

# Initial Environmental Examination

---

Appendix III, Parts 1-5  
March 2019

## Cambodia: National Solar Park Project

Prepared by the Electricité du Cambodge, Government of Cambodia for the Asian Development Bank. This initial environmental examination is a document of the borrower. The views expressed herein do not necessarily represent those of ADB's Board of Directors, Management, or staff, and may be preliminary in nature. Your attention is directed to the [“terms of use”](#) section on ADB's website.

In preparing any country program or strategy, financing any project, or by making any designation of or reference to a particular territory or geographic area in this document, the Asian Development Bank does not intend to make any judgments as to the legal or other status of any territory or area.

## **Appendix III - Part 1 – Biodiversity Assessment**

### **INTRODUCTION**

1. The environmental assessment requirements under ADB SPS 2009 include biodiversity, critical habitats, and legally protected areas. The protected areas, wetlands, mangroves, forest formations, wildlife sanctuaries and important bird areas located near or adjacent to the project area of influence is subject to an environmental assessment.
2. The project site is geographically situated between 11.669518° and 11.804790° north latitudes and 104.334288° and 104.699287° east longitudes in the provinces of Kampong Chhnang and Kampong Speu, Cambodia. The site is characterized by a relatively flat terrain.
3. Table 1 provides the summary of environmental sensitive receptors information for the project. Field visits to the project site and along the proposed transmission alignment were conducted in March and July 2018. The proposed project is shown in Figure 1 (The solar park site is referred to as EDC land in the figure).

### **OBJECTIVE**

4. The objectives of the biodiversity assessment was to conduct site surveys and collect data to:
  - Provide clear identification of project area of influence and assessment of any corresponding areas of biodiversity value;
  - Identify the value/status of any wetlands, feeding areas, lake or ponds, community forests as per national/international conservation standards;
  - Assess potential impacts of the project to the feature; and
  - Provide measures and recommendations to avoid, mitigate or compensate for any potential impacts.

**Table 1 – Summary of Environmentally Sensitive Receptors in the Project Area of Influence<sup>1</sup>**

Province / District	Project Component	Communes Affected	Surface Water Receptors	Land Cover/ Ecological Receptors	Protected Area
Kampong Chhnang Province / Districts: Tuek Phos and Sameakki Mean Chey	Solar Park And Transmission Interconnection System	Total No. 2 Kbal Tuek Chean Laeung	Two natural streams transecting across the length of the proposed solar park site with inflow coming from Upper Catchment Aural and feeding into “An Long Chrey” reservoir located downstream at a distance of approximately 4-5 km; the reservoir may serve as a stop off for migratory birds	Scrubland (293 ha) and paddy fields (116 ha); small plantations such as cassava, mango, cashew, eucalyptus and bamboo are also present	None in close proximity to the proposed site;  Phnom Aural National Protected Area located at least 20 km of site  300 ha  Community forest in Chean Laeung located approx. 5-7 km from proposed solar park in the northeast direction.
Kampong Speu Province / Districts: Thpong and Odongk	Transmission Line ROW (approx. length 37-40 km) <sup>2</sup>	Total No. 6 Prambei Mum Rung Roeang Mean Chey	Average distance from the ROW midline:  2 fish ponds at 50 m 18 natural ponds at 100 m 2 canals between 85-130 m 1 natural stream in Mean Chey	Paddy fields (711 ha), scrubland (213 ha) and degraded land (147); fruit tree orchard (54 ha) and non-fruit tree orchard (41 ha); vacant grassland (16.3 ha); development land (18 ha)	Community forests located 7-8 km from the proposed transmission line:  - 70 ha in Rung Roeang Commune and  800 ha in Prambei Mum <sup>4</sup>

<sup>1</sup> Project area of influence is defined for the project in the methodology section of this report.

<sup>2</sup> For the transmission line, key receptors were identified within an estimated 400 m width (or 200 m) on each side of the midline for a 15 m wide ROW for a total length of 33-34 km.

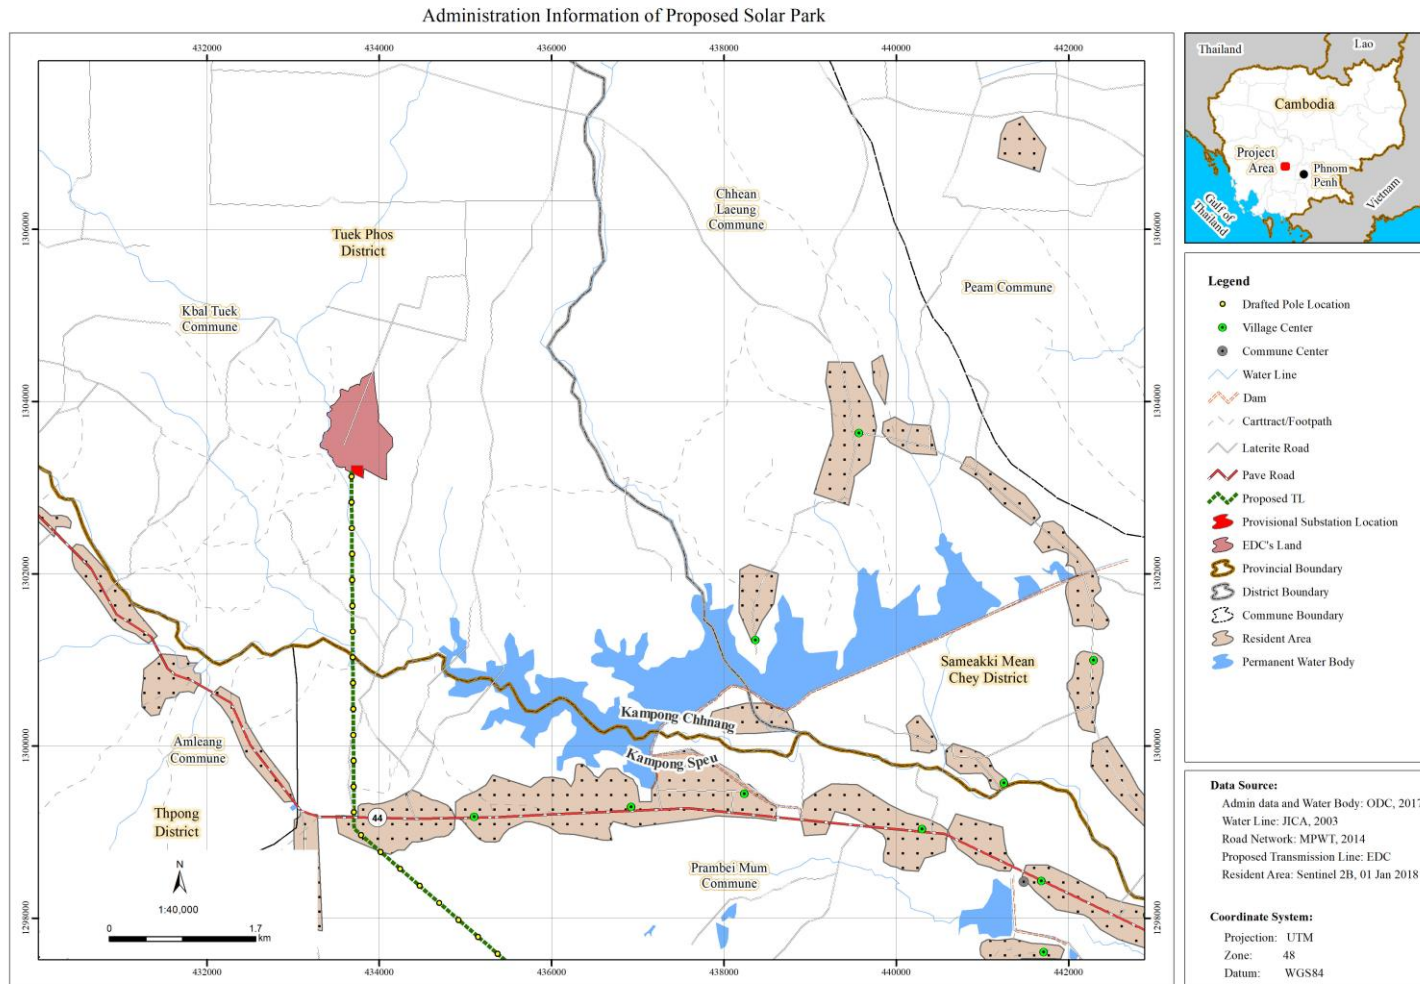

<sup>4</sup> Chornng K'rark community forest

Province / District	Project Component	Communes Affected	Surface Water Receptors	Land Cover/ Ecological Receptors	Protected Area
		Chan Saen Trach Tong Khsem Khsant	at 95 m  Water canal crossing in Mean Chey Chan Saen, Trach Tong and Prambei Mum	256 trees estimated to be cut at transmission tower footings (including 100 mango trees) while over 8500 trees to be affected by the ROW. <sup>3</sup>	
	Grid Substation GS6		None	Upgrade within existing substation boundary	None

<sup>3</sup> Trees - sugar palm, mango, banana, eucalyptus, bamboo etc. Source: draft LARP, July 2018.

**Figure 1: Project Location (The solar park site is referred to as EDC land in this figure)**

## METHODOLOGY

5. Initial screening of project conducted using Integrated Biodiversity Assessment Tool (IBAT).

6. Following this, a seven kilometer radius was delineated and defined as the project area of influence (see Figure 2)<sup>5</sup> to determine: (i) presence of any wildlife species including bats and migratory birds; (ii) if the project area of influence contains any habitat or species of conservation value or considered 'critical habitat'; (iii) if there will be any measurable adverse biodiversity impacts due to the project; and (iv) migratory species flypaths. ADB SPS 2009 defines critical habitat as:

- Areas that have high biodiversity value;
- Habitat required for the survival of critically endangered or endangered species;
- Areas having special significance for endemic or restricted-range species;
- Sites that are critical for the survival of migratory species;
- Areas supporting globally significant concentrations or numbers of individuals of congregatory species;
- Areas with unique assemblages of species or that are associated with key evolutionary processes or provide key ecosystem services; and
- Areas having biodiversity of significant social, economic, or cultural importance to local communities.

7. Dry season survey was conducted on the following dates: March 8 to 12 and March 20 to 21, 2018. The survey covered the proposed solar park site, alternative site and transmission line ROW. The survey activities were done in the morning (07:00-10:00) and afternoon (15:30–18:00). All species sighted, heard, detected and/or flushed were listed in a tally data sheet. The surveys were conducted by transect walks along the predetermined transect lines established within the coverage area.

8. Wet season survey was conducted during July 8 and 9, 2018. The survey covered the proposed solar park site, transmission line ROW (close to the solar park site), An Long Chrey Reservoir<sup>6</sup> and Tbeng Srong community forest (300 ha) located northeast of proposed solar park in Chean Leung commune at a distance of approximately 5-7 km. The coverage area was marked as yellow and red survey points on a map (see Figure 3) as follows:

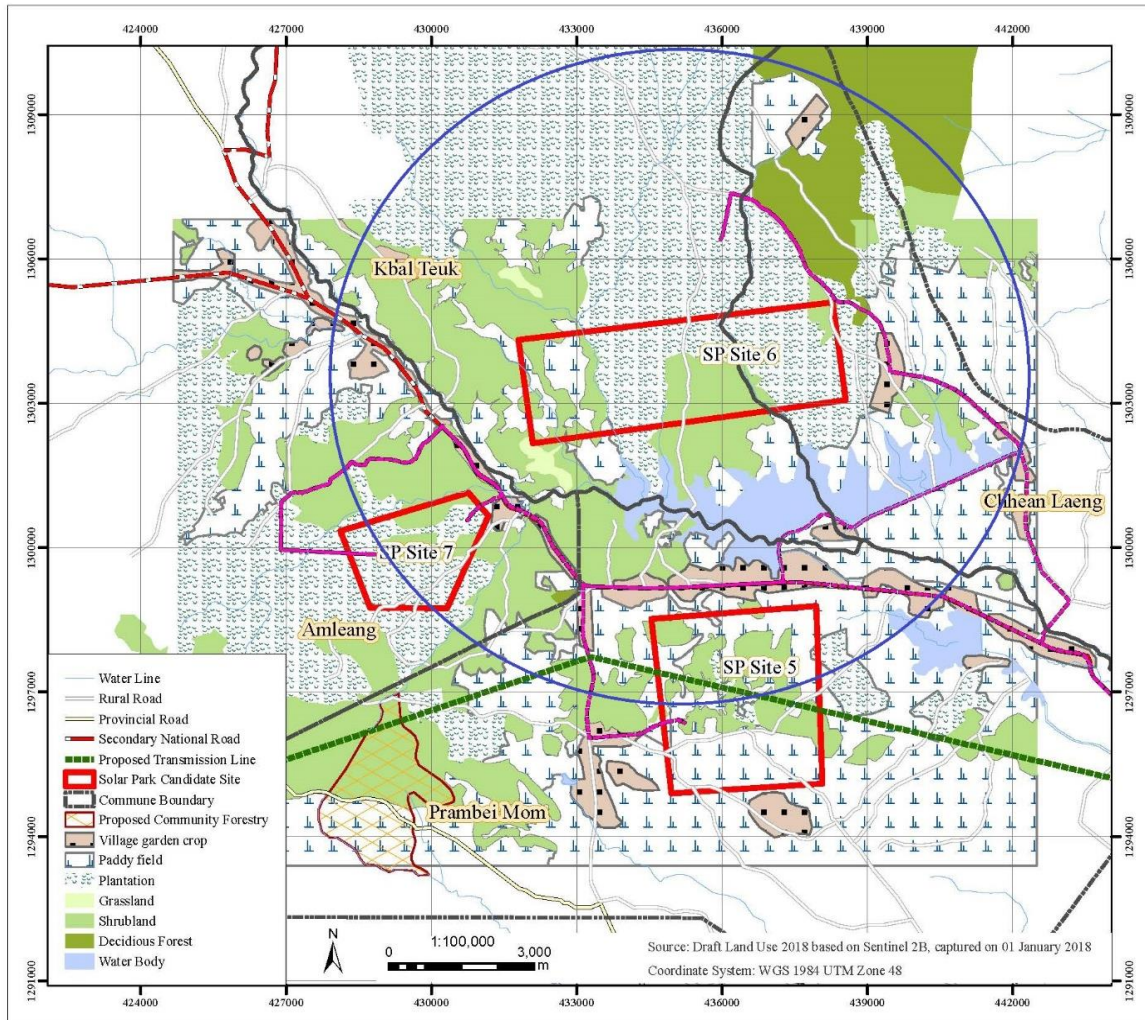

- **Proposed solar park:** a site within the proposed solar park was randomly selected with respect to habitat types and location
- **Potential transmission line:** Transects TL1, TL2, TL3, and TL4 were selected to assess impacts on forest in the nearby area
- **Anlung Chrey reservoir:** Four sites were randomly selected with one site close to the proposed solar park and the other three on the other side of the Reservoir

---

<sup>5</sup> Figure 2 presents the project area of influence marked in a blue circle; the solar park site was initially referred as site 6 (and is marked as such in the figure) while other sites options that were initially under consideration were referred to as site 5 and 7 (also marked in the figure) – these are referred to as alternative site for the purpose of this assessment; the proposed transmission line alignment is marked in green line.

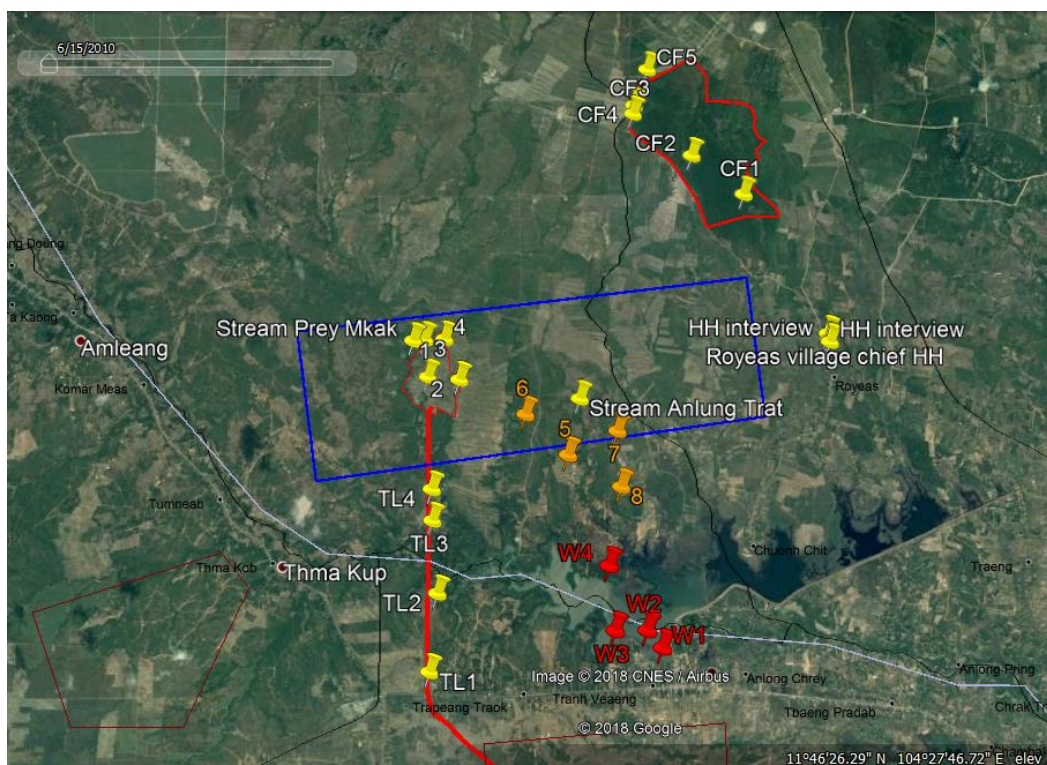

<sup>6</sup> This reservoir is constructed for a micro- hydro project (An Long Chrey) and managed by the Ministry of Water Resources and Meteorology (MOWRAM).

**Figure 2: Project Area of Influence for Conducting a Biodiversity Assessment**

**Figure 3: Survey Points Established During Wet Season Survey<sup>7</sup>**

9. The coordinates of red and yellow spotted points conducted during field survey during the wet season in July are shown in Universal Transverse Mercator (UTM) in Table 2.

**Table 2: UTM of Spotted Points during Field Survey in July, 2018**

Site	Points	UTM	
		X	Y
Proposed solar park and nearby area	Prey Mkak stream	433400	1303960
	1	433618	1303435
	2	434073	1303395
	3	433562	1303976
	4	433852	1303982
	5	435645	1302315

	CF2	437445	1306664
	CF3	436586	1307284
	CF4	436602	1307409
	CF5	436798	1307945

10. The assessment also made use of various kind of maps such as project location, forest types, land use, location / distribution of protected areas, protected community forests, reservoirs.

