ADB’s Office of Public–Private Partnership (OPPP) was set up to increase bankable projects to catalyze private capital investment for sustainable development and economic growth in Asia and the Pacific.

Since 2014, OPPP has been providing support by establishing enabling environment, strengthening government capacity, and offering transaction advisory services to deliver bankable public–private partnership (PPP) projects.

How does OPPP support ADB’s developing member countries?

OPPP provides governments the analysis and support needed in developing workable, transparent, and effective policies as well as legal and regulatory frameworks that facilitate private sector investments in public sector projects, where governments, investors, and the public can benefit.

Our transaction advisory services (TAS) deliver bankable PPP projects, ensuring that value and affordability along with the right risk allocation are achieved through the structuring process, especially for new markets and new sectors.

Through our TAS, we can test the policies and provide feedback for further capacity development and enabling environment development.

Our team has a proven track record in supporting realistic policies, and legal, regulatory, and institutional frameworks to facilitate and manage PPP projects.

The goal of OPPP is to support faster, better, and cheaper sustainable development through expanded private sector participation. We do this by employing international standards of management and technological innovation and applying value-for-money analysis.

ADB has a full menu of sovereign and private sector lending investment and guarantee products to balance risks and catalyze private investment, as well as technical assistance and TAS to support the government.
One of OPPP's core services is the $73 million Asia Pacific Project Preparation Facility (AP3F). This is a multi-donor trust fund established by generous contributions from the governments of Australia, Canada, and Japan.

The use of funds aims to advance and elevate the quality of infrastructure development in Asia and the Pacific. This is managed by ADB’s PPP Thematic Group, which also offers support for enabling reforms and capacity building for our developing member countries.

For more information about AP3F activities and how to get AP3F assistance, click HERE.
The Public–Private Partnership Monitor (PPP Monitor) is an interactive platform that profiles the PPP enabling environment and PPP market maturity using over 500 qualitative and quantitative indicators. It is continuously being developed as a one-stop information hub on the PPP landscape for selected developing member countries of ADB.

Launched in 2017, the PPP Monitor has since expanded and now includes insights on transport, energy, and municipal and social sectors, covering health, education, and housing. Access the PPP Monitor [HERE](#).

### CREATING INVESTABLE CITIES

Cities in Asia and the Pacific will play a central role—technical, managerial, and financial—in the global response to climate change.

Creating Investable Cities is a strategic initiative launched by ADB to help subnational governments build back better. Leveraging standardized tools and expertise from across the bank, the initiative is providing hands-on early-stage advisory and capacity building to city leadership for mainstreaming quality infrastructure and improving local revenue mobilization and creditworthiness, so that partner cities can efficiently mobilize public, private, and climate finance for their investment needs.
Major Milestones

Commercial closures:
• BAN Rampura-Amulia-Demra Expressway
• UZB Namangan Wastewater Treatment Plant
• TIM Dili Solid Waste Management

Commercial closures:
• PAL Solar IPP
• UZB Sherabad Solar
• UZB Tashkent District Heating

Commercial closures:
• PHI National I.D.
• CAM National Solar Park

Commercial closure:
• PHI New Clark City – Power Distribution

Published the first edition of Public-Private Partnership Monitor

Launched the Asia Pacific Project Preparation Facility (AP3F)

Established ADB’s Office of Public-Private Partnership

Launched PPP Monitor Online

Launched Creating Investable Cities Initiative
