INTRODUCTION

1. The Central Asia Regional Economic Cooperation Program (CAREC) Transport Corridor 2 Investment Program proposed by the Government of Kazakhstan (GoK) for funding by the Asian Development Bank (ADB) aims to rehabilitate/upgrade the roads Manasha – Aktau, Beineu-Akzhigit and the Zhetybai-Zhana Ozen – Fetisovo – to the border with Turkmenistan in Mangystau Oblast through a Multi-Tranche Financing Facility (MFF).

2. The MFF is divided into three tranches:

Tranche 1 is covering the road section from km 372.6 (Manashy river) to km 514.3 (Sai-Utes) and km 574 to km 632.3 (Shetpe).

Tranche 2 is expected to upgrade the remaining sections from km 632, 3 to km 802 and the section (Shetpe-Beineu-Aktau).

Tranche 3 will upgrade Beineu – Akzhigit section and Zhetybai – Turkmenistan border.

3. **Tranche 2** comprises upgrading of a total of 169.97 kilometers road. The road will be rehabilitated and partly reconstructed in accordance with the national highway categories I and II. Technically the road length can be divided into 2 sections:

- **Section 1** (Category I) includes the entire route between Shetpe bypass start (km 632.3), to the end of Shetpe bypass (km 644), and continuing to Zhetibay bypass (km 711-719) until joining the national highway from Zhanaozen and Turkmenistan to Aktau (km 719);
- **Section 2** (Category II) includes the stretch between Zhetibay junction (km 719) westwards to Aktau urban periphery, at the junction at km 802.27.

4. The Draft Land Acquisition and Resettlement Plan (LARP) for CAREC Corridor 2 (Mangystau Oblast Section) Investment Program Tranche 2 was prepared in November 2012 and **updated in August 2014** by the Committee of Roads (CoR), Ministry of Investments and Development (MID) in compliance with the Land Acquisition and Resettlement Framework (LARF) agreed between GoK and ADB, relevant Kazakhstan laws, and ADB Safeguard Policy Statement (2009).

5. This Internal Monitoring Report for LARP relates to **Tranche 2** of the CAREC Corridor 2 (Mangystau Oblast Section) Investment Program and provides analysis of implementation of the LARP at km 632.3 to km 802 road section. The objectives of the Report are to:

- a) Verify that resettlement activities implemented for the project comply with the approved Land Acquisition and Resettlement Plan (LARP) and ADB's Safeguard Policy Statement (2009);
- b) Verify that DPs have restored their living standards;

6. This Report reflects the current situation of land acquisition and resettlement related activities and issues. This includes opinions of DPs, whose land/property related interests and rights have been affected as a result of the implementation of Tranche 2. The key information contained in this Report is:

- a) Land acquisition procedures;
- b) Impacts of the land acquisition and resettlement;
- c) Information on compensation;

II. OBJECTIVES OF INTERNAL MONITORING AND METHODOLOGY

7. Monitoring was conducted in November 2014 by national consultant (PMC), with assistance of JSC MOB «NC KazAutoZhol» and akimats of Mangistay, Munaily, and Karakia rayons. The consultant reviewed documents provided by JSC MOB «NC KazAutoZhol», Mangistay, Munaily and Karakia rayon akimats, including corrective actions proposed in approved LARP updated in August 2014.

8. The following actions have been performed as a part of monitoring process:

- Review of LARP, procedures on entitlement, independent evaluation reports and compensation payments processes;
- Review of documents regarding provision of compensation including decisions from relevant state institutions;
- Implementation of monitoring of land acquisition.

III. GENERAL DESCRIPTION OF THE PROJECT¹

9. ADB has agreed to make a loan to the RoK with \$371.300.000 million (Loan Agreement 2967-KAZ) for implementing the CAREC Corridor 2 (Mangystau Oblast Section) Investment Program Tranche 2 (hereinafter the Project) on 18 June 2013.

The Project comprises reconstruction of 169.97 kilometers between the settlement of Shetpe and the city of Aktau and its construction supervision. The road will be reconstructed in accordance with the national highway categories. Technically, the road length can be divided into 2 sections:

- **Section 1** includes the entire route between Shetpe bypass start (km 632.3) to the end of Shetpe bypass (km 644), and continuing to Zhetibay bypass (km 711-719) up to the junction with the national highway from Zhanaozen and Turkmenistan to Aktau (km 719);
- **Section 2** includes the stretch between Zhetibay junction (km 719) westwards to Aktau urban periphery, at the junction at km 802.27.

Civil works are divided into four contract packages:

- **Lot 1** (km 632.3 – km 675);
- **Lot 2** (km 675 – km 719);
- **Lot 3** (km 719 – km 754);
- **Lot 4** (km 754 – km 802.27).

The works involve the followings:

Upgrading of **Section 1** (total length 85.44km) to Category II road between Shetpe bypass (km 632.3 -km 644), and Zhetibay bypass (km 711-719). The section ends at junction on km 719. On this section is anticipated to construct the following:

- 5 cattle crossings for livestock;
- bridge;
- 32 culverts;
- 1 overpass

Section 1 - 632.3 km – 719 belongs to the second category.

¹ Information on Project Description (paragraphs 9-10) provided in this Chapter is based on Land Acquisition and Resettlement Framework, Project 43439-KAZ, November 2012

Section 2 (total length 83,891 km) involves the stretch between Zhetibay Junction end (km 719) westwards to Aktau urban periphery at the junction at km 802.27.

This section includes the followings:

- 5 cattle crossings for livestock;
- 1 junction;
- 33 culverts;
- bridge on the river Ashiagar;
- 1 overpass;
- Railroad

This section includes (km 719 - km. 786) upgrading of the existing road to technical category 1B (total length 68.296 km) with four lane, traffic strip and widening of the roadbed to 27.5 m on the top.

Construction of a road junction at the intersection of two levels of roads "Aktau - Zhanaozen" and "Shetpe - Kuryk" on km 720 with four-lane carriageway passing through the top of the road "Shetpe - Kuryk."

The section (total length 15.595 km) belongs to category III passing urban periphery (km 786 - km 802.27) and involves repairing of carriageway and pavement.

10. During the construction phase, land may also be needed temporarily for batching plants, field offices/workers' camps, and temporary bypasses. However, civil works contracts will require the contractor to be responsible for the temporary acquisition and reinstatement of all and required outside of the right of way for construction camps, offices, borrow pits, materials storage sites, materials processing sites and haul roads. Contractor is assumed to prefer to rent State land, rather than private property, during construction works. In addition, temporarily used lands are required to be returned to their original state after work completed.

11. The Contractor, "Cengiz Inshaat" (Turkey) has been selected. The Contract has been signed on 23.06.2014. In November this year Contractor stated mobilization, construction of camp and construction works at one of the road sections (earth) despite of LARP is not fully implemented.

Summary of land acquisition and resettlement impacts is presented in Table 1 below. Details on affected parties and assets are provided in Annex A.