11. In addition, consultations with the local based environment non-government organizations (NGOs) were undertaken in Phnom Penh and interviews with local villagers were conducted for identifying bird occurrences within the proposed solar park project.

## FINDINGS

### IBAT SCREEING RESULTS.

12. The summary of the IBAT screening results are presented in Table 3. The screening identified a number of Internatinoal Union for Conversation of Nature (IUCN) Red List species (i.e. species under threat that require conservation action) that may occur in the grid.<sup>8</sup> Follwing the screening results, a ground survey was first conducted in the dry season in March 2018 and later in the wet season in July 2018.

13. Red List species were not recorded or taillied during the ground survey in the project area of influence.

**Table 3: Summary of IBAT Screening Results**

Summary of IUCN Red List Species Under Threat that Require Conservation Action				
IUCN STATUS	BIRDS	MAMMALS	REPTILES	FISH
Critically Endangered (CR)	4	1	1	3
Endangered (EN)	5	5	2	5
Vulnerable (VU)	6	9	8	4
Near Threatened (NT)	2	2	0	6
Total	17	17	11	18

<sup>8</sup> See details of IBAT Grid of site 6 in Appendix III-Part 3 IBAT Screening Site 6\_20km

## LAND USE.

14. Site reconnaissance identified the proposed solar park site and the surrounding area as mostly flat and scrubland (293 ha) and paddy fields (116 ha) with few trees, land plots for cultivating paddy and small plantations with cassava, mango and cashew. Table 4 presents the land use in and around the proposed solar park site. There is some farmland (sugar cane fields) along the approach road to the site. The site involves a contiguous piece of land that does not impact large habitations,

crossing of highways or railway lines. Land use in the area to be acquired for each transmission tower footing / pole (approximately 3 ha) is mostly paddy fields, scrubland and degraded land while the rest is a mix of orchards, vacant grassland and development land (for residential purposes). The transmission line will affect 15 m Right of Way (ROW) for a length of approximately 37 - 40 km between the new pooling substation at the proposed solar park and GS6.

**Table 4: Land use identification for 500 ha area, the Solar Park and Substation**

Land type	Total area ha	% of the total area
Paddy Field	115.89	23
Plantation (mango, cassava, cashew)	81.39	16
Scrubland	307.04	61
<b>TOTAL</b>	<b>504.32</b>	<b>100</b>

15. **Flora:** A rapid assessment of flora in the proposed solar park site conducted on 8th July 2018 identified 19 main species as shown in Table 5

**Table 5: List of trees recorded in proposed solar park site**

**Box 1:** Cambodian Tree Classification System (proclamation 089 dated on 14 February 2005, by Ministry of Agriculture Forestry and Fisheries [MAFF])

Cambodian Tree Classification System was made by french scientists. It falls into 4 different categories as follows :

**Luxurious trees :** Any tree that has very high quality and high and economic value. This kind of tree are mostly used as furniture. i.e. *Cassia Siamea*, Lam. , *Diospyros bejaudi*, Lec.

**Class 1 Tree:** Any tree that has high quality but less than those of luxurious ones. i.e. *Mesua ferrea*, L. , *Crudia chrysantha*, (Pierre) Schum.

**Class 2 Tree :** High quality trees but lower than Class 1 tree. i.e. *Toona febrifuga*, N.Roem, *Vatica astrotricha*, Dyer.

**Class 3 Tree :** Tree with low quality. i.e : *Cinnamomum litsaefolium*, Thw. , *Sarcocephalus cordatus*, Mig

There is another class of tree which is not listed in these 4 categories. Tree that has no category does not mean that it has no quality. It is just because the french scientists did not assess all kinds of trees in Cambodia and classify them.

.No	Diameter	Local Name	Scientific name		Other
			Spcies	Family	
Luxury					
1	10-15 CM	Beng / Afzelia	<i>Afzelia Xylocarpa,(Kurz)Craib</i>	Caesalpiniaceae	
2	5-10 CM	Haisan / Chansor	<i>Cassia garretiana, Craib</i>	Caesalpiniaceae	
3	5-10 CM	Krouel / Rengas / Machang	<i>Melanorrhea laccifera, Pierre</i>	Anacardiaceae	
4	5-10 CM	Thnong / Padauk	<i>Pterocarpus pedatus, Pierre</i>	Papilionaceae	
First class and Second class					
5	4-15 CM	Kakah/ Sepetir	<i>Sindora cochinchinensis, Baill.</i>	Caesalpiniaceae	
6	4-20 CM	Phchek / Meranti / Balau	<i>Shora obtuse, Woll.</i>	Dipterocarpaceae	
7	4-20 CM	Sokram / Pyinkado	<i>Xylia dolabriformis, Benth.</i>	Mimosaceae	
8	4-15 CM	Koki masau / Gaim / Merawan	<i>Hopea odorata, Roxb.</i>	Dipterocarpaceae	
9	4-15 CM	Popel Gaim / Merawan	<i>Shorea roxburgshii, G.Don.</i>	Dipterocarpaceae	
10	4-15 CM	Thbeng / Keruing	<i>Dipterocarpus obtusifolius, Teysm.</i>	Dipterocarpaceae	
11	4-15 CM	Khlong / Keruing	<i>Dipterocarpus tuberculatus, Roxb.</i>	Dipterocarpaceae	
Third class					
12	10-15 CM	Kdol	<i>Sarcocephalus cordatus, Mig</i>	Rubiaceae	
13	5-10 CM	Longeang	<i>Cratoxylon prunifolium, Dyer</i>	Hypericaceae	
14	5-10 CM	Pring / Kelat	<i>Eugenia spp.</i>	Myrtaceae	
15	3-5 CM	Kandaul	<i>Careya sphaerica, Pierre</i>	Moraceae	
16	5-10 CM	Svayprei /Machang	<i>Mangifera duoerreana, Pierre</i>	Anacardiaceae	
17	5-10 CM	Thlork	<i>Parinarium annamensis, Hance</i>	Rosaceae	
18	5-10 CM	Tramoung	<i>Garcinia olivari, Pierre</i>	Guttiferae	
19	5- 10 CM	Trameng / Poga	<i>Carallia lucidaç Roxb.</i>	Rhizophoraceae	

16. Findings suggest that out of 19 main species, 4 fall in Luxury class and the remaining between Class 1, 2 and 3 as per the Cambodian Tree Classification System.<sup>9</sup>

## GROUND SURVEY RESULTS.

### *DRY SEASON SURVEY (MARCH, 2018)*

17. The ground survey results are presented in Table 6 through 9.

- i. **Proposed Solar Park site.** At the proposed solar park site, a total of 78 species of birds were tallied and recorded. The total 78 bird species are of “Least Concern (LC)” category as per IUCN. Of the 78 bird species, 41 are migratory birds. Of the 41 migratory birds, 38 are local migrants including Javan Pond-Heron, Chinese Pond Heron, Eastern Cattle Egret, Little Egret, Intermediate Egret, Grey Heron, Little Heron, Paddyfield Pipit, Watercock, Black Kite, Common Barn Owl, Common Snipe, Scaly-breasted Munia, Brown Shrike, Dark-necked Tailorbird, Common Tailorbird, Scarlet-backed Flowerpecker, Eurasian Tree Sparrow, Asian Brown Flycatcher, Taiga Flycatcher, Little Green Bee-eater, Red-wattled Lapwing, Lesser Whistling Duck, Pied Bushchat, Rock Dove, Oriental Honey Buzzard, Rufous-winged Buzzard, Zebra Dove, Red Collared Dove, Spotted Dove, Common Myna, Black-shouldered Kite, Black Drongo, Bronzed Drongo, Greater Racket-tail Drongo, and Ashy Drongo. The 3 regional migrants are House Swift, Asian Palm Swift, and Barn Swallow (See Table 6).
- ii. **Alternative site.** A total of 49 bird species were recorded at the alternative site (initially referred to as Site 5). The 49 bird species are of “Least Concern (LC)” category as per IUCN. Of the 49 species, 25 are migratory birds whereas 5 are waterbirds and the rest are resident birds. Of the 25 migrants, 3 are regional migrants which are House Swift, Asian Palm Swift, and Barn Swallow. The other 22 local migrants include Chinese Pond Heron, Paddyfield Pipit, Black-collared Starling, Red-wattled Lapwing, Brown Shrike, Common Tailorbird, Eurasian Tree Sparrow, Asian Brown Flycatcher, Taiga Flycatcher, Little Green Bee-eater, Red-wattled Lapwing, Common Hoopoe, Sooty-headed Bulbul, Pied Bushchat, Rock Dove, Oriental Honey Buzzard, Zebra Dove, Spotted Dove, Oriental Magpie Robin, White-vented Myna, Common Myna, and Black-shouldered Kite. The 5 water birds are: Black-capped kingfisher, Pied Kingfisher, White-throated Kingfisher, Javan Pond-Heron, and Chinese Pond Heron (See Table 7).
- iii. **Transmission Line ROW.** A total of 59 bird species were tallied and recorded. The total of 59 are of “Least Concern” as per IUCN. Of the 59 bird species, 6 are water bird species, 22 are local migrants and 3 are regional migrants. The 6 waterbird species are: Pied Kingfisher, White-throated Kingfisher, Javan Pond-Heron, Chinese Pond Heron, Watercock, and Common Snipe. The 22 local migrants include: Chinese Pond Heron, Paddyfield Pipit, Watercock, Common Snipe, Black-collared Starling, Common Tailorbird, Eurasian Tree Sparrow, Asian Brown Flycatcher, Ashy Minivet,

<sup>9</sup> Proclamation 089 dated on 14 February 2005, by Ministry of Agriculture Forestry and Fisheries [MAFF])

Plaintive Cuckoo, Little Green Bee –eater, Red-wattled Lapwing, Racket-tailed Treepie, Yellow-vented Bulbul, Streak-eared Bulbul, Pied Bushchat, Oriental Honey Buzzard, Oriental Magpie Robin, Common Myna, Black-shouldered Kite, Black Drongo, and Ashy Drongo. The 3 regional migrants are: House Swift, Asian Palm Swift, and Barn Swallow. The rest are resident birds (See Table 8).

- iv. Across all sites, a of total seven species mammals were counted and recorded, 5 species are bats and 2 species of squirrels. All mammal species are of LC category of IUCN (see Table 9).

### WET SEASON SURVEY RESULTS (JULY, 2018)

18. The ground survey results are presented in Table 10 through 13.

- i. **Solar Park Site.** There were 24 bird species recorded in proposed solar park site, all of which are of “Least Concern” category as per IUCN. Of the 24 bird species, 14 species are migratory birds and 13 are waterbirds as follows: All the 14 migratory birds are local migrants, including Green-billed Malkoha, Watercock, Common Moorhen, Grey-headed Lapwing, Common Snipe, Black-shouldered Kite, Lesser Whistling-duck, Cotton Pygmy-goose, Spot-billed Duck, Little Cormorant, Little Egret, Yellow Bittern, Black Drongo, and Common Myna. The 13 waterbirds are: Lesser Whistling-duck, Cotton Pygmy-goose, Common Kingfisher, White-throated Kingfisher, White-breasted Waterhen, Watercock, Common Moorhen, Common Snipe, Grey-headed Lapwing, Little Cormorant, Little Egret, and Yellow Bittern (see Table 10).
- ii. **Transmission Line ROW.** There are 21 bird species recorded along the transmission line transect, all of which are of “Least Concern” category as per IUCN. Of the 21 bird species, 14 are local migratory bird species consisting of Cotton Pygmy-goose, Spot-billed Duck, Green-billed Malkoha, Spotted Dove, White-breasted Waterhen, Watercock, Common Moorhen, Common Snipe, Grey-headed Lapwing, Black-shouldered Kite, Little Egret, Yellow Bittern, Black Drongo, and Common Myna. 10 Waterbirds: Cotton Pygmy-goose, Spot-billed Duck, Common Kingfisher, White-throated Kingfisher, White-breasted Waterhen, Watercock, Common Moorhen, Common Snipe, Grey-headed Lapwing, and Little Egret (See Table 11).
- iii. **An Long Chrey reservoir.**<sup>14</sup> A total of 20 bird species were recorded at the reservoir, all of which are of “Least Concern” category as per IUCN. Of the total 20 bird species 15 are local migrants, including Lesser Whistling-duck, Cotton Pygmy-goose, Spot-billed Duck, Spotted Dove, Red Collared Dove, White-breasted Waterhen, Ruddy-breasted Crake, Watercock, Common Moorhen, Common Snipe, Black-winged Stilt, Grey-headed Lapwing, Little Cormorant, Little Egret, and Yellow Bittern. Waterbirds: Lesser Whistling-duck, Cotton Pygmy-goose, Spot-billed Duck, Common Kingfisher, White-throated Kingfisher, White-breasted Waterhen, Watercock, Common Moorhen, Common Snipe, Black-winged Stilt, Grey-headed Lapwing, Little Cormorant, Little Egret, and Yellow Bittern (See Table 12).
- iv. **Community Forestry.** There are a total of 14 bird species recorded at Tbeng Sroeng community forestry, all of which are of “Least Concern” category as per IUCN. Of the total 14 species, 8 are local migrants comprising Spot-billed Duck, Garganey, Green-billed Malkoha, Spotted Dove, Red Collared Dove, Black-shouldered Kite, Black Drongo, and Common Myna. Waterbirds: Spot-billed Duck and Garganey (See Table 13).

### COMPARISON OF RESULTS BETWEEN DRY AND WET SEASON SURVEYS

19. A total of 16 bird species were common between dry and wet season surveys. Table 14 and 15 illustrates the common species found both during the dry and wet season surveys at the proposed solar park site and at the transmission line transect.

**Table 14: Common Bird Species Recorded During both Dry and Wet Season. at The Proposed Solar Park Site**

N	English name	Scientific name	Cambodia status	IUCN	Status of Species
1	Lesser Whistling-duck	<i>Dendrocygna javanica</i>	CM	LC	Local Migratoion
2	Small Buttonquail	<i>Turnix sylvatica</i>	CM	LC	Resident
3	Indian Roller	<i>Coracias benghalensis</i>	CM	LC	Resident
4	Common Kingfisher	<i>Alcedo atthis</i>	CM	LC	Local Migration
5	White-throated Kingfisher	<i>Halcyon smyrnensis</i>	CM	LC	Local Migration
6	Greater Coucal	<i>Centropus sinensis</i>	CM	LC	Resident
7	Lesser Coucal	<i>Centropus bengalensis</i>	CM	LC	Resident
8	Spotted Dove	<i>Streptopelia chinensis</i>	CM	LC	Local Migration
9	White-breasted Waterhen	<i>Amaurornis phoenicurus</i>	CM	LC	Local Migration
10	Watercock	<i>Gallicrex cinerea</i>	CM	LC	Local Migration
11	Common Snipe	<i>Gallinago gallinago</i>	CM	LC	Local Migration

12	Black-shouldered Kite	<i>Elanus caeruleus</i>	CM	LC	Local Migration
13	Little Cormorant	<i>Phalacrocorax niger</i>	CM	LC	Local Migration
14	Little Egret	<i>Egretta garzetta</i>	CM	LC	Local Migration
15	Black Drongo	<i>Dicrurus macrocercus</i>	CM	LC	Local Migration
16	Common Myna	<i>Acridotheres tristis</i>	CM	LC	Local Migration

20. Of the 16 bird species, 12 species are local migrants and 4 species are resident birds. The local migrants can be from and to the An Long Chrey reservoir, community forest and proposed solar park site. Some species may utilise these areas for breeding / nesting. All birds are common bird species. Other 62 birds species surveyed during the dry season survey (March 2018) were not observed during the wet season survey in July 2018 (see Table 14)

**Table 15: Common Bird Species Recorded during Both Dry and Wet Season Surveys at The Proposed Transmission Line**

N	English name	Scientific name	Cambodia status	IUCN	Status of Species
1	Small Buttonquail	<i>Turnix sylvatica</i>	CM	LC	Resident
2	Indian Roller	<i>Coracias benghalensis</i>	CM	LC	Resident
3	Greater Coucal	<i>Centropus sinensis</i>	CM	LC	Resident
4	Lesser Coucal	<i>Centropus bengalensis</i>	CM	LC	Resident
5	Spotted Dove	<i>Streptopelia chinensis</i>	CM	LC	Local Migration
6	Watercock	<i>Gallicrex cinerea</i>	CM	LC	Local Migration
7	Black Drongo	<i>Dicrurus macrocercus</i>	CM	LC	Local Migration
8	Common Myna	<i>Acridotheres tristis</i>	CM	LC	Local Migration
9	Common Snipe	<i>Gallinago gallinago</i>	CM	LC	Local Migration

21. Of the 9 bird species, 5 species are local migrants and the rest are resident bird species. The local migrants can move from and to the Anlong Chreay reservoir, community forest and proposed solar park site. Some species may utilise these areas for breeding / nesting (see Table 15).

### **INTERVIEWS WITH LOCAL PEOPLE**

22. Focus Group Discussion (FGD) was held at Royeas village chief's house and four local persons from randomly selected households were interviewed with respect to their dependency on forest resources in the proposed site and nearby areas i.e. persons who usually went to forests to hunt wildlife and forage. Table 16 and 17 present a list of 7 mammal species and 6 reptile species recorded during the FGD.

**Table 16: Mammal Species recorded during Focus Group Discussion (july 2018)**

## CONSULTATIONS WITH LOCAL ENVIRONMENTAL NON-GOVERNMENTAL ORGANIZATIONS (NGOs)

23. Consultations with local environment NGOs engaged in conservation programs and projects in Cambodia were undertaken; these included: Conservation International (CI), Wildlife Conservation Society (WCS) and Bird Life International. The consultations were intended to gather information / data and achieve better understanding of the importance and ecological sensitivities within the project area of influence. The summary of main findings are as follows while details are presented in Table 18 below:

- The three NGOs do not have existing programs or suveryys in or around the project area of influence.
- The three NGOs do not have any upcoming activites in and around the project area of influence.
- No opinion on potential impacts of high voltage transmission lines or solar parks on birds and bats flypaths were offered

**Table 18: Detailed NGO Consultations**

Date: 27/03/ 2018	Consultation/Meeting Attendees	Environmental and Biodiversity Issues/Concerns	How issues raised, if any will be addressed under the Project
<p><b>Brief:</b></p> <p>The meetings started with a brief introduction of the proposed project; all project components were discussed including the solar park, solar PV plants, substation, transmission line and GS6. ## DISCUSSION

### Flora.

24. **Project Area of Influence.** There are 19 tree species including 4 luxurious tree species and 7 class one and class two tree species in the proposed solar park site, transmission line, and Tbeng Srorng community forest located approximately 5-7 km away from the proposed solar park site in Chhen Leung commune, Samki Meanchey district, Kampong Chhnang province. This shows the importance of these three areas, especially the Tbeng Srorng protected community forest where tree diameter range between 20-30 cm. Within 50x50 m<sup>2</sup> there are around 300 Shora obtuse, Woll. trees and around 100 Xylia dolabriformis, Benth. trees. Conversely, there are only few luxurious and class one tree species in proposed solar park site and nearby areas. Within 50x50 m<sup>2</sup> there are only around 5-10 class one and class two tree species whose diameter are from 4-8 cm. These tree species can also be found in the nearby areas which have already converted to agricultural farms such as bamboo farm, casava farm and rice paddy field.

