"..." = data not available, 0 or 0.0 = magnitude is less than half of unit employed, GDP = gross domestic product, kWh = kilowatt-hour, PPP = purchasing power parity.

a Based on the new methodology recommended by the Tendulkar Committee.

b Data is based on consumption and combines the urban and rural distributions, weighted by share of urban and rural population to total population.

c Derived from the consumption share of the highest quintile to lowest quintile.

d Estimates are based on data officially reported to World Health Organization (WHO) and the United Nations Children's Fund (UNICEF) by member economies and data reported in publications on health surveys.

e Estimates are based on household survey data.

f Estimated using data from Global Health Workforce Statistics (WHO) and population from World Population Prospects: The 2012 Revision.

g Data refer to central government.

h Measured as the ratio of female gross enrollment ratio to male gross enrollment ratio.

i Measured as the ratio of female labor force participation rate to male labor force participation rate.

j Presented in standard normal units of the governance indicator, ranging from −2.5 to 2.5 with higher values corresponding to better governance outcomes.
