Women in the project area are aware of the proposed transmission line and most of the participants welcomed the project and appeal to complete the proposed project as soon as possible for better electricity supply in future.</li> <li>2) The proposed sub-project will be beneficial as because there are major power cut &amp; low voltage leading to impediment after supply and for agricultural productivity in the province.</li> <li>3) Frequently power failure leads to increased the expense on Kerosene, oil, candle etc. As the price of Kerosene increasing household rice. With the proposed project intervention, it is believed that there will be a rise in the savings pattering of the household in the area.</li> <li>4) Women in the area should be given opportunity in unskilled works like earth filling, earth digging etc during construction stage of the proposed sub-project which would have a positive result to reduce unemployment for a moment.</li> <li>5) A reliable source of electricity will be who encourage people in the area to start new business like rice mill, fabrication, internet cafes etc. which will increase the source of income in the area.</li> </ol>