25. Specifically luxurious tree species refer to those of high quality and of high economic value. The habitats of luxurious trees in the proposed solar park and transmission line have already been modified due to agricultural activities. These habitats are not more important than other tree species' habitats when it comes to ecological services for wildlife. The good habitats within the proposed solar site can be found along the natural streams that transect the solar park site. In short, there is no critical or natural habitats in the proposed solar park site and transmission line.

26. **Community Forests.** The Tbeng Srorng protected community forest (located approximately 5-7 km away from the proposed solar park site) has a mix of diverse tree species that are grown and /or regenerated. The habitats located within this community forest can be considered as new regenerating natural habitat. It is a good ecosystem for wildlife. There are two communities forests along the transmission line, one situated in ROUNG RUEUNG commune and the other in PRAMBEI MOM commune. These two community forests are located away from the transmission ROW by 6 to 8 km. It is unlikely that the forest ecology will be affected by the proposed project. However, there is a good forest habitat located around 200 m from the east of TL2 point as shown in Figure 3 covering roughly 10 hectares. The habitat type of this forest is dipterocarpaceae which can be home for wildlife. As per an interview with a passerby (lady), it was confirmed that the land is owned by multiple landowners, some of them are from Phnom Penh. Trees are actually well protected in that area. However, the lady further stated that these trees are sometimes cut by local owner if needed for household use.

27. Therefore, it is unambiguous that there is no critical or natural habitat within the proposed project area and area of project influence. The current habitats have already been modified. The important habitats within the proposed project are streams. Thus, it is necessary to conserve streams as its current status by naturally keeping 400 metres reserve both sides from streams since it is the good habitat for wildlife and at the same time it collects water from surrounding watershed before flowing into the downstream An Long Chrey reservoir.

### Fauna

**Protected Area.** Of the 49 Protected Areas in Cambodia, the closest is the Phnom Aural Wildlife Sanctuary located within 20 km from the proposed project site in Aural district of Kampong Speu

province. The sanctuary was designated as a National Protected Area (NPA) as per the Royal Decree on Protected Area, 1993. The NPA covers an area of 253,750 ha and contains a variety of landforms, elevations and geology and is considered as an important bird and biodiversity area. Tonle Sap Lake, a Protected Area is located northwest of the proposed project site at a distance of about 60 – 65 km. The Protected Area is not within the project area of influence and will not be impacted by the project.

28. Generally birds with their great mobility often exploit habitats, because of physical and practical behaviour reasonings, for breeding. Due to the current unfavourable condition of habitats at the proposed solar park site, transmission line, some part of Tbeng Srorng protected community forest and An Long Chrey reservoir as well as due to increased accessibility of humans into these areas, these areas cannot serve as a breeding ground for certain bird species such as Egret and Heron family, sJacana, Moorhen, Watercok, etc. These bird species prefer special breeding ground where there is mix of habitats including flooded forest, scrubland, grassland and open water, and especially where there is absolutely minimal human influence. In addition, some migratory bird species recorded in the proposed solar park site, along transmission line site, Tbeng Srorng protected community forest and Anlong Chrey reservoir including Ashy Drongo, Black Baza, Rufous Winged Buzzard, Ashy Minivet, etc. favour high forest habitat for breeding. According to Kelvin et al., (2012)<sup>15</sup>, it indicated that reproductive traits are important correlates of elevational specialisation in Southeast Asian tropical birds. Interestingly, breeding phenology is the only significant correlate of montane specialisation. The elevational specialists, may not have the opportunity to exploit more abundant resources that may occur across a wider altitudinal range. Studies have shown that avian breeding phenology is influenced by food resource availability (e.g., Yap et al., 2007)<sup>16</sup> and that strong seasonality in food resources occurs in tropical montane forests (Kimura et al., 2001)<sup>17</sup>. As there is anthropogenic influence within and around the proposed projet sites, montane birds will migrate to higher elevation for breeding where they can forage with more food availability. Therefore, the likelihood of migrant birds from the proposed project sites and nearby areas to Phnom Aural Wildlife Sanctuary and Tonle Sap lake is high according to their ecological behaviour and breeding traits.

### **Project Area of Influence**

29. An Long Chrey reservoir.<sup>18</sup> The reservoir is located downstream of the solar park site at a distance of about 4-5 km. Based on the geological condition and the habitat of the reservoir coupled with the increase elevation of stored water during rainy season, this site can attract some migrants bird species such as Lesser Whistling Duck, Cotton Pygmy Goose, Barn Swallow, Asian Palm Swift, House Swift, etc as winter visitors. These migrants have their own specific flyway that is included in East Asian – Australasian Flyway of migratory water birds.

30. Solar Park Site. When considering the habitats within the proposed solar park site and the wider surrounding area comprising of scrubland, agricultural farms, streams, and reservoir into account, these habitats are considered as modified. The most preferable habitats are the

<sup>15</sup> Correlates of Elevational Specialisation in Southeast Asian Tropical Birds. Retrieved from: <http://cdmbuntu.lib.utah.edu/utis/getfile/collection/uspace/id/6799/filename/6799.pdf>

<sup>17</sup> Kimura, K, T. Yumoto & K. Kikuzawa, 2001. Fruiting phenology of fleshy-fruited plants and seasonal dynamics of frugivorous birds in four vegetation zones on Mt. Kinabalu, Borneo. *Journal of Tropical Ecology*, 17: 833–858.

<sup>18</sup> This reservoir is constructed for a micro- hydro project (An Long Chrey) and managed by the Ministry of Water Resources and Meteorology (MOWRAM); it is at an approximate distance of 4 km from the solar park site.

two natural streams that may support species such as the wild pig, muntjack, Burmese hare and other rabbit species as well as birds.

31. **Transmission Line ROW.** Due to mix of habits along the proposed transmission line composing of paddy fields, grassland, scrubland and dipterocarpaceae forest, these habitats can be a stop off for migratory bird species such as Black Drongo, Common Myna, Common Snipe, etc.

32. **Comparison between Survey Results conducted during dry and wet season.** Dry season and wet season surveys tallied and recorded a total of 78 and 24 bird species, respectively at the proposed solar park site. All bird species were of “Least Concern” category as per IUCN. Only 16 bird species were common between dry and wet season surveys. The difference in number of species recorded during the two surveys is due to timeframe of surveys. The dry season survey was conducted in March, which is a prime time for bird migration at regional and local level while the wet season survey was conducted in July, which is when most of the bird species move away to their breeding or to other foraging grounds. In other words, this showcases the migration of the majority of bird species recorded. These migrants may have migrated to nearby area for feeding and breeding, Phnom Aural Wildlife NPA or the Tonle Sap Biosphere Reserve.

33. The wet season survey indicates that there is an ecological connection between stream habitats, reservoir, dipterocarpaceae forest and scrubland. The natural streams collect water from the upstream watershed and flows into the An Long Chrey reservoir located downstream of the solar park site. There may be wildlife migration from one habitat to another habitat over close distances; for instance, the migration of egret and heron species from stream to the reservoir, however such coverage is not anticipated for ground species due to interference in habitat by sustained human activity. The proposed solar park site serves as the feeding ground for Green Peafowl while the Dipterocarpaceae forest (in Tbeng Srong community forest) is the breeding ground for this species. In addition, the habitat of Dipterocarpaceae and scrubland is also favorable for local migration species such as the eagle.

34. **Community Forests.** Tbeng Srong community forest is a good habitat of Dipterocarpaceae forest and suitable for wildlife such as Green Peafowl, Red jungle fowl, Wild pig, etc. Most of red jungle fowl can breed within this habitat. This forest is located approximately 5 -7 km northeast of the proposed solar park site and will not be affected by the proposed project

35. **Local Interviews.**<sup>19</sup> The local interviews at Royeas village in Chaen Laeung commune suggested possible presence of endangered and vulnerable mammals and reptiles within Tbeng Srong community forest such as Dhole, Fishing Cat, Asiatic Jackal, and Burmese Python as seen by the villagers in the past 5 year. The interviews also pointed out the bird species diversity (species found typically in forested areas, wetlands and rural areas).

36. **Project Risks And Impacts On Migratory Flyways And Bat Collisions.** Cambodia is within the East Asia-Australasia migratory flyway (see Figure 4). However to date Cambodia has not yet designated a site as the flyway. Thus, arrivals and presence of migratory birds have

---

<sup>19</sup> The species identification task consisted of asking villagers whether they have ever seen or heard any voice of birds or mammals in their surroundings recently or during last five years (2013-2018). Pictures were provided for identification purposes vis. “A field Guide to the Birds of Cambodia (Tan and Poole, 2003)” and “Mammals of Cambodia (Men, Keo and Chak, 2000)”.

not been recorded nationwide. Birds typically migrate before and after the onset of winter; most start their migration from the northern hemisphere to escape the harsh winter conditions and fly towards the southern hemisphere where it is summer time. Some of these migrants will stay in the southern hemisphere to breed. The United Nations Environmental Program - Convention on Migratory Species (UNEP/CMS) Tenth Meeting Conference of the Parties (Bergen, 20-25 November 2011) adopted the UNEP/CMS/Resolution 10.11 on Power Lines and Migratory Birds<sup>20</sup>. According to Birdlife Europe (2011) ground-mounted solar panels pose medium-level risks to nature. It can lead to habitat loss and habitat fragmentation, causing behavioural change of animals, as well as the change to movement patterns, foraging and breeding. The effects on nature of power transmission lines are the same for solar plants as they can have adverse impacts on bird species including bird collisions and electrocution.

37. Operation of the solar park may potentially harm birds due to the “lake effect” created by large areas of PV panels. Such installation may attract birds that mistake the solar panels for a water body and the hot panels could kill or seriously injure birds, which attempt to land on them especially the young inexperienced ones. Conversely, wide transmission corridors for power lines have been known to increase biodiversity by opening up new habitats (Hernandez et al., 2014a). In addition, Katzner (2013) confirmed that the number of direct animal deaths at solar parks can be negligible. Only when all natural habitat in the vicinity of the site is cleared, vegetation stripped, and soil compacted can cause the worst effects. In some cases, fragmentation of habitats remains a problem with solar parks. However due to lack of moving parts and minimal ground disturbance, with careful management solar parks can be havens for wildlife (BRE Trust, n.d.). It was known that warm air above the panels attracts insects which in turn attract skylarks, swallows and house martins. Skylarks are able to nest between the panels and benefit from the reduced levels of human activity. Voles and mice will live underneath, attracting kestrels and owls.

38. In short, it can be concluded that there are pros and cons against the construction of solar park and transmission lines. However, the opportunity to turn solar park to biological benefits when taking into consideration the conservation importance is very high when properly designed and implemented. It is also the same when it comes to transmission corridors for power lines which can help increase biodiversity by opening up new habitats.

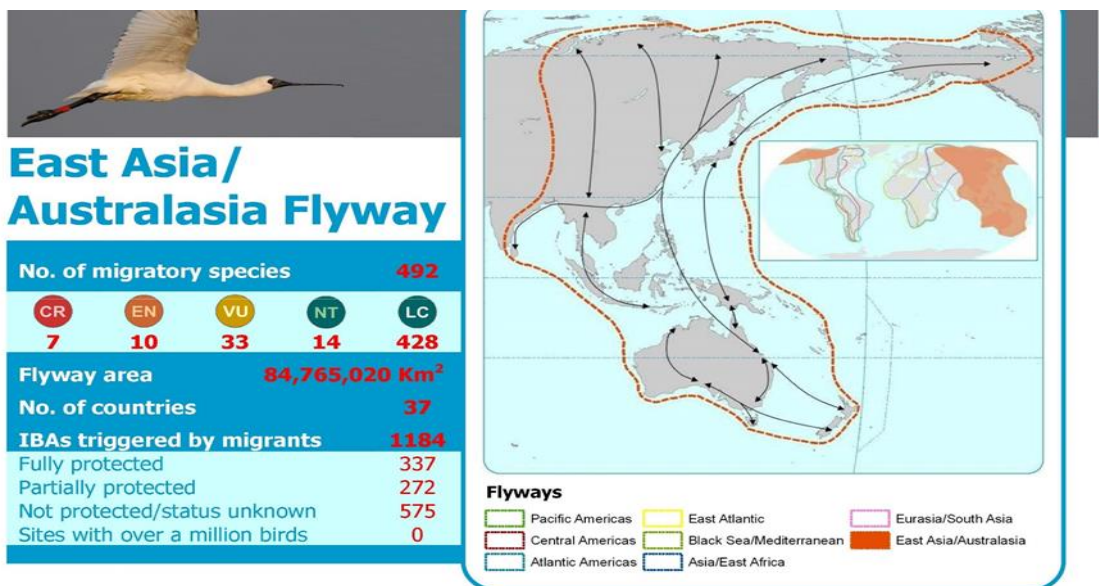

39. To get benefits to biodiversity from solar park, the following mechanisms should be implemented:

- Solar farms should be seeded with grass mixes including a minimum of several species of grass including wild flowers. This initial seeding provided equal or greater botanical diversity than the site's arable or pasture origins (Figure 5). Some flowers can reflect light to solar panels.
- Solar park should be managed through conservation grazing. Sheep grazing is known to be a good mechanism for grassland diversification where sheep are at lower stocking densities, and especially where grazing is stopped during the flowering season.
- Hedgerows trees bordering the proposed solar park, but making sure that trees will not overshadow solar panels.
- Construct bird boxes/hibernacula in which a creature seeks refuge
- Use the approach of design with nature as shown in Figure 5 and 6

---

<sup>20</sup> Power Line and Migratory Birds adopted by the Conference of the Parties at the 10<sup>th</sup> Meeting retrieved from: [https://www.cms.int/sites/default/files/document/ETF1\\_Inf.4.pdf](https://www.cms.int/sites/default/files/document/ETF1_Inf.4.pdf)

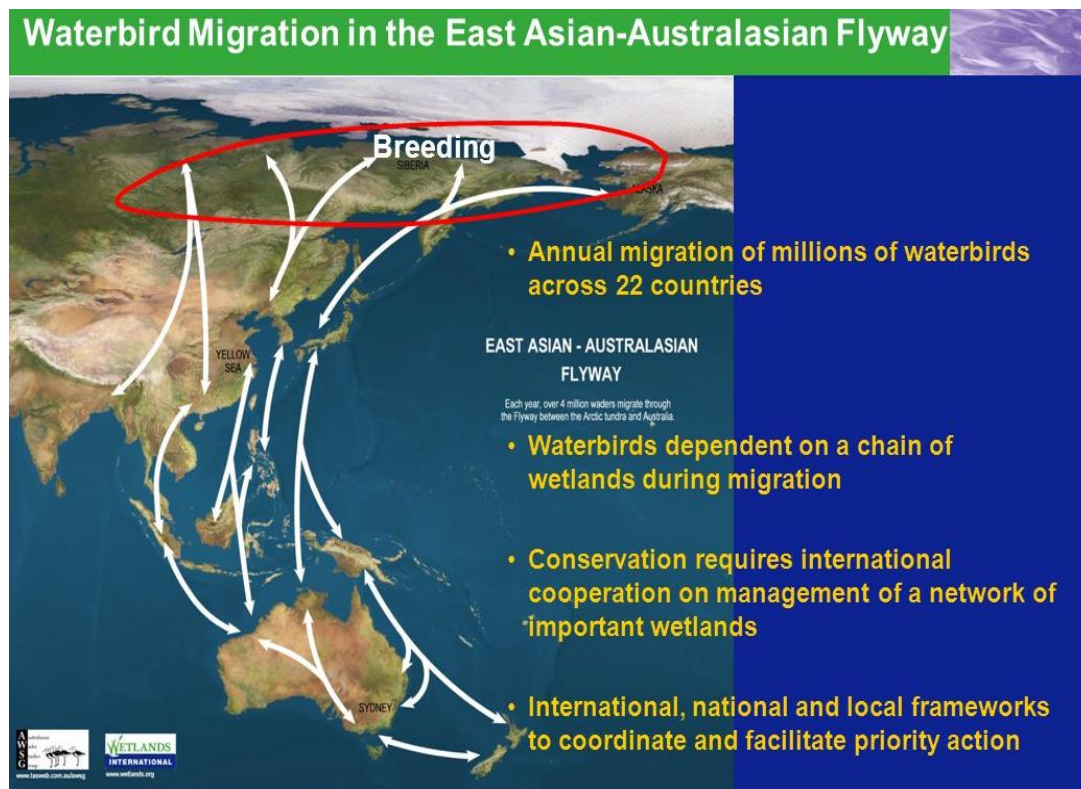

Migration remains one of the most compelling aspects of the avian world. Twice a year, billions of birds migrate vast distances across the globe. Typically, these journeys follow a predominantly north-south axis, linking breeding grounds in arctic and temperate regions with non-breeding sites in temperate and tropical areas. Many species migrate along broadly similar, well-established routes known as flyways. Recent research has identified eight such pathways: the East Atlantic, the Mediterranean/Black Sea, the East Asia/East Africa, the Central Asia, the East Asia/Australasia, and three flyways in the Americas and the Neotropics.

The **East Asia/Australasia Flyway** extends from Arctic Russia and North America to the southern limits of Australia and New Zealand. It encompasses large parts of East Asia, all of Southeast Asia and includes eastern India and the Andaman and Nicobar Islands. The scale of avian movement along the flyway is awesome, with over 50 million migratory waterbirds, including 8 million waders, using the route annually. Flyway population estimates for migratory waders include 2.88 million Oriental Pratincole *Glareola maldivarum* and up to one million Marsh Sandpiper *Tringa stagnatilis*.

