**Subject: Submission of Revised Consultation Report with AHs of the CW-A and CW-B1**

Dear Sir,

With reference to the paragraph 45 of ADB Mid-term Review Mission MOU signed on 24 April 2015, Project Management Unit 3 (PMU3) would like to submit herewith revised consultation report with AHs of contract CW-A and CW-B1 for your review. The report has been incorporated ADB Safeguards Specialist's comments through the meeting held on 13 June 2015 at Phnom Penh.

We would like to inform that PMU3 and consultants instructed the contractor to stopped civil works where finding is negative in cleared areas as the Mission addressed and the contractor has been stopped civil works in negative areas.

With best regards,

**PHENG Sovicheano**

Project Director, PMU3

Under-Secretary of State

Mr. SAR Vutha, Office Manager, PMU3, MPWT

Enclosure (as stated)

## **PROVINCIAL ROADS IMPROVEMENT PROJECT**

### **DUE DILIGENCE REPORT ON COI CLEARING ACTIVITIES IN NR13 AND PR314D**

1. This report is prepared as part of the agreement reached during the Project Mid-Term Review. The purpose is to report on the COI clearing and grubbing activities that took place in some sections of NR13 and PR314D in advance of approval of the updated resettlement plan in March-April 2015, assess the nature of the impacts, and propose measures to address pending issues.

#### **BACKGROUND**

2. The Provincial Roads Improvement Project (PRIP) includes 2 road sections covered under two civil works packages – CW-A covering NR13 and CW-B1 covering PR314D. An updated resettlement plan has been prepared by IRC with support from Project Supervision Consultant based on detailed measurement survey (DMS) conducted January to March 2014 (PR314D) March-September 2014 (NR13) and submitted to ADB for review in May 2015.

3. Of the total length 88km covered under the project scope of these 2 roads, there is a total of 20.1km of unencumbered sections with no resettlement impacts. PMU3 granted permission to the project civil works contractor, SINOHYDRO to commence clearing the unencumbered sections. The list of unencumbered sections was based on a list obtained from the results of the DMS from which km points of encumbered and unencumbered sections could be determined. In undertaking grubbing activities of these sections, SINOHYDRO, without permission of PMU3 also commenced grubbing activities along the sides of the COI of a number of sections encumbered by trees and secondary structures during March and April 2015. Upon becoming aware of this, PMU3 undertook the following measures:

- (i) On 22 April 2015, instructed the contractor to immediately cease all clearing and grubbing activities;
- (ii) Posted 7 large signs in prominent areas on 22-23 May 2015 along the road alignment about the project, including phone numbers to contact in case anyone in the area has queries or complaints about the project;
- (iii) Mobilized the project supervision consultant team (including national resettlement consultant) to review the situation and interview households in the areas affected by the grubbing activities in May 2015.

#### **RESULTS OF PMU3 ACTIONS**

### **Results of Instructions to Contractor**

4. PMU3 confirms that all grubbing and clearing activities ceased on 22 April 2015. No resumption of clearing activities will take place until after the resettlement plan is approved and households are compensated. PMU3 confirms that it will closely monitor the compensation process to assess any complaints that may arise as a result of the clearing activity and will include this information in its regular project progress reports.

### **Results of Signage Posted**

5. No complaints have been received to date.

### **Results of the Monitoring and Household Survey**

6. The monitoring consisted of visual inspection of the cleared areas along with interviews with affected households.

7. The survey interviewed a total of 257 households consisting of 137 households on NR13 and 120 households on PR314D using a combination of structured interviews with survey form and unstructured interviews noting respondents comments. The number of households interviewed represented approximately 20% of those affected by the advance clearing activities. A list of those interviewed with contact details is attached to this report.

8. Based on the monitoring and survey PMU3 can report the following:

- (i) The sections cleared are within the ROW approximately 2m from the side of the existing road.
- (ii) The sections SINOHYDRO cleared were encumbered by trees and some temporary structures (fences and stalls of temporary structure type). No main structures and no privately owned land were affected.
- (iii) No prior written consent was obtained from those affected. Most households were advised in advance of the clearing activity, but some were not. Some households reported that they objected to the clearing activities to the contractor and as a result the clearing skipped their property.
- (iv) All those interviewed had completed the DMS for their property and had thumbprinted the DMS form. Accordingly, there is a written formal record of their affected property prior to clearing. All households had a "yellow ticket" provided by IRC Working Group, which lists the affected property as in the DMS.
- (v) Of those interviewed 85% reported in the interviews that they did not mind about the advance clearing activities and were happy for the road to

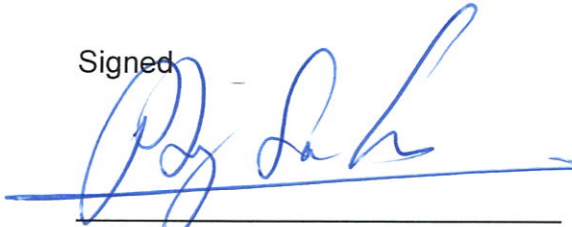

proceed quickly. Another 15% reported complaints during the interviews which consisted of two main types: (i) they had been lied to because they were informed during earlier consultation activities that no clearing would take place prior to compensation payment; and (ii) contractor did not inform them about the clearing activities.

