**Compliance to ADB Observations on Environment & Social Due Diligence Report (ESDDR) of  
Parsuram Arawali Highways Pvt Ltd (PAHPL) – Environmental Safeguards**

S. No.	ADB Comment on Environmental Safeguards	IIFCL response/clarifications
1.	IIFCL was requested to confirm that the sub-project complies with ADB's Safeguard Policy Statement (SPS), 2009. In response, IIFCL has stated (Para 47 revised ESDDR) that "Based on documentary evidence provided by the Developer and its assessment, the sub project seems to be meeting the requirements of ADB's Safeguard Policy Statement (SPS), 2009." IIFCL is requested to confirm explicitly that the sub-project fully complies with ADB's Safeguard Policy Statement (SPS), 2009. Please elaborate the areas or aspects where IIFCL is not able to ascertain and confirm compliance with ADB's SPS 2009.	Para No. 47 of the ESDDR has been revised as "Based on documentary evidence provided by the Developer and its assessment, the sub project is meeting the requirements of ADB's Safeguard Policy Statement (SPS), 2009. During the proposed site visit by IIFCL team, if any observations on safeguards compliance are found, those will be communicated to ADB and a suitable corrective action plan will be prepared, if required."
2.	IIFCL was requested to provide a copy of permission issued by the regulator for the extraction of surface water from Vashishthi river. In response, IIFCL has furnished a copy of communication from the state irrigation department dated 28 February 2019 (as attachment 8 to revised ESDDR) that advised the concessionaire to pay the charges for such extraction of water (while its application for permission was under review). This communication does not appear to be the copy of the water extraction permission issued by the state irrigation department. IIFCL is requested to ascertain and confirm that the document provided as "permission" is indeed the copy of the permission, considering that revised ESDDR would be disclosed on ADB website.	In view of the prevailing Covid situation and shortage of staff at site, IIFCL has not been able to get the actual details. However, the bills raised by the authorities for particular time periods for water lifting have been shared with the ESDDR. The developer had confirmed over phone during the due diligence process that the permission is in place. During proposed site visit the permission will be checked and copies submitted.
3.	IIFCL was requested to include the copies of environmental permits obtained for the quarries, mines, and construction plants used to procure construction materials (stones, sand, earth, etc.) with the revised ESDDR. In response, IIFCL stated that "permissions from Gram Panchayats and State Pollution Control Board taken by Developer have been shared with the ESDDR." IIFCL has further clarified that the concessionaire would use majority of the material required for construction from the material obtained from cut and fill areas within the alignment. It is unclear whether no quarries or mines are envisaged to be used to procure the	Relevant permissions from mining department of State Government and Gram Panchayat are in place. The actual areas being used for sourcing construction material will be checked during proposed site visit to be conducted by IIFCL. The site visit will be undertaken once it is safe for IIFCL staff to visit.

	<p>construction materials. IIFCL is requested to reassess this situation based on its due diligence on quantum of the construction materials required for the sub-project and the quantum available through cutting along the alignment and confirm that no quarries and mines would be utilized for sourcing the construction materials. Should the quarries and/or mines be necessary, IIFCL is requested to provide copies of environmental clearances issued under the prevailing environmental regulations for quarries and mines being and/or to be utilized for sourcing the construction materials.</p>	
4.	<p>IIFCL was informed that the details of monitoring of parameters provided in Appendix 11 of the ESDDR for ambient air quality and water quality should be in line with NAAQS and water standards. In response, IIFCL has stated that the parameters monitored were found to be within permissible limits. IIFCL is requested to confirm by 15 November 2020 that the parameters monitored (as reported in Annexure 11 of ESDDR) for ambient air quality and water quality were in compliance with India's NAAQS and water standards (IS 10500-2012) and were acceptable for consideration from environmental monitoring aspects correlated with environmental assessments.</p>	<p>Developer has been informed to get the parameters tested as per CTO. The monitoring parameters will be checked during Annual Monitoring.</p>
5.	<p>IIFCL is requested to provide copies of entries in the complaint registers maintained at the site as requested</p>	<p>Complaint register will be checked during proposed site visit to be conducted by IIFCL. The site visit will be undertaken once it is safe for IIFCL staff to visit. The status will be reported in Annual Monitoring report.</p>