**Figure 4: The East Asia-Australasia Flyways of Migratory Birds**

**Figure 5: Grassland management in solar park**

**Figure 6: The approach of design with nature for solar park**

40. According to habitat observation, the Anlong Chrey reservoir and the nearby area can also accommodate migrant birds, namely Barn Swallow, Asian Palm Swift, House swift, etc. as winter visitors. These migrants have their own specific flyway which is included in East Asian – Australasian Flyway of migratory water birds. In fact, solar park does not disturb the flyway of migratory birds; solar panel is of course designed to absorb sunlight not to reflect it which does not affect bird species.

41. According to earlier literature review, solar park is considered to be beneficial for biodiversity if properly designed and managed. It can also provoke adverse environmental impacts if natural habitat is cleared, vegetation stripped, and soil compacted.

42. Transmission on the other hand can pose serious environmental concern to bird species as they can collide and encounter electrocution. Wide transmission corridors for power lines are known to increase biodiversity by opening up new habitats (Hernandez et al., 2014a). Transmission line that is designed with lattice-steel self-supported-type towers supporting a three-phase vertical conductor configuration as shown in Figure 7 to minimize the width of the line corridor can also help protect birds from electrocution.

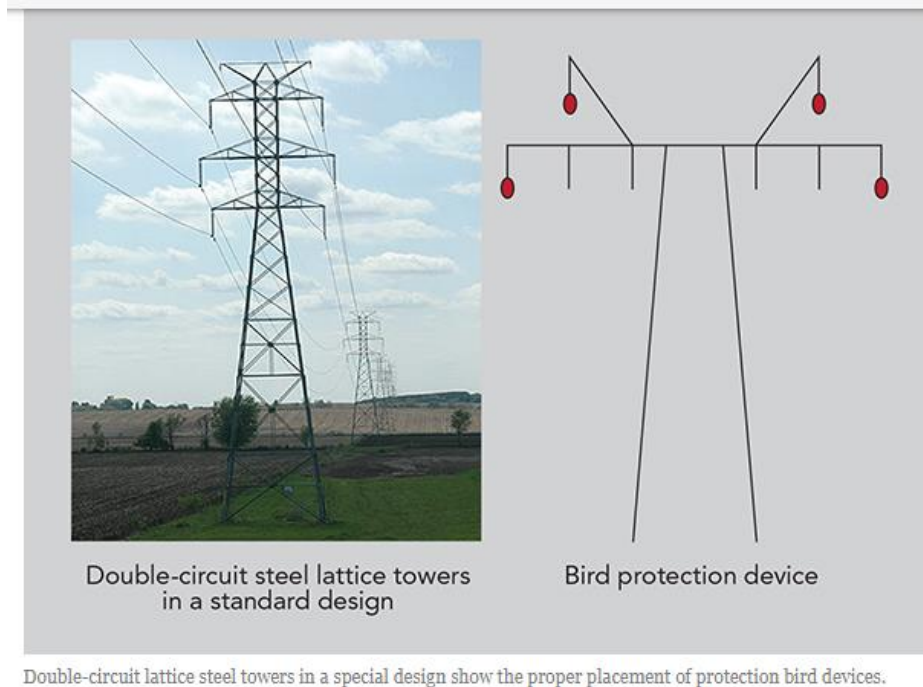

Figure 7 : Transmission line tower in a standard design

43. Bird flight diverter fittings are a sensible and effective contribution to the protection of wild birds, since overhead transmission lines equipped with such devices substantially minimize the hazard caused by these lines. Markers on the ground wires and conductors enable large birds to see the line at a distance and take early action to avoid it. Bird flight diverters are available from numerous clamp and fitting manufacturers, offering the opportunity for competitive product marketing<sup>21</sup>. Figure 8 displays different kinds of birdflight diverter.

<sup>21</sup> <http://www.tdworld.com/overhead-transmission/transmission-line-design-enhances-bird-protection>

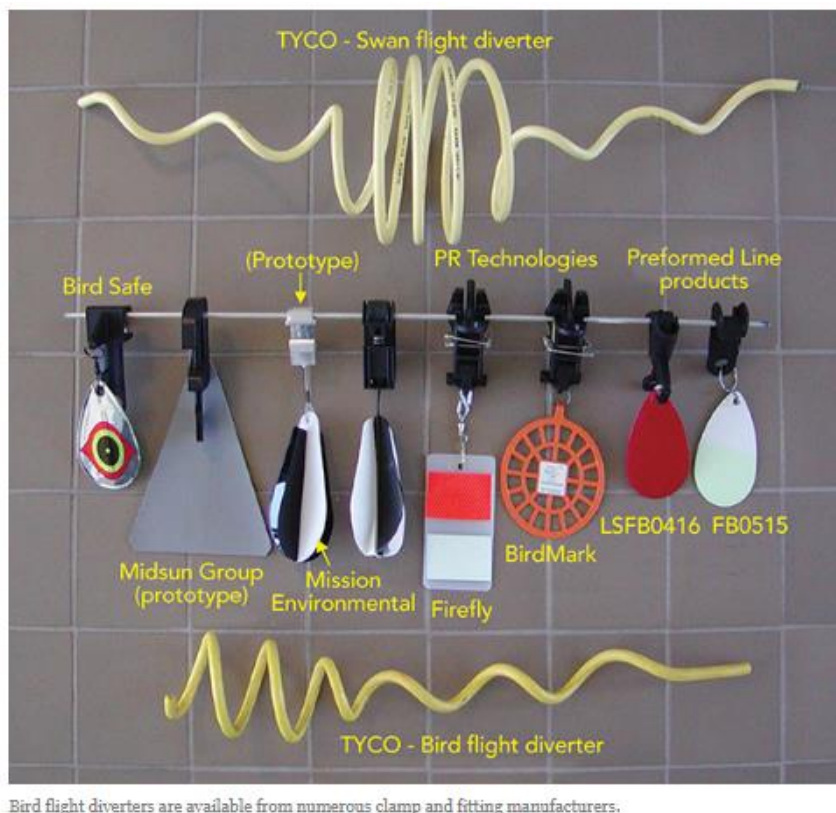

Figure 8: Birdflight diverter devices

## Conclusions and recommendations

44. The habitats in proposed solar park site and transmission line are modified habitats which are still in fairly good conditions at some areas, especially those close to streams. There is no critical or natural habitat was found even the area of proposed project influence.

45. The earlier survey in March highlighted large numbers of bird species a total of at least 78 which are of “Least Concern” as per IUCN. In contrast, the latter survey conducted in July emphasized around 1/3 of bird species recorded during the March survey. This showcases the migration of the majority of bird species recorded. Those migrants might have migrated to nearby area for feeding and breeding, Phnom Aural Wildlife Sanctuary and Tonle Sap Biosphere Reserve as such. Endangered and vulnerable mammals and reptiles were recorded during household interviews with those who frequently went into the forest. However, these mammals and reptiles were found in Tbeng Sroeng protected community forest in Chhlean Leung commune located northeast of the proposed site around 5 – 7 km. The other two community forestries of Rong Reung and Prambei Mom communes are further away from transmission lines ROW up to 7-8km.

46. Stream habitats can play important role for certain wildlife species. In case, the project is approved streams located nearby and on the edge of the proposed site should be maintained as pristine condition with the reserve of 100 meters of both sides of streams.

47. Solar parks and transmission corridor can be beneficial to biodiversity if properly designed and managed. Literature reviews have shown that solar park can offer protection to rare species of birds, animals, plants and to foster biodiversity.

48. In short, the project should be permitted to be in place. However, a further study is vital to be conducted, especially on regional seasonally migratory birds/bird survey. The best timeframe to carry out this work should be from November 2018 to March 2019.

49. When it comes to proper design and management of solar park and transmission line, recommendations should be as follows:

- Solar farms should be re-seeded with grass mixes including a minimum of several species of grass including wild flowers after completion of civil works
- Solar park should be managed through conservation grazing of local species
- Hedgerows and field margins bordering the proposed solar park should be maintained
- Construct bird boxes/hibernacula in which a creature may seek refuge
- Use the approach of design with nature
- Provide and maintain visual deterrents and flight diverters
- Implement Standard Operating Procedures (SOPs) for searching for and assessing, monitoring and record keeping of carcass searches including taxonomic composition of bird/ bat fatalities
- Avoidance of on-site or off-site waste disposal areas
- Implement plan for season specific risks (based on the results of the seasonal survey)
- Use raptor safe design for transmission towers to minimize electrocution risks
- Retrofitting existing transmission interconnection system by installing elevated perches, insulating jumper loops, placing obstructive perch deterrents (e.g. insulated "V's"), changing the location of conductors
- Installing visibility enhancement objects such as marker balls, bird deterrents, or diverters

## Terms of Reference: Seasonal Bird and Bat Surveys

Name : Bird and Mammal Expert  
Position : Avifaunal and Wildlife Expert  
Project Name : Cambodia National Solar Park Project for Energy Access  
Location : Kampong Chhnang and Kampong Speu provinces  
Time period : November – April, 2018

-----

### INTRODUCTION

1. The National Solar Park Project for Energy Access will support Electricité du Cambodge (EDC) to construct a 100 megawatt (MW) capacity solar park and a transmission interconnection system to the Phnom Penh demand center to supply power to the national grid.<sup>1</sup> The project will also assist EDC to design and conduct a competitive tender for procuring Solar Photovoltaic (PV) power plants (“solar PV plant”) within the solar park. The solar PV plants will be tendered to Independent Power Producers (IPPs) in two phases. Phase I will be for 50 MW capacity solar PV plant and Phase II will procure the remaining capacity. The solar park and the transmission interconnection infrastructure will be located in Kampong Chhnang and Kampong Speu provinces.

2. Of the 49 Protected Areas in Cambodia, the closest to the proposed solar park site is the Phnom Aural Wildlife Sanctuary located at a distance of 20 km from the proposed project site in Aural district of Kampong Speu province. The sanctuary was designated as a National Protected Area (NPA) as per the Royal Decree on Protected Area, 1993. The NPA covers an area of 253,750 ha and contains a variety of landforms, elevations and geology and is considered as an important bird and biodiversity area. Tonle Sap Lake, a Protected Area is located northwest of the proposed project site at a distance of about 60 – 65 km. There are three community forests within the project-affected communes and one reservoir located at a distance of about 4-5 km from the solar park site. Table 1 provides the summary of environmental sensitive receptors information for the project.

### OBJECTIVE

3. Whilst the Protected Areas are not within the project area of influence and community forests are not anticipated to be affected by the project, there may be movement of species between and within these areas. A bat and bird survey was undertaken during project preparation in the dry season. A further survey is proposed during the wet season to assess if there are bird flyways traversing the project area of influence. The results of the surveys will inform the detailed design. Map 1 presents the project area of influence.

### TASKS

4. The expert will carry out the following tasks:

---

<sup>1</sup> The project is included in ADB. 2017. *Country Operations Business Plan: Cambodia, 2018–2020*. Manila.

- Review and analysis of existing literature and data regarding species biodiversity in the project area of influence and bats/birds species using formal protected areas, wetlands and Important Bird Areas (IBAs);
- Conduct ground surveys to assess and confirm the presence, species diversity and abundance, habitat preferences and flyways of priority species (Priority species will include nationally and/or globally threatened, rare, endemic, or range-restricted bird species, migratory species, or large numbers of other bird species and bats)
- Identify information gaps, if any for the area in question as well as the sensitivity of the area and the species likely to be present
- Assess the significance of the likely impacts of the proposed project on birds, bats and flyways
- Identify alternative locations or layouts for the proposed project, if needed and recommend other mitigation measures that would help reduce the significance of negative impacts on species
- Collate information – findings and results including accurate migratory locations, time-periods, flyways, altitudes, breeding / nesting grounds; sound recordings; digital distribution/flyway maps and recommendations in a report.

## METHODOLOGY

5. **BIRD SURVEY.** A bird survey event will be conducted between November – April, 2018 and will be one-week long. Survey will include surveying multiple locations and transects within the project area of influence. This will involve:

- Visual and aural (song) recording of birds
- Opportunistic netting for fitting transmitters
- (Digital) photographic documentation of birds netted or collected, and if possible of some of the birds observed
- Recording altitude of bird flights
- Interviews with local villagers to obtain information on bird occurrence in the area

6. Satellite transmitter will be fitted on regional seasonal migratory birds whereas radio transmitter will be fitted on local migratory/non-migratory and ground nesting / breeding birds to monitor flyways and bird movement.

7. Three different species of ten birds each will be netted using a fish net; three species identified for netting are:

- Regional seasonal migratory birds such as Common Greenshank (*Tringa nebularia*)
- Local migratory/non-migratory birds such as Green peafowl (*Pavo muticus*)
- Ground Nesting / Breeding birds as such Red jungle fowl (*Gallus gallus*)

8. Species will be re-released in their natural habitat. Species fitted with satellite transmitters will be observed daily using a computer over duration of 5 months while species fitted with radio transmitters will be observed on site within 3 kilometres distance over duration of 2 months.

9. **BAT SURVEY.** Static bat detectors will be installed at crevasses and along multiple locations and transects as deemed suitable within the project area of influence. Microphones will be set approximately 50m from the nearest crevasse or bat roosting site at a height of

approximately 3m. These will be left recording for around 10 nights and the data will be subsequently analyzed using appropriate software. The methodology will assess the number of bat species at each location and the number of passes per night, giving an indication of activity levels.

## RESOURCE AND BUDGET

10. Three persons will be required to work on the tasks including one expert and two assistants. The resources and budget are as follows:

No.	Description	Unit	No	Months	Approx. Cost (USD)	Total Cost (USD)
1	Salary	Expert	1 person	5	1,500	7,500
		Assistants	2 persons	2	600	2,400
	Equipment	Battery Satellite transmitter	5	-	2,000	10,000
		Radio transmitter	5	-	1,000	5,000
		Static bat detector	5	-	1,000	5,000
3	Travel	1 pick up truck		7 days	150	1,050
4	Accommodation	House rental		7 days	300	2,400
<b>Total Estimated Costs</b>						<b>33,350</b>

## SUMMARY OF SENSITIVE RECEPTORS IN THE PROJECT AREA OF INFLUENCE

Table 1 – Summary of Environmentally Sensitive Receptors in the Project Area of Influence

Province / District	Project Component	Communes Affected	Surface Water Receptors	Land Cover/ Ecological Receptors	Protected Area
Kampong Chhnang Province / Districts: Tuek Phos and Sameakki Mean Chey	Solar Park And Transmission Interconnection System	Total No. 2 Kbal Tuek Chean Laeung	Two natural streams transecting across the length of the proposed solar park site with inflow coming from Upper Catchment Aural and feeding into “An Long Chrey” reservoir located downstream at a distance of approximately 4-5 km	Scrubland (293 ha) and paddy fields (116 ha); small plantations such as cassava, mango, cashew, eucalyptus and bamboo are also present	None in close proximity to the proposed site;  Phnom Aural National Protected Area located at least 20 km of site  300 ha  Community forest in Chean Laeung located 7 Km from proposed solar park in the northeast direction.
Kampong Speu Province / Districts: Thpong and Odongk	Transmission Line ROW (approx. length 37-40 km) <sup>2</sup>	Total No. 6  Prambei Mum  Rung Roeang  Mean Chey  Chan Saen	Average distance from the ROW midline:  2 fish ponds at 50 m  18 natural ponds at 100 m  2 canals between 85-130 m  1 natural stream in Mean Chey at 95 m	Paddy fields (711 ha), scrubland (213 ha) and degraded land (147); fruit tree orchard (54 ha) and non-fruit tree orchard (41 ha); vacant grassland (16.3 ha); development land (18 ha)	Community forests located 6-7 km from the proposed transmission line:  - 70 ha in Rung Roeang Commune and  800 ha in Prambei Mum <sup>4</sup>

<sup>2</sup> For the transmission line, key receptors were identified within an estimated 400 m width (or 200 m) on each side of the midline for a 15 m wide ROW for a total length of 33-34 km.

<sup>4</sup> Chong K'rark community forest

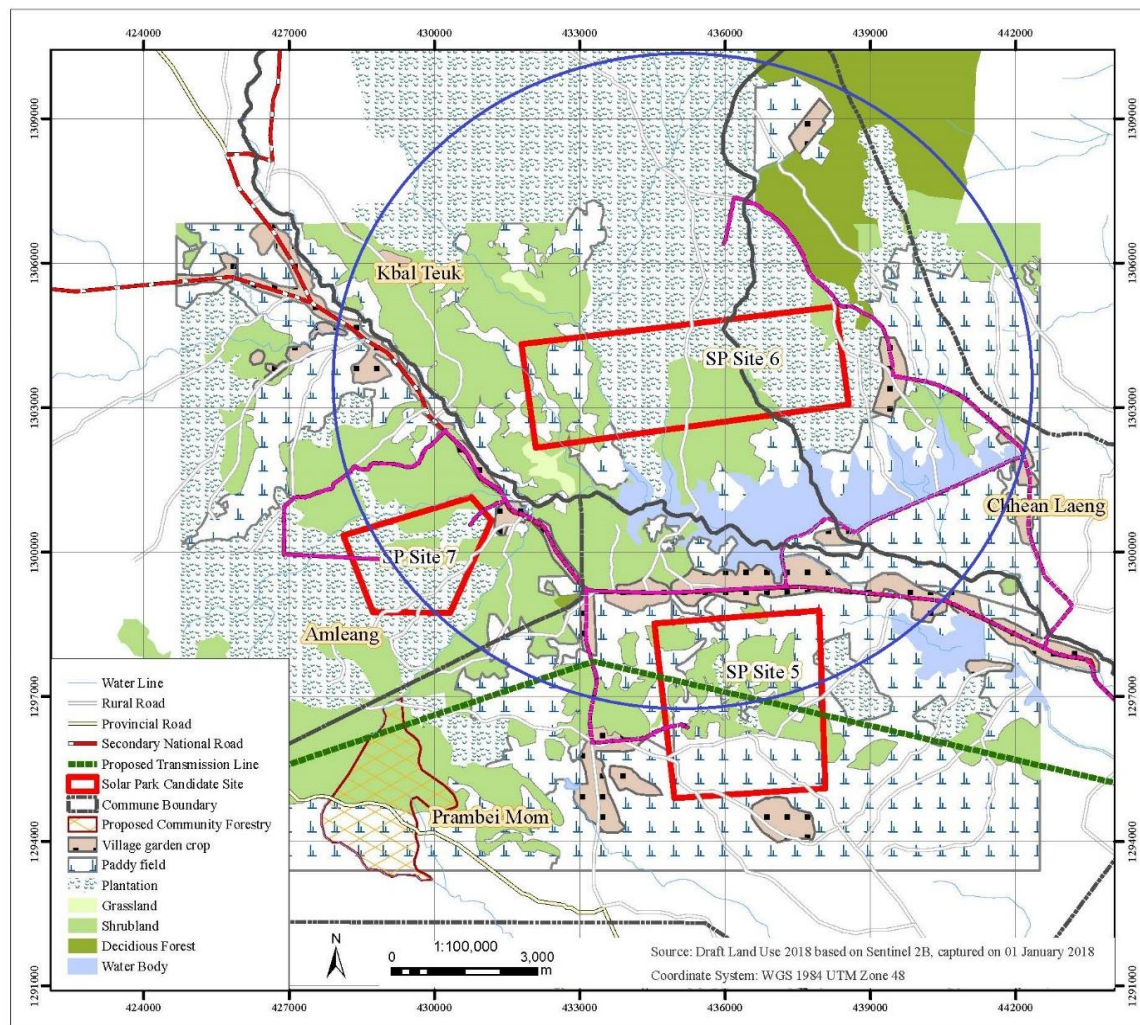

Province / District	Project Component	Communes Affected	Surface Water Receptors	Land Cover/ Ecological Receptors	Protected Area
		Trach Tong Khsem Khsant	Water canal crossing in Mean Chey Chan Saen, Trach Tong and Prambei Mum	256 trees estimated to be cut at transmission tower footings (including 100 mango trees) while over 8500 trees to be affected by the ROW. <sup>3</sup>	
	Grid Substation GS6		None	Upgrade within existing substation boundary	None

<sup>3</sup> Trees - sugar palm, mango, banana, eucalyptus, bamboo etc. Source: draft LARP, July 2018.