## RECOMMENDED APPROACH

9. PMU3 recommends the following further remedial actions to address grievances and ensure compliance:

- (i) Approve and implement the updated resettlement plan as soon as possible. PMU3 will advocate with IRC to prioritize compensation payment to those already affected as much as possible.
- (ii) PMU3 confirms no resumption of clearing activities will take place until after the resettlement plan is approved and households are compensated.
- (iii) PMU3 confirms that it will closely monitor the compensation process to assess any complaints that may arise as a result of the clearing activity and will include this information in its regular project progress reports.

Signed

Total											137				116	19	2	
Percentag											100%				84.67%	13.86%	1.45%	

Date	Road	Methodology	Clear Area	Staff Conduct Work	Total
29 - 30 May , 2015	13	For the methodology I'm use Systematic Sympling by radom with list name of Affected People tha t IRC has record. I'm use this method for road 13D by selected a hold way 300 Aps but now construction clear only 28 Km because some place in PK clear not yet complet. so I'm calculated for Aps only 135 for clearing area.  Aps = 300 * 28 / 62 = 135 Aps	Start From PK 14 +00 to 24 + 00 and 26 + 00 to 40 + 00 and 53 + 00 to 62 + 00	Resettlement Staff Only One KC I : 8 Persons	137 APS  Positive : 116 = 84.67 %  Negative ; 19 = 13.86 %  Both ( Pos and Neg ) : 2 = 1.45 %

\* Consultants instructed the Contractor has to stop work at negative APs area as follow ADB Mission and PMU3's address.  
 \* The Contractor followed consultants' instruction and stopped civil works at negative area.

25 - 28 May , 2015	314 D	<p>For the methodology I'm use Systematic Sympling by radom with list name of Affected People tha t IRC has record. I'm use this method for road 314D by selected a hold way 200 Aps but now construction clear only 15 Km becauuse some place in PK clear not yet complet. so I'm calculated for Aps only 120 for clearing area to be study.</p> <p>Aps = <math>200 * 15 / 25 = 120</math> Aps</p>		Start From PK 00 + 500 to 15 + 00	Resettlement Staff Only One KCI : 2 Persons	<p>120 APS</p> <p>Positive : 119 = 99.1 %</p> <p>Negative ; 1 = 0.83 %</p> <p>Both ( Pos and Neg ) : 0 %</p>

\* Consultants instructed the Contractor has to stop work at negative APs area as follow ADB Mission and PMU3's address.

\* The Contractor followed consultants' instruction and stopped civil works at negative area.

**SUMMARY CONSULTATION ACTIVITIES FOR NR-13 & 314D**

Date	Road	Methodology	Clear Area	Staff Conduct Work	Total
25 - 28 May , 2015	314 D	<p>For the methodology I'm use Systematic Sampling by random with list name of Affected People that IRC has record. We use this method for road 314D by selected a hold way 200 Aps but now construction clear only 15 Km because some place in PK clear not yet complete. So we calculated for APs only 120 for clearing area to be study.</p> <p><math>Aps = 200 * 15 / 25 = 120 \text{ Aps}</math></p>	Start From PK 00 + 500 to 15 + 00	One staff of Resettlement and two staffs of residence engineers	<p>120 APS</p> <p>Positive : 119 = 99.1 %</p> <p>Negative ; 1 = 0.83 %</p> <p>Both ( Pos and Neg ) : 0 %</p>
29 - 30 May , 2015	13	<p>For the methodology I'm use Systematic Sampling by random with list name of Affected People that IRC has record. We use this method for road 13 by selected a hold way 300 Aps but now construction clear only 28 Km because some place in PK clear not yet complete. So we calculated for APs only 135 for clearing area.</p> <p><math>Aps = 300 * 28 / 62 = 135 \text{ Aps}</math></p>	<p>Start From PK</p> <p>14 +00 to 24 + 00 and 26 + 00 to 40 + 00 and 53 + 00 to 62 + 00</p>	One staff of Resettlement and 8 staffs of residence engineers	<p>137 APS</p> <p>Positive : 116 = 84.67 %</p> <p>Negative ; 19 = 13.86 %</p> <p>Both ( Pos and Neg ) : 2 = 1.45 %</p>

\* Consultants instructed the Contractor has to stop work at negative APs area as follow ADB Mission and PMU3's address.

\* The Contractor followed consultants' instruction and stopped civil works at negative area.