## PROJECT AREA OF INFLUENCE MAP

Map 1

**Proximity report generated by the  
Integrated Biodiversity Assessment Tool**

Site name	Site 6
Latitude/Longitude	11° 49' 25" North, 104° 25' 11" East
Date generated	15th June 2017
Generated by	asiandb
Company	ADB

## About this report

This report presents the results of a proximity analysis to identify the biodiversity features and species which are located within 1 km, 10 km and 20 km.

## Data used to generate this report

IUCN and UNEP-WCMC, 2017. *The World Database on Protected Areas (WDPA) [On-line], January 2017.*

BirdLife International (on behalf of the KBA Partnership), 2016. *Key Biodiversity Areas: December 2016 version.*

IUCN, 2016. *The IUCN Red List of Threatened Species grid analysis of range maps. Version 2016.3 (December).*

## Limitations

This report provides an indication of the potential biodiversity-related features - protected areas, key biodiversity areas and species - close to the specified location. It provides an early indication of potential biodiversity concerns, and can provide valuable guidance in making decisions. For example, this information can be helpful when assessing the potential environmental risk and impact of a site, categorising investments/projects, preparing the terms of reference for an impact assessment, focusing attention on key species of conservation concern and sites of known conservation value, and reviewing the results of an impact assessment.

The report does not provide details of potential indirect, downstream or cumulative impacts. Furthermore, the report should be regarded as a “ first-step”, providing a set of conservation values sourced from global data sets, and is not a substitute for further investigation and due diligence, especially concerning national and/or local conservation priorities.

For ultimate accuracy, distance calculations are performed by reprojecting the spatial data (as shown through the map viewer) to an equal distance projection, and so may not match precisely the results shown on the map.

## Protected Areas and Key Biodiversity Areas

The following sites are found within the selected buffer distances:

### Features within 1 km

There are no features within 1 km.

### Features within 10 km

There are no features within 10 km.

### Features within 20 km

National-level protected areas		
IUCN Category III-IV	Phnom Aural	2,562 ha
Priority Sites for Biodiversity		
Key Biodiversity Area	Phnom Aural CR/EN, VU, endemic, other	50,085 ha

## IUCN RED LIST OF THREATENED SPECIES

Given suitable habitat, the following species are potentially found close to the area of interest:

Taxonomic group	Scientific Name	Common Name	IUCN Red List category
Amphibians	<i>Chiromantis nongkhorensis</i>		LC
Amphibians	<i>Duttaphrynus melanostictus</i>	Black-spectacled Toad	LC
Amphibians	<i>Feihyla vittata</i>	Striped Asian Treefrog	LC
Amphibians	<i>Fejervarya limnocharis</i>	Asian Grass Frog	LC
Amphibians	<i>Glyphoglossus guttulatus</i>	Burmese Squat Frog	LC
Amphibians	<i>Hoplobatrachus rugulosus</i>	East Asian Bullfrog	LC
Amphibians	<i>Hylarana erythraea</i>	Common Green Frog	LC
Amphibians	<i>Hylarana macrodactyla</i>		LC
Amphibians	<i>Hylarana taipehensis</i>		LC
Amphibians	<i>Ichthyophis kohtaoensis</i>	Koa Tao Island Caecilian	LC
Amphibians	<i>Ingerophrynus macrotis</i>		LC
Amphibians	<i>Kalophrynus interlineatus</i>		LC
Amphibians	<i>Kaloula pulchra</i>	Malaysian Narrowmouth Toad	LC
Amphibians	<i>Limnonectes gyldenstolpei</i>	Gyldenstolpe's Frog	LC
Amphibians	<i>Microhyla berdmorei</i>	Berdmore's Narrow-mouthed Frog	LC
Amphibians	<i>Microhyla butleri</i>	Tubercled Pygmy Frog	LC
Amphibians	<i>Microhyla fissipes</i>		LC
Amphibians	<i>Microhyla heymonsi</i>	Arcuate-spotted Pygmy Frog	LC
Amphibians	<i>Microhyla pulchra</i>	Beautiful Pygmy Frog	LC
Amphibians	<i>Micryletta inornata</i>	Deli Paddy Frog	LC
Amphibians	<i>Occidozyga lima</i>	Pointed-tongued Floating Frog	LC
Amphibians	<i>Occidozyga martensii</i>	Round-tongued Floating Frog	LC
Amphibians	<i>Polypedates leucomystax</i>	White-lipped Tree Frog	LC
Amphibians	<i>Sylvirana mortenseni</i>		NT
Amphibians	<i>Sylvirana nigrovittata</i>		LC
Amphibians	<i>Theloderma stellatum</i>		LC
Birds	<i>Accipiter badius</i>	Shikra	LC
Birds	<i>Accipiter gularis</i>	Japanese Sparrowhawk	LC
Birds	<i>Accipiter trivirgatus</i>	Crested Goshawk	LC
Birds	<i>Acridotheres grandis</i>	Great Myna	LC
Birds	<i>Acridotheres leucocephalus</i>	Vinous-breasted Myna	LC
Birds	<i>Acridotheres tristis</i>	Common Myna	LC
Birds	<i>Acrocephalus arundinaceus</i>	Great Reed-warbler	LC
Birds	<i>Acrocephalus bistrigiceps</i>	Black-browed Reed-warbler	LC
Birds	<i>Acrocephalus orientalis</i>	Oriental Reed-warbler	LC
Birds	<i>Acrocephalus tangorum</i>	White-browed Reed-warbler	VU
Birds	<i>Actitis hypoleucos</i>	Common Sandpiper	LC

Birds	<i>Aegithina lafresnayei</i>	Great lora	LC
Birds	<i>Aegithina tiphia</i>	Common lora	LC
Birds	<i>Aethopyga saturata</i>	Black-throated Sunbird	LC
Birds	<i>Aethopyga siparaja</i>	Crimson Sunbird	LC
Birds	<i>Agropsar sturninus</i>	Purple-backed Starling	LC
Birds	<i>Alauda gulgula</i>	Oriental Skylark	LC
Birds	<i>Alcedo atthis</i>	Common Kingfisher	LC
Birds	<i>Alcedo meninting</i>	Blue-eared Kingfisher	LC
Birds	<i>Alophoixus ochraceus</i>	Ochraceous Bulbul	LC
Birds	<i>Alophoixus pallidus</i>	Puff-throated Bulbul	LC
Birds	<i>Amandava amandava</i>	Red Avadavat	LC
Birds	<i>Amaurornis cinerea</i>	White-browed Crane	LC
Birds	<i>Amaurornis phoenicurus</i>	White-breasted Waterhen	LC
Birds	<i>Ampeliceps coronatus</i>	Golden-crested Myna	LC
Birds	<i>Anas crecca</i>	Common Teal	LC
Birds	<i>Anas poecilorhyncha</i>	Indian Spot-billed Duck	LC
Birds	<i>Anastomus oscitans</i>	Asian Openbill	LC
Birds	<i>Anhinga melanogaster</i>	Oriental Darter	NT
Birds	<i>Anthracoceros albirostris</i>	Oriental Pied Hornbill	LC
Birds	<i>Anthreptes malacensis</i>	Brown-throated Sunbird	LC
Birds	<i>Anthus cervinus</i>	Red-throated Pipit	LC
Birds	<i>Anthus hodgsoni</i>	Olive-backed Pipit	LC
Birds	<i>Anthus richardi</i>	Richard's Pipit	LC
Birds	<i>Anthus rufulus</i>	Paddyfield Pipit	LC
Birds	<i>Apus nipalensis</i>	House Swift	LC
Birds	<i>Arachnothera longirostra</i>	Little Spiderhunter	LC
Birds	<i>Arborophila chloropus</i>	Green-legged Partridge	LC
Birds	<i>Ardea alba</i>	Great White Egret	LC
Birds	<i>Ardea cinerea</i>	Grey Heron	LC
Birds	<i>Ardea intermedia</i>	Intermediate Egret	LC
Birds	<i>Ardea purpurea</i>	Purple Heron	LC
Birds	<i>Ardeola bacchus</i>	Chinese Pond-heron	LC
Birds	<i>Ardeola speciosa</i>	Javan Pond-heron	LC
Birds	<i>Arenaria interpres</i>	Ruddy Turnstone	LC
Birds	<i>Artamus fuscus</i>	Ashy Woodswallow	LC
Birds	<i>Arundinax aedon</i>	Thick-billed Warbler	LC
Birds	<i>Athene brama</i>	Spotted Owlet	LC
Birds	<i>Aviceda jerdoni</i>	Jerdon's Baza	LC
Birds	<i>Aviceda leuphotes</i>	Black Baza	LC
Birds	<i>Brachypodius atriceps</i>	Black-headed Bulbul	LC

Birds	<i>Bubo nipalensis</i>	Spot-bellied Eagle-owl	LC
Birds	<i>Bubulcus ibis</i>	Cattle Egret	LC
Birds	<i>Buceros bicornis</i>	Great Hornbill	NT
Birds	<i>Burhinus indicus</i>	Indian Thick-knee	LC
Birds	<i>Butastur indicus</i>	Grey-faced Buzzard	LC
Birds	<i>Butastur liventer</i>	Rufous-winged Buzzard	LC
Birds	<i>Buteo japonicus</i>	Japanese Buzzard	LC
Birds	<i>Butorides striata</i>	Green-backed Heron	LC
Birds	<i>Cacomantis merulinus</i>	Plaintive Cuckoo	LC
Birds	<i>Cacomantis sonneratii</i>	Banded Bay Cuckoo	LC
Birds	<i>Calidris alba</i>	Sanderling	LC
Birds	<i>Calidris pugnax</i>	Ruff	LC
Birds	<i>Calidris ruficollis</i>	Red-necked Stint	NT
Birds	<i>Calidris temminckii</i>	Temminck's Stint	LC
Birds	<i>Calliope calliope</i>	Siberian Rubythroat	LC
Birds	<i>Caprimulgus asiaticus</i>	Indian Nightjar	LC
Birds	<i>Caprimulgus jotaka</i>	Grey Nightjar	LC
Birds	<i>Caprimulgus macrurus</i>	Large-tailed Nightjar	LC
Birds	<i>Carpococcyx renauldi</i>	Coral-billed Ground-cuckoo	LC
Birds	<i>Cecropis daurica</i>	Red-rumped Swallow	LC
Birds	<i>Centropus bengalensis</i>	Lesser Coucal	LC
Birds	<i>Centropus sinensis</i>	Greater Coucal	LC
Birds	<i>Ceryle rudis</i>	Pied Kingfisher	LC
Birds	<i>Ceyx erithaca</i>	Oriental Dwarf-kingfisher	LC
Birds	<i>Chalcoparia singalensis</i>	Ruby-cheeked Sunbird	LC
Birds	<i>Chalcophaps indica</i>	Grey-capped Emerald Dove	LC
Birds	<i>Charadrius alexandrinus</i>	Kentish Plover	LC
Birds	<i>Charadrius dealbatus</i>	White-faced Plover	DD
Birds	<i>Charadrius dubius</i>	Little Ringed Plover	LC
Birds	<i>Charadrius mongolus</i>	Lesser Sandplover	LC
Birds	<i>Charadrius peronii</i>	Malay Plover	NT
Birds	<i>Chlidonias hybrida</i>	Whiskered Tern	LC
Birds	<i>Chloropsis aurifrons</i>	Golden-fronted Leafbird	LC
Birds	<i>Chloropsis moluccensis</i>	Blue-winged Leafbird	LC
Birds	<i>Chrysococcyx xanthorhynchus</i>	Violet Cuckoo	LC
Birds	<i>Chrysocolaptes guttacristatus</i>	Greater Flameback	LC
Birds	<i>Chrysophlegma flavinucha</i>	Greater Yellownape	LC
Birds	<i>Ciconia episcopus</i>	Asian Woollyneck	VU
Birds	<i>Cinnyris asiaticus</i>	Purple Sunbird	LC
Birds	<i>Cinnyris jugularis</i>	Olive-backed Sunbird	LC

Birds	<i>Circus melanoleucos</i>	Pied Harrier	LC
Birds	<i>Circus spilonotus</i>	Eastern Marsh-harrier	LC
Birds	<i>Cissa hypoleuca</i>	Indochinese Green Magpie	LC
Birds	<i>Cisticola juncidis</i>	Zitting Cisticola	LC
Birds	<i>Clamator coromandus</i>	Chestnut-winged Cuckoo	LC
Birds	<i>Clanga clanga</i>	Greater Spotted Eagle	VU
Birds	<i>Cochoa viridis</i>	Green Cochoa	LC
Birds	<i>Copsychus saularis</i>	Oriental Magpie-robin	LC
Birds	<i>Coracias affinis</i>	Indochinese Roller	LC
Birds	<i>Coracina macei</i>	Indian Cuckoo-shrike	LC
Birds	<i>Corvus macrorhynchos</i>	Large-billed Crow	LC
Birds	<i>Corydon sumatranus</i>	Dusky Broadbill	LC
Birds	<i>Crypsirina temia</i>	Racquet-tailed Treepie	LC
Birds	<i>Cuculus micropterus</i>	Indian Cuckoo	LC
Birds	<i>Culicicapa ceylonensis</i>	Grey-headed Canary-flycatcher	LC
Birds	<i>Cymbirhynchus macrorhynchos</i>	Black-and-red Broadbill	LC
Birds	<i>Cyornis hainanus</i>	Hainan Blue-flycatcher	LC
Birds	<i>Cyornis sumatrensis</i>	Indochinese Blue-flycatcher	LC
Birds	<i>Cyornis tickelliae</i>	Tickell's Blue-flycatcher	LC
Birds	<i>Cypsiurus balasiensis</i>	Asian Palm-swift	LC
Birds	<i>Delichon dasypus</i>	Asian House Martin	LC

Reptiles	<i>Typhlops siamensis</i>	Siamese Blind Snake	DD
Reptiles	<i>Varanus bengalensis</i>	Common Indian Monitor	LC
Reptiles	<i>Varanus salvator</i>	Common Water Monitor	LC
Reptiles	<i>Xenochrophis flavipunctatus</i>	Yellow-spotted Keelback Water Snake	LC
Reptiles	<i>Xenochrophis trianguligerus</i>	Red-sided Keelback Water Snake	LC
Reptiles	<i>Xenopeltis unicolor</i>	Asian Sunbeam Snake	LC

## About IBAT

The Integrated Biodiversity Assessment Tool (IBAT) provides key decision-makers with access to critical information on biodiversity priority sites to inform risk management and decision-making processes that address potential biodiversity impacts. Developed through a partnership of BirdLife International, Conservation International, International Union for Conservation of Nature (IUCN) and United Nations Environment Programme World Conservation Monitoring Centre (UNEP-WCMC), the vision of IBAT is that decisions affecting critical natural habitats are informed by the best scientific information and in turn decision makers will support the quest to collect and enhance the underlying datasets and maintain that scientific information.

# IBAT for Business (<https://www.ibatforbusiness.org>)

## Species Grid Factsheet

### Species list for grid cell 158495

Total number of Globally Threatened (CR, EN, VU), Near Threatened (NT) and Data Deficient (DD) species 953.

### Please note the following important statement regarding interpretation.

The threatened species grid layer found in IBAT for Business is derived directly from the species distribution maps produced as part of each individual Red List assessment. The species distribution maps, commonly referred to as "limits of distribution" or "field guide" maps, aim to provide the current known distribution of the species within its native range. The limits of distribution are determined by using known occurrences of the species, along with knowledge of habitat preferences, remaining suitable habitat, elevation limits, and other expert knowledge of the species and its range. A polygon displaying the limits of a species distribution is essentially meant to communicate that the species likely only occurs within this polygon, but it does not mean that it is distributed equally within that polygon or occurs everywhere within that polygon.

The Red List deals with species of widely varying range sizes - from restricted range species limited to a single 1 km<sup>2</sup> site to species whose ranges exceed many hundreds of thousands of square kilometers, despite possibly being quite rare within that vast range. Therefore, one must be conscious of these factors when using the Globally Threatened Species Grid within IBAT. When one clicks on a grid cell within IBAT and reveals the species underlying that grid cell, they are revealing species whose "limits of distribution" intersect with that grid cell. This should not be confused with actual occurrence; rather, this should be interpreted as *possible* occurrence.

Should a user wish to explore a specific species' distribution map, the species list contains a link that will display the limits of distribution map (Range map) for that single species.

Taxonomic group	Species	Common name	IUCN Red List Category	Factsheet
Amphibians	<i>Chiromantis nongkhorensis</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/58791/summ">http://www.iucnredlist.org/search/details.php/58791/summ</a> )

Fishes	<i>Glossogobius giuris</i>	Bareye Goby	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/166533/summ">http://www.iucnredlist.org/search/details.php/166533/summ</a> )
Fishes	<i>Glossogobius sparsipapillus</i>		DD	 ( <a href="http://www.iucnredlist.org/search/details.php/181319/summ">http://www.iucnredlist.org/search/details.php/181319/summ</a> )
Fishes	<i>Glyptothorax lampris</i>	Torrent catfish	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/181161/summ">http://www.iucnredlist.org/search/details.php/181161/summ</a> )
Fishes	<i>Glyptothorax laosensis</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180986/summ">http://www.iucnredlist.org/search/details.php/180986/summ</a> )
Fishes	<i>Gymnostomus caudimaculatus</i>	Lesser Silver Mud Carp	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/188096/summ">http://www.iucnredlist.org/search/details.php/188096/summ</a> )
Fishes	<i>Gymnostomus lineatus</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/187870/summ">http://www.iucnredlist.org/search/details.php/187870/summ</a> )
Fishes	<i>Gymnostomus lobatus</i>	Lesser Silver Mud Carp	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/188011/summ">http://www.iucnredlist.org/search/details.php/188011/summ</a> )
Fishes	<i>Gymnostomus ornatipinnis</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/187983/summ">http://www.iucnredlist.org/search/details.php/187983/summ</a> )
Fishes	<i>Gymnostomus siamensis</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/188112/summ">http://www.iucnredlist.org/search/details.php/188112/summ</a> )
Fishes	<i>Gyrinocheilus aymonieri</i>	Honey Sucker	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180997/summ">http://www.iucnredlist.org/search/details.php/180997/summ</a> )
Fishes	<i>Gyrinocheilus pennocki</i>	Spotted Algae Eater	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/181297/summ">http://www.iucnredlist.org/search/details.php/181297/summ</a> )
Fishes	<i>Hampala dispar</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/181300/summ">http://www.iucnredlist.org/search/details.php/181300/summ</a> )
Fishes	<i>Hampala macrolepidota</i>	Hampala Barb	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/181255/summ">http://www.iucnredlist.org/search/details.php/181255/summ</a> )
Fishes	<i>Helicophagus leptorhynchus</i>	Rat-faced Pangasiid	DD	 ( <a href="http://www.iucnredlist.org/search/details.php/180838/summ">http://www.iucnredlist.org/search/details.php/180838/summ</a> )
Fishes	<i>Helostoma temminckii</i>	Kissing Gourami	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/181326/summ">http://www.iucnredlist.org/search/details.php/181326/summ</a> )

Fishes	<i>Hemibagrus filamentus</i>		DD	 ( <a href="http://www.iucnredlist.org/search/details.php/180805/summ">http://www.iucnredlist.org/search/details.php/180805/summ</a> )
Fishes	<i>Hemibagrus nemurus</i>	Yellow Catfish	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180954/summ">http://www.iucnredlist.org/search/details.php/180954/summ</a> )
Fishes	<i>Hemibagrus spilopterus</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180677/summ">http://www.iucnredlist.org/search/details.php/180677/summ</a> )
Fishes	<i>Hemibagrus wyckii</i>	Blacktail Catfish	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/181293/summ">http://www.iucnredlist.org/search/details.php/181293/summ</a> )
Fishes	<i>Hemibagrus wyckioides</i>	Asian Red Tailed Catfish	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180905/summ">http://www.iucnredlist.org/search/details.php/180905/summ</a> )
Fishes	<i>Homaloptera confuzona</i>		DD	 ( <a href="http://www.iucnredlist.org/search/details.php/180664/summ">http://www.iucnredlist.org/search/details.php/180664/summ</a> )
Fishes	<i>Homaloptera smithi</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/187875/summ">http://www.iucnredlist.org/search/details.php/187875/summ</a> )
Fishes	<i>Homaloptera tweediei</i>		DD	 ( <a href="http://www.iucnredlist.org/search/details.php/187951/summ">http://www.iucnredlist.org/search/details.php/187951/summ</a> )
Fishes	<i>Homaloptera zollingeri</i>	Black lizard loach	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/169564/summ">http://www.iucnredlist.org/search/details.php/169564/summ</a> )
Fishes	<i>Hypsibarbus malcolmi</i>	Goldfin Tinfoil Barb	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180843/summ">http://www.iucnredlist.org/search/details.php/180843/summ</a> )
Fishes	<i>Hypsibarbus vernayi</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180834/summ">http://www.iucnredlist.org/search/details.php/180834/summ</a> )
Fishes	<i>Kryptopterus bicirrhys</i>	Glass Catfish	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180737/summ">http://www.iucnredlist.org/search/details.php/180737/summ</a> )
Fishes	<i>Kryptopterus dissitus</i>		DD	 ( <a href="http://www.iucnredlist.org/search/details.php/180670/summ">http://www.iucnredlist.org/search/details.php/180670/summ</a> )
Fishes	<i>Kryptopterus geminus</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180726/summ">http://www.iucnredlist.org/search/details.php/180726/summ</a> )
Fishes	<i>Kryptopterus micronema</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/169545/summ">http://www.iucnredlist.org/search/details.php/169545/summ</a> )
Fishes	<i>Kryptopterus paraschilbeides</i>		DD	 ( <a href="http://www.iucnredlist.org/search/details.php/180676/summ">http://www.iucnredlist.org/search/details.php/180676/summ</a> )
Fishes	<i>Labeo chrysophekadion</i>	Black Sharkminnow	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180648/summ">http://www.iucnredlist.org/search/details.php/180648/summ</a> )
Fishes	<i>Labeo indramontri</i>		DD	 ( <a href="http://www.iucnredlist.org/search/details.php/180995/summ">http://www.iucnredlist.org/search/details.php/180995/summ</a> )
Fishes	<i>Labiobarbus leptocheila</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180797/summ">http://www.iucnredlist.org/search/details.php/180797/summ</a> )
Fishes	<i>Labiobarbus siamensis</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180901/summ">http://www.iucnredlist.org/search/details.php/180901/summ</a> )
Fishes	<i>Lalides longibarbis</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180673/summ">http://www.iucnredlist.org/search/details.php/180673/summ</a> )
Fishes	<i>Laubuca caeruleostigmata</i>	Flying Minnow	EN	 ( <a href="http://www.iucnredlist.org/search/details.php/4602/summ">http://www.iucnredlist.org/search/details.php/4602/summ</a> )
Fishes	<i>Lepidocephalichthys hasselti</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180693/summ">http://www.iucnredlist.org/search/details.php/180693/summ</a> )
Fishes	<i>Lobocheilos melanotaenia</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/181050/summ">http://www.iucnredlist.org/search/details.php/181050/summ</a> )
Fishes	<i>Luciosoma bleekeri</i>	Shark Minnow	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180761/summ">http://www.iucnredlist.org/search/details.php/180761/summ</a> )
Fishes	<i>Luciosoma setigerum</i>		DD	 ( <a href="http://www.iucnredlist.org/search/details.php/181231/summ">http://www.iucnredlist.org/search/details.php/181231/summ</a> )

Fishes	<i>Lycothrissa crocodilus</i>	Sabretoothed Thryssa	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180690/summ">http://www.iucnredlist.org/search/details.php/180690/summ</a> )
Fishes	<i>Macrochirichthys macrochirus</i>	Long Pectoral-fin Minnow	NT	 ( <a href="http://www.iucnredlist.org/search/details.php/181325/summ">http://www.iucnredlist.org/search/details.php/181325/summ</a> )
Fishes	<i>Macrognahtus circumcinctus</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/181012/summ">http://www.iucnredlist.org/search/details.php/181012/summ</a> )
Fishes	<i>Macrognahtus maculatus</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180801/summ">http://www.iucnredlist.org/search/details.php/180801/summ</a> )
Fishes	<i>Macrognahtus semioellatus</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180795/summ">http://www.iucnredlist.org/search/details.php/180795/summ</a> )
Fishes	<i>Macrognahtus siamensis</i>	Spotfin Spiny Eel	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180869/summ">http://www.iucnredlist.org/search/details.php/180869/summ</a> )
Fishes	<i>Mastacembelus armatus</i>	Spiny eel	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/166586/summ">http://www.iucnredlist.org/search/details.php/166586/summ</a> )
Fishes	<i>Mastacembelus erythrotaenia</i>	Spiny Eel	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180888/summ">http://www.iucnredlist.org/search/details.php/180888/summ</a> )
Fishes	<i>Mastacembelus favus</i>	Tire Track Eel	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/181094/summ">http://www.iucnredlist.org/search/details.php/181094/summ</a> )
Fishes	<i>Micronema cheveyi</i>		DD	 ( <a href="http://www.iucnredlist.org/search/details.php/188060/summ">http://www.iucnredlist.org/search/details.php/188060/summ</a> )
Fishes	<i>Minyclupeoides dentibranchialis</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180964/summ">http://www.iucnredlist.org/search/details.php/180964/summ</a> )
Fishes	<i>Monopterus albus</i>	Rice swampee	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/166148/summ">http://www.iucnredlist.org/search/details.php/166148/summ</a> )
Fishes	<i>Monotrete brevirostris</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/187954/summ">http://www.iucnredlist.org/search/details.php/187954/summ</a> )
Fishes	<i>Monotrete cambodgiensis</i>	Cambodian Puffer	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/169505/summ">http://www.iucnredlist.org/search/details.php/169505/summ</a> )
Fishes	<i>Monotrete cochinchinensis</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180992/summ">http://www.iucnredlist.org/search/details.php/180992/summ</a> )
Fishes	<i>Monotrete ocellaris</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/187974/summ">http://www.iucnredlist.org/search/details.php/187974/summ</a> )
Fishes	<i>Mystacoleucus marginatus</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180759/summ">http://www.iucnredlist.org/search/details.php/180759/summ</a> )
Fishes	<i>Mystus albolineatus</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180912/summ">http://www.iucnredlist.org/search/details.php/180912/summ</a> )
Fishes	<i>Mystus atrifasciatus</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180991/summ">http://www.iucnredlist.org/search/details.php/180991/summ</a> )
Fishes	<i>Mystus multiradiatus</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/181071/summ">http://www.iucnredlist.org/search/details.php/181071/summ</a> )
Fishes	<i>Mystus mysticetus</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/181112/summ">http://www.iucnredlist.org/search/details.php/181112/summ</a> )
Fishes	<i>Mystus singaringan</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180836/summ">http://www.iucnredlist.org/search/details.php/180836/summ</a> )
Fishes	<i>Mystus wolffii</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/169551/summ">http://www.iucnredlist.org/search/details.php/169551/summ</a> )
Fishes	<i>Nandus oxyrhynchus</i>		LC	( <a href="http://www.iucnredlist.org/search/details.php/180933/summ">http://www.iucnredlist.org/search/details.php/180933/summ</a> )
Fishes	<i>Nemacheilus platiceps</i>		DD	( <a href="http://www.iucnredlist.org/search/details.php/181088/summ">http://www.iucnredlist.org/search/details.php/181088/summ</a> )
Fishes	<i>Neobarynotus microlepis</i>		DD	( <a href="http://www.iucnredlist.org/search/details.php/180657/summ">http://www.iucnredlist.org/search/details.php/180657/summ</a> )
Fishes	<i>Notopterus notopterus</i>		LC	( <a href="http://www.iucnredlist.org/search/details.php/166433/summ">http://www.iucnredlist.org/search/details.php/166433/summ</a> )

Fishes	<i>Omox biporos</i>	Omox Blenny	DD	 ( <a href="http://www.iucnredlist.org/search/details.php/196310/summ">http://www.iucnredlist.org/search/details.php/196310/summ</a> )
Fishes	<i>Ompok pinnatus</i>		DD	 ( <a href="http://www.iucnredlist.org/search/details.php/180668/summ">http://www.iucnredlist.org/search/details.php/180668/summ</a> )
Fishes	<i>Ompok urbaini</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/181135/summ">http://www.iucnredlist.org/search/details.php/181135/summ</a> )
Fishes	<i>Opsarius koratensis</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180762/summ">http://www.iucnredlist.org/search/details.php/180762/summ</a> )
Fishes	<i>Opsarius ornatus</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/187940/summ">http://www.iucnredlist.org/search/details.php/187940/summ</a> )
Fishes	<i>Opsarius pulchellus</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/181090/summ">http://www.iucnredlist.org/search/details.php/181090/summ</a> )
Fishes	<i>Osphronemus exodon</i>	Elephant Ear Gourami	VU	 ( <a href="http://www.iucnredlist.org/search/details.php/169508/summ">http://www.iucnredlist.org/search/details.php/169508/summ</a> )
Fishes	<i>Osphronemus goramy</i>	Giant Gouramy	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180720/summ">http://www.iucnredlist.org/search/details.php/180720/summ</a> )
Fishes	<i>Osteochilus lini</i>	Dusky Face Carp	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/181030/summ">http://www.iucnredlist.org/search/details.php/181030/summ</a> )
Fishes	<i>Osteochilus melanopleura</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180985/summ">http://www.iucnredlist.org/search/details.php/180985/summ</a> )
Fishes	<i>Osteochilus microcephalus</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180653/summ">http://www.iucnredlist.org/search/details.php/180653/summ</a> )
Fishes	<i>Osteochilus schlegelii</i>	Giant Sharkminnow	DD	 ( <a href="http://www.iucnredlist.org/search/details.php/187972/summ">http://www.iucnredlist.org/search/details.php/187972/summ</a> )
Fishes	<i>Osteochilus vittatus</i>	Hard-lipped Barb	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180750/summ">http://www.iucnredlist.org/search/details.php/180750/summ</a> )
Fishes	<i>Osteochilus waandersii</i>	Waandersii's Hard-lipped Barb	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180923/summ">http://www.iucnredlist.org/search/details.php/180923/summ</a> )
Fishes	<i>Oxyeleotris marmorata</i>	Marbled Goby	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/181009/summ">http://www.iucnredlist.org/search/details.php/181009/summ</a> )
Fishes	<i>Oxygaster anomalura</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/181205/summ">http://www.iucnredlist.org/search/details.php/181205/summ</a> )
Fishes	<i>Oxygaster pointoni</i>		VU	 ( <a href="http://www.iucnredlist.org/search/details.php/169521/summ">http://www.iucnredlist.org/search/details.php/169521/summ</a> )
Fishes	<i>Pangasianodon gigas</i>	Mekong Giant Catfish	CR	 ( <a href="http://www.iucnredlist.org/search/details.php/15944/summ">http://www.iucnredlist.org/search/details.php/15944/summ</a> )
Fishes	<i>Pangasianodon hypophthalmus</i>	Striped Catfish	EN	 ( <a href="http://www.iucnredlist.org/search/details.php/180689/summ">http://www.iucnredlist.org/search/details.php/180689/summ</a> )
Fishes	<i>Pangasius bocourti</i>	Bocourt's catfish	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180848/summ">http://www.iucnredlist.org/search/details.php/180848/summ</a> )
Fishes	<i>Pangasius conchophilus</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/181218/summ">http://www.iucnredlist.org/search/details.php/181218/summ</a> )
Fishes	<i>Pangasius elongatus</i>	Elongate catfish	DD	 ( <a href="http://www.iucnredlist.org/search/details.php/180765/summ">http://www.iucnredlist.org/search/details.php/180765/summ</a> )
Fishes	<i>Pangasius krempfi</i>		VU	 ( <a href="http://www.iucnredlist.org/search/details.php/181328/summ">http://www.iucnredlist.org/search/details.php/181328/summ</a> )
Fishes	<i>Pangasius lamaudii</i>	Black-spotted catfish	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180760/summ">http://www.iucnredlist.org/search/details.php/180760/summ</a> )
Fishes	<i>Pangasius macronema</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/169550/summ">http://www.iucnredlist.org/search/details.php/169550/summ</a> )
Fishes	<i>Pangasius mekongensis</i>	Mekong catfish	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/181260/summ">http://www.iucnredlist.org/search/details.php/181260/summ</a> )
Fishes	<i>Pangasius sanitwongsei</i>	Giant Pangasius	CR	 ( <a href="http://www.iucnredlist.org/search/details.php/15945/summ">http://www.iucnredlist.org/search/details.php/15945/summ</a> )
Fishes	<i>Pangio myersi</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180865/summ">http://www.iucnredlist.org/search/details.php/180865/summ</a> )

Fishes	<i>Papuligobius ocellatus</i>	Mekong Rock Goby	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180718/summ">http://www.iucnredlist.org/search/details.php/180718/summ</a> )
Fishes	<i>Parachela maculicauda</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/181311/summ">http://www.iucnredlist.org/search/details.php/181311/summ</a> )
Fishes	<i>Parachela oxygastroides</i>	Glass Fish	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/169547/summ">http://www.iucnredlist.org/search/details.php/169547/summ</a> )
Fishes	<i>Parachela siamensis</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180824/summ">http://www.iucnredlist.org/search/details.php/180824/summ</a> )
Fishes	<i>Parachela williaminae</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180674/summ">http://www.iucnredlist.org/search/details.php/180674/summ</a> )
Fishes	<i>Paralaubuca barroni</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/181310/summ">http://www.iucnredlist.org/search/details.php/181310/summ</a> )
Fishes	<i>Paralaubuca harmandi</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/181299/summ">http://www.iucnredlist.org/search/details.php/181299/summ</a> )
Fishes	<i>Paralaubuca riveroi</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/181089/summ">http://www.iucnredlist.org/search/details.php/181089/summ</a> )
Fishes	<i>Paralaubuca typus</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/181032/summ">http://www.iucnredlist.org/search/details.php/181032/summ</a> )
Fishes	<i>Parambassis apogonoides</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/181175/summ">http://www.iucnredlist.org/search/details.php/181175/summ</a> )
Fishes	<i>Parambassis siamensis</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/181129/summ">http://www.iucnredlist.org/search/details.php/181129/summ</a> )
Fishes	<i>Parambassis wolffii</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/181174/summ">http://www.iucnredlist.org/search/details.php/181174/summ</a> )
Fishes	<i>Phalacronotus apogon</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180701/summ">http://www.iucnredlist.org/search/details.php/180701/summ</a> )
Fishes	<i>Phalacronotus bleekeri</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180747/summ">http://www.iucnredlist.org/search/details.php/180747/summ</a> )
Fishes	<i>Phalacronotus micronemus</i>		DD	 ( <a href="http://www.iucnredlist.org/search/details.php/181253/summ">http://www.iucnredlist.org/search/details.php/181253/summ</a> )
Fishes	<i>Physoschistura pseudobrunneana</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180740/summ">http://www.iucnredlist.org/search/details.php/180740/summ</a> )
Fishes	<i>Polynemus aquilonaris</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180956/summ">http://www.iucnredlist.org/search/details.php/180956/summ</a> )
Fishes	<i>Polynemus melanochir</i>	Blackhand Paradise Fish	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180727/summ">http://www.iucnredlist.org/search/details.php/180727/summ</a> )
Fishes	<i>Poropuntius laoensis</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180909/summ">http://www.iucnredlist.org/search/details.php/180909/summ</a> )
Fishes	<i>Poropuntius normani</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180643/summ">http://www.iucnredlist.org/search/details.php/180643/summ</a> )
Fishes	<i>Pristis pristis</i>	Large-tooth Sawfish	CR	 ( <a href="http://www.iucnredlist.org/search/details.php/18584848/summ">http://www.iucnredlist.org/search/details.php/18584848/summ</a> )
Fishes	<i>Pristolepis fasciata</i>	Malayan Leaf-fish	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/172329/summ">http://www.iucnredlist.org/search/details.php/172329/summ</a> )
Fishes	<i>Probarbus jullieni</i>	Jullien's Golden Carp	EN	 ( <a href="http://www.iucnredlist.org/search/details.php/18182/summ">http://www.iucnredlist.org/search/details.php/18182/summ</a> )
Fishes	<i>Pseudapocryptes elongatus</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/169496/summ">http://www.iucnredlist.org/search/details.php/169496/summ</a> )
Fishes	<i>Pseudobagarius filifer</i>		DD	 ( <a href="http://www.iucnredlist.org/search/details.php/193973/summ">http://www.iucnredlist.org/search/details.php/193973/summ</a> )
Fishes	<i>Pseudobagarius similis</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/187905/summ">http://www.iucnredlist.org/search/details.php/187905/summ</a> )

Fishes	<i>Pseudogobiopsis oligactis</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180644/summ">http://www.iucnredlist.org/search/details.php/180644/summ</a> )
Fishes	<i>Pseudolais micronemus</i>		DD	 ( <a href="http://www.iucnredlist.org/search/details.php/181073/summ">http://www.iucnredlist.org/search/details.php/181073/summ</a> )
Fishes	<i>Pseudolais pleurotaenia</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/181078/summ">http://www.iucnredlist.org/search/details.php/181078/summ</a> )
Fishes	<i>Pseudomystus siamensis</i>	Bumble bee catfish	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180973/summ">http://www.iucnredlist.org/search/details.php/180973/summ</a> )
Fishes	<i>Puntioplites bulu</i>	Bulu Barb	DD	 ( <a href="http://www.iucnredlist.org/search/details.php/181098/summ">http://www.iucnredlist.org/search/details.php/181098/summ</a> )
Fishes	<i>Puntioplites falcifer</i>	Sickle Fin Barb	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180864/summ">http://www.iucnredlist.org/search/details.php/180864/summ</a> )
Fishes	<i>Puntioplites proctozystron</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180764/summ">http://www.iucnredlist.org/search/details.php/180764/summ</a> )
Fishes	<i>Puntioplites waandersi</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180803/summ">http://www.iucnredlist.org/search/details.php/180803/summ</a> )
Fishes	<i>Puntius brevis</i>	Swamp Barb	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180959/summ">http://www.iucnredlist.org/search/details.php/180959/summ</a> )
Fishes	<i>Raiamas guttatus</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/168219/summ">http://www.iucnredlist.org/search/details.php/168219/summ</a> )
Fishes	<i>Rasbora aurotaenia</i>	Pale Rasbora	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/166965/summ">http://www.iucnredlist.org/search/details.php/166965/summ</a> )
Fishes	<i>Rasbora borapetensis</i>	Red-tailed Rasbora	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180947/summ">http://www.iucnredlist.org/search/details.php/180947/summ</a> )
Fishes	<i>Rasbora daniconius</i>	Slender Barb	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/166467/summ">http://www.iucnredlist.org/search/details.php/166467/summ</a> )
Fishes	<i>Rasbora paviana</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/181147/summ">http://www.iucnredlist.org/search/details.php/181147/summ</a> )
Fishes	<i>Rasbora rubrodorsalis</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/180669/summ">http://www.iucnredlist.org/search/details.php/180669/summ</a> )
Fishes	<i>Rasbora tornieri</i>	Southeast Asian Yellowtail Rasbora	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/169513/summ">http://www.iucnredlist.org/search/details.php/169513/summ</a> )
Fishes	<i>Rasbora trilineata</i>	Scissortail Rasbora	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/166864/summ">http://www.iucnredlist.org/search/details.php/166864/summ</a> )
Fishes	<i>Scleropages formosus</i>	Golden Dragon Fish	EN	 ( <a href="http://www.iucnredlist.org/search/details.php/20034/summ">http://www.iucnredlist.org/search/details.php/20034/summ</a> )
Fishes	<i>Scomberomorus sinensis</i>	Chinese Seerfish	DD	 ( <a href="http://www.iucnredlist.org/search/details.php/170346/summ">http://www.iucnredlist.org/search/details.php/170346/summ</a> )
Fishes	<i>Sikukia stejnegeri</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/188090/summ">http://www.iucnredlist.org/search/details.php/188090/summ</a> )
Fishes	<i>Sundasilanx mekongensis</i>	Mekong noodlefish	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/188076/summ">http://www.iucnredlist.org/search/details.php/188076/summ</a> )
Fishes	<i>Sundasilanx praecox</i>	Dwarf Noodlefish	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/188074/summ">http://www.iucnredlist.org/search/details.php/188074/summ</a> )
Fishes	<i>Syncrossus helodes</i>	Banded Tiger Loach	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/187994/summ">http://www.iucnredlist.org/search/details.php/187994/summ</a> )
Fishes	<i>Tenuialosa thibaudeaui</i>	Mekong herring	VU	 ( <a href="http://www.iucnredlist.org/search/details.php/21627/summ">http://www.iucnredlist.org/search/details.php/21627/summ</a> )
Fishes	<i>Tetraodon biocellatus</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/166997/summ">http://www.iucnredlist.org/search/details.php/166997/summ</a> )
Fishes	<i>Thryssocypris tonlesapensis</i>	Anchovy rasbora	LC	( <a href="http://www.iucnredlist.org/search/details.php/188005/summ">http://www.iucnredlist.org/search/details.php/188005/summ</a> )
Fishes	<i>Thynnichthys</i>	Tiny scale barb	LC	( <a href="http://www.iucnredlist.org/search/details.php/188079/summ">http://www.iucnredlist.org/search/details.php/188079/summ</a> )

	<i>thynnoides</i>			
Fishes	<i>Tonlesapia amnica</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/13198125/summ">http://www.iucnredlist.org/search/details.php/13198125/summ</a> )
Fishes	<i>Tor tambra</i>		DD	 ( <a href="http://www.iucnredlist.org/search/details.php/188012/summ">http://www.iucnredlist.org/search/details.php/188012/summ</a> )
Fishes	<i>Tor tambroides</i>		DD	 ( <a href="http://www.iucnredlist.org/search/details.php/187939/summ">http://www.iucnredlist.org/search/details.php/187939/summ</a> )
Fishes	<i>Toxotes microlepis</i>	Smallscale Archerfish	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/188054/summ">http://www.iucnredlist.org/search/details.php/188054/summ</a> )
Fishes	<i>Trichopodus microlepis</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/187925/summ">http://www.iucnredlist.org/search/details.php/187925/summ</a> )
Fishes	<i>Trichopodus pectoralis</i>	Snakeskin Gourami	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/188087/summ">http://www.iucnredlist.org/search/details.php/188087/summ</a> )
Fishes	<i>Trichopodus trichopterus</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/187981/summ">http://www.iucnredlist.org/search/details.php/187981/summ</a> )
Fishes	<i>Trichopsis pumila</i>	Pygmy gourami	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/188102/summ">http://www.iucnredlist.org/search/details.php/188102/summ</a> )
Fishes	<i>Trichopsis schalleri</i>	Mekong Croaking Guaramy	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/188058/summ">http://www.iucnredlist.org/search/details.php/188058/summ</a> )
Fishes	<i>Trichopsis vittata</i>	Croaking Guaramy	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/187906/summ">http://www.iucnredlist.org/search/details.php/187906/summ</a> )
Fishes	<i>Urogymnus polylepis</i>		EN	 ( <a href="http://www.iucnredlist.org/search/details.php/195320/summ">http://www.iucnredlist.org/search/details.php/195320/summ</a> )
Fishes	<i>Wallago attu</i>		NT	 ( <a href="http://www.iucnredlist.org/search/details.php/166468/summ">http://www.iucnredlist.org/search/details.php/166468/summ</a> )
Fishes	<i>Wallago micropogon</i>		DD	 ( <a href="http://www.iucnredlist.org/search/details.php/187930/summ">http://www.iucnredlist.org/search/details.php/187930/summ</a> )
Fishes	<i>Xenentodon cancilooides</i>	Indochinese Needlefish	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/187889/summ">http://www.iucnredlist.org/search/details.php/187889/summ</a> )
Fishes	<i>Yasuhikotakia eos</i>	Sun Loach	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/188002/summ">http://www.iucnredlist.org/search/details.php/188002/summ</a> )
Fishes	<i>Yasuhikotakia lecontei</i>	Red-finned Loach	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/187984/summ">http://www.iucnredlist.org/search/details.php/187984/summ</a> )
Fishes	<i>Yasuhikotakia modesta</i>	Blue Botia	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/188006/summ">http://www.iucnredlist.org/search/details.php/188006/summ</a> )
Fishes	<i>Yasuhikotakia morleti</i>	Skunk Loach	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/187878/summ">http://www.iucnredlist.org/search/details.php/187878/summ</a> )
Invertebrates	<i>Aciagrion hisopa</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/163798/summ">http://www.iucnredlist.org/search/details.php/163798/summ</a> )
Invertebrates	<i>Aciagrion occidentale</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/167267/summ">http://www.iucnredlist.org/search/details.php/167267/summ</a> )
Invertebrates	<i>Aciagrion pallidum</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/167350/summ">http://www.iucnredlist.org/search/details.php/167350/summ</a> )
Invertebrates	<i>Acisoma panorpoides</i>	Grizzled Pintail	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/59785/summ">http://www.iucnredlist.org/search/details.php/59785/summ</a> )
Invertebrates	<i>Aethriamanta brevipennis</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/167270/summ">http://www.iucnredlist.org/search/details.php/167270/summ</a> )
Invertebrates	<i>Agriocnemis femina</i>		LC	 ( <a href="http://www.iucnredlist.org/search/details.php/167208/summ">http://www.iucnredlist.org/search/details.php/167208/summ</a> )

Mammals	<i>Cuon alpinus</i>	Dhole	EN	 ( <a href="http://www.iucnredlist.org/search/details.php/5953/summ">http://www.iucnredlist.org/search/details.php/5953/summ</a> )
Mammals	<i>Cynopterus brachyotis</i>	Lesser Dog-faced Fruit Bat	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/6103/summ">http://www.iucnredlist.org/search/details.php/6103/summ</a> )
Mammals	<i>Cynopterus sphinx</i>	Greater Shortnosed Fruit Bat	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/6106/summ">http://www.iucnredlist.org/search/details.php/6106/summ</a> )
Mammals	<i>Eonycteris spelaea</i>	Dawn Bat	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/7787/summ">http://www.iucnredlist.org/search/details.php/7787/summ</a> )
Mammals	<i>Felis chaus</i>	Jungle Cat	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/8540/summ">http://www.iucnredlist.org/search/details.php/8540/summ</a> )
Mammals	<i>Glischropus tylopus</i>	Common Thick-thumbed Bat	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/9248/summ">http://www.iucnredlist.org/search/details.php/9248/summ</a> )
Mammals	<i>Helarctos malayanus</i>	Sun Bear	VU	 ( <a href="http://www.iucnredlist.org/search/details.php/9760/summ">http://www.iucnredlist.org/search/details.php/9760/summ</a> )
Mammals	<i>Herpestes javanicus</i>	Javan Mongoose	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/70203940/summ">http://www.iucnredlist.org/search/details.php/70203940/summ</a> )
Mammals	<i>Hesperoptenus tickelli</i>	Tickell's Bat	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/9978/summ">http://www.iucnredlist.org/search/details.php/9978/summ</a> )
Mammals	<i>Hipposideros armiger</i>	Great Himalayan Leaf-nosed Bat	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/10110/summ">http://www.iucnredlist.org/search/details.php/10110/summ</a> )
Mammals	<i>Hipposideros diadema</i>	Diadem Leaf-nosed Bat	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/10128/summ">http://www.iucnredlist.org/search/details.php/10128/summ</a> )
	<i>Hipposideros</i>	Cantor's Leaf-		

Mammals	<i>galeritus</i>	nosed Bat	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/10136/summ">http://www.iucnredlist.org/search/details.php/10136/summ</a> )
Mammals	<i>Hipposideros larvatus</i>	Horsfield's Leaf-nosed Bat	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/10143/summ">http://www.iucnredlist.org/search/details.php/10143/summ</a> )
Mammals	<i>Hipposideros pomona</i>	Andersen's Leaf-nosed Bat	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/10154/summ">http://www.iucnredlist.org/search/details.php/10154/summ</a> )
Mammals	<i>Hystrix brachyura</i>	Malayan Porcupine	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/10749/summ">http://www.iucnredlist.org/search/details.php/10749/summ</a> )
Mammals	<i>Kerivoula hardwickii</i>	Hardwicke's Woolly Bat	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/10974/summ">http://www.iucnredlist.org/search/details.php/10974/summ</a> )
Mammals	<i>Kerivoula picta</i>	Painted Woolly Bat	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/10985/summ">http://www.iucnredlist.org/search/details.php/10985/summ</a> )
Mammals	<i>Leopoldamys sabanus</i>	Long-tailed Giant Rat	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/11520/summ">http://www.iucnredlist.org/search/details.php/11520/summ</a> )
Mammals	<i>Lepus peguensis</i>	Burmese Hare	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/41284/summ">http://www.iucnredlist.org/search/details.php/41284/summ</a> )
Mammals	<i>Lutra sumatrana</i>	Hairy-nosed Otter	EN	 ( <a href="http://www.iucnredlist.org/search/details.php/12421/summ">http://www.iucnredlist.org/search/details.php/12421/summ</a> )
Mammals	<i>Lutrogale perspicillata</i>	Smooth-coated Otter	VU	 ( <a href="http://www.iucnredlist.org/search/details.php/12427/summ">http://www.iucnredlist.org/search/details.php/12427/summ</a> )
Mammals	<i>Macaca fascicularis</i>	Nicobar Crab-eating Macaque	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/12551/summ">http://www.iucnredlist.org/search/details.php/12551/summ</a> )
Mammals	<i>Macaca leonina</i>	Northern Pig-tailed Macaque	VU	 ( <a href="http://www.iucnredlist.org/search/details.php/39792/summ">http://www.iucnredlist.org/search/details.php/39792/summ</a> )
Mammals	<i>Macroglossus minimus</i>	Dagger-toothed Long-nosed Fruit Bat	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/12594/summ">http://www.iucnredlist.org/search/details.php/12594/summ</a> )
Mammals	<i>Macroglossus sobrinus</i>	Hill Long-tongued Fruit Bat	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/12595/summ">http://www.iucnredlist.org/search/details.php/12595/summ</a> )
Mammals	<i>Manis javanica</i>	Sunda Pangolin	CR	 ( <a href="http://www.iucnredlist.org/search/details.php/12763/summ">http://www.iucnredlist.org/search/details.php/12763/summ</a> )
Mammals	<i>Martes flavigula</i>	Yellow-throated Marten	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/41649/summ">http://www.iucnredlist.org/search/details.php/41649/summ</a> )
Mammals	<i>Maxomys surifer</i>	Indomalayan Maxomys	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/12905/summ">http://www.iucnredlist.org/search/details.php/12905/summ</a> )
Mammals	<i>Megaderma lyra</i>	Greater False Vampire	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/12938/summ">http://www.iucnredlist.org/search/details.php/12938/summ</a> )
Mammals	<i>Megaderma spasma</i>	Lesser False Vampire	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/12939/summ">http://www.iucnredlist.org/search/details.php/12939/summ</a> )
Mammals	<i>Megaerops niphanae</i>	Ratanaworabhan's Fruit Bat	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/12947/summ">http://www.iucnredlist.org/search/details.php/12947/summ</a> )
Mammals	<i>Melogale personata</i>	Large-toothed Ferret Badger	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/41627/summ">http://www.iucnredlist.org/search/details.php/41627/summ</a> )
Mammals	<i>Menetes berdmorei</i>	Berdmore's Squirrel	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/13144/summ">http://www.iucnredlist.org/search/details.php/13144/summ</a> )
Mammals	<i>Miniopterus magnater</i>	Large Bent-winged Bat	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/13566/summ">http://www.iucnredlist.org/search/details.php/13566/summ</a> )
Mammals	<i>Muntiacus vaginalis</i>	Northern Red Muntjac	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/136551/summ">http://www.iucnredlist.org/search/details.php/136551/summ</a> )
Mammals	<i>Murina cyclotis</i>	Round-eared Tube-nosed Bat	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/13938/summ">http://www.iucnredlist.org/search/details.php/13938/summ</a> )

Mammals	<i>Mus caroli</i>	Ryukyu Mouse	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/13956/summ">http://www.iucnredlist.org/search/details.php/13956/summ</a> )
Mammals	<i>Mus musculus</i>	House Mouse	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/13972/summ">http://www.iucnredlist.org/search/details.php/13972/summ</a> )
Mammals	<i>Myotis horsfieldii</i>	Horsfield's Myotis	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/14166/summ">http://www.iucnredlist.org/search/details.php/14166/summ</a> )
Mammals	<i>Myotis muricola</i>	Nepalese Whiskered Myotis	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/14183/summ">http://www.iucnredlist.org/search/details.php/14183/summ</a> )
Mammals	<i>Myotis rosseti</i>	Thick-thumbed Myotis	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/14196/summ">http://www.iucnredlist.org/search/details.php/14196/summ</a> )
Mammals	<i>Niviventer fulvescens</i>	Chestnut White-bellied Rat	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/14820/summ">http://www.iucnredlist.org/search/details.php/14820/summ</a> )
Mammals	<i>Nycticebus bengalensis</i>	Bengal Slow Loris	VU	 ( <a href="http://www.iucnredlist.org/search/details.php/39758/summ">http://www.iucnredlist.org/search/details.php/39758/summ</a> )
Mammals	<i>Paguma larvata</i>	Masked Palm Civet	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/41692/summ">http://www.iucnredlist.org/search/details.php/41692/summ</a> )
Mammals	<i>Paradoxurus hermaphroditus</i>	Common Palm Civet	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/41693/summ">http://www.iucnredlist.org/search/details.php/41693/summ</a> )
Mammals	<i>Petaurista philippensis</i>	Indian Giant Flying Squirrel	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/16724/summ">http://www.iucnredlist.org/search/details.php/16724/summ</a> )
Mammals	<i>Pipistrellus coromandra</i>	Coromandel Pipistrelle	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/17335/summ">http://www.iucnredlist.org/search/details.php/17335/summ</a> )
Mammals	<i>Pipistrellus javanicus</i>	Javan Pipistrelle	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/17344/summ">http://www.iucnredlist.org/search/details.php/17344/summ</a> )
Mammals	<i>Pipistrellus tenuis</i>	Least Pipistrelle	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/17368/summ">http://www.iucnredlist.org/search/details.php/17368/summ</a> )
Mammals	<i>Prionailurus bengalensis</i>	Leopard Cat	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/18146/summ">http://www.iucnredlist.org/search/details.php/18146/summ</a> )
Mammals	<i>Prionodon pardicolor</i>	Spotted Linsang	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/41706/summ">http://www.iucnredlist.org/search/details.php/41706/summ</a> )
Mammals	<i>Pteropus lylei</i>	Lyle's Flying Fox	VU	 ( <a href="http://www.iucnredlist.org/search/details.php/18734/summ">http://www.iucnredlist.org/search/details.php/18734/summ</a> )
Mammals	<i>Pteropus vampyrus</i>	Large Flying-fox	NT	 ( <a href="http://www.iucnredlist.org/search/details.php/18766/summ">http://www.iucnredlist.org/search/details.php/18766/summ</a> )
Mammals	<i>Rattus argentiventer</i>	Ricefield Rat	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/19322/summ">http://www.iucnredlist.org/search/details.php/19322/summ</a> )
Mammals	<i>Rattus exulans</i>	Polynesian Rat	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/19330/summ">http://www.iucnredlist.org/search/details.php/19330/summ</a> )
Mammals	<i>Rattus losea</i>	Losea Rat	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/19341/summ">http://www.iucnredlist.org/search/details.php/19341/summ</a> )
Mammals	<i>Rattus rattus</i>	House Rat	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/19360/summ">http://www.iucnredlist.org/search/details.php/19360/summ</a> )
Mammals	<i>Rattus tanezumi</i>	Oriental House Rat	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/19366/summ">http://www.iucnredlist.org/search/details.php/19366/summ</a> )
Mammals	<i>Ratufa bicolor</i>	Black Giant Squirrel	NT	 ( <a href="http://www.iucnredlist.org/search/details.php/19377/summ">http://www.iucnredlist.org/search/details.php/19377/summ</a> )
Mammals	<i>Rhinolophus acuminatus</i>	Accuminate Horseshoe Bat	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/19520/summ">http://www.iucnredlist.org/search/details.php/19520/summ</a> )
Mammals	<i>Rhinolophus affinis</i>	Intermediate Horseshoe Bat	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/19522/summ">http://www.iucnredlist.org/search/details.php/19522/summ</a> )
Mammals	<i>Rhinolophus malayanus</i>	Malayan Horseshoe Bat	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/19551/summ">http://www.iucnredlist.org/search/details.php/19551/summ</a> )
Mammals	<i>Rhinolophus pusillus</i>	Least Horseshoe Bat	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/19561/summ">http://www.iucnredlist.org/search/details.php/19561/summ</a> )
Mammals	<i>Rhinolophus</i>	Shamel's	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/19566/summ">http://www.iucnredlist.org/search/details.php/19566/summ</a> )

	<i>shameli</i>	Horseshoe Bat			
Mammals	<i>Rhinolophus stheno</i>	Lesser Brown Horseshoe Bat	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/19569/summ">http://www.iucnredlist.org/search/details.php/19569/summ</a> )	
Mammals	<i>Rhizomys pruinosus</i>	Hoary Bamboo Rat	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/19645/summ">http://www.iucnredlist.org/search/details.php/19645/summ</a> )	
Mammals	<i>Rousettus amplexicaudatus</i>	Geoffroy's Rousette	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/19754/summ">http://www.iucnredlist.org/search/details.php/19754/summ</a> )	
Mammals	<i>Rousettus leschenaultii</i>	Leschenault's Rousette	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/19756/summ">http://www.iucnredlist.org/search/details.php/19756/summ</a> )	
Mammals	<i>Rucervus eldii</i>	Eld's Deer	EN	 ( <a href="http://www.iucnredlist.org/search/details.php/4265/summ">http://www.iucnredlist.org/search/details.php/4265/summ</a> )	
Mammals	<i>Rusa unicolor</i>	Sambar	VU	 ( <a href="http://www.iucnredlist.org/search/details.php/41790/summ">http://www.iucnredlist.org/search/details.php/41790/summ</a> )	
Mammals	<i>Scotophilus kuhlii</i>	Lesser Asiatic Yellow House Bat	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/20068/summ">http://www.iucnredlist.org/search/details.php/20068/summ</a> )	
Mammals	<i>Suncus murinus</i>	House Shrew	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/41440/summ">http://www.iucnredlist.org/search/details.php/41440/summ</a> )	
Mammals	<i>Sus scrofa</i>	Wild Boar	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/41775/summ">http://www.iucnredlist.org/search/details.php/41775/summ</a> )	
Mammals	<i>Tamiops macclellandii</i>	Himalayan Striped Squirrel	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/21379/summ">http://www.iucnredlist.org/search/details.php/21379/summ</a> )	
Mammals	<i>Tamiops rodolphii</i>	Cambodian Striped Squirrel	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/21381/summ">http://www.iucnredlist.org/search/details.php/21381/summ</a> )	
Mammals	<i>Taphozous longimanus</i>	Long-winged Tomb Bat	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/21459/summ">http://www.iucnredlist.org/search/details.php/21459/summ</a> )	
Mammals	<i>Taphozous melanopogon</i>	Black-bearded Tomb Bat	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/21461/summ">http://www.iucnredlist.org/search/details.php/21461/summ</a> )	
Mammals	<i>Taphozous theobaldi</i>	Theobold's Bat	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/21465/summ">http://www.iucnredlist.org/search/details.php/21465/summ</a> )	
Mammals	<i>Trachypithecus germaini</i>	Indochinese Lutung	EN	 ( <a href="http://www.iucnredlist.org/search/details.php/39874/summ">http://www.iucnredlist.org/search/details.php/39874/summ</a> )	
Mammals	<i>Tragulus kanchil</i>	Lesser Oriental Chevrotain	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/136297/summ">http://www.iucnredlist.org/search/details.php/136297/summ</a> )	
Mammals	<i>Tupaia belangeri</i>	Northern Treeshrew	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/41492/summ">http://www.iucnredlist.org/search/details.php/41492/summ</a> )	
Mammals	<i>Tylonycteris pachypus</i>	Lesser Bamboo Bat	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/22577/summ">http://www.iucnredlist.org/search/details.php/22577/summ</a> )	
Mammals	<i>Tylonycteris robustula</i>	Greater Flat-headed Bat	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/22578/summ">http://www.iucnredlist.org/search/details.php/22578/summ</a> )	
Mammals	<i>Vandeleuria oleracea</i>	Asiatic Long-tailed Climbing Mouse	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/22845/summ">http://www.iucnredlist.org/search/details.php/22845/summ</a> )	
Mammals	<i>Viverra megaspila</i>	Large-spotted Civet	EN	 ( <a href="http://www.iucnredlist.org/search/details.php/41707/summ">http://www.iucnredlist.org/search/details.php/41707/summ</a> )	
Mammals	<i>Viverra zibetha</i>	Large Indian Civet	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/41709/summ">http://www.iucnredlist.org/search/details.php/41709/summ</a> )	
Mammals	<i>Viverricula indica</i>	Small Indian Civet	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/41710/summ">http://www.iucnredlist.org/search/details.php/41710/summ</a> )	
Plants	<i>Isachne globosa</i>	Swamp Millet	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/168638/summ">http://www.iucnredlist.org/search/details.php/168638/summ</a> )	
Plants	<i>Magnolia duperreana</i>		DD	 ( <a href="http://www.iucnredlist.org/search/details.php/191516/summ">http://www.iucnredlist.org/search/details.php/191516/summ</a> )	
Reptiles	<i>Acanthosaura lepidogaster</i>	Brown Pricklenape	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/170366/summ">http://www.iucnredlist.org/search/details.php/170366/summ</a> )	

Reptiles	<i>Ahaetulla prasina</i>	Gunther's Whip Snake	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/176329/summ">http://www.iucnredlist.org/search/details.php/176329/summ</a> )
Reptiles	<i>Amyda cartilaginea</i>	Asiatic Softshell Turtle	VU	 ( <a href="http://www.iucnredlist.org/search/details.php/1181/summ">http://www.iucnredlist.org/search/details.php/1181/summ</a> )
Reptiles	<i>Bungarus candidus</i>	Malayan Krait	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/192238/summ">http://www.iucnredlist.org/search/details.php/192238/summ</a> )
Reptiles	<i>Calamaria pavementata</i>	Brown Reed Snake	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/192211/summ">http://www.iucnredlist.org/search/details.php/192211/summ</a> )
Reptiles	<i>Calliophis maculiceps</i>	Speckled Coral Snake	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/192226/summ">http://www.iucnredlist.org/search/details.php/192226/summ</a> )
Reptiles	<i>Crocodylus porosus</i>	Salt-water Crocodile	LR/lc	 ( <a href="http://www.iucnredlist.org/search/details.php/5668/summ">http://www.iucnredlist.org/search/details.php/5668/summ</a> )
Reptiles	<i>Crocodylus siamensis</i>	Siamese Crocodile	CR	 ( <a href="http://www.iucnredlist.org/search/details.php/5671/summ">http://www.iucnredlist.org/search/details.php/5671/summ</a> )
Reptiles	<i>Cryptelytrops albolabris</i>	White-lipped Tree Viper	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/178433/summ">http://www.iucnredlist.org/search/details.php/178433/summ</a> )
Reptiles	<i>Cuora amboinensis</i>	Southeast Asian Box Turtle	VU	 ( <a href="http://www.iucnredlist.org/search/details.php/5958/summ">http://www.iucnredlist.org/search/details.php/5958/summ</a> )
Reptiles	<i>Cylindrophis ruffus</i>	Common Pipe Snake	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/192080/summ">http://www.iucnredlist.org/search/details.php/192080/summ</a> )
Reptiles	<i>Dasia olivacea</i>	Olive Dasia	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/178252/summ">http://www.iucnredlist.org/search/details.php/178252/summ</a> )
Reptiles	<i>Dendrelaphis subocularis</i>	Mountain Bronzeback Tree Snake	LC	 ( <a href="http://www.iucnredlist.org/search/details.php/191970/summ">http://www.iucnredlist.org/search/details.php/191970/summ</a> )

**Proximity report generated by the  
Integrated Biodiversity Assessment Tool**

Site name	Site 5
Latitude/Longitude	11° 43' 39" North, 104° 24' 21" East
Date generated	26th June 2017
Generated by	asiandb
Company	ADB

## About this report

This report presents the results of a proximity analysis to identify the biodiversity features and species which are located within 1 km, 10 km and 20 km.

## Data used to generate this report

IUCN and UNEP-WCMC, 2017. *The World Database on Protected Areas (WDPA) [On-line], January 2017.*

BirdLife International (on behalf of the KBA Partnership), 2016. *Key Biodiversity Areas: December 2016 version.*

IUCN, 2016. *The IUCN Red List of Threatened Species grid analysis of range maps. Version 2016.3 (December).*

## Limitations

This report provides an indication of the potential biodiversity-related features - protected areas, key biodiversity areas and species - close to the specified location. It provides an early indication of potential biodiversity concerns, and can provide valuable guidance in making decisions. For example, this information can be helpful when assessing the potential environmental risk and impact of a site, categorising investments/projects, preparing the terms of reference for an impact assessment, focusing attention on key species of conservation concern and sites of known conservation value, and reviewing the results of an impact assessment.

The report does not provide details of potential indirect, downstream or cumulative impacts. Furthermore, the report should be regarded as a “ first-step”, providing a set of conservation values sourced from global data sets, and is not a substitute for further investigation and due diligence, especially concerning national and/or local conservation priorities.

For ultimate accuracy, distance calculations are performed by reprojecting the spatial data (as shown through the map viewer) to an equal distance projection, and so may not match precisely the results shown on the map.

## Protected Areas and Key Biodiversity Areas

The following sites are found within the selected buffer distances:

### Features within 1 km

There are no features within 1 km.

### Features within 10 km

There are no features within 10 km.

### Features within 20 km

There are no features within 20 km.

## IUCN RED LIST OF THREATENED SPECIES

Given suitable habitat, the following species are potentially found close to the area of interest:

Taxonomic group	Scientific Name	Common Name	IUCN Red List category
Amphibians	<i>Chiromantis nongkhorensis</i>		LC
Amphibians	<i>Duttaphrynus melanostictus</i>	Black-spectacled Toad	LC
Amphibians	<i>Feihyla vittata</i>	Striped Asian Treefrog	LC
Amphibians	<i>Fejervarya limnocharis</i>	Asian Grass Frog	LC
Amphibians	<i>Glyphoglossus guttulatus</i>	Burmese Squat Frog	LC
Amphibians	<i>Hoplobatrachus rugulosus</i>	East Asian Bullfrog	LC
Amphibians	<i>Hylarana erythraea</i>	Common Green Frog	LC
Amphibians	<i>Hylarana macrodactyla</i>		LC
Amphibians	<i>Hylarana taipehensis</i>		LC
Amphibians	<i>Ichthyophis kohtaoensis</i>	Koa Tao Island Caecilian	LC
Amphibians	<i>Ingerophrynus macrotis</i>		LC
Amphibians	<i>Kalophrynus interlineatus</i>		LC
Amphibians	<i>Kaloula pulchra</i>	Malaysian Narrowmouth Toad	LC
Amphibians	<i>Limnonectes gyldenstolpei</i>	Gyldenstolpe's Frog	LC
Amphibians	<i>Microhyla berdmorei</i>	Berdmore's Narrow-mouthed Frog	LC
Amphibians	<i>Microhyla butleri</i>	Tubercled Pygmy Frog	LC
Amphibians	<i>Microhyla fissipes</i>		LC
Amphibians	<i>Microhyla heymonsi</i>	Arcuate-spotted Pygmy Frog	LC
Amphibians	<i>Microhyla pulchra</i>	Beautiful Pygmy Frog	LC
Amphibians	<i>Micryletta inornata</i>	Deli Paddy Frog	LC
Amphibians	<i>Occidozyga lima</i>	Pointed-tongued Floating Frog	LC
Amphibians	<i>Occidozyga martensii</i>	Round-tongued Floating Frog	LC
Amphibians	<i>Polypedates leucomystax</i>	White-lipped Tree Frog	LC
Amphibians	<i>Sylvirana mortenseni</i>		NT
Amphibians	<i>Sylvirana nigrovittata</i>		LC
Amphibians	<i>Theloderma stellatum</i>		LC
Birds	<i>Accipiter badius</i>	Shikra	LC
Birds	<i>Accipiter gularis</i>	Japanese Sparrowhawk	LC
Birds	<i>Accipiter trivirgatus</i>	Crested Goshawk	LC
Birds	<i>Acridotheres grandis</i>	Great Myna	LC
Birds	<i>Acridotheres leucocephalus</i>	Vinous-breasted Myna	LC
Birds	<i>Acridotheres tristis</i>	Common Myna	LC
Birds	<i>Acrocephalus arundinaceus</i>	Great Reed-warbler	LC
Birds	<i>Acrocephalus bistrigiceps</i>	Black-browed Reed-warbler	LC
Birds	<i>Acrocephalus orientalis</i>	Oriental Reed-warbler	LC
Birds	<i>Acrocephalus tangorum</i>	White-browed Reed-warbler	VU
Birds	<i>Actitis hypoleucos</i>	Common Sandpiper	LC

Birds	<i>Aegithina lafresnayei</i>	Great lora	LC
Birds	<i>Aegithina tiphia</i>	Common lora	LC
Birds	<i>Aethopyga saturata</i>	Black-throated Sunbird	LC
Birds	<i>Aethopyga siparaja</i>	Crimson Sunbird	LC
Birds	<i>Agropsar sturninus</i>	Purple-backed Starling	LC
Birds	<i>Alauda gulgula</i>	Oriental Skylark	LC
Birds	<i>Alcedo atthis</i>	Common Kingfisher	LC
Birds	<i>Alcedo meninting</i>	Blue-eared Kingfisher	LC
Birds	<i>Alophoixus ochraceus</i>	Ochraceous Bulbul	LC
Birds	<i>Alophoixus pallidus</i>	Puff-throated Bulbul	LC
Birds	<i>Amandava amandava</i>	Red Avadavat	LC
Birds	<i>Amaurornis cinerea</i>	White-browed Crane	LC
Birds	<i>Amaurornis phoenicurus</i>	White-breasted Waterhen	LC
Birds	<i>Ampeliceps coronatus</i>	Golden-crested Myna	LC
Birds	<i>Anas crecca</i>	Common Teal	LC
Birds	<i>Anas poecilorhyncha</i>	Indian Spot-billed Duck	LC
Birds	<i>Anastomus oscitans</i>	Asian Openbill	LC
Birds	<i>Anhinga melanogaster</i>	Oriental Darter	NT
Birds	<i>Anthracoceros albirostris</i>	Oriental Pied Hornbill	LC
Birds	<i>Anthreptes malacensis</i>	Brown-throated Sunbird	LC
Birds	<i>Anthus cervinus</i>	Red-throated Pipit	LC
Birds	<i>Anthus hodgsoni</i>	Olive-backed Pipit	LC

Reptiles	<i>Takydromus sexlineatus</i>	Asian Grass Lizard	LC
Reptiles	<i>Typhlops diardii</i>	Indochinese Blindsnake	LC
Reptiles	<i>Typhlops muelleri</i>	Müller's Blind Snake	LC
Reptiles	<i>Typhlops siamensis</i>	Siamese Blind Snake	DD
Reptiles	<i>Varanus bengalensis</i>	Common Indian Monitor	LC
Reptiles	<i>Varanus salvator</i>	Common Water Monitor	LC
Reptiles	<i>Xenochrophis flavipunctatus</i>	Yellow-spotted Keelback Water Snake	LC
Reptiles	<i>Xenochrophis trianguligerus</i>	Red-sided Keelback Water Snake	LC
Reptiles	<i>Xenopeltis unicolor</i>	Asian Sunbeam Snake	LC

## About IBAT

The Integrated Biodiversity Assessment Tool (IBAT) provides key decision-makers with access to critical information on biodiversity priority sites to inform risk management and decision-making processes that address potential biodiversity impacts. Developed through a partnership of BirdLife International, Conservation International, International Union for Conservation of Nature (IUCN) and United Nations Environment Programme World Conservation Monitoring Centre (UNEP-WCMC), the vision of IBAT is that decisions affecting critical natural habitats are informed by the best scientific information and in turn decision makers will support the quest to collect and enhance the underlying datasets and maintain that scientific information.
